CUSTOM DESIGNED MODULES & SUB-ASSEMBLIES

DDC designs modules and sub-assemblies tailored to particular requirements. A natural outgrowth of our capabilities has been the development of data conversion modules and special purpose assemblies to accomplish specific functions.

We have supplied hundreds of special devices, including units for use in sophisticated electronics systems on A7A, Mark II, P3C, AAFSS, C5A and other programs.

DDC's staff and facilities are geared to build modules and sub-assemblies to satisfy unique customer requirements.

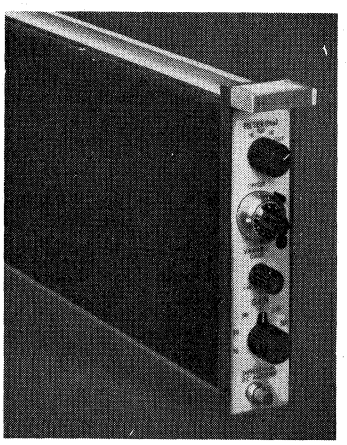
Dynamics Instrumentation

DIFFERENTIAL AMPLIFIERS

Universal Buffer DIFFERENTIAL DC AMPLIFIER Model 7504

DC to 100 kHz. Gains from 0.1 to 33. Source Impedance — 100 k-ohms. Output — 10 V, 100 mA. FET input circuit eliminates zero errors from pump-out current flowing in signal source. Tolerates floating sources, long input cables. Typical applications include buffering single-ended amplifiers for ground isolation, driving galvanometers, long lines, and tape recorder preamplification. Gain accuracy: ±0.1%. Size: 5¼"H. From $235.00*



High Gain — Solid State DIFFERENTIAL DC AMPLIFIER Model 7514 Two Sizes — Eighteen Options

Model 7514 Differential DC Amplifiers are highly suited for many applications in instrumentation systems. Advanced multiple-feedback design rejects common-mode signals, and provides excellent input-to-output isolation. Operation from floating sources is permissible. Low pump-out current is maintained over a wide temperature range, permitting low drift operation from high source impedances.

Model 7514 is available in two sizes — 5¼" high and 7" high — with single or dual outputs and may be mounted 10 channels to standard 19" RETMA rack mounts. Optional features include gain step sequences of 10, 20, 50 . . . 1000 or 10, 30, 100 . . . 1000, lower gains (0.1-1000) 0.01% gain step accuracy, variable or fixed current limiting, offset control and 5 or 7 position low-pass filters.

Basic specifications: Gain accuracy, ±0.1%; CM level, ±20 V; CMR at gain 1000, 120 dB with up to 1000 ohms unbalance from dc to 60 Hz; Output Capability, ±10 V at ±100 mA, frequency response dc to 75 kHz.

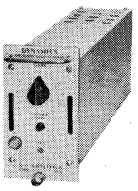
Model 7514 from $405.00*

300 Volt Common-mode Level DIFFERENTIAL DC AMPLIFIER Model 6050/PD and 6122/PD

These instruments operate from floating sources and permit the use of long input and output cables. Applications include conditions where high common-mode signals are encountered. Dual outputs 10V at 100 mA; Frequency Response DC to 10 KC, fast overload recovery, gains from 1.0 to 3300, Low Drift, Low Noise and .01% Linearity. Other models available with filters and wider bandwidth.

Price: Model 6050/PD $775.00
Price: Model 6122/PD $810.00

Megahertz DIFFERENTIAL DC AMPLIFIER Model 7575



Five variations permit gains from 0.2 to 1250. Typical specifications include DC to 1 MHz Bandwidth; Common-Mode Level ±50 V dc or peak ac; Slewing Rate: 50 V/μs; FS Output: ±10 V, ±100 mA. Applications include wideband data links, accurate video buffer amplifier, direct reference recording, and applied research in turbulence, blast or shock studies.

From $835.00*

DC AMPLIFIERS GALVO DRIVERS

GALVO DRIVER, D.C. AMPLIFIER Model 7202

The 7202 is ideally suited for driving galvanometers. DC to 35 KHz, gains 0.1-330, Input Impedance 100 K-ohms, Output 10V, 100 ma. Options include variable offset, current limiting, filtering, output pad networks and output reversal switch.

From $195.00*

DIFFERENTIAL CHARGE AMPLIFIERS

ISOLATED CHARGE AMPLIFIER Model 7306

Model 7306 Charge Amplifier is an all solid-state wideband instrument suitable for use with piezoelectric transducers. Input, output isolation is provided eliminating ground loop problems.

Automatic gain switching is available with this series of charge amplifier. One option provides the capability to automatically switch up or down one 10 DB step from a switch selected center position. Another option provides fully automatic gain ranging from 1 G to 1000 G full scale in seven 10 DB steps. Calibration provisions are available to test the input cable, transducer condition and amplifier gain. Programable calibration is available for systems application.

From $750.00*

ANALOG TO DIGITAL CONVERTERS

ANALOG-TO-DIGITAL CONVERTER, Model 6539

The Dynamics Model 6539 Analog-to-Digital Converter is a high-speed, isolating, differential instrument. It achieves a 0.01% accuracy at word rates of 31,200 wps, using successive approximation techniques. The accuracy and high word rate are realizable during system operation because of the excellent input signal isolation.

Optional features include sample and hold, up to 28 volt output logic levels, and variations in output codes. Standard instruments with varying word lengths in binary or BCD output coded are available.

Reliability is obtained through extensive use of integrated circuits. Accuracy is realized through the use of state-of-the-art resistors that are specially wound and encapsulated for the ultimate in low-temperature coefficients. The internal reference voltage is derived from a temperature controlled Zener diode. From $3,250.00*

Triple Mode DIFFERENTIAL AMPLIFIER Model 7350

This unit combines all the features of a differential dc amplifier, charge amplifier and ac amplifier in one compact plug-in module.

Model 7350, is an all purpose instrument amplifier designed to work from a wide variety of signal sources such as strain gauges, thermocouples and piezoelectric transducers.

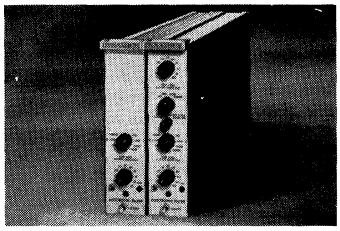
Wide Dynamic Range, 60 dB; ±20 V Common-Mode Operating Level; Isolated Charge Calibration Circuitry; Low-Level AC Measurements with long input cables and fully isolated input/output circuitry.

Front panel controls are arranged to read directly in full-scale input units required to produce a 1.0 volt, full-scale output signal. A seven position switch covers a range of 1 to 1000 in 10 dB steps and represents either full-scale millivolts for the ac and dc modes or full-scale "g" for the charge mode. A direct reading sensitivity control multiplies the step switch setting for the ac and dc modes or reads pC/g for the charge modes. A second direct reading dial is included to vary full-scale output over the range of 0 to 1.0 volt. Selection of the three operating modes is also accomplished by a front panel switch.

Optional features which can be supplied in the standard package configuration include active 2-pole filters at the output, power supplies for bridge excitation and full-scale offset controls for galvo positioning. Custom built packages can be supplied with automatic gain switching (up or down one 10 dB step as a function of peak signal level), average reading or peak holding meters or other special functions or controls.

From $780.00*

ELECTRONIC FILTERS



Variable, Direct-Coupled
ELECTRONIC FILTERS
Models 6364 and 6371

Low-pass/ High-pass/Bandpass/Band Reject
Variable through Four Decades
Direct-Coupled Low-pass Cutoff, from
1 Hz to 1 MHz
Sixth-order Butterworth/Linear Phase
in One Package

Dynamics' new Model 6364 and 6371 series of Electronic Filters are variable direct-coupled active filters with Butterworth and Linear Phase characteristics. Terminal slope on each skirt is 36 dB per octave. Cutoff frequencies can be selected over four decades in 0.1 decade steps. Model 6371 is a low-pass instrument only. Model 6364 has both low and high-pass circuits with switching provisions providing bandpass and band reject capabilities as well. Low-pass or high-pass filtering can be independently switched out.
Both Models 6364 and 6371 are available in two frequency ranges. Low frequency units cover four decades from 1 Hz to 10 kHz. High frequency units cover four decades from 100 Hz to 1 MHz. Versatile packaging enables these filters to be mounted in single, dual, or eight-channel rackmount configurations. A portable bench-mount is also available. From $800.00*

DIGITAL ISOLATION SWITCHES

500 ns Response
DIGITAL ISOLATION SWITCH
Model 601

The Model 601 Digital Isolation Switch is an isolating digital circuit with 500 nanosecond response, capable of transmitting dc logic levels. Eight models provide all combinations of inversion, translation and bipolar operation. The dimensions, 0.4" x 1⅛" x 1½", make it suitable for mounting on printed circuit cards. Proper operation requires power be supplied separately on both input and output sides.

The Isolation Switch is the equivalent of a nanosecond relay with very small reactive coupling between the drive circuit and the switch closure. It is transformer-coupled, but effective at dc. Excellent common-mode rejection capability is provided. Noise on the input logic line does not appear in the output logic line. Fan-out capability is adequate to drive many circuits or match to a transmission line.

High Speed
DIGITAL ISOLATION SWITCH
Model 602

The Model 602, Hi Speed, Digital Isolation Switch provides an isolating interface for digital logic signals with 100 nanosecond response. Input-to-Output Isolation prevents signal contamination in interface processes by eliminating ground loops. Input has variable threshold Schmitt trigger characteristics. Output is fully floating — power is carrier-derived from the input side and is sufficient to provide a dc to 3 MHz response. A single 602 can be used to provide signal inversion, translation, compression or expansion as required, with simple external adjustments.

Compact size, 2" x 2½" x ¾", makes the 602 Digital Isolation Switch ideally suitable for mounting on printed circuit cards, offering greater systems design flexibility. Connector pins are located on 0.4" centers and are "keyed" to eliminate possible plug-in errors. The unit weighs less than two ounces.
Price: $39.00 to $135.00*

HYBRID MICROELECTRONIC SYSTEMS

MULTITECH MICROELECTRONICS offers:

- Advanced custom circuit design utilizing hybrid techniques.
- Optimized military and commercial system mechanizations utilizing hybrid circuits.
- 45 day delivery for prototype hybrid circuits.
- 30 day 1st article delivery for build-to-print hybrid circuits.
- Both **thick** and **thin** film processes, depending on the application.
- Both standard and custom packages, including flat packs and stacked TO-5 and TO-8 configurations.
- Microelectronic design consulting.
- Microelectronic process equipment, including pull-testers and large array automatic test equipments.
- Large production facilities.
- Knowledgeable and objective system circuit and packaging analysis which may or may not utilize hybrid mechanizations.
- ". . . and because complex hybrids are not components but subsystems, only a system oriented company can best apply the theory of hybrid microelectronics — we are that company."

DATA/COM SYSTEMS

Data Transmission with
Multitech Data Products
DATA/COM Equipment

The bulk of data transmission problems can be conveniently grouped in accordance with several characteristics:

Transmission Method Tone Keying — Acoustic Coupled / Wired. Teletype Keying (Loop Keying). Frequency Shift Keying (FSK) — Acoustic Coupled / Wired. Phase Shift Keying (PSK). **Conversion Requirements** Serial-Parallel / Parallel-Serial / Encoding / Decoding / Format. **Error Control Requirements** Conventional Parity Checks / Self-Parity Techniques / Signal Regeneration / Retransmission Control. **Special Addresses & Messages** Special Word Generators / Variable Address Answerback / "Stunt Boxes" (Function response to selected characters or words). **Switching Requirements** Many Lines to One User / Many Users to One Line / Traffic Net Among Many Users. **Electronic:** High switching speed, high reliability and flexibility. **Stepping Switch;** Electronically Controlled: Low cost, high reliability, high crosspoint density, relatively low switching speed. **Word Generators** Many communications require a header message to precede the message text. If the message header is dependent on the type of message, these word generators can ensure reliable transmission of a message header, in accordance with a preselected, settable code. **Variable Address Decoders** Occasionally messages are routed to coded addresses and the addresses are message dependent. The variable address decoder allows a data terminal to receive only those messages routed by the variable address decoder. **Data Converters** Data characteristics must be altered in many systems. The alteration may be logical and/or electrical. Data converters provide electrical and logical alteration. Data keyers are used for serial data transmission in teletypewriter loops, and for isolation of signals from one loop system to another. Most computers, printers, card readers provide parallel by character or word data transmission. Teletypewriters receive and send bits serially. The data converter will convert parallel data to serial data format and serial data to parallel data format. The DATA/COM Converters are efficient in assembling and disassembling characters.

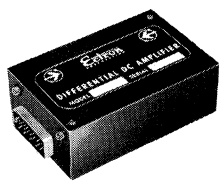
FLIGHT TEST INSTRUMENTATION
DIFFERENTIAL DC AMPLIFIERS
ISOLATION AMPLIFIERS
TRANSDUCER SIGNAL CONDITIONING
DATA ACQUISITION SYSTEMS

Ectron has developed advanced instrumentation for high accuracy signal conditioning despite environmental extremes. To produce precise data in typical airborne environments, Ectron amplifiers feature low dc drift, high common mode rejection and a true differential input completely isolated from output, power and case. Rugged cordwood construction, conservative design, and rigorous testing assure high reliability.



MODEL A444-12 MINIATURE INSTRUMENTATION AMPLIFIER

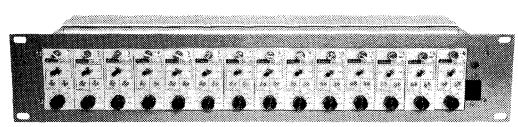
Combining a precision differential dc amplifier with an integral strain gage power supply, the A444-12 provides outstanding performance in a size only .85″ x 1.4″ x 2.0″. DC drift is only 0.5 microvolts/°C, common mode rejection is 120db at 60 Hz and linearity is 0.05%. Input to the amplifier is completely isolated (typically 10,000 megohms) and can be floated to 100 volts.

A414 SERIES INSTRUMENTATION AMPLIFIERS

Designed for flight test and other severe environment applications, the A414 Series offers a variety of differential dc amplifiers with signal conditioning to suit a wide range of instrumentation needs. Operating environment includes temperature from −55° to +100°C, vibration to 100 g and shock to 1000 g. Electrical performance offers gain ranges to 20,000, common mode rejection to 140db and drift to 0.5 microvolts/°C. Conditioning for strain gage, thermocouple and RT transducers is available.

A418 SERIES SIGNAL CONDITIONERS

These models offer the versatility of laboratory type amplifiers combined with ruggedness and miniature size suitable for vehicle and portable equipment uses. Features include front panel controls for gain and zero, integral transducer conditioning and rugged construction.



SPECIAL CONDITIONERS, DATA SYSTEMS

Ectron offers a variety of signal conditioners, microvolt level dc amplifiers and dc to dc isolators for specialized applications. Also available are data acquisition systems to meet exacting requirements from laboratory to missile environments. Consult your local engineering representative or contact Ectron for detailed information.

SOLID-STATE FUNCTIONAL MODULES

Hybrid Systems specializes in epoxy encapsulated functional modules for use by system and instrument designers. These high performance, versatile, low cost units embody performance heretofore unavailable or confined to expensive and inconvenient rack mounted equipment.

Hybrid Systems' functional modules are powered from ±15 volt power supplies and feature voltage swings and driving capability which are compatible with operational amplifiers, standard digital IC logic, as well as all other Hybrid Systems' units.

These modular system components are high quality units incorporating the most advanced analog & hybrid analog/digital circuitry. In many cases analog and digital techniques are internally combined in a proprietary manner so as to produce performance advantages over either approach alone.

In addition to the off-the-shelf units described in the Hybrid Systems Catalog, modified versions and complete customized circuits tailored to meet specific requirements are offered. Quantity & OEM Discounts are available.

SERIES 100 ANALOG MULTIPLIERS

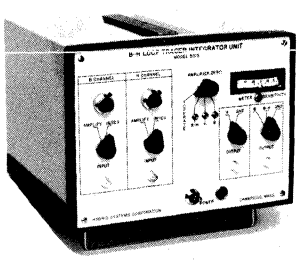
Hybrid Systems' line of analog multipliers includes models offering bandwidths to 10 megacycles and accuracies up to ±0.1%. Most units are extremely versatile and are capable of operation as a multiplier (XY/10), a divider (10X/Y), a squarer ($X^2/10$), or a square-rooter ($\sqrt{10X}$), without requiring any external amplifiers or reference supplies. These multipliers operate in all four quadrants with a full ±10 volts dynamic range in both inputs. No external balance, gain, trim, or adjustments are required.

SERIES 200 REFERENCE SUPPLIES

These units produce stable accurate 10.000 volt references capable of driving loads up to 150 mA without requiring any external buffer amplifiers or adjustments. The units are epoxy modules and are powered from conventional ±15 volt power supplies; thus insuring compatibility with operational amplifier circuits. An optional remote sensing feature is available at no additional cost.

SERIES 600 MODULAR COUNTERS

These solid-state Counters are primarily intended for use in conjunction with other Hybrid Systems' modular components for producing such functions as ramp or stairstep generators, long-term integrators, etc. Unidirectional (up only) and bidirectional (up-down) units are available in both natural binary and BCD. The bidirectional counters utilize a sign bit plus magnitude code. These modular counters are packaged with 3 decades (BCD versions) or 12 bits (natural binary) in each module with cascade capability. Every unit is electronically resettable to zero and have gated inputs.



SERIES 300 MULTIPLYING D TO A CONVERTERS

These Multiplying Digital-to-Analog Converters (MDAC) produce an output voltage which is proportional to the mathematical product of the applied analog reference and the digital input. If a constant reference is employed, conventional D to A conversion is accomplished. Inasmuch as these units feature the ability to accept a completely varying bipolar reference, the use of an analog signal as the reference results in hybrid multiplication (analog x digital = analog). Standard models exist for either binary or BCD coding with accuracies up to ±.025%. The units are epoxy encapsulated modules and are powered from ±15 volts.

SERIES 400 VOLTAGE-TO-FREQUENCY CONVERTERS

This Series of V to F Converters produces a train of square waves whose repetition rate is directly proportional to the magnitude of the input voltage. Zero input voltage yields zero output frequency. A variety of full scale output frequencies are available. Units which accept bipolar input voltages and, in addition to the appropriate output frequency, produce a "sign bit" for polarity display, reversing counters, logical operations, etc., are included in this Series. Accuracies are better than ±0.1%. All models generate square wave outputs which are DTL and TTL compatible. These units are epoxy encapsulated modules and are powered from ±15 volts.

SERIES 500 ELECTRONIC SWITCHES

Hybrid Systems' line of Electronic Switches are all solid-state devices. This Series includes Analog Multiplexers, Integrator Reset Switches, ±1 Unity Gain devices, etc. All units operate from ±15 volt power supplies.

SERIES 900 PHASE SENSITIVE DEMODULATORS

These units convert phase sensitive suppressed carrier AC signals to a linearly proportional bipolar DC voltage. High accuracy, linearity, and gain and null stability are featured. Output impedance of all units is less than 1Ω.

SERIES 700 SAMPLE-INFINITE HOLDS

Hybrid Systems' Sample-Infinite Holds are similar in operation to conventional sample-holds, but offer the additional unique feature of no droop (decay) of the stored value in the "Hold" mode. Hence, the term "Infinite Hold." Specifically, the units will, upon command, sample the input analog voltage and indefinitely hold that value until commanded to sample again. Hybrid analog/digital techniques are employed to produce the no droop feature.

SERIES 800 PEAK DETECTORS

These units continuously monitor an input analog voltage and automatically store the peak value attained by this signal. The hybrid analog/digital techniques utilized in these units produce the unique feature of no decay (droop) of the stored peak value, regardless of the duration of the holding period. Upon command, the circuit is reset to zero volts and re-commences monitoring the analog input.

SERIES 1000 SYNCHRO CONVERTERS

Included in this Series are solid-state Synchro-to-DC, Synchro-to-Sin ϕ and Cos ϕ, Synchro-to-Digital, and Digital-to-Synchro converters. Both 3 wire synchro and 4 wire resolver input units are available.

OTHER PRODUCTS INCLUDE

SOLID-STATE FUNCTIONAL MODULES

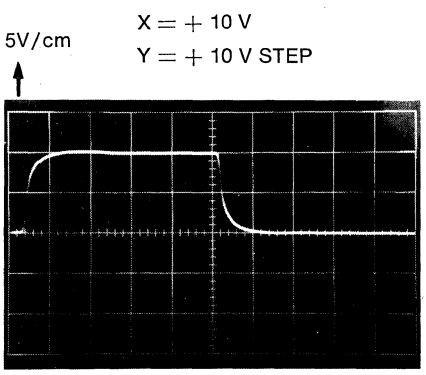
NEW MODEL 105 WIDEBAND (DC TO 10 MEGAHERTZ) MULTIPLIER

SPECIFICATIONS	
Bandwidth (—3db)	DC to 10 MHz
Slewing Rate	250 V/μsec.
Outputs	+XY/10 and —XY/10
Input Voltage Range	±10 volts.
Output Range	±10 volts at ±10 mA.
Accuracy	±1% of F.S.
Power Supply	±15 V
Price (1-9)	$295

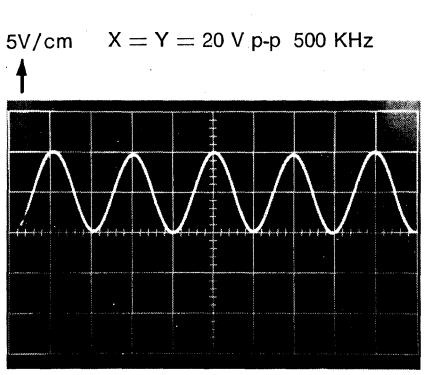
Hybrid Systems' Model 105 offers unmatched analog multiplier performance — full ± 10 volt four quadrant operation with wide bandwidth and high slewing rate. The excellent transient response of this unit makes possible a wide range of real-time signal processing heretofore impractical with existing limited bandwidth devices. The Model 105, unlike "quarter-square" devices, produces a minimum of unwanted harmonics; thus, also making it ideal for amplitude modulation applications in communications systems.

TYPICAL APPLICATIONS

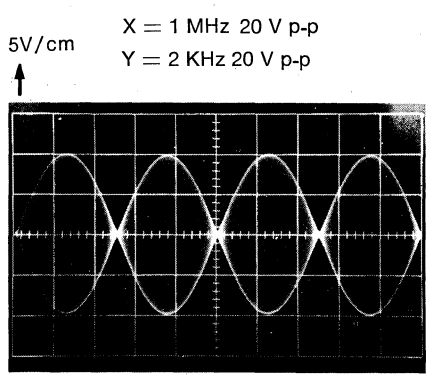
• CORRELATION • REAL-TIME RADAR & VIDEO SIGNAL PROCESSING
• SUPPRESSED CARRIER MODULATION • DISPLAY GENERATION



TRANSIENT RESPONSE



SQUARING AT 500 KHz



AMPLITUDE MODULATION

NARROW BAND MULTIPLIERS/DIVIDERS

• MULTIPLY • DIVIDE • SQUARE • SQUARE ROOT

Hybrid Systems' Series 100 Analog Multiplier/Dividers feature high accuracy & versatility at low cost. All Models are full ±10 volt four quadrant devices. Specified accuracy requires no external balance or gain trim adjustments and includes all sources of error (gain, linearity, offset, etc.) in the "worst case" combination. All units are capable of multiplication, division, squaring, and square-rooting without any traditional external amplifiers.

All units are 2.5" x 3.5" x .825".

MODEL	101	102	103	104
Max Error[1]	0.2%	0.2%	0.1%	0.1%

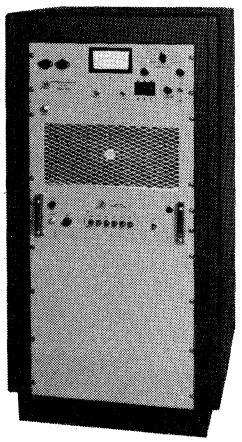
BROADBAND POWER AMPLIFIERS

(no tuning, no plug-in's, no bandswitching)

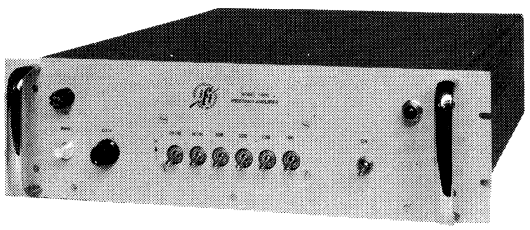


BANDPASS.....10 kHz to 220 MHz

POWER OUTPUT.....up to 400 watts continuous

POWER GAIN.....up to 64 db

The M404A shown at left is the most powerful and most versatile broadband amplifier on the market. Standard unit produces 200 to 400 watts continuous power output with minimum of 50-db power gain from 200 kHz to 220 MHz.



The M5000L is a low-cost broadband power amplifier capable of 5 to 10 watts continuous output with 30-db gain from 10 kHz to 220 MHz.

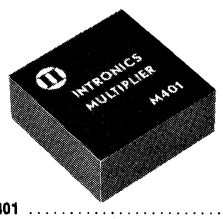
INTRONICS BLACK BOXES

provide a known cost and performance solution to system design problems

Intronics modules feature MIL quality construction and advanced solid state circuitry. Operation from ±15 volt supply voltages is standard, with ±10 volt input and output voltages. Modules are designed for compatible operation, minimizing interface problems. No customer furnished feedback networks, pots, or other adjustments are normally required. All units have short circuit proof outputs. −55°C to +125°C storage and −25°C to +85°C specified operation is standard, with −55°C to +125°C operation available for most models. Other options include operation from ±12 volt supply voltages.

MULTIPLY / DIVIDE / SQUARE / SQUARE ROOT

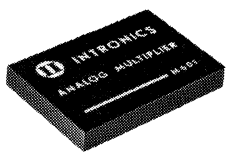
ECONOMY dc to 20 kHz



Transconductance multiplier featuring adjustable accuracy to better than 1%, temperature stability of 0.03%/°C, and small signal response to 125 kHz. Available in divider model D401.

M401 ..... **$95**

GENERAL PURPOSE dc to 100 kHz



Medium priced transconductance multiplier featuring small signal response to 500 kHz, 1% accuracy, and 0.02%/°C temperature stability. Higher accuracy model M602. Military versions M601-M, M602-M.

M601 ..... **$165**

WIDEBAND dc to 1 MHz

Transconductance multiplier with frequency response beyond 1 MHz, 1% accuracy, and 0.02%/°C temperature stability. Higher accuracy model M502. Military versions M501-M, M502-M.

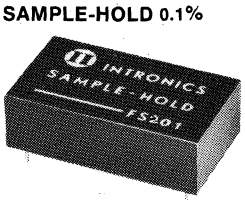
M501 ..... **$295**

PRECISION 0.1% accuracy

Pulse height-width type with best accuracy, linearity, and temperature stability. DC to 1 kHz. Other lower accuracy lower priced models M301, M302.

M303 ..... **$325**

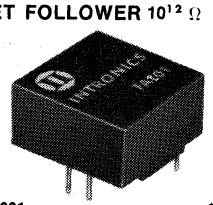
SAMPLE-HOLD 0.1%



Low priced unit featuring accuracy to 0.1%, 5 μs acquisition, 50 ns aperture, and provision for external holding capacitor.

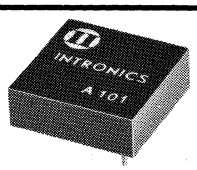
FS201 ..... **$95**

FET FOLLOWER $10^{12}\ \Omega$



High impedence voltage follower series featuring accuracies to 0.01%, input currents to 2 pA, and 100 kHz full output frequency.

FA201 ..... **$24.50**



OP AMPS priced from $13.50

Amplifiers having the following features:

- High input impedance
- High output current
- Fast slewing/wide bandwidth/fast settling time
- Low drift
- High gain

POWER SUPPLIES

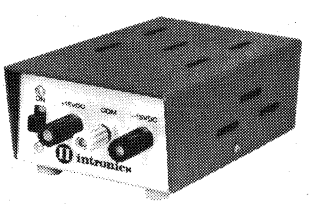
MODULAR

Complete regulated dual output power supply module, ±12, 15, 18, and 24 VDC at 60, 75, and 100 mA, 0.05% regulation, short circuit protected in encapsulated module.

Prices start at **$45**

BENCH TYPE

Dual output ±15 VDC power supplies in compact metal cases for bench use. Line and load regulation 0.1%. Output currents from 50 mA to 500 mA.



PS50 ..... **$59**

Other solid state function modules available for: precision voltage/current amplification, linear-log conversion, sin/cos generation, absolute value, A-D, D-A conversion, binary-BCD conversion, coordinate rotation and transformation subsystems.

Contact our applications engineering department to discuss your requirements.

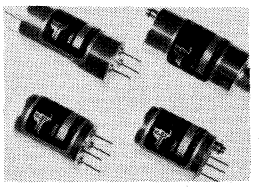
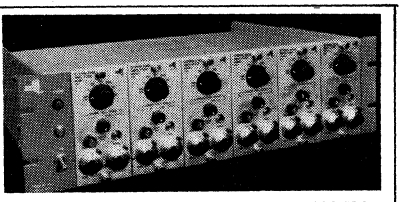
MODEL 450S2 PORTABLE CASE



MODEL 143/144 PREAMPLIFIERS



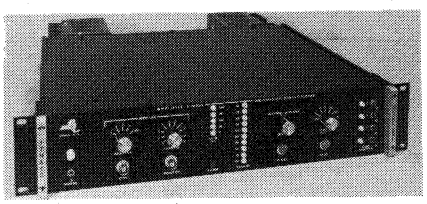
MODEL 241 DYNAMIC STRAIN GAGE AMPLIFIERS

ITHACO dynamic data acquisition amplifiers and preamplifiers generally operate in the 1Hz to 200KHz range, and are used in a wide variety of applications requiring:

- Shaping of frequency and phase response
- Voltage or charge inputs; single-ended or differential
- State-of-the-art noise performance at any impedance level
- Fully automatic (ITHACO's AUTO-GAIN® Amplifiers) computer oriented, data acquisition systems
- All products provide stable and precise gain; as low as −20 db and as high as 100 db

ITHACO manufactures high and low impedance, single-ended or differential, voltage or charge preamplifiers in various packages. The 250, 450 and 430 Series are general purpose amplifiers for dynamic data, available with a choice of electrical configurations — including single-ended or differential front ends. The 260 Series are charge amplifiers for shock and vibration measurements. The Model 241 is specifically designed for acquisition of dynamic strain data over a 60 KHz bandwidth.

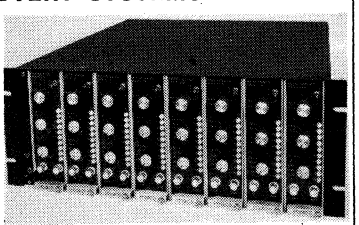
FULLY AUTOMATIC DYNAMIC DATA ACQUISITION AND RECOVERY SYSTEMS



MODEL 541
AMPLIFIER STATUS MULTIPLEXER-DEMULTIPLEXER

Automatic Gain Ranging, 32 Channel Status Recovery

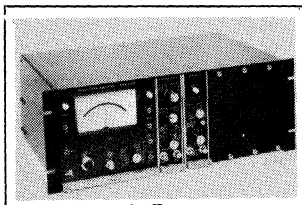
ITHACO's fully automatic data acquisition and recovery systems condition wide-dynamic range signals to amplitudes suitable for recording processing and display. They prevent loss of costly data due to operator error and manual response time. Model 441 Amplifiers automatically condition the amplitude of signals in the range of 1 Hz to 100 KHz to a level within the limited dynamic range of the tape recorder (or A/D converter, real-time analyzer, etc.). Gain is automatically switched in the precise steps as required to hold output signal amplitude in the range 0.2 to 1.0 volts. The Model 541 multiplexes the amplifier status signals and supplies the data processing equipment with amplifier status for each data channel.



MODEL 441 AUTO-GAIN® AMPLIFIERS

PHASE-LOCK (Lock-in) AMPLIFIERS

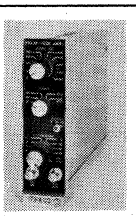
For Synchronous Detection of Noise Buried Periodic Signals



MODEL 353
PHASE-LOCK AMPLIFIER

Model 353 Phase-Lock Amplifier measures amplitude and phase of repetitive signals in the presence of high noise levels. The design of the 353 represents a significant departure from that of conventional lock-in amplifiers. Synchronization with an external reference signal is substantially automatic, and the instrument will track this reference signal over a 10:1 frequency range without affecting accuracy or phase calibration. Set-up time is minimum and no frequency tuning is required. The instrument will accommodate peak to peak coherent signals or noise of 1000 times the full scale signal setting without saturating. Modular in construction, the 353 can be adapted to a wide variety of specialized applications. Standard sensitivity of 1 microvolt can be increased to 10 nanovolts with remote preamplifiers in the 1Hz to 200KHz frequency range.

For multichannel applications, the Model 361 provides up to 7 synchronous demodulation channels in a single 19″ standard rack adapter.

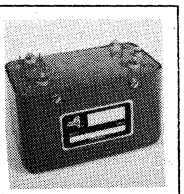


MODEL 361

LOGARITHMIC, VOLTAGE-CONTROLLED AMPLIFIERS

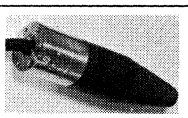
Logarithmic Conversion, Compression and AGC

The Models 314 and 316 are wideband AC amplifiers with true logarithmic gain control characteristics. Gain is controlled by a 0.5 volt DC control signal. The Model 316 is capable of slewing gain at rates of over one million db per second with no coupling of the control signal into the output. Bandwidths are from 2Hz to 100KHz. Control voltage vs. gain is accurate to within ±0.5db. The addition of an external feedback loop (detector and integrating op amp) permits logarithmic signal conversion, signal compression and automatic gain control.



MODEL 316
VOLTAGE-CONTROLLED AMPLIFIER

WIDEBAND, OMNIDIRECTIONAL, SENSITIVE HYDROPHONE

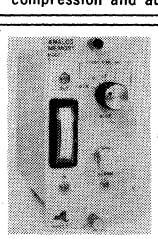


MODEL 601-1
WIDEBAND HYDROPHONE

30 Hz to 150KHz Response, Internal 20db Preamplifiers

The Model 601-1 is a sensitive, wideband, omnidirectional hydrophone incorporating a low noise ITHACO preamplifier within its molded structure to provide optimum noise performance. The midband sensitivity of the Model 601-1 is −69dbv/μbar at preamplifier output (−89db at amplifier input). Frequency response is ±3db from 30Hz to 100KHz with usable response to 150 KHz. Spectral noise, 1.0 Hz bandwidth, at preamplifier output is less than Sea State Zero at frequencies below 10KHz.

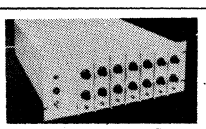
PEAK HOLDING ANALOG MEMORY



MODEL 511
ANALOG MEMORY

Stores and Displays Peak Amplitude of Varying Signals

The Model 511 Analog Memory is a dual purpose instrument providing either a long term memory of transient output signal voltages or an envelope-detected output for signals in the 4Hz to 5KHz range.



MODEL 6061-48 DISTRIBUTION AMPLIFIER

MULTI-CHANNEL VIDEO DISTRIBUTION AMPLIFIER

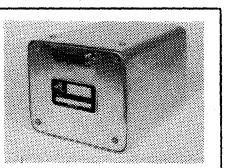
For Generation of Instrumentation Tape Recorder Copy Tapes

One input and 6 outputs per channel. Bandwidth is over 2MHz.

ULTRA-LOW NOISE SEISMIC AMPLIFIERS

Low Frequency Preamplifier Free of I/f Effects

The Model 1541 has a .001Hz to 100Hz basic frequency range. High/low pass plug-in filters are available at up to 24 db/octave rolloff. Gain is 60-100db.



MODEL 1541
ULTRA-LOW NOISE
SEISMIC AMPLIFIER

ITHACO LOW NOISE VOLTAGE PREAMPLIFIERS, CHARGE PREAMPLIFIERS, VELOCITY PREAMPLIFIERS AND SEISMIC PREAMPLIFIERS

ITHACO RACK-MOUNTED VOLTAGE, CHARGE, STRAIN GAGE AND VIBRATION AMPLIFIERS FOR DYNAMIC DATA ACQUISITION AND SIGNAL CONDITIONING

MODEL No.	DESCRIPTION	FREQUENCY RESPONSE —3 db Points	GAIN RANGE	GAIN COARSE	GAIN FINE	NOISE[2]	OUTPUT, RATED LOAD	MAX. LIN. INPUT	POWER SUPPLY AND MOUNTING
431	1 meg input Z, Selectable LF Rolloff	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]	—10 to +90db		1.0db steps (10db vernier available)	3μv rms			INDIVIDUAL ISOLATED ±15v DC POWER SUPPLY IN EACH CHANNEL. Primary Power 95v to 130v, 50Hz to 400Hz Model 430S1—rack adapter holds up to 8 channels, 7" high
432	500 meg input Z, General Purpose	1Hz to 100KHz				4μv rms			
433	500 meg input Z, Selectable LF Rolloff	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]				3μv rms			
434	1 meg input Z, Post Amplifier	1Hz to 100KHz				10μv rms			
435[5] 436[5]	20 meg Z differential input, 100db CMR	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3] 1Hz to 100KHz							
441[4] 442	Automatic gain ranging Post Amplifiers	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]	—10 to +80db		Special order only	3μv rms		5v rms sinewave	Similar to 430 Series. Uses 440S1 rack adapter
451	1 meg input Z, Selectable LF Rolloff	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]	—10 to +90db	10±0.1 db steps	1.0db steps (10db vernier available)		Output Z is 20 ohms dc coupled. Max. offset ±10mv. 5v rms sinewave output into 500 ohm load, 1v rms into 100 ohm load		COMMON ±15 VDC POWER SUPPLY FOR UP TO 7 CHANNELS, ±50 ma/channel Additional—55v for Models 455/456 Model 450S1—rack adapter holds up to 7 channels, 7" high Model 450S2—portable case holds 3 channels plus 450R power supply Models 450S1 and 450S2—takes plug-in power supplies: Model 450P1—AC type Model 450P2—AC type with preamp power Model 450R—Battery with charger Model 450P4—for Models 455/456
452	500 meg input Z, General Purpose	1Hz to 100KHz				4μv rms			
453	500 meg input Z, Selectable LF Rolloff	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]				3μv rms			
454	1 meg input Z, Post Amplifier	1Hz to 100KHz				10.0 μv rms			
455[5]	20 meg Z differential input, 100db CMR	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]							
456[5]		1Hz to 100KHz							
457[6]	Low-noise Vibration Post Amplifier for ITHACO Preamps	1Hz to 50KHz (±3% 5Hz to 20KHz)	.01 to 3000 g's or ips for 1v out		10-turn normalizing dial	.0001 pk g's .003 pk ips			
491[7]	4 meg input Z, Remote Control of Gain	LF 1, 10, 100, 1K, 10KHz HF 100KHz [3]	0 to +80db	20±0db steps in response to static BCD commands		3μv rms			Similar to 430 Series. Uses 490S1 rack adapter
241[8]	Dynamic Strain Gage Amplifier complete with Constant Current Source. Very High Gain.	0.5Hz to 60KHz (±3% 2Hz to 10KHz)	1 volt out for 10 to 30,000μ strain		2 normalizing dials set GF (1 to 4) and gage R (100 to 1000 ohm)	0.25μ strain rms w/120 ohm gage	Output Z is 100 ohms, 100μf. 5v pk output into a 10K load (full scale is 1v pk)	30,000 strain for 1v out	105 to 125v, 60-400 Hz Model 240T—6 channel rack adapter w/power, 5¼" high Model 240P A & B—one channel system
261[9] 262	Charge Amplifiers. Rack-mount and Portable Types	0.5Hz to 100KHz (±3% 2Hz to 20KHz)	5v out for 3 to 10,000 g using 1 to 10 pc/g accelerometer		10-turn dial sets accelerometer sensitivity, pc/g	10mv rms **at output** w/1000 pf at input	Output Z is 100 ohms series with 40μf (full scale output is 5v pk into 5K min.)	10,000 g w/1 to 10 pc/g accelerometer	105 to 125v, 60 to 400 Hz[9] Model 260T—6 channel rack adapter w/power, 5¼" high or Model 250R—portable case

MELCOR OPERATIONAL AMPLIFIERS

These versatile solid state modules are used in a wide range of applications for control instrumentation, computation, test equipment, medical instruments, data logging, etc. Melcor has developed and produced in large quantities, one of the broadest and most up-to-date product lines in the industry. These are available for OFF-THE-SHELF delivery. In addition, Melcor manufactures many customized modules to industry specifications.

MELCOR AUDIO AMPLIFIERS

A complete line of Microphone Preamplifiers, Mixers, Line Amplifiers, Equalizers, Compressors, Monitor Amplifiers, Channel Select Switching for Custom Audio Consoles. Modules feature ultra low noise and distortion, flat frequency response, output power to 16 watts on plug-in PC cards. Rack mounted power amplifiers to 100 watts output. Line Transformers, Power Supplies, Rack Mounting Frame and numerous accessory items available.

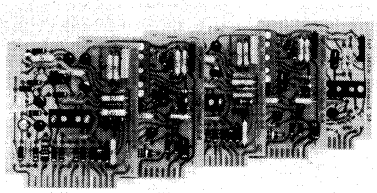
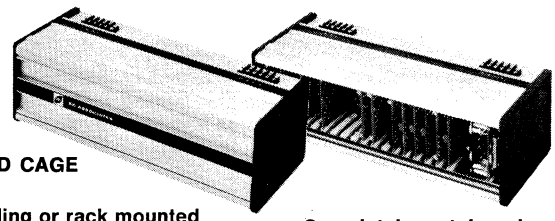
Analog Modules for Control Systems: 900 and 800 Series



Complete line of standard cards
Instant analog systems
Off-the-shelf delivery
Compatible power supplies available



CARD CAGE

Free standing or rack mounted
Rack mounting flanges available for standard 19-inch rack
Holds power supply and 17 boards or 20 boards alone

Completely metal enclosed
Excellent flexibility for connectors, switches, meters, etc.

Size	Price
5½" x 6½" x 18"	**$75.00**

900 Series / Precision modules for system accuracies of 0.01% to 0.1%

	901	905	933	950	955

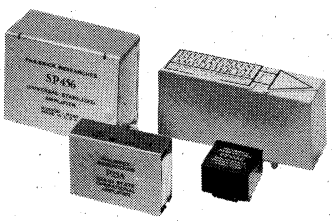
PHILBRICK/NEXUS: BEST SOURCE FOR YOUR

Philbrick/Nexus can fill your needs for anything analog from the industry's broadest range of analog products—ranging from simple operational amplifiers to the most sophisticated analog systems. Philbrick/Nexus' 26 years of combined experience offer you the advanced-technology of the pioneer and the vitality of a customer-oriented organization dedicated to producing the answers to any of your unsolved problems. For prompt, competent applications, engineering assistance or advice, call your local Philbrick/Nexus field-engineering representative or write, Philbrick/Nexus Research, Allied Drive at Route 128, Dedham, Massachusetts 02026.

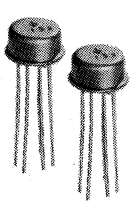
DISCRETE-COMPONENT OPERATIONAL AMPLIFIERS



High-gain, low-gain, low-drift amplifiers for stable feedback loops. Provide precise, predictable operations on one or more input signals. The solid state line includes general purpose, high performance and military grades of differential amplifiers, matching chopper stabilizers and output current boosters.

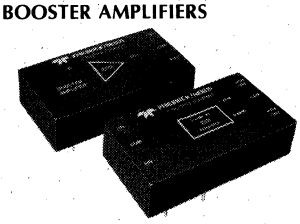
The solid state discrete component amplifiers employ all silicon semiconductors and are available in a wide variety of economy or premium grades ranging from economical general purpose types such as PF55AU and SQ10A to the most sophisticated designs such as the high speed chopper-stabilized SP456 and the parametric P2A. They come in plug-in or wire-in models in every style of package.

IC OPERATIONAL AMPLIFIERS



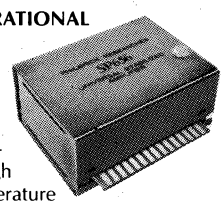
Monolithic devices offer the promise of high performance, reliability and small size at low cost. Philbrick/Nexus now offers state of the art IC op amps. Monolithics are available in two models. T-52's are packaged in TO-5 cans. S-52's come in dual in-line packages.

DC POWER SUPPLIES, REGULATORS AND BOOSTER AMPLIFIERS



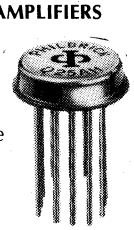
Compound-regulated, stable, noise-free power supplies designed to meet the needs of high-performance, low-level analog systems. The Philbrick/Nexus 2001 current booster with 500 Ma power is the only one of its kind in the industry. The 2101 is an encapsulated 100 Ma dual voltage regulator that is completely short-circuit protected. Rack, cabinet, modular, plug-in or built-in models available. NPS 300 is a dual voltage power supply for powering analog circuits.

LOW-ERROR OPERATIONAL AMPLIFIERS



Ideal where drift and offset must be held over long operating periods through wide ambient temperature fluctuations. Philbrick/Nexus offers 19 stock models offset-stabilized, mechanical chopper, parametrically modulated RD carrier, temperature-compensated, FET front-end. With a range so wide, there's a "low-error" model offering unusually high input impedance and low input current for virtually every design situation. The SP456 offers high-speed chopper stabilization.

HYBRID OPERATIONAL AMPLIFIERS



Philbrick/Nexus combines the best of monolithic and discrete technologies to create third generation op amps—the hybrids. They're microminiature and low cost, yet their overall performance is equal to or better than their discrete predecessors. And, built-in stabilization simplifies circuit design by eliminating external components.

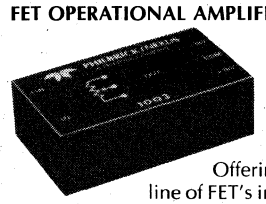
The 1402, for example, features a quiescent current drain of only 500 μA with a power supply voltage range of ±4V to ±24V, full output frequency of 80 KHz and output capability of ±14V at ±5mA with a ±15V power supply.

TO-8 packaging. Price: $75.00 each in lots of 1-9.

The Q25AH and Q85AH are Micro-Hybrids which combine linear monolithic chip and discrete microminiature component technologies to offer immunity to overloads, shorts and supply voltage stresses. They are available in TO-8 size cans.

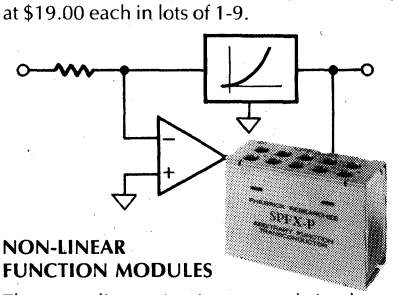
Other hybrids provide a 50μA power drain, bandwidth of 30 MHz, low cost differential FET output and FET with wideband, high reliability performance.

FET OPERATIONAL AMPLIFIERS



Offering the broadest line of FET's in the industry, Philbrick/Nexus can meet—and exceed—nearly every needed specification. Whether its lowest noise, lowest offset voltages, lowest input current, or highest CMRR . . . you'll find your needs here.

QFT-2B's, for example, offer the lowest offset voltage—5 μV/°C max. 1003's exhibit the highest CMRR you'll find anywhere—1,000,000:1. The industry's lowest priced FET operational amplifier is the QFT-5, selling at $19.00 each in lots of 1-9.

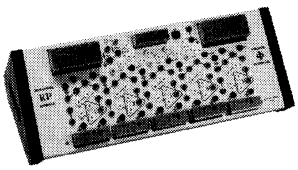


NON-LINEAR FUNCTION MODULES

These non-linear circuits accurately implement such operations as multiquadrant squaring, generating sine and cosine functions, quadratic or logarithmic response and the linearization of amplitude of non-linear transducers. They fall into two general classes: (1) natural continuous function types, based on the continuous-function characteristics inherent in certain semiconductors operated in specific parametric regions, and (2) precise-linear-approximation types, using diode-resistor networks proportioned to approximate the desired function by a series of straight lines. Scaled and biased for use in conjunction with ±10-volt operational amplifiers, they constitute a convenient and effective means for generation of exponential, transcendental, and high-order mathematical functions. All units are manufactured in two forms—"P" and "N"—one for each polarity of input signal.

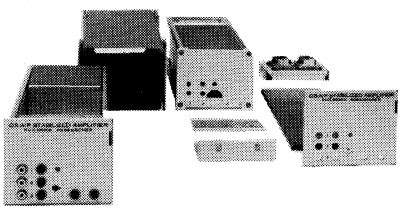
ANALOG NEEDS

MODEL RP OPERATIONAL MANIFOLDS

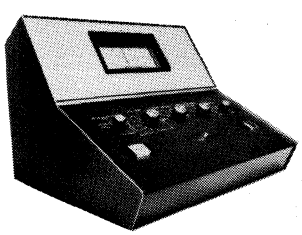


These 5-amplifier self-powered units are self-contained analog instruments for research, development, industrial control, simulation and teaching that virtually eliminate wiring problems. They are real whizzes as lab assistants. They are also excellent for breadboarding. Complex problems can be breadboarded in a fraction of the time required by conventional methods. They combine high reliability, small size, low drift and noise, light weight and low power-requirements. A variety of amplifier combinations meet specific requirements.

Q3 MODULAR SYSTEMS

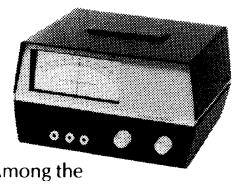


These are modular components for use in both analog and hybrid computors, simulators and analyzers. Each package consists of a carefully optimized combination of amplifiers, networks, components, and power supplies. Representative units include a self-powered, low-noise, low current-offset, differential amplifier; switch-programable, self-powered integrator-differentiator; switch-programable, self-powered unit capable of performing non-linear functions.



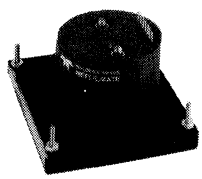
INTEGRATED CIRCUIT TESTER

Philbrick/Nexus IC Tester performs all tests automatically without calibration or manual programming. Dial setting is required to select the test and for minimum scale changing for offset and current measurements. This is the only tester available that performs both CMMR and PSRR tests. Instrument includes direct reading meter, external terminals to display IC output, oscillation indicator and integral power supply. Price: $1400.



New
METERED INSTRUMENTS

Among the many metered instruments in the Philbrick/Nexus line are the 5101 log null meter and the 5100 log ratio meter. The 5101 will permit nulling to 10 μV with a sensitive and stable null. The 5100 provides a four-decade display of voltage, current, voltage ratio and current ratio or resistance.



New
METERMATES

Series 4100 Metermates are packaged signal conditioning units that adapt standard panel meters to making certain types of non-linear measurements and/or to extend sensitivity. They convert standard meters into very high impedance instruments. They bolt to meter studs and mount flush at the rear. Metermates are available in a variety of configurations: single-ended D.C. amplifier, log scale D.C., and point-to-point logarithmic A.C.

TECHNICAL SUPPORT SERVICES

Philbrick/Nexus Research welcomes opportunities to bid on special system requirements to help you apply analog technique and products in such areas as industrial and scientific instrumentation, process and quality control systems and in-line analog data processing. Customer services of Philbrick/Nexus include: applications engineering, technical bulletins, applications manuals, the "Lightning Empiricist", and factory or on-site applications seminars.

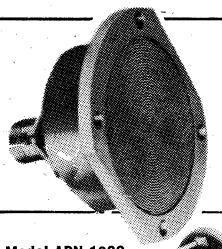
PHILBRICK/NEXUS RESEARCH

A TELEDYNE COMPANY

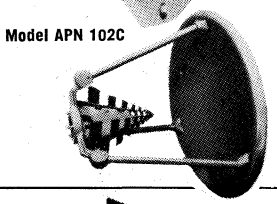
AEL® STOCK and CUSTOM ANTENNAS



Model ASN 118A

BROADBAND CAVITY-BACKED SPIRALS

These circularly polarized spirals have performance characteristics that lend themselves to broadband applications and provide compact, lightweight circularly polarized antenna configurations which can be easily flush-mounted. Applications include airborne surveillance, ECM, telemetry, direction-finding, command/control, and a variety of others. They are available in octave or 10:1 bandwidths in the frequencies between 200 MHz and 11 GHz. Several models of these antennas are available to meet MIL-E-5400 specifications.

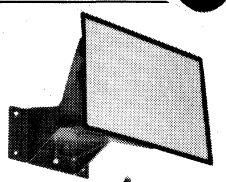


Model APN 102C

PARABOLIC REFLECTORS with BROADBAND FEEDS

High gain, broadband antennas utilizing the frequency independent feeds – gain proportional to frequency squared – available with 18", 36", and 72" parabolic reflectors.

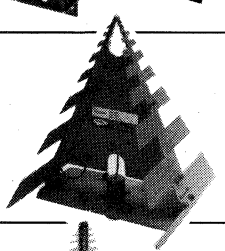
Frequency Range (GHz)	Linear Polarization Model Nos.	Circular Polarization Model Nos.
.3-3	APN 112B	ALN 123B
1-11 (6 feet)	APN 111B	ALN 122B
1-11 (3 feet)	APN 110B	ALN 121B
1-11 (18 inches)	APN 102C	ALN 111C



'OPTIMUM' LINEAR HORNS

Broadband linear horns utilizing Tchebycheff step transformers—unidirectional "tear drop" pattern—equal E and H plane half-power beamwidths. Useful for standard gain measurements.

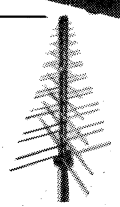
Frequency Range (GHz)	Militarized Model No.	Commercial Model No.
.25-.5	—	H4801
.5-1	—	H4901
1-2	H5000	H5001
2-4.5	H5100	H5101
4-10	H5200	H5201



PYRAMIDAL LOG PERIODIC

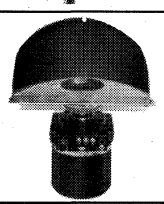
Frequency independent linearly polarized antennas providing unidirectional "tear drop" pattern—60° half-power beamwidth, E and H planes—gain 9 db.

Frequency Range (GHz)	Model No.
.05-3.0	APN 105B
.09-3.0	APN 109A
.3-3.0	APN 106A
.4-3.0	APN 106AA
.9-12.4	APN 101AB
1.0-12.4	APN 101B



SIGNAL SENTRY CROSS-PLANAR LOG PERIODIC ANTENNAS

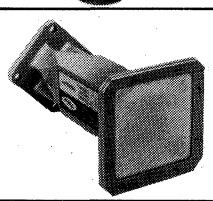
Isolation between orthogonal planes is better than 25 db across the band. Fifth boom in transmission line helps maintain constant impedance over entire band, and provides optimum isolation between the two planes. Applications include: air surveillance, ECM, and parabolic dish feeds where frequency and polarization diversity are a requirement. AEL can build a Crossed Planar to meet your requirements. Send us your specifications.



AEL CUSTOM ANTENNAS... ON TIME... WITHIN BUDGET

AEL has an enviable record of successful one-time, within-budget deliveries of highly customized antennas to meet specific user requirements. These custom requirements have encompassed several or all of the following broad parameters:

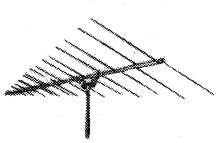
- Extreme frequency coverage (from 8 KHz to 70 GHz)
- Sophisticated packaging design specifications
- Applications in very unusual or adverse environmental conditions.



CIRCULAR HORNS

A complete line of circularly-polarized, unidirectional horn antennas for operation over range 8.2 GHz to 40 GHz in four bands. The 3 db beamwidths vary from 50° at low frequency to 40° at high frequency end.

Frequency Range (GHz)	Model No.
8.2-12.4	H6000
12.4-18	H6100
18.0-26.5	H6200
26.5-40	H6300



LOG PERIODIC COPLANAR

Extremely large frequency coverage from .02 GHz through 1.1 GHz Gain and beamwidth remain constant throughout entire frequency range. Rugged, militarized, lightweight construction. Both folding and rigid types of antennas are available. Folding types are man-portable. AEL also makes custom models to your exact needs.

Frequency Range (GHz)	Model No.	Frequency Range (GHz)	Model No.

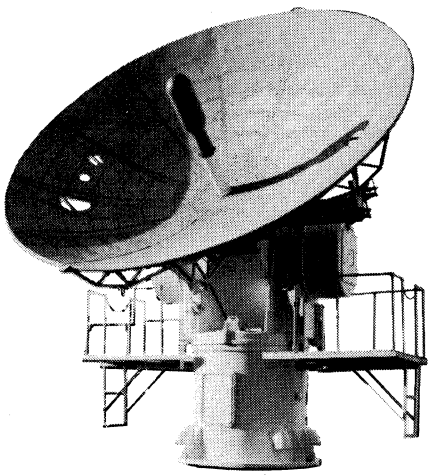
METRIC

Systems Corporation

Radar Systems — Range Instrumentation Equipment — Precision Pedestals

METRIC SYSTEM'S LONG RANGE PRECISION TRACKING RADAR

AN/FPQ-11



ANTENNA

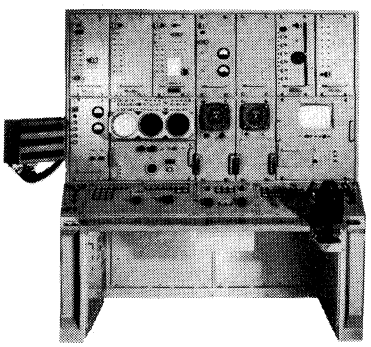
The AN/FPQ-11 Precision Tracking Radar offers features most needed in a modern Instrumentation Radar. Important features of the AN/FPQ-11 are: Dual Receivers for simultaneous reception of skin and beacon signals — Selectable 3 mc and 8 mc IF Bandwidth — Parametric Preamplifier with 3.5 db noise figure — 14 foot dish with 40 db gain — 1000 nautical mile Nth-time-around range tracker with digital readout — Digital Data Outputs in Range, Azimuth, and Elevation — Television Boresight Camera with console mounted Monitor — Handwheel and Joystick Control modes — Selectable automatic tracking in angle using either radar or infrared tracking.

This set is capable of tracking targets at rates in excess of 30 degrees per second in azimuth and 15 degrees per second in elevation with errors less than approximately 0.3 mills. The pedestal accuracy is 10 seconds of arc with levels provided to permit leveling to approximately 6 seconds of arc.

Digital outputs provide 17-bit words in azimuth and elevation and 20 bits in range.

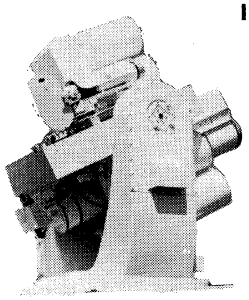
Included is a secondary data system providing analog sine/cos outputs to 0.05%, range 0.005% to 400 K yds. and 0.05% to 2000 K yds.

Synchro inputs and outputs are available to permit slaving to another radar or slaving a remotely located radar from the AN/FPQ-11.



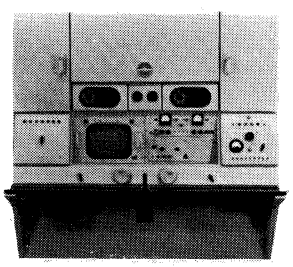
CONTROL CONSOLE

INFRARED TRACKER & SIGNATURE MEASURING SYSTEM



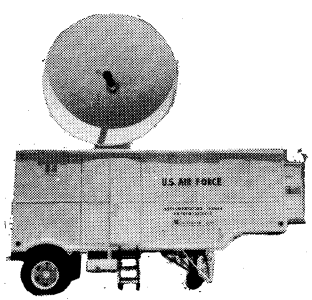
INFRARED TRACKER PEDESTAL

The Signature Measuring System produced by Metric Systems on Contract AF 08(606)-4732, automatically tracks a ballistic missile re-entry and records radiated energy over a spectrum ranging from infrared to ultraviolet. Six optical instruments are mounted on a modified Nike-Ajax Pedestal. Automatic target acquisition and track capability is provided by a dual field of view IR Tracker. A console mounted television monitor and joystick permits manual or automatic control of the pedestal as desired. The system features slaving capabilities to external tracking equipment and 17-bit serial or parallel digital data outputs on both azimuth and elevation.



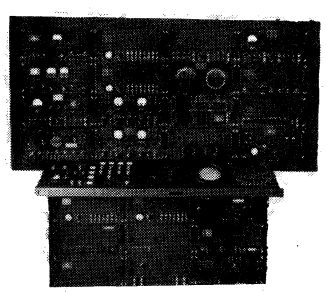
INFRARED TRACKER CONTROL CONSOLE

PRECISION TRACKING RADARS



AN/MPQ-31 RADAR VAN

The AN/MPQ-31 Precision Target Tracking Radar, designed and fabricated by Metric Systems, meets the need for a moderately priced instrumentation radar capable of providing target coordinate data in the wide variety of forms required by modern missile tracking ranges. The MPQ-31 radar provides visual readouts for operator use, multiple speed synchro outputs for slaving external equipment, analog voltage outputs for computer and plotting board operation, and digital outputs for use with digital data systems. Features of the radar are: 750 KW Peak Power, Push-button PRF Selection from 320 pps to 1707 pps, Dual receivers (Beacon and Skin), 10 foot reflector, nutating feed with variable polarization, 5 million yard range unit (nth time-around tracking range unit optional) and Binary Digital Data outputs for range, azimuth, and elevation.



AN/MPQ-31 CONTROL CONSOLE

Metric Systems has produced an assortment of missile range instrumentation equipment with particular emphasis on radars and radar modifications. Metric Systems has outstanding qualifications in the design of radar range measuring equipment, having produced high performance range units for radars such as the SCR-584, MPQ-31, MPS-9, MSQ-1A, the Nike-Ajax Radar, and others. For expert advice on the adaptability of a particular radar to your instrumentation requirement, contact Metric Systems Sales Department.

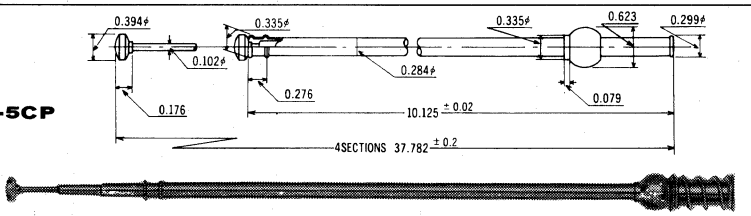
HIGH SENSITIVITY, HIGH RELIABILITY !!

YOKOWO ANTENNA

Yokowo Mfg. Co., Ltd., Japan's leading manufacturers of Antenna field, offer you the finest products at reasonable price. All Yokowo antennas are backed by the progressive research staff and produced under rigid quality control.

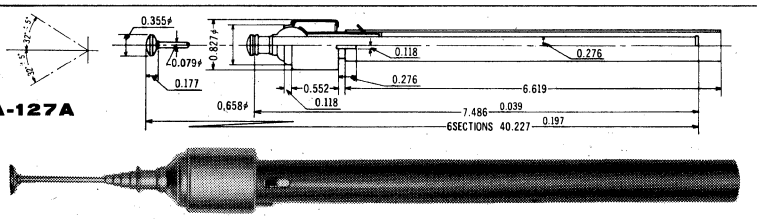
TELESCOPIC ROD ANTENNA FOR TV SET

Model BA-5CP



Any collapsed length available, provided the extended length of antenna is limited by the collapsed length, diameter of outer tubing, and number of sections.

Model SA-127A



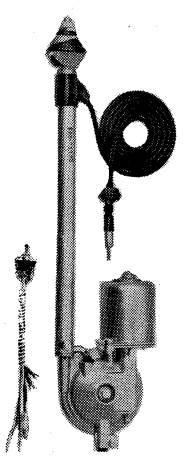
Material:
Antenna elements and tips are made of brass (65～35 alloy) if otherwise not stated.

Finish:
All the visible parts are chrome plated, if otherwise not stated.

CAR RADIO ANTENNA

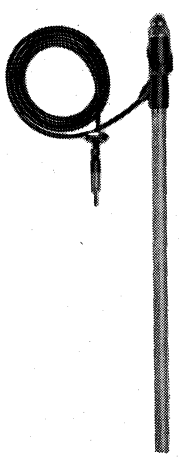
Automatic Type

Model YA-1000A

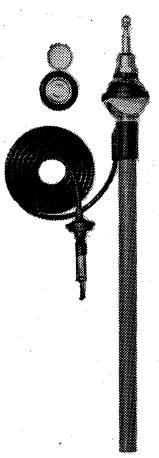


Ring-Key Type

Model VW-300



Model RA-52



YOKOWO CAR ANTENNA
Car Antennas are available in various kinds and those are designed for use on all sorts of cars, from small to large sizes. YOKOWO Car Antenna will always prove its highest efficiency even on the street surrounded by tall buildings and in the remote mountain areas where the electric wave is so weak.

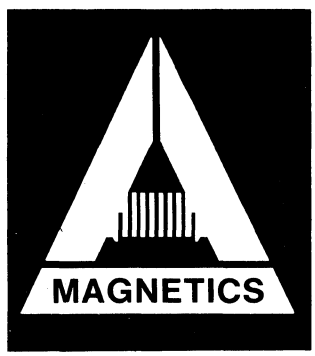
Custom engineer
Custom manufacture

Magnetic heads to your specifications



Offering total services to the computer industry in the areas of...

FLYING HEADS

Hong Kong facility offers sophisticated manufacturing skills and significant savings. Arvin Magnetics—Hong Kong was established during 1968 as part of Arvin International, Inc.'s facility in Hong Kong to provide the computer industry with a low cost source of flying heads and assemblies. Employees and facilities in Hong Kong are being continually improved to provide the finest in manufacturing capability. The customer deals only with Arvin Magnetics-Columbus which had developed a sophisticated system of parts movement, importing, air shipping, and communications to assure performance to the customer's schedule. A proven approach of prototype construction in the United States followed by training in Hong Kong by engineers assures tight adherence to performance and fast production start-up.

TAPE HEADS

Double your head life by having your head manufactured as an Arvin "Hard Head." Arvin Magnetics has developed a new head construction that greatly extends head life by a special head construction that has a very low coefficient of friction. Heads constructed in this manner are called Arvin "Hard Heads." If you are a user of precision heads, Arvin Magnetics would like to quote your head manufactured as an Arvin "Hard Head."

Arvin Magnetics concentrates on multi-channel heads for the computer and instrumentation industry. Capability exists to manufacture to your design and/or specifications and to design to your system requirements. Experience with all types of core materials and head construction techniques enables Arvin Magnetics to utilize the best approach to your magnetic head needs.

FERRITE PRODUCTS

Core Material With the Big Future

Arvin Magnetics is dedicated to anticipating trends in the magnetic head area and being ready to serve our customers' future needs. A major part of this policy is the belief, based upon outside market surveys and our knowledge of the field, that ferrites will play a major role as the core material of the future in magnetic heads.

We have a multi-faceted program in the ferrite area that includes:

a. Sources of ferrite—Both internal and external sources are utilized to assure our customers of the widest range of ferrite material.

b. Machining—Trained personnel and slicers and dicers, parallel lapping machines, toroid cutters, etc., enable us to process ferrite for any application.

c. Glass-Bonding—Arvin Magnetics is licensed by North American Philips Company, Incorporated, to do glass-bonding.

Interested in seeing how Arvin Magnetics would solve your head problem? Contact Manager, Arvin Magnetics, to arrange for a presentation on the total capability of Arvin Magnetics and a discussion on how this capability can be applied to your problems.

When Your Problem Comes to a Head...Solve it with Arvin®

MAGNETICS

RESEARCH, IMAGINATION AND EXPERIENCE HAVE BEEN COMBINED IN THE DEVELOPMENT OF ARVIN'S NEWEST "LONG LIFE, LOW MAINTENANCE" DUPLICATING HEAD LINE.

Professional people, in the tape duplicating field, were invited to air their suggestions, opinions, and expectations regarding mechanical and electrical parameters desirable in this product. From these discussions and our own experience was born a line of, what we feel to be, the new standard of HIGH QUALITY, REASONABLY PRICED professional stereo tape duplicating heads.

3 inductances currently available

.240 mH 1.0 mH 1.5 mH

This provides a range coverage from .5 to above 2.0 MHz Bias frequency. (Up to 10 MHz Bias will be available this year.)

MECHANICAL FEATURES

Head tape surface is completely exposed for ease of cleaning.

Heads are relief slotted to avoid tape edge abrasion on head surface.

Lapped in, pre-established Azimuth control.

Increased tape to head contact surface for extended life and less bias re-adjustment.

Precision dowel pin head positioning.

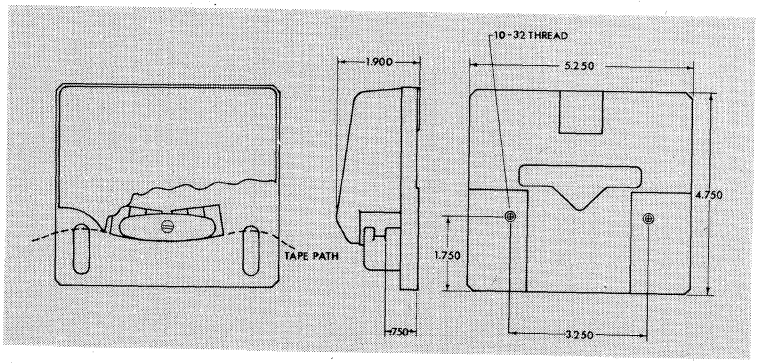
Mounting base and cable assemblies are compatible with Ampex 3000 series recording deck—however, your requirements can be met at little or no additional cost.

Tape guides of high wear resistance material—designed to prevent incorrect tape loading.

All accessories removable and replaceable from the top.

Top cap spring hinged for convenient head replacement and cleaning.

Assembly configuration consists of 2 stacks with 4 poles in each. Head positions are interchangeable and may be "flip-flopped" to desired base to track format.



TRACK LOCATIONS ARE IN COMPLIANCE WITH R.I.A.A. STANDARDS

From the people who pioneered magnetic recording

Brush magnetic heads.

designed and fabricated to your specifications

Brush designs and fabricates magnetic heads to *your* particular requirements . . . from low cost single-track audio models to highly sophisticated multi-track heads and multiple-head assemblies.

- Digital heads in IBM compatible formats, or format of your choice — with packing densities to 6000 fci.
- Wideband instrumentation heads — from IRIG formats to 42 tracks/inch — out to 2MHz.

Full range of electrical characteristics — to your specifications. ■ A quarter-century of experience (Brush developed the first successful magnetic recorder back in 1942) has produced proprietary core and structural designs with pronounced advantages in higher efficiency, reduced crosstalk and crossfeed, extended life, higher resolution.

■ Whatever your problem involving heads, give us your specifications.

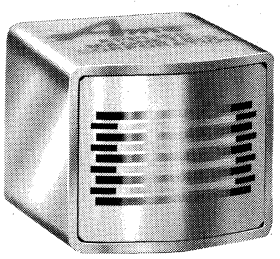
GOLD SERIES MAGNETIC HEADS FOR 1/4 INCH TAPE

A SERIES OF PRECISION, LOW COST MAGNETIC HEADS FOR 1/4 INCH TAPE

FEATURING:

- The AMC reputation for quality and service
- Increased wear life
- All metal faces
- Outstanding gap collinearity
- Extended frequency response
- Superior crosstalk rejection
- Unusually high temperature stability
- Uniform track widths



G5500 SERIES

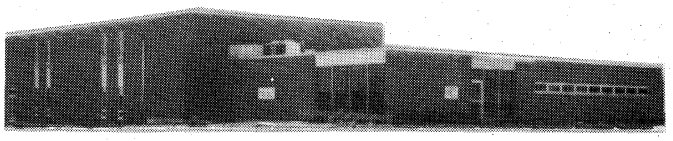
SYSTEMS COMPONENTS

PRECISION MAGNETIC

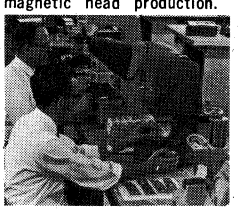
FACILITIES • CAPABILITIES QUALTY



iem in its ten years of steady growth has become a major supplier not only for standard magnetic recording components but also for special types built to your specification. In 1968 facilities were quadrupled to meet the demand for our products. IEM operates under a formal Quality Assurance plan. The documented Q.A. manual has been accepted for Aerospace production. Inhouse electrical-mechanical standards are traceable to the National Bureau of Standards.

Completely equipped machine shop meets the demand for precision parts required for magnetic head production.

Proficient line personnel perform the delicate assembly operation of putting magnetic heads together.



Ultra precise mechanical checkout.

Electrical testing under laboratory conditions.

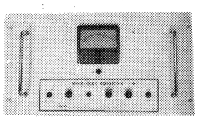
SPECIAL PRODUCTS

iem with its complete facilities for both engineering and fabrication makes *iem* an ideal partner in your special short run requirements. Below are a few items developed with both customer and company sponsored programs.

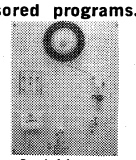
General Purpose Digital-Analog Cartridge Tape Transport

Miniature Personal Recorder Measures ⅞″ x 3⅛″ x 5″

Feed Back System for Linear Position Control



Bias Amplifier Mega Cycle Range Rated 50 Watts

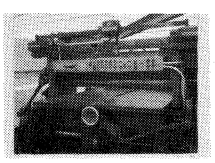


Cartridge or Cassette Tape Loader

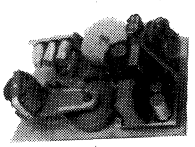
FLUX RESPONSIVE SYSTEMS

iem **The flux sensitive system represents an efficient method of sensing static magnetic information, making data output independent of tape speed.**

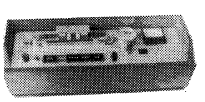
The system is flexible, simple, and economical, the accuracy being mainly a function of the drive element. All circuitry is solid state utilizing plug in board, thus reducing maintenance and trouble shooting to within the scope of the average user.



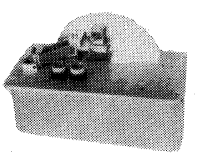
Flux Sensitive Programmable Machine Control System



Analog Ultra Low Frequency Playback System



Flux-Sensitive Linear Resolver for Machine Control and Measuring Applications



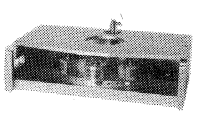
Angular Resolver

— USES —

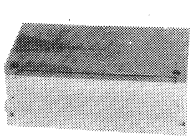
- **FEEDBACK SYSTEM FOR POSITION CONTROL**
- **LOAD ACTUATION TO INITIATE AN OPERATION**
- **METERED OUTPUT FOR QUANTITATIVE MEASUREMENT**
- **LOGIC SYSTEM FOR NUMERICAL CONTROL**
- **TRIGGER CIRCUIT FOR COUNTING**
- **LINEAR RESOLVER**
- **ANGULAR RESOLVER**
- **ANALOG ULTRA LOW FREQUENCY PLAYBACK**

RECORDING ASSEMBLIES

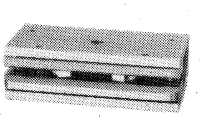
iem **professional recording assemblies represent the state of the art for precision magnetic components. They encompass most of the standard and special recording formats and electronics. They can be incorporated for upgrading most existing professional equipment. They are also available as OEM equipment for systems manufacturers. All parts are precision ground for accuracy and permanent alignment. • Guide surfaces are of tungsten carbide for maximum life and accuracy. • IEM unique MEGA-BIAS design permits head change in seconds with positive azimuth and zenith lock-in.**



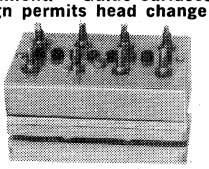
Turret Head Mount



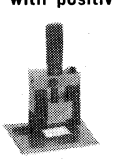
Magnetically Shielded Erase, Record and Playback Assembly



Quick Change Nonobsolescent Head Mount



Quick Change Mount with Integrated Bias Current Control Panel



Micrometer Calibration Head

RECONDITIONING REFURBISHING SERVICES

iem **offers complete service for refurbishing, including cleaning, relapping, replacement of guides and inspection. Standard audio types — all formats. Duplicator types — slave and master assemblies. Video tape recorder audio heads. Complete conversion service for various tape formats.**

RECORDING COMPONENTS

MAGNETIC HEAD TYPES

iem manufactures head structures utilizing axis oriented manganese-zinc single crystal ferrite as well as the sintered ferrite types. The advantages of the single crystal are

- **Linearity of gap equivalent to metallic core structure. No grain pull out.**
- **Lower core loss at high frequency.**
- **Excellent wear characteristics for long life.**

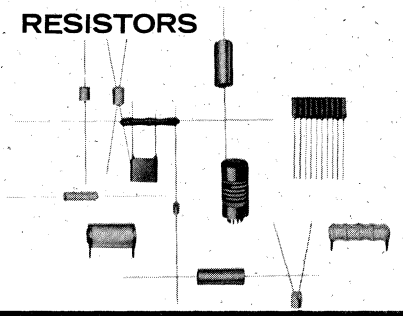
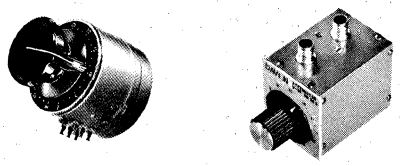
DAVEN MEANS DEPENDABLE

RESISTORS



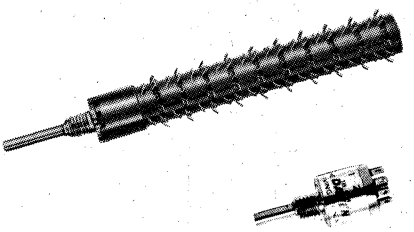
PRECISION WIRE WOUND RESISTORS & High Reliability Series — from .03 to 1.0 watts. Failure rates $\leq$0.02%/1,000 hrs. @ rated power and 125°C: Encapsulated Styles — non-inductively wound — meet or exceed MIL-R-93 and MIL-R-39005. Wide range of axial and lug terminal types: Subminiature Styles — Sizes from .1" dia. x .235"L at .03 watts for micro-circuit applications: Printed Circuit Styles — wide range of standard sizes, specials to customer order: Instrument Grade Styles — Daven DAX design provides wire wound performance at popular prices: Power Resistors — Fuse Resistors — High Frequency Resistors — Write for industry "Bible" — Catalog WW-55.

ATTENUATORS



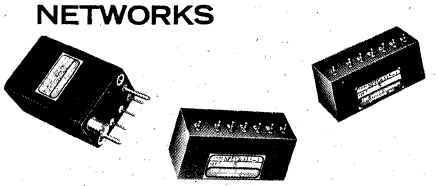
A/V and RF ATTENUATORS — Performance proven Audio/Video pots featuring noise levels below circuit noises. Balanced and Unbalanced Ladders; "T" and Balanced "H" types in Bridged, Cueing and Precision (±1%) Models. Cat No. A-15. RF ATTENUATORS, rotary single and multi dial, rotary coaxial, remote programmable and electronic models for operation from DC to 500 MHz. Cat No. RFA-768.

SWITCHES



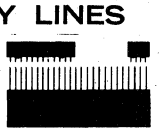
ROTARY SWITCHES — Standard Switches featuring rugged construction, multi leaf rotor blades, shaft mounted detents. Shorting and non-shorting types in 1 through 8 pole per section models. SUBMINIATURE — High carrying capacity and dielectric strength. Shorting and Non-shorting 2 through 20 positions/pole, 1 through 4 poles, single and multi deck models — Cat No. SWSM 267. HERMETIC — Rotary types with leak rates to 1×10^{8} cc/min. Thumbwheel models, pushbutton models and lever models, all with near absolute hermeticity. Cat No. HR-15.

NETWORKS



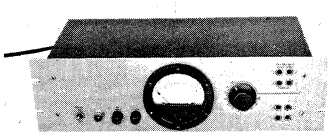
PRECISION WIRE WOUND NETWORKS — DAV-PAKS in miniaturized packages, simplify assembly, inspection and storage problems. Resistance values are available matched to ±.002%, TC matched to ±1PPM/0°C to 60°C. Wide range of circuit types and packages to function as divider, adder, current source, compensation etc, networks.

DELAY LINES



LUMPED CONSTANT DELAY LINES — Various package configurations with delay times from 1 to 100 nanoseconds. Rise times less than 1 nanosecond. Frequency response better than 1,000 mc. Impedances from 50 to 2,000 Ohms. Bulletin No. DL-95.

LAB EQUIPMENT



LAB EQUIPMENT — Transistorized Interphone Amplifiers; Volume Level Indicators; AF, AVF, and RF Attenuation Networks; Noise and Transmission Measuring Sets; Output Power Meters. Bulletin No. LE-34.

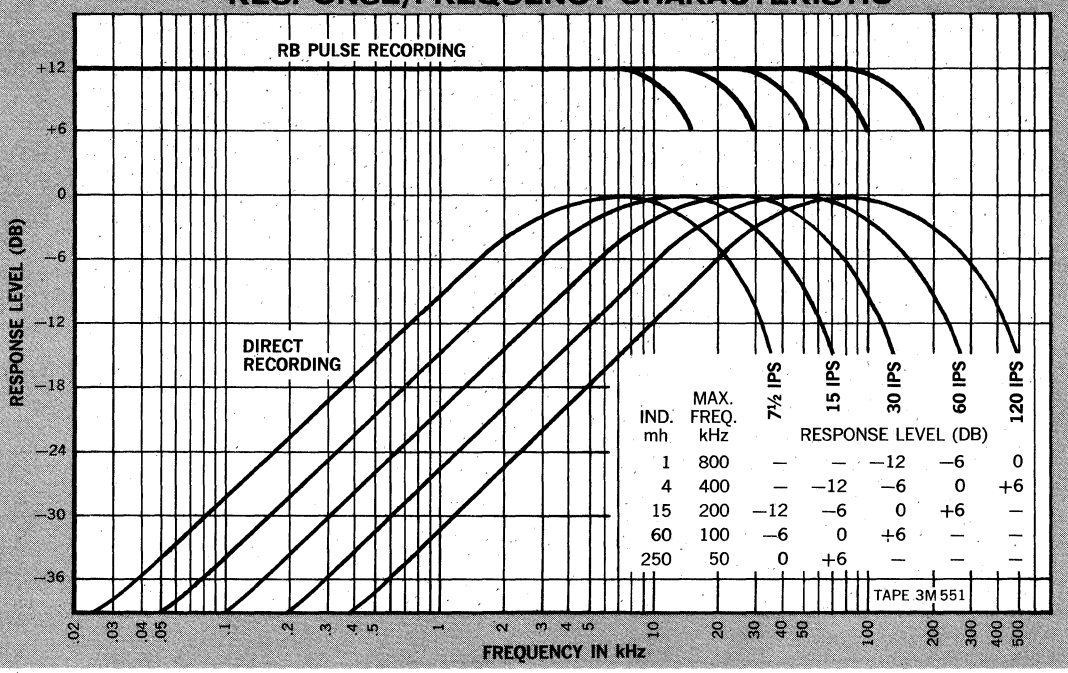
NORTON® MAGNETIC HEADS

MULTITRACK

SERIES 2000/7500 ERASE RECORD PLAY

RESPONSE/FREQUENCY CHARACTERISTIC



IND. mh	MAX. FREQ. kHz	7½ IPS	15 IPS	30 IPS	60 IPS	120 IPS
		RESPONSE LEVEL (DB)				
1	800	—	—	−12	−6	0
4	400	—	−12	−6	0	+6
15	200	−12	−6	0	+6	—
60	100	−6	0	+6	—	—
250	50	0	+6	—	—	—

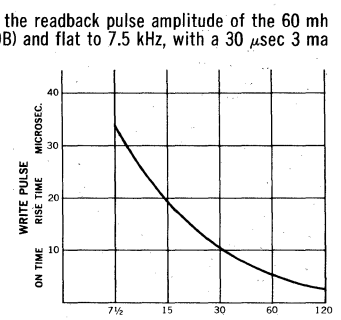
The Response/Frequency characteristics above, illustrate the exceptional performance of the Series 2000 thru 7500 Norton Magnetic Heads in direct and digital recording. The upper curves relate to the readback pulse amplitude for RB (return to bias) writing with the digital models and the lower curves relate to the unequalized playback amplitude of the analog models for constant current direct recording, both as a function of frequency (or rep rate). The five standard impedances available, together with the five tape speeds illustrated, total 25 different curves in each group, too many to clearly represent on a single chart. Pairs of inductance and tape speed are selected, which result in a set of curves peaking at the same level and having upper frequency limits proportional to tape speed. Therefore, the 1 mh inductance record/play response is at 120 ips; the 4 mh at 60 ips, and so on to the 250 mh response at 7½ ips. The other inductances are related to each as set forth in the included table. Each curve is at the same mv level as the others and so enables a quick comparison of level, frequency response, and required tape speed to achieve a desired performance goal. To read the curves, first refer to any Series found on the following pages, and note the Typical Operation data and the 0 DB playback reference level in mv rms for direct recording or +12 DB reference level in mv p-p for RB pulse recording. Then referring to the curves, calculate the response obtainable at the inductance and tape speed contemplated.

DIGITAL RECORDING

Selecting the 5500 Series from the following pages for analysis, the 60 mh track for RB pulse recording has a +12 DB reference level of 10 mv p-p at 15 ips. The readback pulse at 15 ips is 10 mv p-p and constant up to a 15 kHz rep rate, equivalent to a 1000 ppi recording density, with a 20 μsec, 3 ma p-p write pulse (rise time 20 μsec). At a faster rep rate of 30 kHz (2000 ppi) at 15 ips and a 10 μsec, 3 ma p-p pulse (rise time 10 μsec) the readback pulse is 5 mv p-p (10 mv less 6 DB) with all pulses present, and 10 mv p-p for an isolated pulse.

Writing and reading at 7½ ips the readback pulse amplitude of the 60 mh track is 5 mv p-p (10 mv less 6 DB) and flat to 7.5 kHz, with a 30 μsec 3 ma p-p pulse (rise time 30 μsec).

Full output is obtained up to a recording density of 1000 ppi with equal pulse on time and rise time at the values shown in the graph below. Operation up to 2000 ppi at reduced read amplitude requires halving these times. Increasing the times will reduce the recording density and readback level, and is not recommended. A better solution is to choose a lower inductance to preserve the recording density capability.



DIRECT RECORDING

Selecting the 2000 Series from the following pages for analysis, the 15 mh track for direct (bias) recording has a stated playback 0 DB reference level of 1.8 mv rms which at 30 ips is at 30 kHz. At 1 kHz the playback level drops to 0.15 mv rms (21 db below 1.8 mv). Operated at 7½ ips its 1 kHz and 30 kHz levels are both 0.15 mv rms (1.8 mv less 12 db less 9 DB). Increasing the inductance to 250 mh would increase the 1 and 30 kHz play level to 0.6 mv rms (1.8 mv less 9 DB) at 7½ ips. It can be seen that the short wavelength response to over 4000 cpi together with a maximum contour effect deviation of ±2 DB from the 6 DB/octave slope permits a useful bandwidth of over 10 octaves at any tape speed, and with the range of inductances available, permits the highest play level consistent with the frequency range of the system.

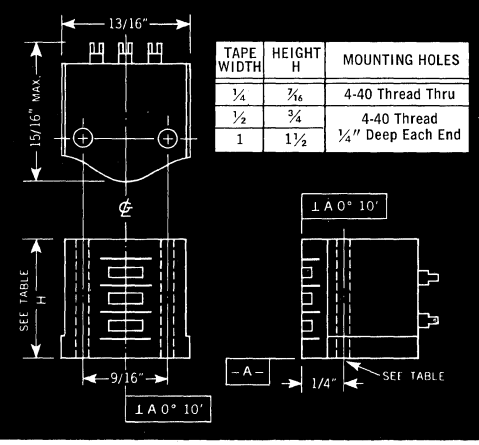
MULTITRACK
ERASE RECORD PLAY

STANDARD FEATURES SERIES 2000/7500

Standard features include extremely low crosstalk ratings and +75°C temperature operation without derating, plus a mechanical accuracy permitting hard mount or adjustable mount installation. Rugged solid metal construction, shock and vibration resistant, provides a hard, stable, low friction, long wear surface for the tape. The cores, shields and all metallic members are mechanically and electrically bonded together for effective electrostatic shielding and grounding of static charges. Precision finishing of the recording face to micro-inch tolerance insures intimate contact of the tape with every channel for uniformly excellent response independent of track location.

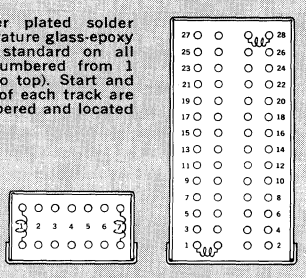
OUTLINE & MOUNTING DIMENSIONS



TAPE WIDTH	HEIGHT H	MOUNTING HOLES
¼	7/16	4-40 Thread Thru
½	¾	4-40 Thread
1	1½	¼" Deep Each End

TERMINAL BOARD CONNECTION DIAGRAM

TERMINATION: Silver plated solder lugs on a high temperature glass-epoxy terminal board are standard on all series. Tracks are numbered from 1 through 28 (bottom to top). Start and finish terminal pairs of each track are correspondingly numbered and located as illustrated.



SELECTIVE ERASE HEADS

Multitrack selective erase heads to match the formats of the NORTON Series 2000/7500 units are available. All heads offer erase track widths at least 10 mils wider than the record tracks to insure full erasure. Outline and mounting dimensions are the same, and a standard 1 mh inductance is stock with other impedances available on request.

Erase heads for the Series 2000 and 3500 heads are a single unit with the same number of tracks and track spacing as the record head. Erase heads for the Series 4500 thru 7500 units consists of a pair of heads, each with double track spacing. Odd number tracks are on one unit, and even number tracks on the other.

Catalog numbers for the erase heads have the same Series number as the record head except for the suffix which changes to 1E as in the following example: Catalog #3510-1E is a 1mh erase head for use with the 10 track 1" tape head in the Series 3500.

ORDERING INFORMATION

To specify the complete catalog number for ordering purposes designate the Series number of the head you require, the inductance in mh and the function ie. Record (AR) only, Record/Play (ARP), or Play (AP) only for audio and analog applications: or Record (DR) only, Record/Play (DRP), or Play (DP) only for digital applications, as in the following example: Catalog #4507—15 DP which is the Series 4500, 7 tracks, 15mh Digital Play Head for ½" tape.

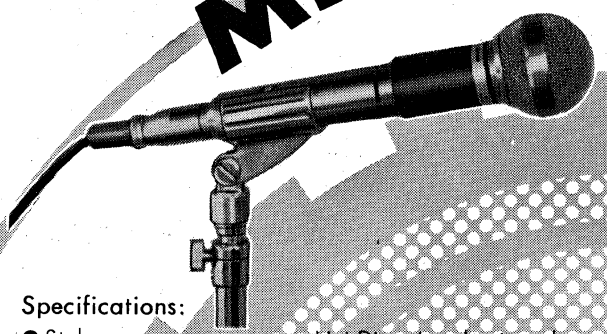
Prime

—A Leader in Microphone Field—

MICROPHONES



UD-900

UNI-DIRECTIONAL MICROPHONE

Superlative "Beautiful" The final microphone. Try and see yourself if the followings are true to its wording.

Specifications:

- Style ..... Uni-Directional microphone
- Impedance ..... 600 ohm
- Frequency Response ..... 50~15,000Hz ±5dB
- Sensitivity ..... −73dB ±2dB
- Cable ..... 6m shielded with Cannon type 3-P plug.
- Measurement ..... 260mm long, 50mm dia.
- Weight ..... 490g.

Features:

- The unique acoustic circuit for this particular model achieved the unrivalled super-directional character.
- Free from all ambient reflections, with sturdy construction.
- Highest Sensitivity allowed for unidirectional microphone theory and practice.

WE MAKE THE INLET FOR THE SOUNDS OF THE WORLD

PRIMO COMPANY LTD.

Head Office: 1-25, 6-chome, Mitaka-shi, Tokyo
Tel: (0422) 43-3121 Tlx: 2822-326 PRIMO MUS

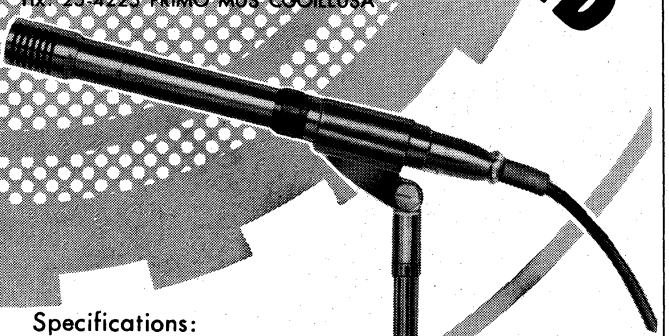
Tel: 312-472-6142 Tlx: 25-4225 PRIMO MUS CGOILLUSA



CMU-500

CONDENSER MICROPHONE

Uni-Directional, Self-contained Supply. FET application.

Features:

- Solid-state construction enhanced the reliability against the vibration.
- Lesser S/N ratio approved wider dynamic range.
- A single type switch at the middle of the body serves for on-off and tone-control transferring.
- Beautiful super-slim type fits to stage extraordinary.

Specifications:

- Style ..... Uni-Directional microphone
- Frequency Response ..... 30~15,000Hz ±4dB
- Impedance ..... 600 ohm
- Cable ..... 6m shielded with Cannon type 3-P plug.
- Power Supply ..... Eveready 504" 300 hours.
- Measurement ..... 295mm long, 25mm dia.
- Weight ..... 310g.

"THE FUTURE OF MAGNETIC RECORDING...AND MAGNETIC HEADS...DEPENDS NOT SO MUCH ON WHAT WE CAN DO, AS ON WHAT WE CAN THINK OF DOING."

COMPLETE RANGE OF MECHANICAL CONFIGURATIONS AND ELECTRICAL SPECIFICATIONS

The following pages indicate the enormous variety of head styles and types catalogued by and available from Nortronics. This is the industry's most complete and comprehensive grouping of types, functions, sizes, etc. Our catalogued line includes two, four, eight and full track units; multi-channel, stereo, mono; inductances of 10, 50, 100, 200, 400, and 800 mhy; Standard, Premium, and Professional performance criteria; base mount, side mount, rear mount, and no mount; Erase, Record, Record/Playback, and R/P/E.

VALUE ANALYSIS AND HEADS FOR SPECIAL REQUIREMENTS

Our Marketing Engineering department will assist you in determining the head best suited to your application. It is easy to over-specify, particularly on tape heads for many instrumentation applications. We can frequently demonstrate how a slight modification in the circuitry will permit enormous reductions in the cost of the tape heads.
If your requirements cannot be met by our catalogued line, our engineers will evaluate your problems and will develop special designs to satisfy your needs.

NORTRONICS

THE WORLD'S LARGEST MANUFACTURER OF MAGNETIC TAPE HEADS

MASTER FILE

OF CATALOGUED

TAPE HEADS

THE PRODUCT IS THE END RESULT OF THESE NORTRONICS ACCOMPLISHMENTS

Unequalled Research and Manufacturing Facilities

The new 40,000 square foot Nortronics building was designed to provide control of dust, noise, humidity and temperature. Equipment, from the research laboratory's binocular Unitron metallurgical microscope with Xenon light source, to the production line's 10-7 Torr vacuum quartz gap depositors, is the best available, much of it designed and built at Nortronics, to accommodate new departures in product design requiring equally dramatic departures in manufacturing technique.

QUALITY CONTROL

Between incoming inspection and use tests just before packaging, each head undergoes an average of 30 inspections, and is subjected to an average of seven different microscopic, visual, and electrical tests. Mechanically, the two half sections of a Nortronics head must be precision lapped to flatness tolerances of one-quarter wave length of monochromatic helium light. Electrically, completed heads are checked for inductance, impedance. DC resistance, long and short wave length response, record and biasing parameters, interchannel and adajacent channel cross talk, shorts, opens and proper grounding.

INNOVATIVE LEADERSHIP SINCE 1957

Many Nortronics innovations have become standards of the industry: the "B" case, hyperbolic tape head face to eliminate pressure pads; laminated cores, and quartz-deposited gaps for popular priced tape heads; all-metal-face heads; 8-track stereo tape heads for automobiles; "no-mount" snap-in heads; quick-kit mounting adapters; terminal plugs with standard pin spacing and centering; and "Z combo" stereo record-play-erase heads in a single case.

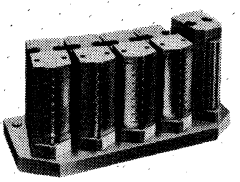
MASTER FILE OF CATALOGUED TAPE HEADS

PRODUCT LOCATOR

INSTRUMENTATION & COMPUTER HEADS

Mini-digital heads described on Page 3 of this MASTER FILE.

Consult Nortronics Marketing Engineering Department for technical information and product literature on other instrumentation and complete heads.

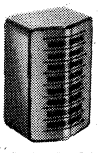


- Custom built to your specifications
- Digital and analog designs, IRIG and IBM formats
- Read, write, and erase heads
- Available with adjustable mount, fixed precision ground base, and as complete assemblies

Head assembly pictured illustrates two seven channel read heads and two seven channel write heads which interlace to provide fourteen channels on one inch tape. Full track ferrite core erase head completes the head configuration precision aligned on machined base plate.

STUDIO SERIES HEADS

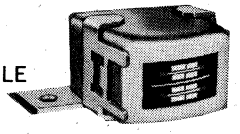
Fully described on Page 4 of this MASTER FILE



- Uncompromised excellence for use with two-inch, one-inch or half-inch tape
- For professional audio and mastering recorders
- Standard SMPTE formats

CASSETTE HEADS

Fully described on Page 5 of this MASTER FILE



- Units for mono, stereo, and language lab track configurations
- Unique bi-directional design permits record-play-erase in both directions without flipover

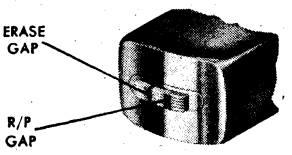
MINIATURE HEADS

Fully described on Page 6 of this MASTER FILE

- Flush face for use with tape
- Relieved face for drum, disc, and film stripe applications

NARROW TRACK HEADS

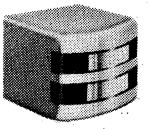
Fully described on Page 7 of this MASTER FILE



- Ideal for dictation machines, card readers, film stripe
- Close-coupled gaps for simplified circuitry, accurate editing
- Extended tip or flush face

PROFESSIONAL SERIES HEADS

Fully described as PR Series heads, Pages 8 and 13 of this MASTER FILE.

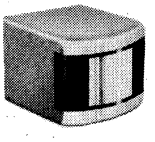


- Unexcelled response from 20 Hz to 20 KHz
- Designed for maximum head life
- Full track and two track models for ¼" tape

HEADS FOR ¼" TAPE

Fully described on Pages 8 through 13 of this MASTER FILE

8 TRACK 9
3, 4 TRACK 10, 11
2 TRACK 12, 13
FULL TRACK 8



- Heads for recording, duplicating, and computer instrumentation applications
- All track and channel configurations
- New concepts in Stereo Z Combo, with R/P/E functions in a single stereo head

NORTRONICS ACCESSORIES

Fully described on Pages 14-15 of this MASTER FILE

- Bias Oscillator Transformers
- Cartridge and Universal Mounting Brackets
- Plugs, Clips, and Cable Assemblies
- Contactor Heads, Guide Posts, etc.

This MASTER FILE is designed to describe — but not to limit — Nortronics capabilities.

HOW TO SPECIFY MINI-DIGITAL HEADS

Selecting the proper tape head for your application can be accomplished by referring to the information below. Technical data on all Nortronics tape heads listed in the following index is contained on the individual pages referenced.

In determining the part number for your application, please refer to the step-by-step selection guide below. Please note that on most items listed in specification charts, **Basic** part numbers are shown. The guide below can be referred to for exact head characteristics.

PART NUMBER SELECTION

STEP 1 — DESIGNATE SERIES	P = Premium series XP = Extended tip-premium PR or WP = Professional series (Standard Has No Prefix)
STEP 2 — DESIGNATE CASE STYLE	List proper letter designation from case outline dwgs on each page
STEP 3 — NUMBER OF CHANNEL	1 = mono 3 = 3 channel 2 = stereo 4 = 4 channel
STEP 4 — NUMBER OF TRACKS	H = 2 track (half track) Q = 4 track (quarter track) L = 8 track
STEP 5 — TRACK LOCATION (mono heads only)	NONE = Standard stereo offset Y = .020 off center (GIHY) C = Centered track .040 off center (BIHY)
STEP 6 — ERASE ELECTRICAL CODE (combo heads only)	List code from specification chart
STEP 7 — R/P ELECTRICAL CODE	List code from specification chart
STEP 8 — MOUNTING STYLE	List proper mounting code shown on individual pages

EXAMPLE

P	—	A	I	Q	C	4	6K	—	SL
series		case style	channels	tracks	tr. location	case code	elect. code		mounting

= PREMIUM SERIES; "A" case style; I channel (mono); 4 track; centered tracks; combination erase - R/P head; No. 4 erase electrical code; No. 6K R/P electrical code; side mount with erase section to the left

MINI-DIGITAL MAGNETIC HEADS

For read/write applications in desk-top calculators, input/output systems, and peripheral equipment.

• Open reel, cartridge, and cassette formats • Excellent electrical characteristics and mechanical tolerances.

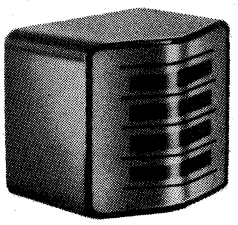
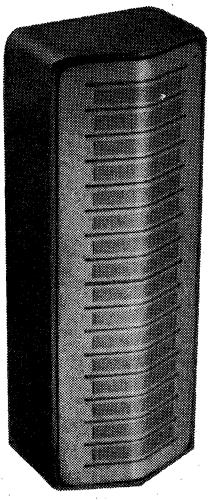
STUDIO SERIES TAPE HEADS
for ½, 1 and 2 inch tape

FOR ½", 1" AND 2" TAPE



STR-4B

STR-8B



STR-16B

DESIGNED ESPECIALLY...

for professional audio or mastering recorders using one half, one, or two inch tape. Uncompromised quality dictates only the finest in design, materials and technology. Custom built to your electrical specifications and mechanical mounting requirements, the Studio Series is available in standard SMPTE track formats; 3 or 4 channels on one half inch tape, 8 or 12 channels on one inch tape, or 16 channels on two inch tape. Record and Playback heads feature ultra thin HY MU 800 laminated precision-lapped cores for minimum eddy current loss, deposited silicon monoxide gaps for maximum frequency definition and hyperbolic face contour for uniform intimate tape contact. Compatible companion erase heads are available with selective (independent) channels or full width. Ferrite core structures reduce ultra high frequency bias losses while providing erasure to virgin tape level.

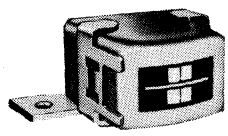
2 Channel Head for Language Laboratory Applications



MODEL W2R
2 Track Dual Channel

Nortronics features a complete line of heads for the cassette system, including a new bi-directional design that permits automatic changing, since the cassette need not be flipped over to play the second half of the tape.*

The Nortronics bi-directional design puts all three functions on one head, permitting two capstans to be used, thus providing for automatic reversing. Nortronics also produces conventional compatible cassette heads.

Typical operating speed for commercial applications is 1.875 ips.

TYPICAL APPLICATIONS

ENTERTAINMENT

For monaural applications; one or two recorded tracks, .059 inches wide separated by a guard band of .030 inches on the standard .150 inch tape. For compatible stereophonic recording; four recorded tracks, each .023 inches wide, are grouped in identical adjacent pairs with .012 guard bands — permits playing monaural and stereo tapes on the same equipment without loss of program material. Despite close spacing, crosstalk rejection of stereo models is in excess of 36 db.

LANGUAGE LABORATORY

Heads provide playback of the teacher's voice on one track while recording the student's voice on the other. Teacher channel is .023 inches wide to play back a pre-recorded program. Student record and playback channel is .059 inches wide, (and is located at the far edge of the tape for maximum separation of .065 inches.)

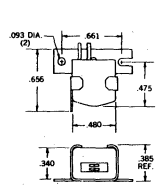
* R/P section normally receives sufficient bias thru magnetic leakage from the erase section, 50 pf across R/P coil during record.

PHYSICAL CHARACTERISTICS



The mounting bracket/tape guide (illustrated) is supplied pre-aligned. The tape guide for .150 is positioned for proper track height when gap is azimuth aligned. (Specify "A" following basic model number).

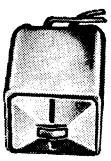
MINIATURE TYPES

SIZES



"L" SERIES (5/16"W x 5/16"H x 3/8"D)

"M" SERIES (1/4"W x 1/4"H x 1/4"D)

"M" SERIES — Features small size — ¼ inch cubed. R/P track widths are .045 or .070 with compatible erase track widths of .055 or .090 inch. Face contour is either flush (as illustrated) or relieved. Standard relief for 16 mm stripe is .050 inch notch across top of face from case to core. To specify a relieved face add the number "3" to part number shown below. Available as no mount or base, side or rear mount (No. 2-56 stud).

"L" SERIES — Incorporates laminated cores, deposited quartz gaps and either a flush face for use with tape or a relieved face (as illustrated) for use in drum, disc or film stripe applications. The flush face contour is hyperbolic, while the pole-tip projection is .010 to 020 inch on relieved heads. To specify a relieved face add the number "5" to part number shown below. Available as no mount or base or rear mount (No. 2-56 stud). Special track widths or specifications on custom order basis. Six-inch leads std.

TYPICAL APPLICATIONS — Magnetic drums and discs, magnetic stripes on motion picture film and miniature tape recorders. When used with magnetic drums, discs and film stripes, it is recommended that a projecting track version be selected.

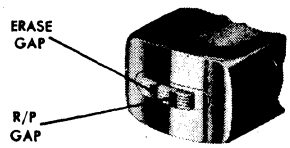
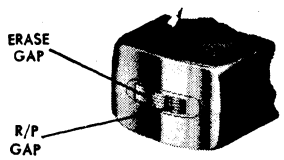
NARROW TRACK HEADS

Extended tip or flush face — Mu Metal or Alfenol Cores
Standard track widths: .0135 inches, .020 inches, .080 inches



"XZ" Extended Pole



"Z" Flush Face

*Z Combo — Type Z — Combination erase and R/P head places all three functions within a single head. Ideal for dictation machines, card readers and film stripe applications. "Close-coupled" gap provides internal bias coupling that simplifies required circuitry and permits accurate editing.

Type XZ offers additional advantage of extended pole tip (.010-.020 inches) for gap to oxide contact on hard or non-compliant surfaces.

*R/P Heads — Type X — Extended pole tip R/P heads feature high sensitivity mu-metal cores.

Type XA — Extended pole tip R/P heads feature long wearing alfenol cores.

PR-BIF

PR SERIES

- Sets a new standard for high performance magnetic heads.
- Unexcelled response from 20HZ to 20KHZ.

Professional series full track — PR-B1F, designed especially for long wave length response with extra wide pick-up poles, smooth response characteristics are obtained to below 20HZ. Fine precision lapped laminated core stacks and deposited gaps extend short wavelength response. Extra deep deposited quartz gap.

Companion PR-B1EF ERASE also available.

(No Mount—N)

All Nortronics erase heads have efficient double-gap construction plus metal faces and cases for superior heat transfer. They will operate effectively at erase frequencies up thru 100 kc, and also on d.c. **Two low-cost standard case sizes, "L" and "S,"** in the various mounting styles as illustrated to the right and indicated below. All erase models are also available in the B-case style to match the r/p heads; example, B2EQ4-N which is identical electrically to the SEQ4.
Erase heads are shown with various mounts, but all are available in your choice of **base, side, rear or no mount.**

Voltage, 60 KC RMS	120 V	40 V	9.3 V	40 V

Specifications subject to change without notice. †For 56 DB erasure of Saturated Tape.

To determine erase model number, select a basic model number, add the erase electrical code, add a dash (—) and add mounting designator (below). Following are typical examples:
MEF1-S23U, Full-track mono erase head, No. 1 erase electrical code, "L case," **side mount,** track **up** (studs are to **left**).
Erase Mounting Designator follows model number in this fashion:

"MEF1-N9", no mount (S Size)
"-N", no mount (L Size)
"-B3", standard base mount (Supplied S Size only). For mono heads, add a U for up or D for down after the B3 to denote track up or track down.
"-S23", standard side mount (Supplied L Size only). For mono heads, add a U for up or a D for down after S23 to denote track up or track down.
"-R-12S", standard rear mount and 12 inch shielded leads (Supplied S Size only).
"-R-4U", standard rear mount and 4 inch unshielded leads (Supplied S Size only).
For "B" style erase heads, mounts are the same as for R/P heads.

GENERAL PURPOSE TAPE HEADS

8-track heads for ¼" tape

8-TRACK HEADS FOR ¼" TAPE

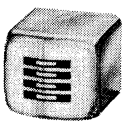
MODEL ZJ2L Z-Combo

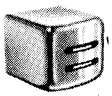
The type **ZJ2L** offers combination erase and record/playback functions in one head for 8-track stereo applications. Its patented unique "Z-Combo" construction places the erase and R/P gaps only .030 apart in the same pole structure, resulting in extremely accurate height alignment and tracking. Recording and erasing for the 8-track stereo system thereby become fully practicable. Standard B-size case fits most mountings.

Advantages of Z-Combo Close-Coupled Gaps

- Intimate tape contact with single or no pressure pad
- Insures overlap alignment of erase when R/P section is azimuth aligned
- Prevents adjacent channel erasure in close spaced track configurations when R/P section is azimuth aligned

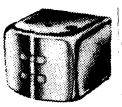
8-Track 4-Channel P-BQL-N (No Mount)





8-Tr. Stereo Z-Combo ZJ2L (No Mount)

8-Tr. Stereo B2L-N (No Mount)



MODEL P-B2L

SUITABLE FOR HIGH SPEED DUPLICATORS, LOW SPEED LOGGING APPLICATIONS, AND GENERAL PURPOSE RECORDING AND PLAYBACK.

The NORTRONICS Premium Quality P-BQL four-channel magnetic tape head utilizes the most advanced design and manufacturing techniques. Fine-laminated cores and precision-deposited gaps give extended frequency response capability. Ideal as high speed slave heads for duplication of 8-track stereo at speeds up to 8X or 16X, with bias frequencies up to 750 KHz.

MODEL B2L-N

Standard playback — only or record/playback head for automobile or home type Stereo — 8 tape cartridge players. Premium version of above head is available with extra-fine laminated cores for improved high frequency response to 15 KHz at 3.75 ips tape speed. Also available Alfenol Premium record-only head for heavy-duty high speed duplicating applications. Give five times normal life.

The B2Q, C2Q, G2Q heads shown represent a broad new series of 4-track stereo and monophonic record/playback heads. Each type of head is available in either a PREMIUM or STANDARD version. The PREMIUM series is a fully professional line of tape heads giving unsurpassed performance for broadcast and studio applications. Long life and extended high frequency response at slower tape speeds, are among the benefits of the features listed: • Fine laminated, precision-lapped, low loss core structures • Deposited quartz gaps, as fine as 50 micro-inches • Hyperbolic face contour • Highly polished all-metal faces • Compatible mechanically and electrically with older model Nortronics heads • Superbly shielded against external magnetic fields. The STANDARD versions are recommended for less critical applications where cost is a primary factor. They offer improved high frequency performance over that of conventional solid-core heads, plus the added features of hyperbolic all-metal face and precision deposited quartz gaps.

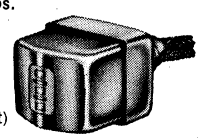
P-B3Q-R
(Rear Mount)



The P-A2Q, A2Q, P-A1QC and A1QC 4-track series of NORTRONICS Combination Magnetic Tape Heads contain record/playback and erase sections in one miniature case. Internal construction is based on the low-loss, laminated core design. PREMIUM Series P-A2Q and P-A1QC heads offer fully professional fine-laminated core construction where the ultimate in high frequency performance is required. STANDARD A2Q and A1QC series heads are recommended for less critical applications where cost is a primary factor. STANDARD type heads have laminated cores, providing a superior high frequency response over that of conventional solid-core heads. Deposited quartz gaps as fine as 50 micro-inches. Precision-polished metal faces for freedom from oxide buildup. Hyperbolic face contours, available on PREMIUM models, for optimum tape-to-gap contact without need for pressure pads.

P-B3Q SERIES

Premium series three channel R/P heads designed especially to meet N.A.B. (USA) track configuration for stereo cartridge machines, two channels for stereo program plus control channel. Precision gap co-linearity eliminates phase cancellation distortion of stereo signal, all metal face insures maximum shielding. B case to fit all mounting accessories.

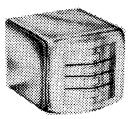
4-Track
4-Channel
BQQN-B
(Base Mount)



P-BQQ
(No Mount)

Nortronics Model P-BQQ is an instrument quality, 4-channel in-line record/reproduce magnetic tape head for ¼-inch tape. Its fine laminated-core construction is designed for professional applications with the ultimate in high frequency performance. Deposited quartz gaps as fine as 50 micro-inches result in exceptionally clean "smear-free" gap edges. The all-metal face greatly reduces oxide loading problems and the hyperbolic contour promotes intimate tape-to-gap contact allowing reduced tape tension and elimination of pressure pads.

Typical Applications — Instrumentation recording including carrier modulated types such as AM, FM or Pulse, as well as straight digital and analog recording. Tracks of the P-BQQ head are compatible with the 4-track stereo system making it ideal for audio duplication, background music and 4-channel in-line stereo.

Two versions are available, offering a choice between the minimum interchannel crosstalk and lower price. The P-BQQ style has the superior interchannel crosstalk rejection of 55 db. For some applications, such as pulse recording, the 18 db crosstalk rejection of the more economical BQQN model may be acceptable.

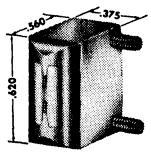
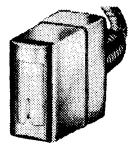
ERASE HEADS

All Nortronics erase heads have efficient double-gap construction plus metal faces and cases for superior heat transfer. They will operate effectively at erase frequencies up thru 100 kc. and also on d.c. **Two low-cost standard case sizes, "L" and "S,"** in the various mounting styles as illustrated to the right and indicated below. All erase models are also available in the B-case style to match the r/p heads; example, B2EQ4-N which is identical electrically to the SEQ4.

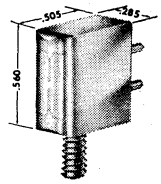
Erase heads are shown with various mounts, but all are available in your choice of **base, side, rear** or **no mount.**



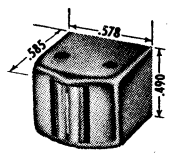
L Size
SEQ
(Side Mount—S23)



S Size
MEH
(Rear Mount—R-12S)



S Size
SEH
(Base Mount—B3)



B Style
BIEF
(No Mount—N)

To determine erase model number, select a basic model number, add the erase electrical code, add a dash (—) and add mounting designator (below). Following is a typical example:

SEQ4-R-12S, 4-track (quarter track) stereo erase head, No. 4 erase electrical code, "S" case, rear mount, 12 inch shielded leads.

Erase Mounting Designator follows model number in this fashion:

"SEQ4-N9", no mount (S Size)

"-N", no mount (L Size)

"-B3", standard base mount (Supplied S Size only). For mono heads, add a U for up or D for down after the B3 to denote track up or track down.

"-S23", standard side mount (Supplied L Size only). For mono heads, add a U for up or a D for down after S23 to denote track up or track down.

"-R-12S", standard rear mount and 12 inch shielded leads (Supplied S Size only).

"-R-4U", standard rear mount and 4 inch unshielded leads (Supplied S Size only).

For "B" style erase heads, mounts are the same as for R/P heads.

PR SERIES

- Sets a new standard for high performance magnetic heads.
- Unexcelled response from 20 HZ to 20KHZ.

Professional series R/P heads. Designed especially for long wave length response with extra wide pickup poles, smooth response characteristics are obtained to below 20HZ. Fine precision lapped laminated core stacks and deposited gaps extend short wavelength response. Extra deep deposited quartz gap.

All Nortronics erase heads have efficient double-gap construction plus metal faces and cases for superior heat transfer. They will operate effectively at erase frequencies up thru 100 kc, and also on d.c. **Two low-cost standard case sizes, "L" and "S,"** in the various mounting styles as illustrated to the right and indicated below. All erase models are also available in the B-case style to match the r/p heads; example, B2EQ4-N which is identical electrically to the SEQ4.
Erase heads are shown with various mounts, but all are available in your choice of **base, side, rear** or **no mount.**

To determine erase model number, select a basic model number, add the erase electrical code, add a dash (—) and add mounting designator (below). Following are typical examples:
MEH1-S23U, 2-track (half track) mono erase head, No. 1 erase electrical code, "L case," **side mount, track up** (studs are to **left**).
Erase Mounting Designator follows model number in this fashion:
For "B" style erase heads, mounts are the same as for R/P heads.

"SEH2-N9", no mount (S Size)
"-N", no mount (L Size)
"-B3", standard base mount (Supplied S Size only). For mono heads, add a U for up or D for down after the B3 to denote track up or track down.
"-S23", standard side mount (Supplied L Size only). For mono heads, add a U for up or a D for down after S23 to denote track up or track down.
"-R-12S", standard rear mount and 12 inch shielded leads (Supplied S Size only).
"-R-4U", standard rear mount and 4 inch unshielded leads (Supplied S Size only).

ACCESSORIES

BIAS OSCILLATOR TRANSFORMERS

TO DRIVE RECORD AND ERASE HEADS

- Heavy-duty Ferrite E-core construction assures minimum external magnetic field.
- High efficiency, high Q, clean waveform, and good voltage regulation.
- Wide frequency and voltage range.
- Output voltage at secondary of transformer may be varied by adjustment of the D.C. power supply voltage to the oscillator.
- Power handling up to 3 watts.

T-70 SERIES

- Pin terminals provide for plug-in and soldering
- Nylon case measures 1¼" x 1½" x 1⅛"
- **for printed circuit board mounting**
- May be used with standard transistor push-pull or single-ended Class "C" oscillator circuits.

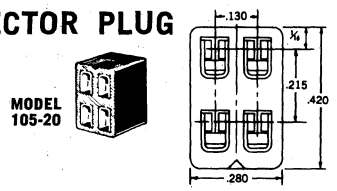
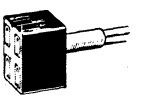
Table and circuit list the various methods of operation for the T70-T2 oscillator circuit, to obtain power for Nortronics #4 erase heads, at three different frequencies.

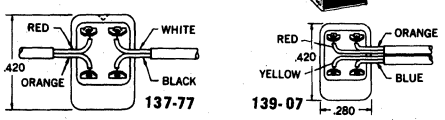
CONNECTOR PLUG



4-Pin Black Phenolic Plugs permit instant connection to all 4 pins of Stereo Heads and 2 pins of Mono Heads. **105-20** plug is for all Nortronics heads except BQQ, P-B3Q and P-BQL.

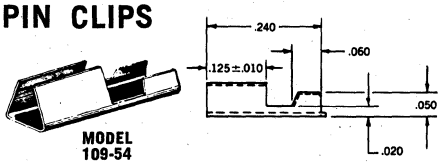
PLUG & CABLE ASSEMBLY





Assemblies ready to plug onto Head Terminal Pins. Consist of proper plug and two shielded cables (nominal length 18" each). **139-70** is used with all Nortronics stereo heads, with cable pairs connected to the upper pair of pins and lower pair of pins. **139-77** is used with Nortronics mono-combo heads, with cable pairs connected to the right pair of pins and left pair of pins.

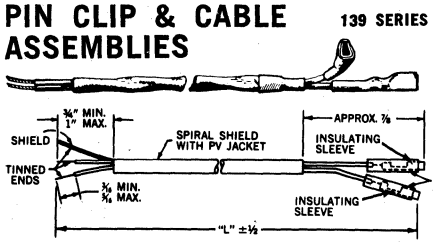
PIN CLIPS



The **109-54** is a gold plated beryllium copper push-on clip formed to fit the terminal pins of all Nortronics heads. Lead wires may be soldered easily to the small end of the clip, leaving the larger end open to push on to the terminal pins. Pin clips permit ready attachment or removal of leads to terminals of heads, and also eliminate damage to head caused by soldering leads directly to pins.

PIN CLIP & CABLE ASSEMBLIES

139 SERIES



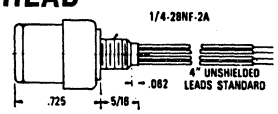
Provided to make neat and simple electrical connections to the terminal pins of Nortronics heads. Two conductor (No. 26) shielded wire insulated with vinyl jacket, with 109-54 pin clips. Available in 2 lengths, 4 color combinations:

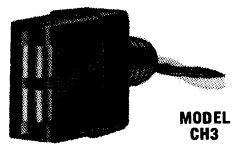
	9 inch	24-inch
Red-Orange	139-55	139-78
Yellow-Blue	139-56	139-79
White-Black	139-57	139-80
Red-Black	139-58	139-81

Nortronics COMPANY, INC.
8107 Tenth Avenue North, Minneapolis, Minnesota 55427

ACCESSORIES

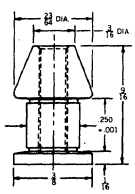
CONTACTOR HEAD

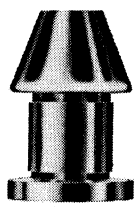




Use with metal-foil cueing to operate relay. Has two isolated contactor shoes. Model CH3-R-4U has rear mount and 4" leads. Model CH3-N9 is no-mount small-case size. CH3-B3 is base mount.

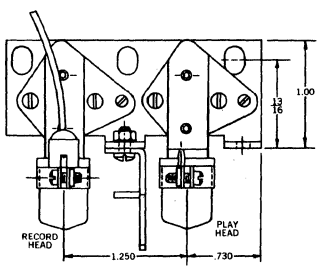
TAPE GUIDE POST

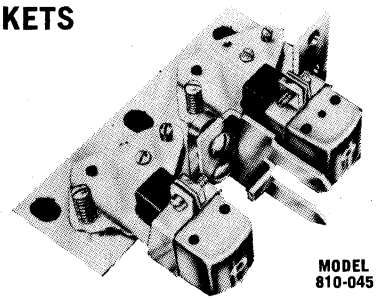


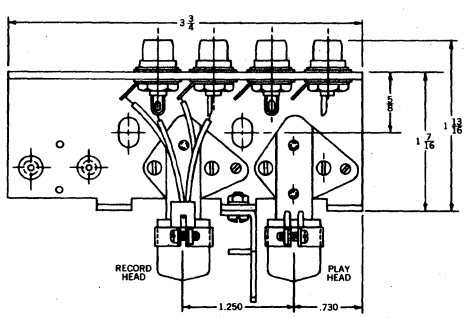


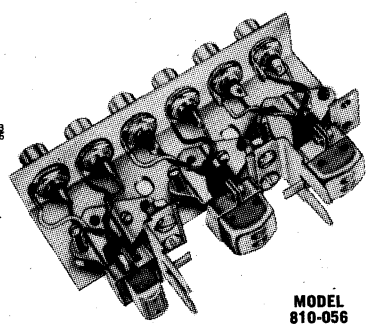
A universal precision-made guide post for ¼" tape — may readily be mounted to control the path of tape travel. Chrome plated brass insures long life and friction-free operation. Height is readily adjustable by loosening the locking set screw and rotating the threaded post.

CARTRIDGE MOUNTING BRACKETS









Unique head mounting assembly for endless loop cartridge tape handlers (Fidelipac and Viking types). Eliminates awkward mounting and adjustment problems of rear-mount style heads. Offers "Micrometer" adjustments of head height, azimuth, and face perpendicularity. Lock screw on each head bracket "freezes" adjustments.

Heads fastened to bracket with quick-release screw clamp. Replacement time is a matter of seconds when heads are connected with plug and cable assemblies provided with kits.

#810-045 "B" Cartridge-Mount Kit. Up to three heads may be mounted on this assembly, using two no-mount R/P heads of the "A" or "B" size. A small case erase head may be added in the third position on the channel base by means of a #810-044 head bracket. Kit supplied unassembled, includes base channel, four jacks, two #810-042 brackets for the R/P or Combo heads, one #173-16 tape guide fork, and two plug and cable assemblies.

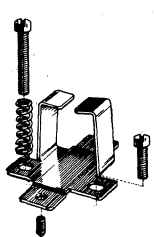
#810-046 "G" Cartridge-Mount Kit. As above, but with two #810-043 brackets for "G" or "T" size mono R/P heads.

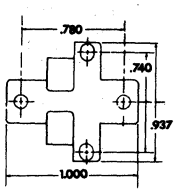
#810-055 "B" Two Head Cartridge-Mount Kit. Accommodating two no-mount R/P heads of "A" or "B" size. Vertical back rail and jacks have been eliminated. Connection to the heads may be made by use of the 18" shielded plug and cable assemblies (provided).

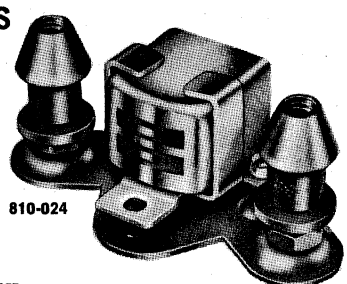
#810-056 "G" Two Head Cartridge-Mount Kit. As above, but with #810-043 brackets "G" or "T" size mono R/P heads.

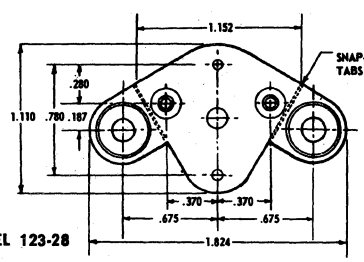
#173-17 Brake-Release Guide — for larger Viking metal cartridges.

UNIVERSAL MOUNTING BRACKETS

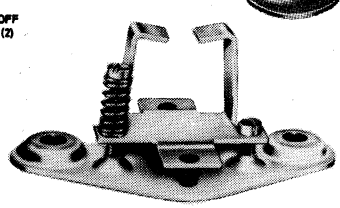








SUB PLATE MODEL 123-28



Designed for simplified mounting plus ease in adjustments.

These universal head mounting brackets provide for convenient adjustment of head azimuth height and tilt. Heads are easily snapped in and out of brackets, which are accurately positioned by means of "Micrometer" adjustment screws. Brackets are made of cadmium-plated steel and are supplied with mounting screws and spring—and can be combined with other Nortronics accessories to make various mounting assemblies.

#810-024 Head Nest. Includes bracket, guide posts and mounting plate for "A" and "B" Heads.
#810-027 Bracket. For "A", "B",, and "E" style no-mount heads.
#810-028 Bracket. For "G" size heads.
#810-041 Bracket. For small-case no-mount erase heads.

Shallco HIGHWAY 301 SOUTH • SMITHFIELD, NORTH CAROLINA 27577 • (919) 934-3135

SHALLCO, INC. was established to provide a modern, capable source of AUDIO and R. F. ATTENUATORS, DELAY LINES and related devices. All designs, tools and "know-how" for these products was acquired from the Shallcross Manufacturing Company and located in specially arranged facilities for the efficient designing and production of this class of product. In addition, all areas of activity have been up-dated with new designs, equipment and tooling. A dynamic organization is now ready to serve the industry.

PRECISION AUDIO ATTENUATORS

APPLICATIONS

SHALLCO Precision Audio Attenuators for industrial, commercial and military usage are ideal for applications where circuitry demands precision and highest reliability.

STOCK TYPES

SHALLCO attenuators are available in both variable and fixed units. There are four rotary models of 10, 15, 20, or 30 steps . . . linear or tapered . . . with attenuation as small as 0.1 db per step, plus one slide-type attenuator of 10 to 30 steps. "Cue" positions are available on all SHALLCO attenuators. Circuit types include Ladder, Balanced Ladder, T, Bridged T, Potentiometer, and Dual Potentiometer.

DESIGN FEATURES

Advanced design of SHALLCO Attenuators results in extreme accuracy, with resistor tolerances ranging from ±½% to ±5% depending on specifications and types indicated. The new design employs: a minimum of machined parts, resistive elements continuously wound on a one-piece card, stops and detents (where specified) mounted inside front hub. Operation is incredibly smooth and noise free, and maintenance requirements are minimal.

ELECTRICAL CONSIDERATIONS

Frequency Response: Precision winding and the efficient use of highest quality materials assure flat frequency response throughout the entire audio range and a usable response to over 200 KC.

Noise Level: 130 db or better below zero level.

Impedances: All standard impedances. "Custom" impedances tailored to special order.

RELIABILITY

The highest degree of Electrical and Mechanical reliability is assured through SHALLCO's multiple in-process and final inspections. Conformance with published specifications is guaranteed.

PRICING

You'll appreciate SHALLCO pricing. Twenty-five years of experience, ultra-modern equipment, innovations in design and production methods, and the efficient use of materials . . . all combine to offer you the world's finest precision audio attenuators at lowest possible cost. SHALLCO is pleased to pass these savings along to you.

SERVICE

Jet-quick "off-the-shelf" delivery of standard components is assured by SHALLCO's computer-modern shipping system.

ORDERING INFORMATION

Ordering information should include:

1. Size (See outline drawings).
2. Type of circuit (Ladder, Bridged T, Potentiometer, etc.).
3. Number of steps; with or without detent and cueing.
4. DB per step.
5. Attenuation characteristics (Linear attenuation with CCW shaft rotation, no "off" position, etc.).
6. Mounting per outline drawing or single hole (⅜-32 bushing) with length.
7. Number of gangs (4 gangs maximum).
8. Impedance input and output in ohms.
9. Shaft details when different from outline drawings.
10. Any special frequency requirements.
11. Knobs and dials supplied only when specified.

Also available — VU Meter Multiplier Networks, Decade Audio and Radio Frequency Attenuators, Impedance Matching Networks, Video Variable Attenuators. Special impedances or decibel steps other than those shown are available.

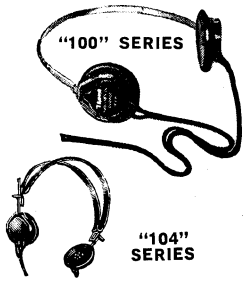
TRIMM INC.

HEADSETS ACOUSTIC PRODUCTS

TRIMM headsets, acoustical items and related accessories are the result of over 47 years continuous production of these products. A selection of the many basic magnetic types available are listed on this page. In addition there are numerous special types originally developed to fill specific commercial or military requirements. TRIMM is your headquarters for all types and varieties of headsets and related components. Request BULLETIN AC-1A for additional information. (See also SECTION 2100 page 996 for TRIMM jacks, plugs, panels, patch cords, terminal blocks and coaxial products.)

"L" SERIES—Extended frequency range magnetic type headset. Available in an assortment of ohmages in both double and single earphone styles, as well as with different types of headbands, cords, and plugs. Recommended for use in language and other educational training systems, broadcast monitoring, and high quality communication work.

FEATHERWEIGHT — Commercial "100" and "104" Series are the two best known lightweight headsets. Available in a wide range of ohmages, in both double and single earphone styles with various types of headbands, cords and plugs. Recommended for commercial communication use, amateur radio and electronic testing.



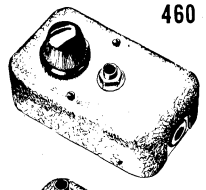
DEPENDABLE — The original TRIMM headset manufactured continuously for over 47 years. Available in all the standard ohmages in both double and single earphone styles. Used on centralized radio systems, electronic organs, for low cost language and educational labs, and code training.

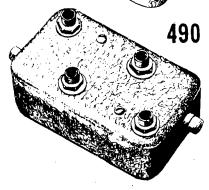
REX — Lowest cost TRIMM bi-polar lightweight type headset. Available in standard ohmages in both double and single earphone styles. Used extensively in low cost teaching systems, institutional radio systems, electronic organs, educational code teaching units and similar low cost applications requiring better performance than the ACME line.

ACME — The best known American built low cost headset. Available in standard ohmages in both double and single earphone styles. Widely used on educational toys, low cost Geiger counters, crystal sets and a variety of industrial applications where cost is a major factor.

GROUP LISTENING AIDS

SINGLE EARPHONES—There are two basic types of earphones for group hearing aid use. The lorgnette handle type for churches and mortuaries; and the headband type for theatres and auditoriums. The Featherweight and "L" models are available for this application.





CONTROL AND OUTLET BOXES —Numerous types, some containing volume control and jack, others just jacks, and still others with selector switches, jacks, or volume controls. Basic box 3¾x2½x1¼" with rounded edges and corners. Used in group hearing aid and centralized radio systems, language labs and stereo control systems.

PILLOWPHONE—With these TRIMM units acting as a personal loudspeaker, radio, TV, tape recorder, or phonograph can be enjoyed without disturbing others. Has gray vinyl cord, plugs, and shell with stainless steel cap. Complete unit is waterproof and may be readily cleaned with disinfecting solution.

ALL OF THE ABOVE HEADSETS AVAILABLE IN BOTH MONAURAL AND STEREO MODELS

DYNAMIC TYPES — Hi-Fi and educational types available by requesting special bulletins on these headsets.

REPLACEMENT PARTS — We provide a complete line of replacement parts for our products plus cords for competitive and special products.

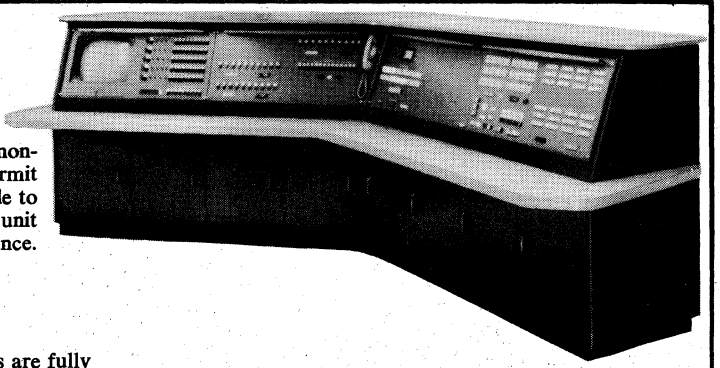
Amco has a complete line of standard or styled enclosure systems...

Standard Amco Enclosure Lines . . .

fast delivery!

styling!

Custom enclosures have non-structural exteriors that permit units up to five frames wide to have a one-piece, single unit appearance.

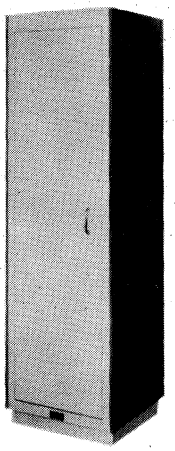


strength!

Semi-Custom enclosures are fully gusseted for superior strength and conformance to Mil-E-5772C shock and vibration requirements.

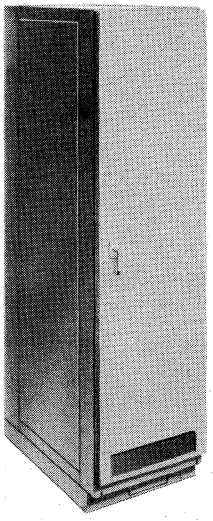
versatility!

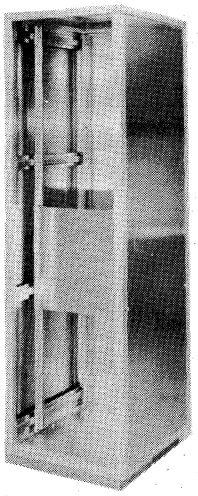
FJ enclosures offer economy, versatility and off-the-shelf delivery for a wide variety of applications. These units are ideally suited for back-up equipment where conformance to rigid environmental specifications is not required.



E. M. I.!

E.M.I. enclosures provide complete radiation protection in excess of E.M.I. MIL-STD 285. Amco pioneered modular E.M.I. enclosures and offer the most complete line.

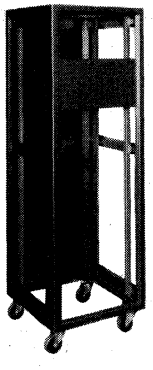




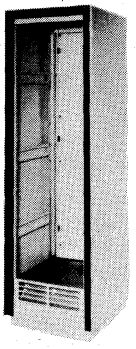
economy!

Heavy-duty aluminum enclosure system that you can assemble from a wide variety of corner castings, extruded square tubing and panels. Special locking clips eliminate the need for assembly tools. Continuous sections from 6 in. to 20 ft. with angles or slopes to 90° are possible.

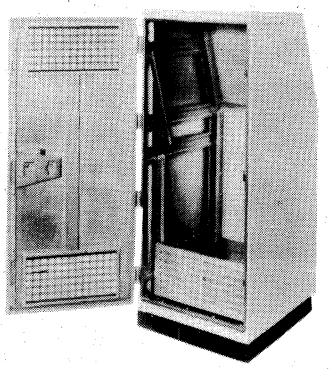
Styled Aluminum Enclosure



Styled FJ Enclosure



Styled E.M.I. Enclosure



Before and after styling. Just an example of Amco's design approach for unique identification. Both the enclosures and styling are modular which permits a complete range of design possibilities to meet the most stringent structural needs or the most unique styling moods.

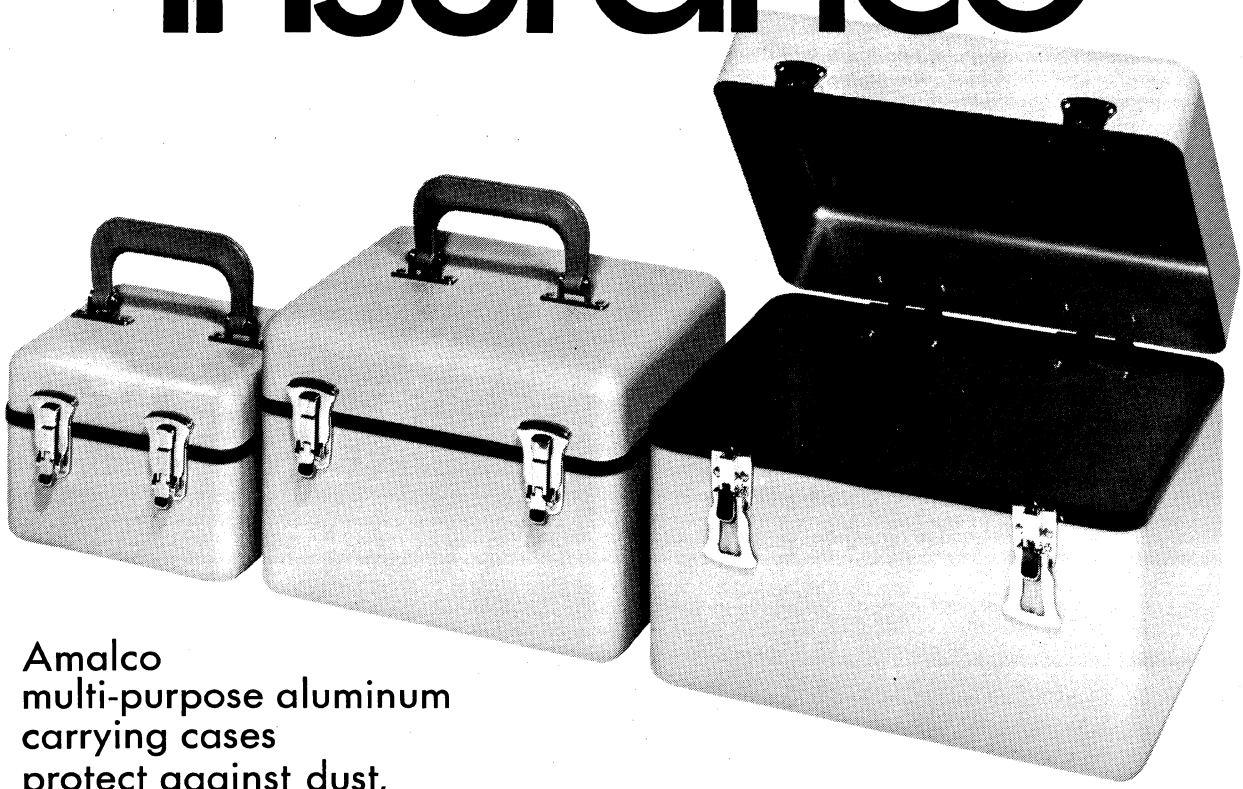
Light weight insurance



Amalco multi-purpose aluminum carrying cases protect against dust, sprays, rust and vibration

Economical, light in weight, rugged, AMALCO Deep Drawn Aluminum Carrying Cases are ideal for hundreds of industrial uses including electronic instrument cases, precious mechanical instrument cases, scientific instruments, photographic equipment and more. Their sturdy seamless construction includes a tight neoprene gasket, protective chromate treatment inside, plated hinges and others. Eleven standard sizes available for immediate delivery. Special sizes to comply with MIL-C-4150F can be produced to your specifications.

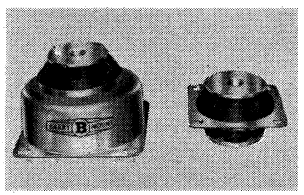
CONTROL
Shock and Vibration

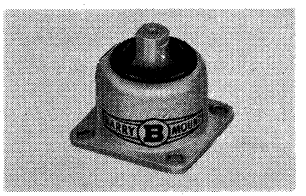
We have a wide range of standard products for controlling shock and vibration effectively, and most of them meet or exceed MIL Specs. They are available off the shelf. Non-standard products to meet special needs are routine with us.

For unusual or critical applications we provide design, development, and testing services that are backed by over 20 years of experience and staffed with specialists.

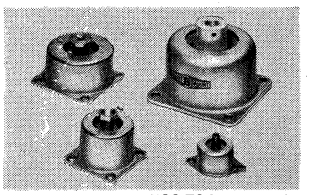
STANDARD UNIT ISOLATORS:



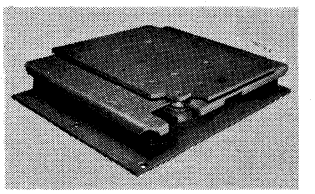
Isolator—series 5200 protects and isolates equipment from shock and vibration in all directions; load ratings from 7 to 50 lbs. per mount.



Isolator—series H44 and H64 for helicopters and similar applications. 14 sizes, ¼ to 40 lbs. per mount. Low natural frequency, low transmissibility.

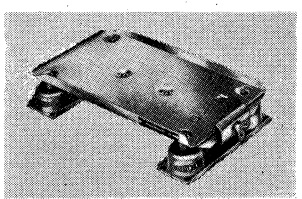


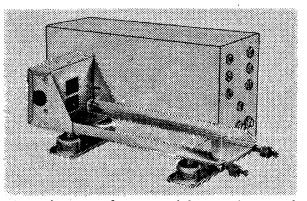
Isolator—series T22-T94 are all-angle mounts using Barry HI-DAMP® elastomer for high isolation efficiency and excellent resistance to harsh environments. For use in aircraft, shipboard, or ground vehicle applications. Four sizes, loads from 1.0 to 150 lbs. per mount.



Isolation Systems — series 2K-S. Provides excellent protection from **both** shock and vibration for shipboard or mobile electronic equipment.

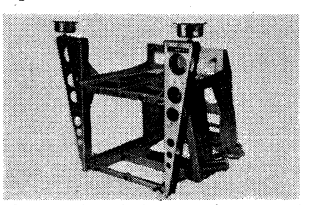
Standard Mounting Bases:

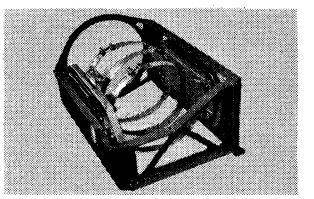




A complete line of MS and ATR mounting bases for a wide variety of aircraft electronic equipment.

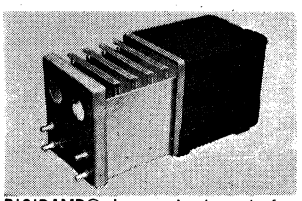
Special Mounting Bases:

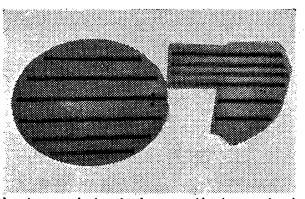




Designed and developed to match your requirements. Prototype or production quantities. Our testing lab will prove efficient performance.

Structural Damping:

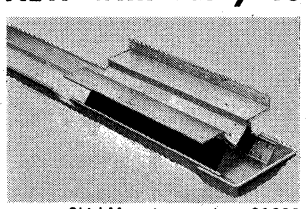




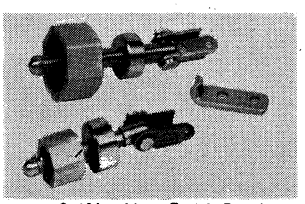
RIGIDAMP® is our trademark for products and techniques that control vibratory response in structures. Available built-in or in add-on form to add damping to any structural material.

Barry Controls is a one-stop source to solve **all** your shock and vibration problems. Shown here is only a representative sampling of our products and services. For a broader picture, ask for a copy of our latest Product Digest.

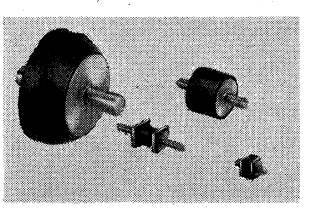
NEW with Barry Controls:

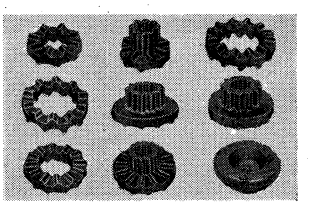


. . . Skid-Mounts—series 91200 are shock-attenuating devices to protect para-dropped electronic equipment shelters from free-fall impact or while being dragged over rough terrain. Fully proven, low cost, reuseable.



. . . Self-Locking Front Retainers eliminate safety-wiring and provide a quick, fail-safe means of clamping electronic "black boxes" to equipment racks or mounting bases. Meets all applicable specs. and NAS573.





For appliances, office equipment, vehicles, industrial applications, etc. there are many other configurations of mountings featuring low unit cost, high-volume manufacture, and consistent quality.

chassis Trak inc.

ENGINEERING FACTS AND FIGURES

Construction—Chassis-Trak Slides are made of hard, cold-rolled steel for maximum strength and wearing qualities and are cadmium-plated for extra corrosion resistance. Smooth operation is achieved by means of Poxylube 75 dry film lubricant which becomes increasingly slick with use. This permanent formulation is dust-repellent and withstands pressure loading of more than 50,000 psi at 25 ft./min. Finish has passed JAN 100-hour salt spray test and is approved for military use.

Installation—"Pencil thin" Chassis-Trak design permits installation of standard 17" chassis in standard 19" panel racks without modification. Standard slides bolt to front rail and rear of cabinet. On most models, a prefabricated gusset assembly can be furnished for use where load does not exceed 100 lbs. Gusset automatically aligns slides and permits mounting at front rail only. Templates, rear mounting brackets and all hardware furnished together with complete assembly instructions.

Operation—Chassis-Trak Slides are available in non-tilt, tilt, and tilt-detent models. Slides with "B" in the model designation tilt upward only; "D" models tilt and lock in seven different service postions. Choice of solid bearing or roller bearing operation. Roller bearings are recommended for equipment requiring frequent service. Chassis of any length can be fully extended without disconnecting rear cables. Pushbutton spring mechanism releases chassis for convenient slip-out, slip-in servicing.

The EQUIPTO ENCLOSURE SYSTEM

A Proven Concept thru Functional Design!

The Equipto Enclosure System represents the first new idea for housing electronic equipment and instrumentation since the introduction of modular cabinets almost fifteen years ago.

New and outstanding features make the Equipto Enclosure System the standard by which all others can be compared.

This System of Modular Cabinets is a proven concept, with emphasis on function and human engineering, designed by the engineers who originated the modular concept of cabinetry and built by men who are recognized authorities in this field.

LABORATORY TEST FURNITURE

FOR

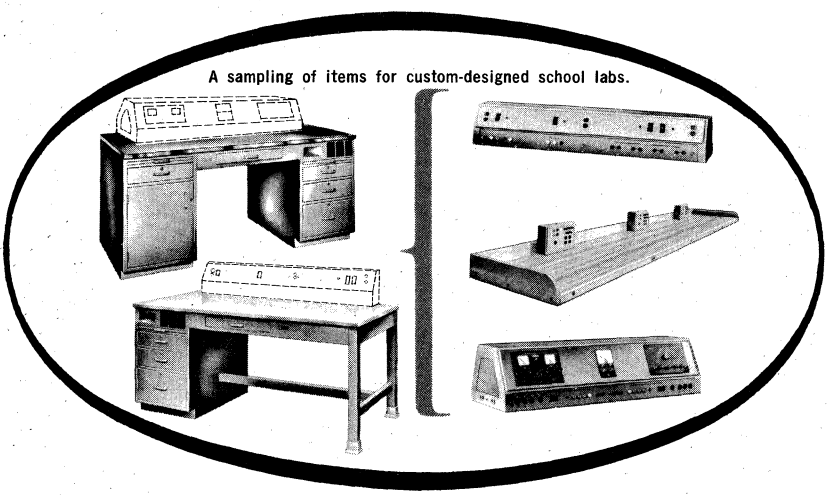
INDUSTRIAL • MILITARY • SCHOOL

APPLICATIONS

Formica's sectional electronic test furniture is designed *by* engineers *for* engineers to provide the utmost in serviceability. Individual prefabricated sections are constructed to afford the greatest possible number of combinations, then factory assembled to suit the exact requirements of your laboratory or classroom. Design features also provide at least 50% more available working area over other types now in use. Made of heavy gauge furniture steel, Formica's rugged construction means many extra years of service even in hard use.

•

For school purposes, the unusual adaptability of Formica's many specialized turrets and pedestals — whether for single or double set-ups — is illustrated in part below.



A sampling of items for custom-designed school labs.

LIGHTWEIGHT • RUGGED • SUBMERSIBLE CASES • FOR ELECTRONICS • INSTRUMENTATION AND FIELD USE

MORE THAN 400 USERS AND OVER 200,000 UNITS IN SERVICE

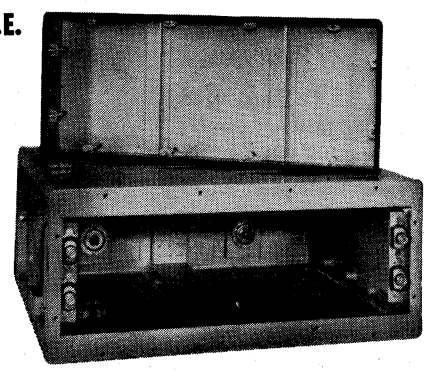
R.A.E. EQUIPMENT CASES

complicated electronic equipment fits standard cases using own or supplied chassis at the design stage • can be used in the field or with 19″ rack mounts without modification • sealing panel gasket completely weatherproofs your chassis when cover is secured, unit is submersible • front panels can be machined, engraved and finished to your specifications • spring loaded chassis support pins provide protection during excessive vibration and shock conditions • designed to permit easy handling in confined spaces such as tanks, aircraft and submarines • internal finish is black, to insure adequate heat dissipation, external finish to order • choice of cover depth to suit internal stowage fittings for accessories • rack mount brackets hinged to fold back when not in use are available as option

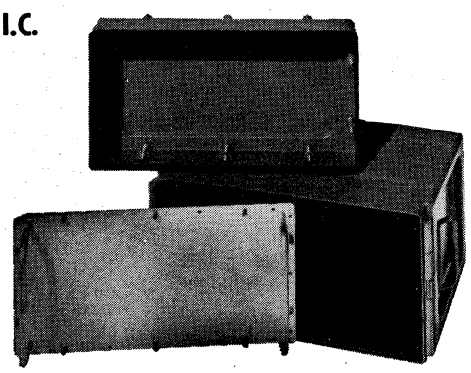
19 INCH EQUIPMENT CASES (E.I.C.)

accepts assemblies with standard 19″ panels for field use or transportation • when cover is secured unit is submersible • both panel and chassis are shock mounted • permits easy handling in confined spaces such as tanks, aircraft and submarines • special clamps provided to permit stacking • adequate circulation to insure heat dissipation • internal and external finish to order • standard cover depth permits stowage fittings for accessories

R.A.E.



E.I.C.



PROVIDES MAXIMUM USAGE • ACCESSIBILITY • HANDLING AND PROTECTION IN WORLD-WIDE ENVIRONMENTS

GENERAL SPECIFICATIONS both R.A.E. and E.I.C. Cases will accommodate equipment up to 80 lbs. • both have manual pressure release valves for use in air transporting • recessed spring loaded carrying handles are supplied with all C & N Cases • all cases have fully watertight cover screws, spring loaded to insure freedom from damage

OPTIONS provisions for rear entry can be supplied to order • modifications based around existing design concept can be incorporated • special fittings within cover can be supplied to order

NOTES:

1. Outside depths 4¾″ to 18⅜″ in 2″ increments for full width cases
2. Outside depths 7″ to 15⅜″ in 3″ increments for half width cases
3. Outside heights 8⁹⁄₁₆″ to 17⁵⁄₁₆″ for 19 inch cases
4. Panel heights 5¼″ to 14″ for 19 inch cases

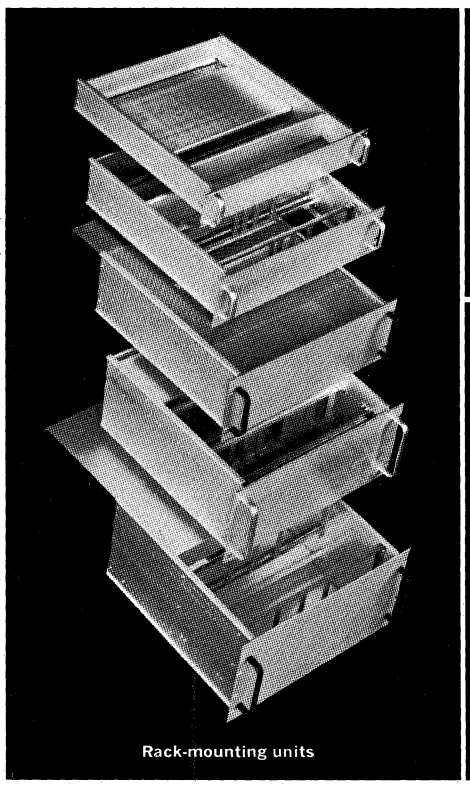
OMNICLOSURE®

Prefab chassis kits and parts ▪ Featuring the "Erector Set" concept ▪ IN STOCK FOR ONE-DAY SHIPPING

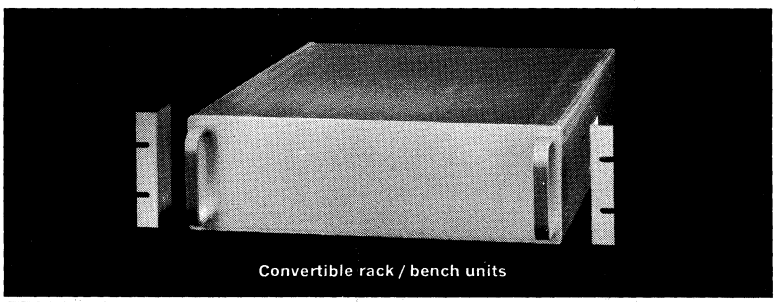
FEATURES □ Customized appearance at off-the-shelf prices for immediate delivery □ Modular dimensioning and pre-punched hole patterns permit hundreds of possible configurations □ Satin-surfaced aluminum with clear iridite finish □ Covers optionally slide or screw down □ Pre-mounted captive nuts for easy assembly □ Hardware included □ Many options for mounting components or PC Boards.

USE THEM TO... □ Eliminate chassis development and fabrication costs: design, tooling, production supervision □ Cut stocking costs: floor space, handling, inventory control, capital tie-up □ Prevent schedule delays caused by late delivery □ Standardize chassis among depts. and divs.

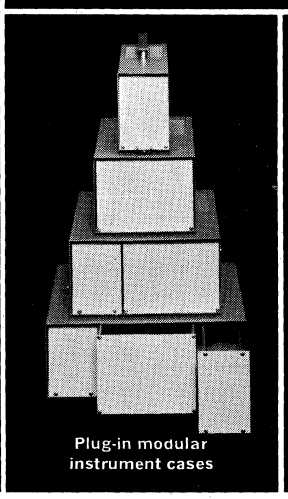
APPLICATIONS □ Prototypes □ Special-purpose systems □ Short to medium production runs □ Professional-looking breadboards □ Laboratory instrumentation, GSE, communications, data processing, medical electronics.



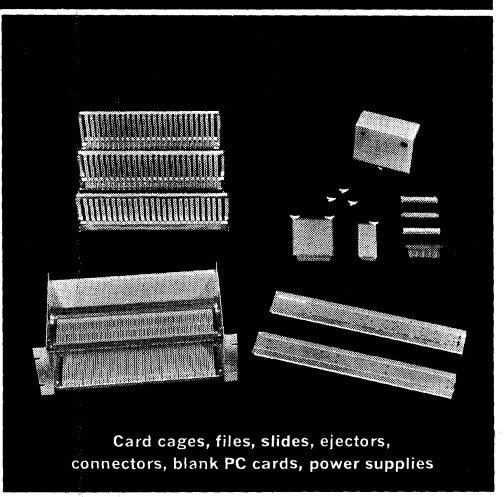
Rack-mounting units



Convertible rack / bench units



Plug-in modular instrument cases



Card cages, files, slides, ejectors, connectors, blank PC cards, power supplies

KITS Each basic kit consists of 1 front panel, 2 side frames, 2 cross plates, 2 sliding covers, 1 pair handles, hardware.

KIT NUMBERS			DIMENSIONS		
Rack Mount Kit No.	Bench Kit No.	Convertible Kit No.	Front Panel Height	Side Frame Height	Side Frame* Depth
RK 3	BK 3	CK 3	3½"	3.15	19.00
RK 5	BK 5	CK 5	5¼"	4.90	19.00
RK 7			7"	6.65	19.00
RK 8			8¾"	8.40	19.00
RK 10			10½"	10.15	19.00

*To adjust depth, side frame can be sawed off on ½" increments and rear panel can be reattached without redrilling.

Card File Kit (CF-7) includes end plates, chrome plated steel guide frames and connector rails, plastic snap-in guides, hardware.

Modular Instrument Cases (Mod Boxes) with plug-in chassis modules. Single modules are 7" high, 4⅜" wide, 12½" deep. Cases are 1, 2, 3 or 4 modules wide. Plug-ins are ½, 1, 2, 3 or 4 modules wide. Top and bottom ventilation. Optional handles for portable applications.

CARD CAGES (To make chassis into card drawers.) Each cage sub-kit includes guide frames, connector rails, snap-in guides, hardware.

Card Cage # (add as dash # to kit #)	Height of Mating Chassis	No. of Card Rows	Max. Cards p/ Row	Min. Card-to-Card Centers-Edge Type	Min. Card-to-Card Centers-Offset Type
CC4-1R	5¼"	1	37	.4	.6
CC4-2R	5¼"	2	37	.4	.6
CC4-3R	5¼"	3	37	.4	.6
CC5-1R	7" or Higher	1	37	.4	.6
CC5-2R	7" or Higher	2	37	.4	.6
CC5-3R	7" or Higher	3	37	.4	.6

KIT OPTIONS (Add one or more dash numbers to basic kits)

Front panel thickness—3/16" instead of 1/8" ..... add -316
Full bottom plate instead of 1 cover and 1 cross plate ..... –FB
Solid covers instead of perforated ..... —SC
Black anodized handles instead of clear anodized ..... –BH
No "erector set" hole patterns in side frames ..... –NH
Locking Slides (ball-bearing) ..... —LS
Quick-disconnect locking slides ..... —QDLS
Tilting quick-disconnect locking slides ..... —TQDLS
Ejectors ..... (quantity & —E)
Connectors ..... (specify type)
Power Supplies ..... (specify voltage & current)

ONE DAY SHIPPING – Standard kits and parts in small to medium quantities are shipped one day after receipt of order. Catalog includes prices. On larger quantities, specials, connectors and power supplies, contact factory for price and shipping date.

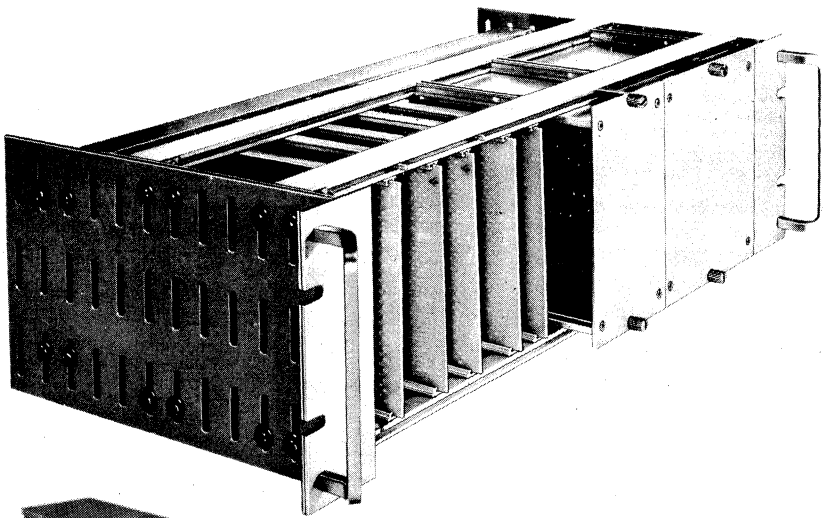
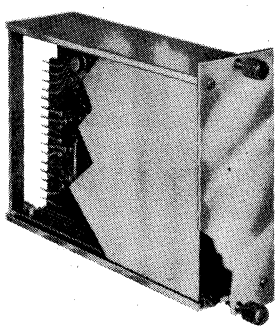
Vector PACKAGING SYSTEM FOR CARDS AND MODULES



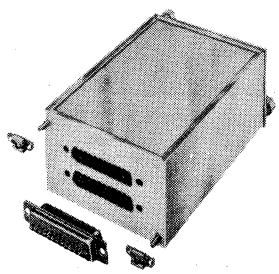
Vector Strut Cages are uniquely adjustable aluminum frames designed for mounting in 19" equipment racks which accommodate "EFP" Modules shown below, or cards. Vector Strut Cages are sold in kit form in three heights, 3-15/32", 5-7/32", 8-23/32", and three depths, 8.975", 11.975", and 15.725". Kits consist of the slotted side walls, cross members (Triple Tee Struts) and brackets, plus necessary assembly hardware. Vector Strut Cages sell for $19.00 to $27.00 in small quantities. Extruded aluminum card and case guides, EFP Modules, and handles are ordered separately as required. Each cage provides adjustment for varying module heights, and adjustment for varying module or card positions from side to side.

Special Models Available to Order



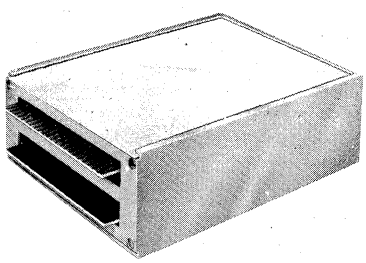
VECTOR "EFP" (EXTENDED FRONT PANEL) CASES

Vector "EFP" aluminum module cases are made in 60 different sizes to accommodate circuit boards from 2.7" to 7.9" wide and 4.6" to 14" long. All EFP cases will fit Vector Strut Cages shown above. EFP cases have identical top and bottom extruded rails with parallel .062" longitudinal grooves spaced as shown at bottom of page for holding circuit boards, slide out .062" side covers, front and rear panels. Captive thumb screws are provided.



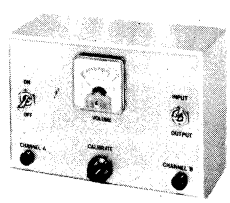
HI FREQUENCY CASES

For optimum IF shielding up to 400 megacycles of printed circuit cards. Unusual design with quickly removable top, slide out sides and inside 1/16" grooves for multiple circuit boards or boards and shields. Standard off-the-shelf sizes for 3" x 4-1/2", and 4-1/2" x 6-1/2" cards.



WRAP AROUND VECTOR PAK CASES

Wrap-around "Vector-Pak" Bottom Access cases are formed by mitering and bending aluminum extrusions shown below into a "U" shaped member and attaching a bottom plate. The finished result is a handsome plug-in case for circuit cards or an attractive instrument case with parallel .062" grooves. Covers slide off or may be blocked by using a wide bottom plate. Standard cases of various sizes are available.



(Packaged Instrument in Multi-Mod Case)

MULTI-MOD CASES

Versatile Multi-Mod Cases can be used for small instruments and circuit packaging where appearance and utility are important. Slotted inner surfaces on four sides hold circuit cards or mounting ing plates, eliminating unsightly screws in case exterior. Access is easy by removing base plate. Available in extrusion widths below and lengths from 3.1" to 14"; and heights from 3.1" to 8".

All listed widths are stocked two ways: (a) with square cut ends and overall lengths of 4.525", 6.525", 9.640", 13.840", 24"; (b) with 45° miter plus corner fasteners in overall lengths of 2.87", 3.11", 4.61", 4.91", 6.61", 8.0", 8.61", 10.0", 14.0", 17.1". Extrusion details apply to all plug-in cases shown above.

VECTOR ALUMINUM FRAME LOC EXTRUSIONS USED IN ABOVE CASES
ALSO AVAILABLE IN CUT LENGTHS

VENT RAK ®

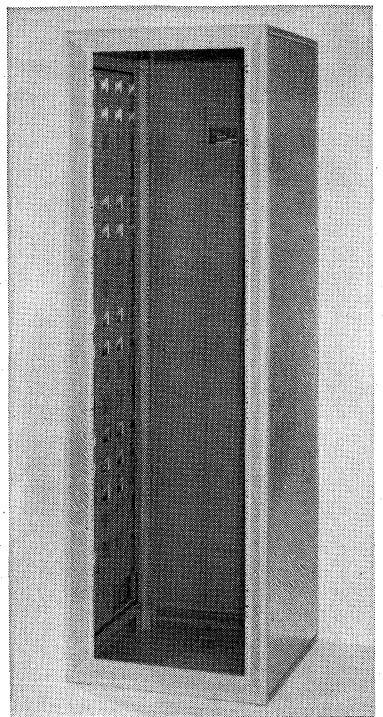
VENT-RAK CABINET LINE ENGINEERING DATA SHEET

VENT-RAK OFFERS A FULL LINE OF ELECTRONIC PACKAGING COMPONENTS

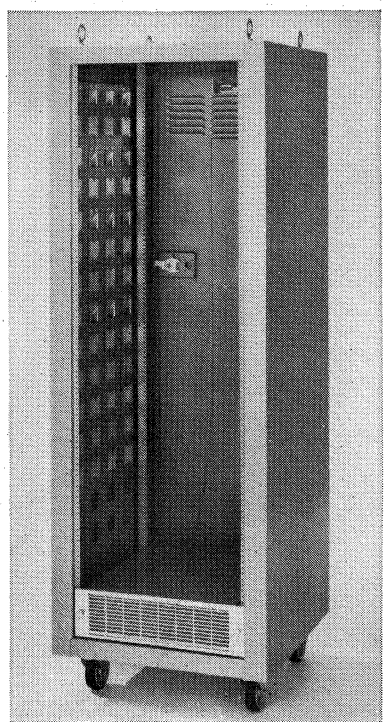
Included in Vent-Rak's full line of electronic packaging components are cabinets, slides, chassis, cable retractors, handles, dollies, blower assemblies and front panels.

The Vent-Rak line of heavy-duty enclosures meets commercial and military specifications. The heart of the Vent-Rak line is the unique frame design, rugged construction, ease of accessibility and economy.

Offering a single source for all your electronic packaging requirements, Vent-Rak will supply standard or semi-standard cabinets as shown on this page, or will custom design an enclosure to meet your own specifications.



1000 SERIES



3000 SERIES

1000 Series—All heli-arc welded fabrication—Perfect for military application—Steel fabrication is standard, aluminum optional—Side panels engineered for ease of installation and accessibility, front door optional—Flush chrome door latches with or without keylock—In forced-ventilation models, air flow panel is permanently fastened to side panel, and does not sacrifice interior space—

3000 Series—Medium-duty industrial or military cabinet—heli-arc welded fabrication—precision drilled and tapped RETMA pattern on front rails—hinged rear door—solid side panels—provisions for casters and eyebolts—optional louvered top or sides—optional rear mounting angles—

5000 Series—Rugged, self-aligning, all-steel frame with unique cross-section construction—Assembled quickly with ordinary hand tools—Instantly removable side panels—Louvers standard on sides and optional on tops—Single or multiple installation—Full line of accessories—

5050 Series—Used for housing complete package, or supplement to your present installation—Exceptionally rugged frame and all-steel construction—Removable side panels—Interior components interchangeable with Vent-Rak 5000 Series Cabinets—

Some of these models are available from distributors, or for more information, write:

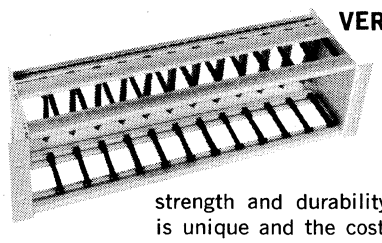
NEW *Fast, Simple and Economical* COMPLETE PACKAGING SYSTEMS *From* VERO

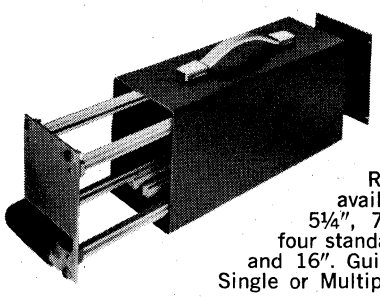
VERO INTRODUCES THE ULTIMATE PC CARD FRAMES • VERORACK SYSTEM 3

VERORACK SYSTEM 3



The ultimate PC card frame featuring variable card spacing from .4" up. This rack combines beauty, strength and durability. Connector mounting is unique and the cost is low.

VERO MODULE CASES



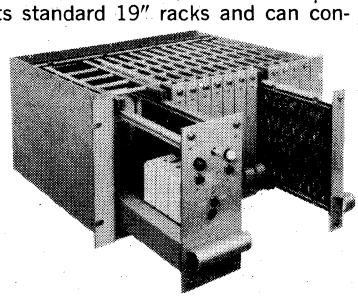
A line of Portable Module Cases has been designed for use in conjunction with standard modules from the Vero Module Rack. The cases are available in three heights, 5¼", 7" and 8¾" and in four standard widths, 4", 6", 8" and 16". Guides are included for Single or Multiple Module Mounting.

VERO MODULE RACK

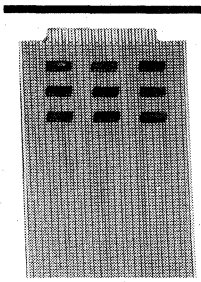
OVER 450 ASSEMBLY COMBINATIONS — DELIVERY FROM STOCK — GREATEST FLEXIBILITY AT LOWEST COST

The Vero Module Assembly — another phase of the Vero circuit concept — provides a fast, simple and inexpensive method of circuit packaging.

The Vero principle of versatile standardization has produced a module which fits standard 19" racks and can contain any combinations of 1", 2", 4", 8" or 16" pull out modules. It is available in 5¼", 7" or 8¾" heights and 11" or 14" depths.



This rugged ⅛" aluminum units is also available as a composite of modules and printed circuit cards for the ultimate in flexible circuit assembly.



VEROBOARD*

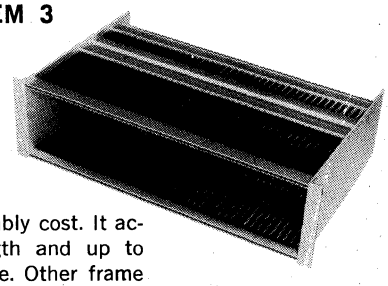
Hole Patterns — .050 x .050, .1 x .1, .150 x .150, .156 x .1, .2 x .2, .2 x .1.

Over 200 Standard Sizes — Single and Double Sided x-y pattern.

Material — XXXP and FR-4 Epoxy Glass.

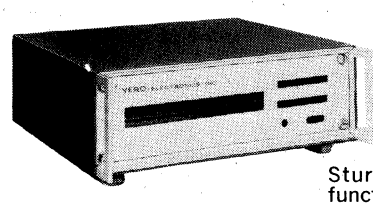
*Patented.

VERORACK SYSTEM 3



Features standard .5" card spacing with polycarbonate guide slabs that slide with precision extrusions. This rack is versatile, rigid and low in assembly cost. It accepts cards any length and up to 4½" high in ¼" frame. Other frame heights are also available.

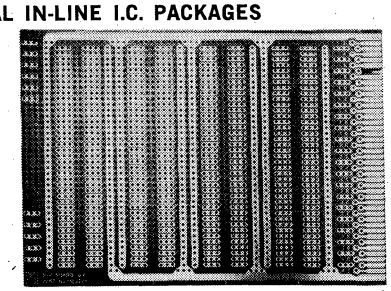
VERO INSTRUMENT CASE



An attractive new range of of instrument cases available in heights from 3½" to 10½" to accept 19" wide racks. Sturdy construction and functional design are featured.

VERO D.I.P. BOARD

FOR DUAL IN-LINE I.C. PACKAGES



- .1 x .1 hole pattern with .041 dia. holes
- Accepts D.I.P. socket or direct I.C. plug in
- Gold plated contacts with connectors to match
- Boards available in epoxy glass ⅛ thick or low cost paper
- Complete versatility with continuous isolated pads on .1 centers holds 20 D.I.P.s on 4.5 x 6.5 board
- Power and ground buss plus test points all on one side of board
- Reverse side printed with grid to ease component location
- Vero handle location indicated

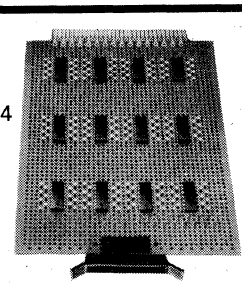
VERO "FINGER BOARDS"

Hole Patterns — .1 x .1, .052 dia.

Material — ⅛ Epoxy Glass, FR-4.

Connector Fingers — 22 x .156, 44 x .156, 16 x .1, 32 x .1.

OFF THE SHELF IN SIZES TO FIT ALL CARD FILE SYSTEMS



COMPLETE RANGE OF CONNECTORS, TERMINAL PINS, MODULE CASES AND ACCESSORIES. BASIC VERO SYSTEMS CAN BE QUICKLY MODIFIED TO MEET CUSTOMER REQUIREMENTS.

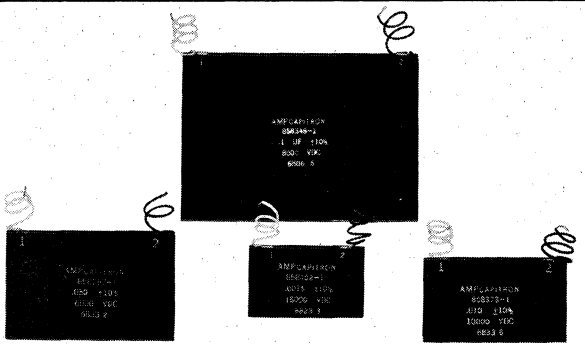
AMPLIFILM★ HIGH VOLTAGE CAPACITORS 2,500 to 60,000 VDC

INDUSTRIAL • MILITARY • COMMERCIAL

The CAPITRON★ Division of AMP Incorporated has specialized in the development of a diversified line of high voltage capacitors that provide outstanding performance characteristics. AMPLIFILM dielectric capacitors feature monolithic construction which results in substantial size and weight reduction, making them particularly suitable for use in high voltage power supplies, modulators, pulse forming networks, etc. AMPLIFILM capacitors, custom or stock, are designed to your exacting requirements as to size, shape and performance.

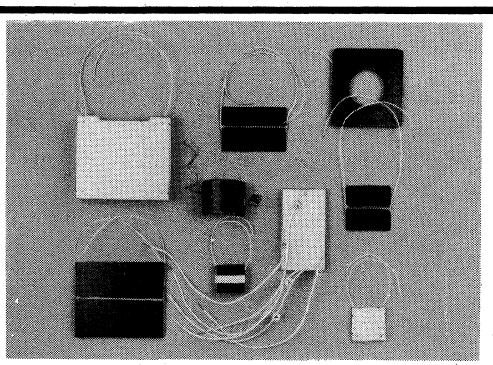


AMPLIFILM★

WAFER CAPACITORS FOR TEMPERATURES UP TO 125° C

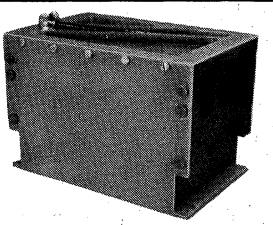
The basic element in these capacitors is AMP's AMPLIFILM dielectric, interleaved with copper foils and bonded with a non-polar thermoplastic resin specially selected for its excellent dielectric qualities. Heavy gage foil and molded construction combine to make these components ideal for rugged high voltage oil-filled or encapsulated assemblies.

- Operating temperature: —55° C to +125° C
- Capacitance range: 100 $\mu\mu$f to 1.0 μf
- Voltage range: 2,500 to 60,000 volts DC
- Power factor: 0.5% max.
- High insulation resistance
- Conforms to MIL-C-19978 where applicable
- Moisture resistant
- Very low dielectric absorption: less than 0.2%
- Wafer sizes from 1 sq. in. to 36 sq. in.
- Many configurations available



Configuration variety of AMPLIFILM ★ wafers

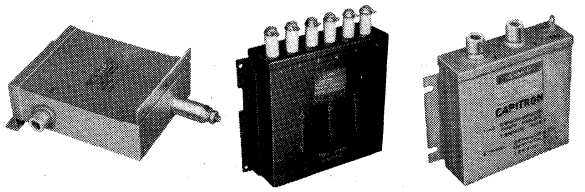
For complete information write for 858 Series AMPLIFILM capacitor catalog.



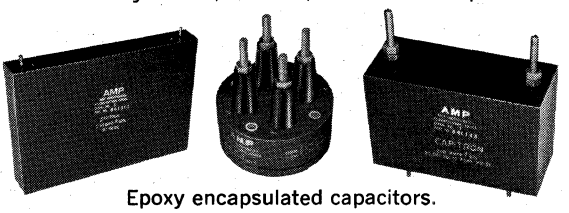
A typical AMPLIFILM capacitor assembly. Even **before encapsulation,** the exclusive dielectric construction provides moisture resistance meeting MIL-STD-202 (Method 106), making possible an energy efficiency greater than 0.6 joules per cubic inch without the encumbrance of a metal case.

- Capacitance: 0.1 μf ± 5%
- Voltage rating: 40,000 volts DC
- Power factor: 0.5% max.
- Temperature Range: —55° C to +100° C
- Size: 4½" x 4½" x 6½" max. (exclusive of frame)
- Weight: 9½ lbs. (exclusive of frame)

CUSTOM-PACKAGED AMPLIFILM HIGH VOLTAGE CAPACITORS



Hermetically sealed, oil-filled, metal cased capacitors.



Epoxy encapsulated capacitors.

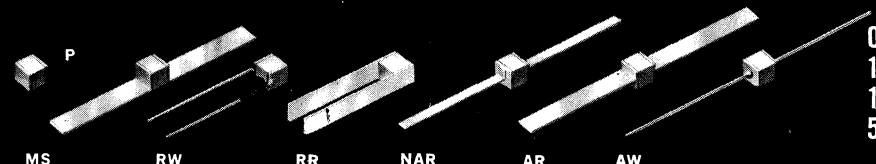
MICROWAVE PORCELAIN ATC-100



0.03 dB INSERTION LOSS
1.05:1 VSWR
10,000 Qu
50. WATT POWER INPUT

MICROWAVE CHARACTERISTICS

ATC Microwave Porcelain Capacitors are designed to advance the state-of-the-art in broadband, high power and low noise applications. Unique construction techniques provide ultra-high unloaded-Q (10,000 at 100 MHz in a 10 PF unit), with loss tangents lower than 0.0001, and self-resonance near X-Band.

ELECTRICAL CHARACTERISTICS

EXCEEDS MIL-C-11272B (Complete Test Data available)

INSERTION LOSS: Less than 0.03 dB @ 10 watts @ 1 GHz

VSWR: 1.05:1

POWER HANDLING CAPABILITY: 50 Watts for $X_c < 1\ \Omega$

TEMPERATURE RANGE: From —55°C to 125°C (no derating of working voltage)
From 125°C to 200°C derate linearly to 50% @ 200°C

TEMPERATURE COEFFICIENT OF CAPACITY: (Measured @ 1 MHz) + 90 ±20 PPM/°C (—55°C to 125°C)

QUALITY FACTOR (Qu): Greater than 10,000 @ 100 MHz (10PF)

INSULATION RESISTANCE: For 200, 300, 500 WVDC Units: 1,000,000 megohms min @ 25°C, 100,000 megohms @ 125°C, for 100 WVDC units: 10^5 Meg. Ω @ 25°C, and 10^4 Meg. Ω @ 125°C

CAPACITY RANGE: From .1 PF to 1000 PF (for higher values, consult factory)

TOLERANCES AVAILABLE: ±.1 PF, ±.25 PF, ±.5 PF, 1%, 2%, 5%, 10%, and 20%

OPERATING VOLTAGES: From .1 PF to 100 PF (500 WVDC), 110 PF to 200 PF (300 WVDC), 220 PF to 470 PF (200 WVDC), 510 PF to 1000 PF (100 WVDC)

CASE SIZE: (.1" by .1" square: "B" Case)—See ATC Lead Types. For special sizes consult factory.

DIELECTRIC TEST VOLTAGE: All units tested at 250% of WVDC rating for 5 secs.

SELF RESONANT FREQUENCY: From 2 to 10 GHz (determined by value and lead style)

PIEZO-ELECTRIC EFFECTS: None

ELECTRICAL CHARACTERISTICS AFTER LIFE TEST*

CHANGE IN CAPACITANCE: At 25°C — 0.1% max

QUALITY FACTOR: Greater than 10,000 @ 1 MHz

INSULATION RESISTANCE: 1,000,000 megohms min @ 25°C, 100,000 megohms min @ 125°C (for 100 WVDC units, 10^5 Meg Ω @ 25°C, and 10^4 Meg Ω @ 125°C)

*Life tested at 150% of rated voltage for 2000 hours at +125°C as per MIL-STD-202C method 108A (test condition F.)

APPLICATIONS

Constant-capacitance matching and coupling in octave bandwidth microstrip and stripline L and S-Band amplifiers, swept L.O.'s, mixers, synthesizers, and switches.

Low-loss signal paths for low noise receivers.

Coupling and by-passing for low and high power UHF transmitters.

Excellent first base-shunt elements in low-pass Matthaei wideband interstages.

Utilization in base and emitter by-passing, as well as coupling applications, where extremely low inductance is required.

Applications in ultra-stable oscillator sources where absolute retrace and minimal drift (less than .1%), as well as low inductance, are an important factor, particularly over environmental extremes.

Use in RF tank circuits where high circulating currents or where stability and Q are important factors. Use in timing and control circuits demanding high stability under extreme environmental conditions.

High Q DC blocks in wideband varactor-tuned sweepers.

Compact stable elements for use in low-distortion and narrow pulse width, high PRF delay lines.

Low and high values of capacity where close tolerances and high stability are required in HF and VHF filter design. (See ATC-100 Capacity Values)

Single-replacement for multiple-capacitor collector and base by-passes.

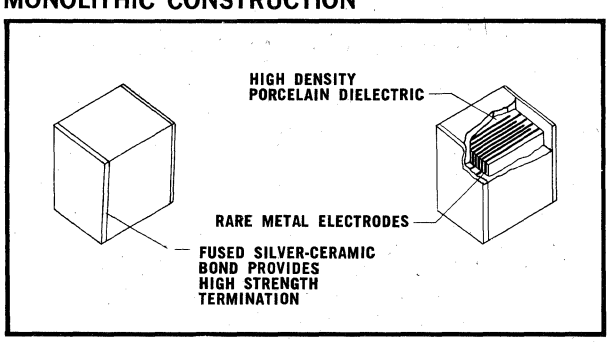
Pellet styles for input-matching and pseudo-idler circuits of high-ratio step-recovery multipliers.

Where state-of-the-art high Q_U capacity-vs-size microminiaturization is required.

SELF-ENCAPSULATED MONOLITHIC BLOCK

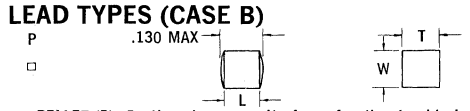
Self-encapsulated by its own extremely dense, low-loss porcelain, molecularly fused into a homogeneous miniature cube; provides a very rugged non-porous block unaffected by moisture, contaminants, shock, vibration, and altitude.

SELF-ENCAPSULATED MONOLITHIC CONSTRUCTION

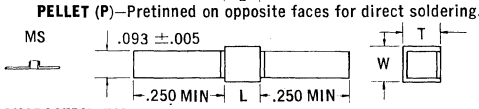


TO ORDER ANY AMERICAN TECHNICAL CERAMICS CAPACITOR SEE PAGE 8

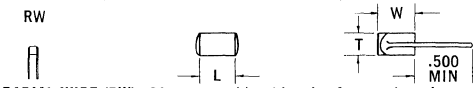
ATC LEAD TYPES (CASE B)



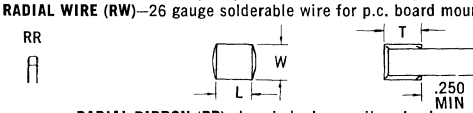
PELLET (P)—Pretinned on opposite faces for direct soldering.



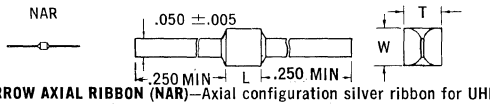
MICROSTRIP (MS)—Silver ribbon leads for single-sided UHF substrates.



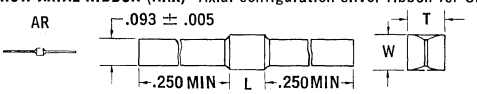
RADIAL WIRE (RW)—26 gauge solderable wire for p.c. board mounting.



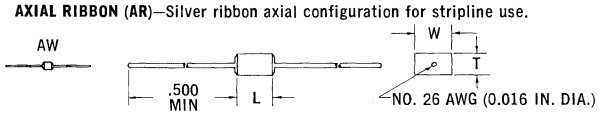
RADIAL RIBBON (RR)—Low inductance silver leads.



NARROW AXIAL RIBBON (NAR)—Axial configuration silver ribbon for UHF circuits.



AXIAL RIBBON (AR)—Silver ribbon axial configuration for stripline use.



AXIAL WIRE (AW)—26 gauge solderable wire for cordwood packaging and point-to-point wiring. (Weldable wire available)

All dimensions are inches: Length (L) = .100 ±.010; Width (W) = .100 ±.010; Thickness (T) = .100 maximum. All lead types (except Pellets) available with body insulation where the capacitor body may come in contact with a chassis or other metal parts. All ribbon leads are .004" ±.001" thick silver.

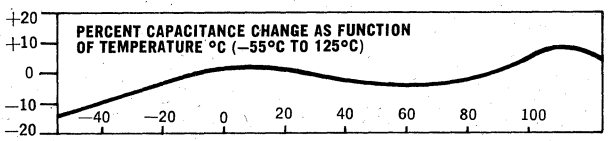
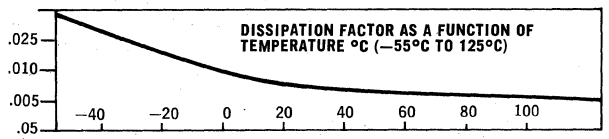
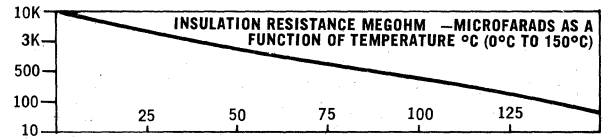
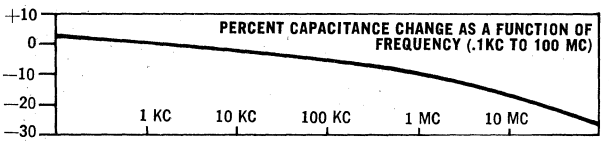
ATC-200 PERFORMANCE CURVES









HIGH PACKAGING DENSITY ATC-300

The ATC-300 Series is designed to attain extremely high values of capacity in a minimal case size for use over a moderate temperature range. Values from .1 MF to 1.0 MF are available in .1" square case.

ELECTRICAL CHARACTERISTICS

CAPACITY RANGE: .1 MF to 1.0 MF
TOLERANCES: 20%, 30%, GMV
WORKING VOLTAGE: 50 WVDC
TEST VOLTAGE: 3 x rated, for 5 secs.
INSULATION RESISTANCE: 1000 Megohms min
VOLUMETRIC EFFICIENCY: 1000 MFD/Cu inch
RECOMMENDED OPERATING RANGE: 10°C to 60°C
SELF-RESONANT FREQUENCY: Above 1 GHz
DISSIPATION FACTOR: 3% max @ 1 KHz
CASE SIZE: B case, .1" by .1" square
LEAD TYPES: See ATC lead types (Case B) page 3
CONSTRUCTION: Self-encapsulated monolithic block
TESTING SEQUENCE: CAP., D.F., I.R., V.D.C.

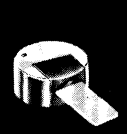
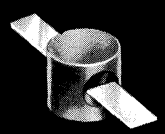
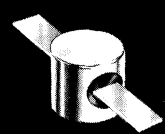
STRIPLINE CAPACITORS AND FILTERS ATC-400



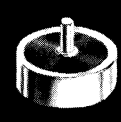
SH



SS



FT



FR

100. WATT POWER INPUT
0.03 dB INSERTION LOSS
1.05:1 VSWR
60. dB BY-PASSING

CONSTRUCTION

All ATC-400 styles have a rugged case with fused-in capacitor elements of self-encapsulated monolithic construction that can withstand the most severe military environmental tests.

This unique construction is extremely rugged mechanically; all leaded devices are capable of meeting a **10 lb. PULL TEST** along the axis of the lead.

The 400 Series **withstand great thermal shock,** insuring no intermittencies in your circuit caused by thermal stress due to high operating temperatures, heat generated by high RF current levels, or by installation of component.

MICROWAVE APPLICATIONS (by case style):

SERIES COUPLING:
CASE SS: DC block/RF coupling/RF tuning and matching. Conservatively rated at 100. watts of RF input power, and equally rugged mechanically. Typical UHF performance: VSWR of 1.05:1 with a 1.05:1 load; Insertion Loss less than 0.03 dB (e.g. less than 70. milliwatts of dissipation at full rated input power); Unloaded Q of 10,000 at 100. MHz (10 PF.); Loss Tangent of 0.00005, and inductance so low that self-resonance is well above frequencies of application.

SHUNT BY-PASS:
CASE FR: low inductance RF by-pass and dc connection through the STRIPLINE metallic backing directly onto the center stripline at any desired point, such as for Vcc input at end of Cob cancelling stub or at a $\frac{\lambda}{4}$ stub-end point.

CASE FR: low inductance RF by-pass and dc connection through the STRIPLINE features which typify the ATC-400 coupling capacitor also characterize the shunt-by-pass models, thus providing up to 60 dB of signal reduction in a single unit, depending upon line impedance level.

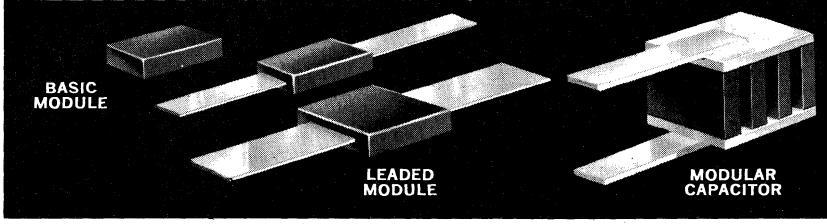
*Exceeds spec mounted by body, or in stripline package.

RF POWER MODULAR CAPACITORS ATC-500



1000 KVA/CUBIC INCH. VIRTUALLY UNLIMITED CURRENT AND CAPACITY RATINGS

WITH ATC MODULAR CAPACITORS...

...YOU CAN BUILD A CAPACITOR OF VIRTUALLY ANY VALUE, CURRENT AND VOLTAGE RATING...

Each modular capacitor (regardless of capacity value, voltage and current rating) is engineered for rapid, versatile interconnection. They may be paralleled to increase current and capacity ratings, series connected to increase voltage capabilities, or used in combinations of both series and parallel. For example: to obtain a capacitor with the following ratings: 1000 PF, continuous current rating of 150 Amps, and a peak test voltage of 5000 Volts. By paralleling eight Type MD modular capacitors of 125 PF [each MD module is .6" x .45" x .15" with a peak test voltage of 7000 and a maximum recommended current of 20 Amps], you can build a 1000 PF capacitor rated at 160 Amps and 7000 Volts.

...PACK UP TO 1000 KVA IN A CUBIC INCH...

The 1000 PF capacitor designed, occupies a volume of less than ⅓ of a cubic inch. ATC modular capacitors are often 10 to 100 times smaller than any other RF power capacitor of equivalent ratings (including pressurized gas and vacuum types). In fact, the 1000 PF capacitor you just designed, has higher power ratings than a standard ceramic vacuum fixed type that is 3¾" Dia. and over 2½" thick.

...AND IN THE SHAPE YOU WANT

This same 1000 PF capacitor may be made by electrically paralleling modules vertically, horizontally, or a combination of both, to attain a desired form factor.

SPECIAL HIGH VOLTAGE AND HIGH ALTITUDE TYPES

High voltage modular capacitors and high altitude types for operation in excess of 50,000 Ft., and Customer calculated design values are also available.* (SEE PAGE 8)

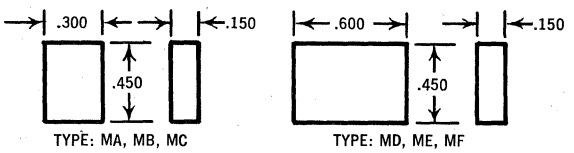
CONSTRUCTION AND RATINGS

Every ATC-500 modular capacitor has its internal structure completely embedded in a homogeneous dielectric of low-loss, high-voltage porcelain, so constructed as to prevent the RF arc-over, common at plate edges in stacked dielectric capacitors. The modular capacitors are available in two physical sizes and three RF voltage ratings (3000, 1000, 250). The MA, MB, MC sizes are all .300" x .450" x .150" with a capacity range from 10 to 5000 PF, and the MD, ME, MF sizes are all .600" x .450" x .150" with a capacity range from 20 to 10,000 PF.

MOUNTING HARDWARE: Gold flashed copper strap for individual axial leaded modular capacitors.

Gold flashed copper bus-bars for interconnecting modular capacitors. (Consult factory for all mounting applications)

ATC-500 MODULAR CAPACITORS



TYPE: MA, MB, MC — TYPE: MD, ME, MF

STANDARD VALUES PF

5.1	13	36	91	240	620	1600	4300
5.6	15	39	100	270	680	1800	4700

10	27	68	180	470	1200	3300	8200
11	30	75	200	510	1300	3600	9100
12	33	82	220	560	1500	3900	10000

APPLICATIONS

ATC-500 Modular Capacitors are used wherever high voltage, high RF current, low-loss capacitors are demanded, but space is limited, or the environment severe. Examples are: P.A. tank circuits; grid and plate blocks; fixed neutralizing capacitors; output matching, tuning, and trap circuits; low inductance high current by-passes; RF voltage dividers; in and beyond the BC and HF ranges.

ELECTRICAL CHARACTERISTICS:

TEMPERATURE COEFFICIENT OF CAPACITY: +90 PPM ±20 PPM @ 1. MHz (−55°C to 125°C)

TEMPERATURE COEFFICIENT TRACKING: Difference between capacitors less than 10 PPM

RETRACE: Less than 0.1%

CAPACITANCE DRIFT: Less than 0.1% or 0.1 PF, whichever is greater

VOLTAGE COEFFICIENT: From 0 Volts to full WVDC, no measurable change

SELF RESONANCE: Up to 1000 MHz

INSULATION RESISTANCE: (+25°C) — 10^6 megohms min
(+125°C) — 10^5 megohms min

VOLUMETRIC EFFICIENCY: 1000 KVA per cubic inch

QUALITY FACTOR: Greater than 10,000 @ 1 MHz

TOLERANCES AVAILABLE: 1%, 2%, 5%, 10% (customer selected non-standard values are available in tolerances as close as 1%)

MAXIMUM RECOMMENDED RATINGS

Modular Capacitors	Range of Values PF	WVDC	Dielectric Test Voltage DC	RF Voltage RMS	RF Current	KVA
MA	5-75	3500	7000	3000	10	15
MD	10-150	3500	7000	3000	20	30
MB	150-500	1200	2400	1000	10	7.5
ME	300-1000	1200	2400	1000	20	15
MC	1000-5000	300	600	250	10	2
MF	2000-10000	300	600	250	20	4

NOTE: All power ratings are based on "still air" measurements with minimal heat sinking. Since circuit mounting techniques, RF current levels, ambient temperatures, humidity, and altitude conditions, all have an effect on actual current and voltage ratings, a safe Design/Test procedure is to monitor the module body temperature, and insure it does not exceed 125°C by providing adequate heat sinking.

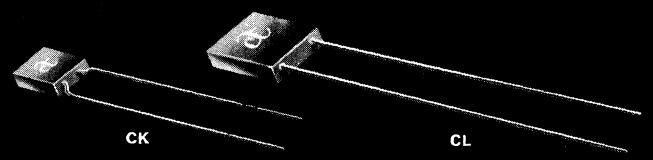
HIGH Q PRECISE TOLERANCE ATC-600



.25% TOLERANCES
.1% DRIFT
.1% RETRACE
5000 Q

ATC-600 offers greater volumetric efficiency and lower losses [(D.F. = 0.0002) in a CK05 case size (.2″ by .2″ by .125″)] than conventional glass, porcelain, ceramic, and mica types, while meeting all environmental and electrical parameters of MIL-C-11272B.

Precise capacity tolerances as close as ±¼ of 1% are available. The ATC 600 maintains its capacitance value under extreme changes in temperature, time, voltage, frequency, shock/vibration and hostile environments. Their guaranteed minimum Q of 5000 @ 1 MHz, negligible drift (less than 0.1%) perfect retrace (less than 0.1%), and unexcelled capacitance stability, means narrower bandwidth, drift free oscillators. An extremely broad range of values (1PF to 5000PF) is available in two small precise case sizes for upright mounting on 100 MIL GRID P.C. boards. Repeatability is assured since each ATC capacitor is manufactured under strict Quality Control standards starting with the formulation of the porcelain dielectric to 100% electrical testing of each capacitor.

ELECTRICAL CHARACTERISTICS

Exceeds: MIL-C-11272B
Temperature Coefficient of Capacity = +90PPM ±20PPM measured @ 1MHz
Temperature Coefficient Tracking: Difference between capacitors is less than 10PPM
Quality Factor: Greater than 5000 @ 1 MHz
Retrace: Less than 0.1%
Capacitance Drift: Less than 0.1% or 0.1PF (whichever is greater)
Capacity Range: 1 PF to 5000 PF
Dielectric Test Voltage: 250% x WVDC for 5 sec
Voltage Coefficient: From 0 volts to full WVDC, no measurable change
Voltage Derating: No derating to 125°C
Working Voltage Ratings Available: Case CK 500 V for 1-100PF, 300 V for 110 200PF, 200 V for 220-470PF, 100 V for 510-1000PF
Case CL 300 V for 1000-5000PF
Tolerances Available: ±.25% (20PF to 5,000PF), .5%, 1%, 2%, 5%, 10% and 20% are available from 10PF to 5000PF. Values from 1PF to 9.1PF (available only in ±.25PF and ±.5PF tolerances).
Insulation Resistance: 1,000,000 megohms minimum, @ 25°C, 100,000 megohms minimum @ 125°C
Dissipation Factor: @ 1KHz less than .0002
Moisture Resistance: 1R exceeds 10^{10} ohms, after Moisture Resistance Test per MIL-STD 202 Method 106, when measured at 25°C and 50% R.H.
Life: After 2000 hours @ 125°C with 150% x WVDC, capacitance change less than .1%

APPLICATIONS

Both the CK and CL case styles are designed for insertion in 100 MIL GRID P.C. boards and are ideal for high stability oscillators, extremely accurate delay lines, precision phase shifters, precise RC time constants, specific ratio dividers, sharp cut off filters, and low noise LF receiver front ends.

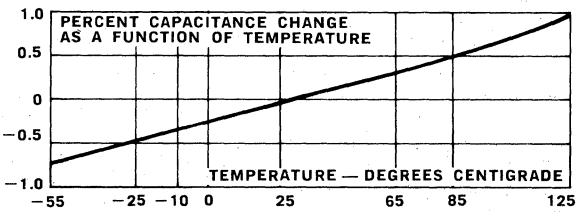
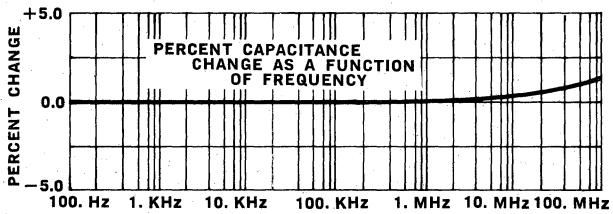
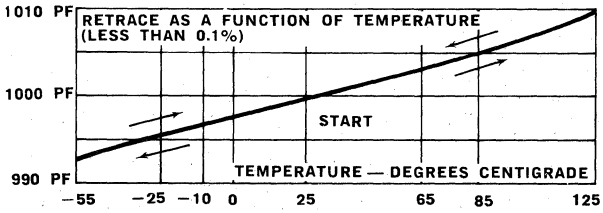
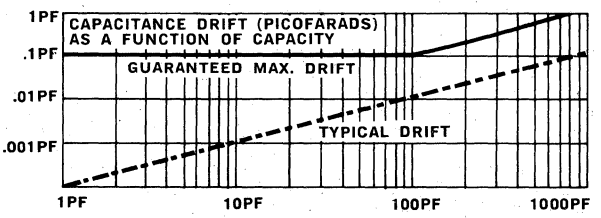
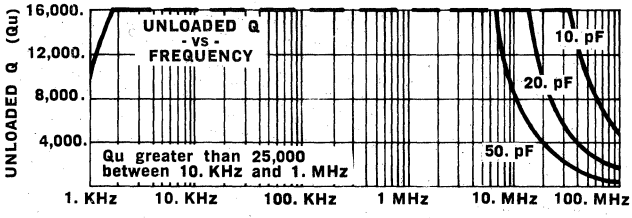
ATC-600 PERFORMANCE CURVES

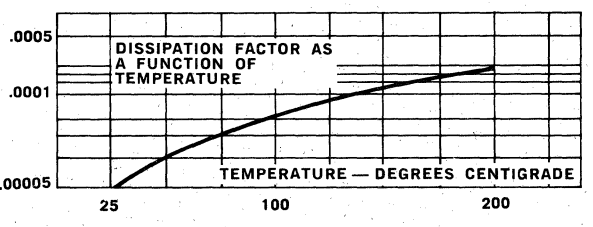


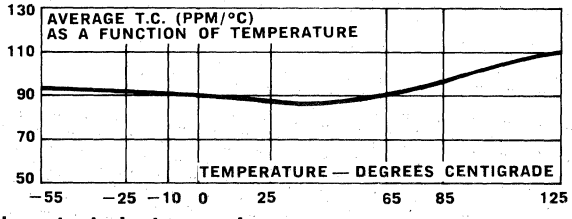


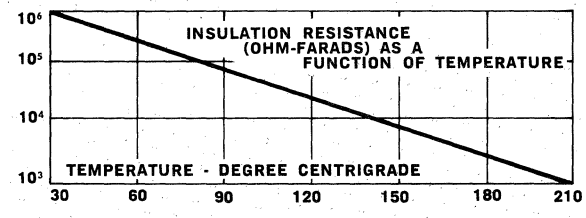












ATC CAPACITORS

advance the state-of-the-art with the widest range of parameters in the smallest packages available in the industry.

- **Q greater than 10,000 @ 1 MHz**
- **Insertion Loss less than .03 dB @ 1. GHz @ 10 Watts**
- **Highest volumetric efficiency: 1000 MFDS/CUBIC INCH**
- **Highest KVA/Unit volume: greater than 1000 KVA/CUBIC INCH**
- **Self-resonant frequencies up to 20 GHz**
- **Retrace and Drift below 0.1%**

TECHNICAL ASSISTANCE
An ATC microwave application engineer is available to answer any questions you may have regarding the use of ATC capacitors in your circuit.

If your capacitor requirements cannot be met with a standard ATC component, a capacitor design engineer is available to assist you.

SCREENED UNITS
Screening to your specifications, A, B, and C testing, and accelerated life testing for any of the ATC series are available. (ATC also maintains a separate RF test lab for screening all high current, high voltage ATC-500 modular capacitors.)

CUSTOMER CALCULATED DESIGN VALUES:
Are available for the ATC-500 Series and the ATC-600 Series; e.g. if your circuit requires a non-standard value such as 85.6 PF, (standard values being 82 and 91) ATC will supply it in extremely close tolerances (±¼ of 1% for ATC-600, ±1% for ATC-500 Series).

HOW TO ORDER ATC CAPACITORS

EXAMPLE: 6-ATC 100-B - 91 0 - F - AR - 500 - BI

- **QUANTITY**
- **ATC SERIES**
- **CASE TYPE**
- **FIRST TWO DIGITS OF THE CAPACITANCE IN PICOFARADS**
- **INDICATES NUMBER OF ZEROS FOLLOWING DIGITS OF CAPACITANCE IN PICOFARADS**

FOR VALUES LESS THAN 10. PF, or FRACTIONAL VALUES, USE LETTER "R" FOR DECIMAL POINT:

e.g.: 0.3 PF = 0R3
7.5 PF = 7R5

THE ABOVE EXAMPLE DESIGNATES: 6 ATC-100 "B" CASE CAPACITORS, 91 PF ±1%, AXIAL RIBBON LEADS, 500 WVDC AND BODY INSULATION.

NOTE: CHIPS ARE SILVERED CAPACITOR ELEMENTS.
PELLETS ARE PRE-TINNED CHIPS.

- **INDICATES SPECIAL BODY INSULATION. AVAILABLE ONLY ON ATC-100, 200, 300 SERIES, (EXCEPT CHIPS AND PELLETS)**
- **WVDC (ONLY SPECIFIED IF NON-STANDARD)**
- **LEAD STYLE**
- **DESIGNATES CAPACITANCE TOLERANCE:**

B = ±0.1 PF	G = ±2%
C = ±0.25 PF	J = ±5%
D = ±0.5 PF	K = ±10%
E = ±½%	M = ±20%
F = ±1%	N = ±30%

Z = GUARANTEED MINIMUM VALUE (–20% TO +80%)

T = ±¼% (600 SERIES ONLY)

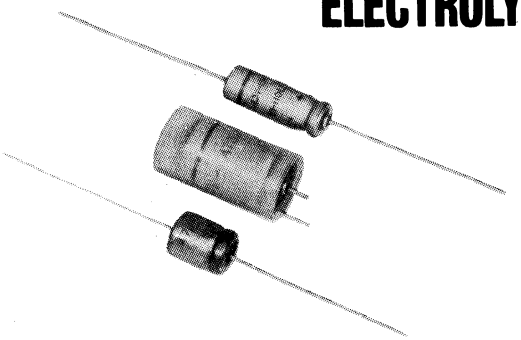
Amperex Capacitors

ELECTROLYTIC CAPACITORS



Amperex high quality, low cost electrolytic capacitors feature small size, high capacitance and long service life. Low leakage currents are achieved through the use of highly purified materials and carefully controlled manufacturing processes. They are the "dry" type with the liquid electrolyte absorbed into a layer of paper between cathode and anode foils. Winding is sealed in an aluminum can.

They are designed to operate at varied efficiences over a temperature range of −40°C to +85°C. The min. and max. temp. depends on the application; increase of impedance and losses are the limiting factors.

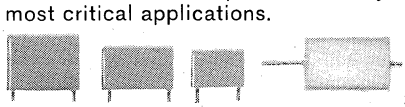
FILM CAPACITORS

Fixed Film Dielectric Capacitors

METALLIZED POLYCARBONATE

Metallized polycarbonate capacitors offer 125°C operation with no voltage de-rating, extreme capacitance stability with temperature, and low dissipation factor. High insulation resistance coupled with small physical size make these capacitors ideally suited for the most critical applications.

C280M Series



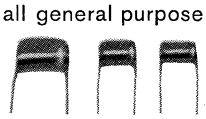
C281 Series

100VDC from .047 mfd to 6.8 mfd
400VDC from .01 mfd to 1.0 mfd
630VDC from .01 mfd to .47 mfd

METALLIZED POLYESTER

Available in 250VDC rating from .001 mfd to 2.2 mfd. Offer small size and cost advantages and are suitable for all general purpose applications.

C280AE Series



(Also available in C280M and C281 packaging configuration)

Variable Capacitors

CERAMIC DIELECTRIC

For high freq. temp.-compensating applications requiring low Zero capacitance. Feature high breakdown voltage, stability and accuracy of adjustment.

C004 Series
(typical configurations)

FILM DIELECTRIC

The CO10 is a general trimmer used when large Delta 'C' variations are required and space is limited. Adjustable top and bottom, available in following min.-max. ranges: 2pf-10pf, 5pf-20pf, 5pf-60pf.

C010/HT10 Series

HT10 TEFLON® SERIES

For applications requiring guaranteed Delta 'C' and where capacitance-variation is unaffected by temp. of 125° and higher. Same ranges as CO10 (above).

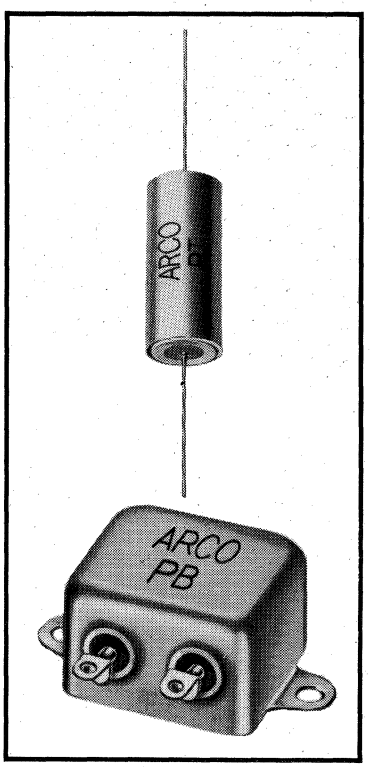
ARCO precision polystyrene capacitors

MANUFACTURING DIVISION



for military applications and hostile environments

type PT, CT and ST tubular

type PB, CB and SB rectangular bathtub cans

hermetically-sealed — metal case

Design innovations and extreme care in production have enabled ARCO to approach the optimum performance characteristics of the polystyrene film. These capacitors will exceed all performance requirements of MIL-C-19978 under ALL ENVIRONMENTAL CONDITIONS specified therein. ARCO polystyrene capacitors were specifically designed for the most critical applications where requirements for extremely high insulation resistance, high Q, extraordinary stability, close tolerance, and low dielectric absorption and dissipation factor are mandatory. These capacitors are intended primarily for use in ANALOG and DIGITAL COMPUTERS, CALCULATORS, HIGH Q TUNED CIRCUITS, INTEGRATORS, PRECISION FILTER CIRCUITS, PULSE NETWORKS, SERVO SYSTEMS, and as REFERENCE CAPACITORS.

specifications

DISSIPATION FACTOR: When measured at or referred to 1kHz the dissipation factor shall not exceed the following
.0001 at 23°C
.0002 at 85°C

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values

	23°C	*85°C
megohm x mfd	10^6	1.5×10^5
except the insulation resistance in megohms need not exceed	10^8	10^6

*NOTE: verified on 100% of production

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed 0.05% over the entire operating temperature range.

OPERATING TEMPERATURE RANGE: The ARCO capacitor types listed can be used for continuous operation from −55°C to +85°C without derating. Transient exposure to +95°C will have NO DELETERIOUS effect.

TEMPERATURE COEFFICIENT: The following temperature coefficient variants are available —

Type PT & PB	negative 120 ±15 PPM/°C
Type ST & SB	negative 120 ±15 PPM/°C
Type CT & CB	negative 175 ±15 PPM/°C

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed the following limits for the types listed.

Type PT & PB	±0.1%
Type CT & CB	±0.1%
Type ST & SB	±0.05%

VOLTAGE RATING: All ARCO capacitors are available in 100, 200, 400, 600 and 1,000 Volts DC ratings. Special voltages can be supplied upon request or to specification.

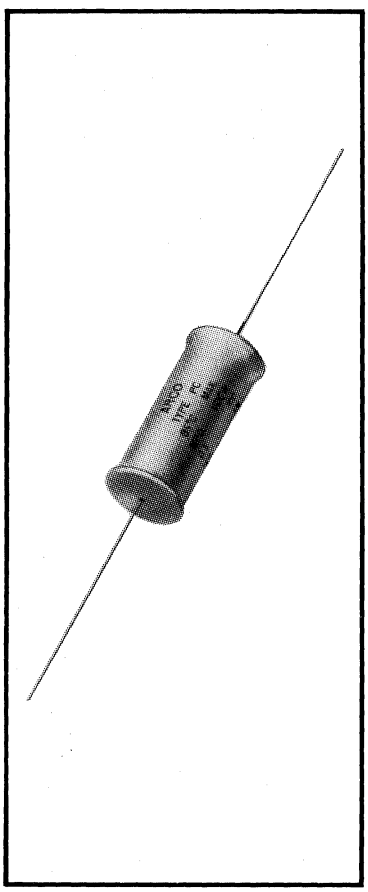
CAPACITANCE TOLERANCE: ARCO specializes in precision capacitors. Available from standard production are tolerances of ±10%, ±5%, ±3%, ±2%, ±1%, ±½%, ±¼%, ±0.1%.

BURN-IN: All ARCO capacitors are subjected to a minimum of two 16 hour burn-in periods with 300% of rated voltage applied at 85°C.

CONSTRUCTION: All ARCO precision polystyrene capacitor types here listed are hermetically sealed in metal cases with compression glass-to-metal, solder-sealed terminals. They are wound with a SOLID CORE in the center for optimum stability, and are terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance and exhibiting complete FREEDOM FROM MICROPHONISM.

ARCO precision polystyrene capacitors

MANUFACTURING DIVISION



superior environmental protection at low cost—smallest size

type PC & PJ tubular
type SC & SJ tubular

The unique design of Arco Type PC capacitors provides physical and electrical stability, ruggedness and strength of termination, and excellent uniformity in production. All these features enable tight control of the narrow specification limits published. Type PC offers the smallest, lowest cost construction available, while retaining optimum performance characteristics.

The Type PC enclosure provides unusual protection against moisture, solvents and inadvertent contact with a soldering iron. The rugged, heat resistant jacket material makes Type PC particularly suited to printed circuit dip-solder assemblies subject to solvent cleaning and also to densely packed component structures where there is danger of damage to adjacent units while making solder connections.

Extensive evaluation has confirmed the excellent moisture resistance of the type PC (surpassed only by metal cased enclosures) and its conformance to the most stringent shock and vibration specifications. Type PC capacitors are exceptionally well suited for PRECISION FILTERS, DELAY LINES, and PRECISION TIMING CIRCUITS, where small size and excellence of performance are mandatory at LOW COST.

specifications (See Page 606 for Electrical Characteristics)

CONSTRUCTION: The ARCO precision polystyrene capacitors types PC & SC are encased in an irradiated polyolefin jacket sealed with bonded silicone rubber. Types PJ & SJ are encased in a silicone treated fused polystyrene jacket. This unique construction economically protects the excellent electrical characteristics exhibited in types PC and SC and is primarily intended for use where they will not be subjected to the following hazards:

1. Physical damage due to excessive heat during dip or flow solder assembly.
2. Solvent damage during cleaning operations
3. Exposure to excessive humidity for prolonged periods of time.

All types herein listed are wound with a SOLID CORE in the center for optimum stability, and are terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance and exhibiting complete FREEDOM FROM MICROPHONISM.

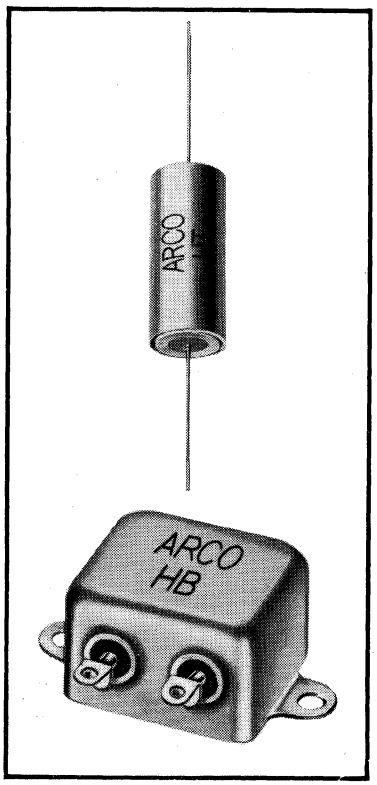
ARCO modified polystyrene capacitors

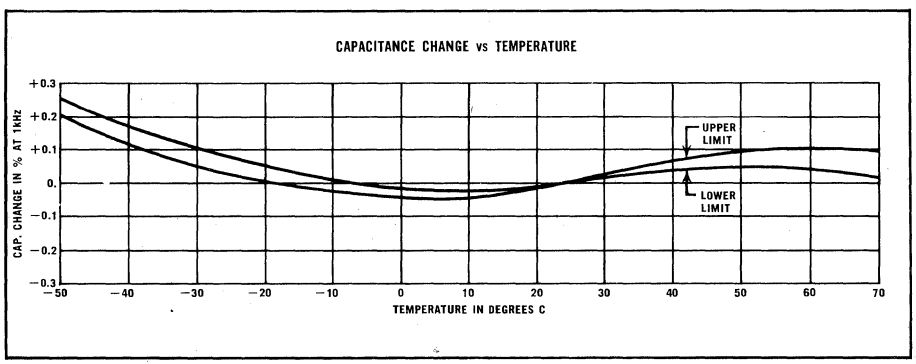
MANUFACTURING DIVISION



temperature-stable
small size
type HT tubular
type HB rectangular bathtub cans
hermetically sealed — metal case

An exclusive ARCO design modifying the temperature characteristics of the dielectric film to provide capacitors insensitive to temperature changes (±0.1% change to 85°C). Type HT and HB capacitors will meet ALL ENVIRONMENTAL REQUIREMENTS OF MIL-C-19978.

ARCO Type HT and HB capacitors are specifically designed for INTEGRATORS, PRECISION TIMING CIRCUITS, and PRECISION RC NETWORKS.



specifications

DISSIPATION FACTOR: When measured at or referred to 1kHz the dissipation factor shall not exceed 0.002 at 23°C

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values

	23°C	*85°C
megohm x mfd	10^6	1.5×10^5
except the insulation resistance in megohms need not exceed	10^8	10^6

*NOTE: verified on 100% of production

OPERATING TEMPERATURE RANGE: The ARCO capacitor types listed can be used for continuous operation from −55°C to +85°C without derating. Transient exposure to +95°C will have NO DELETERIOUS effect.

TEMPERATURE COEFFICIENT: The temperature coefficient of ARCO type HT and HB capacitors is controlled so that the variation of capacitance from room temperature to 85°C. is less than ±0.1%; from room temperature to −55°C. variation is less than ±0.25%. Tighter control is available to special order (±0.05% from 10°C to 50°C).

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed 0.05% over the entire operating temperature range.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed ±0.1%.

VOLTAGE RATING: ARCO type HT and HB capacitors are produced in 100 Volt DC rating. Other voltages to 1,000 volts can be supplied upon request.

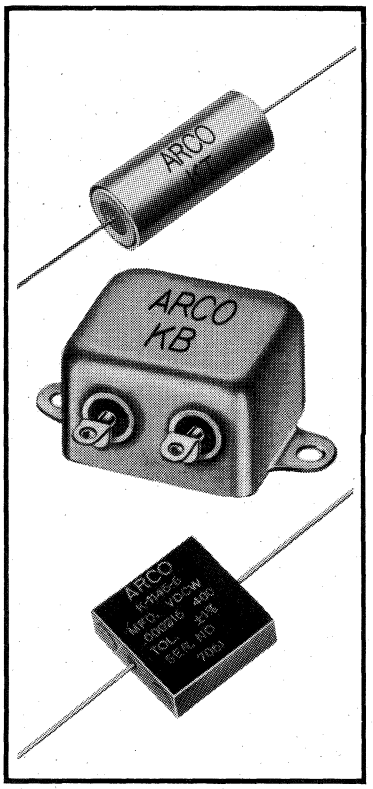
CAPACITANCE TOLERANCE: ARCO specializes in precision capacitors. Available from standard production are tolerances of ±10%, ±5%, ±3%, ±2%, ±1%, ±½%, ±¼%, ±0.1%.

BURN-IN: All ARCO capacitors are subjected to a minimum of two 16 hour burn-in periods with 300% of rated voltage applied at 85°C.

CONSTRUCTION: ARCO type HT and HB capacitors are hermetically sealed in metal cases with compression glass-to-metal, solder-sealed terminals. They are wound with a SOLID CORE in the center for optimum stability, and are terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance and exhibiting complete FREEDOM FROM MICROPHONISM.

ARCO polystyrene and mica precision capacitors

MANUFACTURING DIVISION



zero temperature coefficient

type KT tubular

type KB rectangular bathtub cans

hermetically sealed — metal case

type KE flat epoxy encapsulated

A unique combination of Polystyrene and Mica dielectrics resulting in a capacitor offering a truly ZERO TEMPERATURE COEFFICIENT (±10 ppm/°C from −55°C to +85°C standard production) with the ultimate in long term STABILITY. Type KT and KB capacitors will meet or exceed all requirements of MIL-C-19978, where applicable, under ALL ENVIRONMENTAL CONDITIONS specified therein.

ARCO Type KT, KB, and KE capacitors provide the utmost in performance for PRECISION-OSCILLATORS, TIMING CIRCUITS, and RC NETWORKS.

specifications

DISSIPATION FACTOR: When measured at or referred to 1kHz the dissipation factor shall not exceed the following
.001 @ 23°C

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values

	23°C	*85°C
megohm x mfd	10^5	10^3
except the insulation resistance in megohms need not exceed	10^6	10^4

***NOTE:** verified on 100% of production

OPERATING TEMPERATURE RANGE: The ARCO capacitor types listed can be used for continuous operation from −55°C to +85°C without derating. Transient exposure to +95°C will have NO DELETERIOUS effect.

TEMPERATURE COEFFICIENT: The temperature coefficient of Arco Type KT, KB, and KE capacitors is truly zero, they are usually produced to a tolerance of ±10 ppm/°C. They can also be produced to zero ±5 ppm°/C. The linearity of the temperature coefficient regardless of tolerance is ±1 ppm/°C. Other temperature coefficient centers may be supplied within the range of −100 to +20 ppm/°C THE TEMPERATURE COEFFICIENT OF THESE CAPACITORS **is tested on a 100% basis.** Data verifying these tests can be supplied at NO EXTRA COST as requested.

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed 1.0% over the entire operating temperature range.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed ±0.05%.

VOLTAGE RATING: Arco Type KT, KB, and KE capacitors are available in 100, 200, and 400 volts DC ratings (all supplied in the same case size). Other voltages up to 1,000 volts can be supplied upon request.

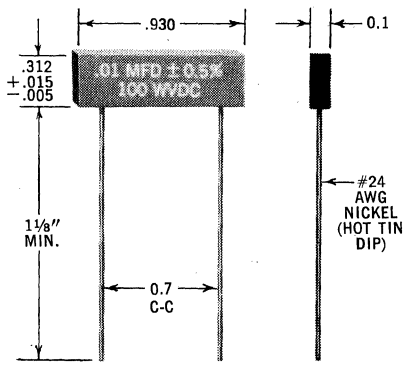
CAPACITANCE TOLERANCE: ARCO specializes in precision capacitors. Available from standard production are tolerances of ±10%, ±5%, ±3%, ±2%, ±1%, ±½%, ±¼%, ±0.1%.

BURN-IN: All ARCO capacitors are subjected to a minimum of two 16 hour burn-in periods with 300% of rated voltage applied at 85°C.

CONSTRUCTION: The Arco Type KT, KB, and KE capacitors are constructed by a unique combination of polystyrene dielectric sections with a linear negative temperature coefficient cross compensating a mica dielectric capacitor section with a linear positive TC. The polystyrene capacitor section is wound with a SOLID CORE in the center for optimum stability, and is terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance. The mica capacitor section is the well known Arco-Elmenco capacitor exhibiting highest reliability and performance characteristics. The individual capacitor sections as well as their combination have been constructed so as to guarantee all performance characteristics listed as well as complete FREEDOM FROM MICROPHONISM.

ARCO polystyrene capacitors

MANUFACTURING DIVISION



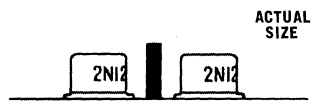
ALL tolerances except where otherwise specified ±0.005

type PE

Arco PFC Division announces availability of a new polystyrene dielectric capacitor with a thin configuration specifically designed for conservation of space in printed circuits and in filters. Flat polystyrene sections are encapsulated in uniform epoxy preforms to provide the following features:

0.1" thickness

Uniform lead spacing for p-c use.
Uniform size and flush mounting.
Both weldable and solderable leads.
Rugged, moisture proof construction.



WELDABLE LEADS
Nickel "A" (solderable, too) 0.7" spacing

SPACE SAVERS
10 capacitors per inch .312" high Flush mount

specifications

CAPACITANCE RANGE: .001 to .01 mfd (lower and higer values are available upon request). Maximum value .015 mfd.
TOLERANCE: ±5%, ±2%, ±1%, ±½%, ±¼%, ±0.1%.
VOLTAGE RATING: 100VDCW
INSULATION RESISTANCE: 10^{13} ohms minimum at 25°C — 10^{12} ohms at 85°C.
DISSIPATION FACTOR: 0.01% maximum at 25°C, — 0.02 maximum at 85°C.
DIELECTRIC ABSORPTION: 0.05% maximum at all temperatures.
TEMPERATURE COEFFICIENT: Negative 190 ±30 ppm/°C
LONG TERM OPERATING STABILITY: ±0.1% maximum drift under fixed or variable operating conditions within specified maximum limits.

All the above design advantages are accompanied by modest prices and quick delivery. Any value within the standard range (.001 mfd. to .01 mfd.) is in stock in all tolerances for immediate delivery (72 hours).

In addition to the physical advantages of this design, the electrical excellence of ARCO polystyrenes has been retained. High long term stability under maximum operating conditions, low dissipation factor and dielectric absorption, extremely high insulation resistance, close tolerance are featured. And also important is the ARCO control of quality which results in close uniformity not only from unit to unit, but from production lot to production lot as well.

The Nickel "A" leads of ARCO Type PE capacitors are welded directly to the capacitor section. The strength and permanence of electrical contact is thereby entirely independent of encapsulation.

All Arco Type PE capacitors are "debugged" 100% prior to shipment by accelerated life test at stress levels exceeding ratings to eliminate potential early failures. Extensive data on reliability of Arco polystyrene capacitors is available for documentation

precision RC networks

the ultimate in temperature coefficient control of RC product.

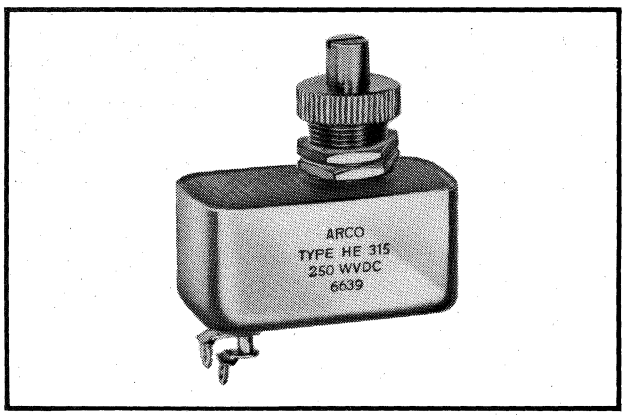
linear TC of ±5 ppm/°C over temperature range of −55°C to +85°C.

ARCO's ability to produce capacitors with adjustable and closely uniform characteristics has facilitated the design of highly precise RC networks. By matching zero temperature coefficient resistors and capacitors, or by balancing temperature coefficients to obtain a zero (or other specified) T.C. on the RC product, networks which have long term stability independent of temperature are obtained. At the same time, RC products of better than ±0.05% accuracy can be supplied. Testing is performed on a 100% basis on both resistors and capacitors with temperature coefficient data recorded at the temperature extremes.

ARCO variable compression-type mica capacitors

MANUFACTURING DIVISION

hermetically sealed



ARCO introduces the first hermetically-sealed variable compression-type mica capacitor. Designated as Types HE-30 and HE-30M, these units employ a specially designed enclosure that protects them against the effects of moisture, pressure variation, fungus, salt spray, dust, and mechanical damage. Additionally, the case provides effective electrostatic shielding.

The basic capacitor design is the time-tested Type 30 padder with established reliability verified by more than 25 years of operational experience.

The enclosure measures 1 9/16" by 15/16" by 3/4" deep. The drawn brass can is hot tin dipped and all mechanical parts are nickel-plated brass. The capacitor element is completely insulated from the case and connection is made at the rear by means of two lugs mounted on glass-to-metal seals. The unit is designed for single-hole panel mounting using a 15/32" — 32 bushing. A bushing nut is furnished as part of the assembly. Rotational control can be either by means of a screwdriver slot at the end of the 1/4" shaft or by means of a standard knob of the user's own choice. The rotary shaft seal enhances the stability of the shaft setting under conditions of shock and vibration. For complete locking of the shaft after adjustment, an accessory shaft lock is available. This shaft lock also provides redundant humidity protection where the ultimate in reliability is needed.

The HE-30 is a 250VDC rated series in 14 discreet capacitance ranges from 15-130 PF to 1400-3055 PF. The HE-30M is a 500VDC rated series, also in 14 similar ranges from 15-120 PF to 1200-2525 PF. These are guaranteed minimum ranges in three turns of adjustment. Dissipation factor at 1MC is better than .001. Insulation resistance is better than 100,000 megohms.

Stability of the capacitance varies with the particular setting, however, a conservative design limit is a maximum of ±3% change caused by all combinations of temperature cycling, vibration, shock, hysteresis, etc. As the extremes of environment are reduced toward laboratory conditions, the stability will be improved at least ten-fold or to ±0.3%. Operating temperature range is −55°C. to +85°C.

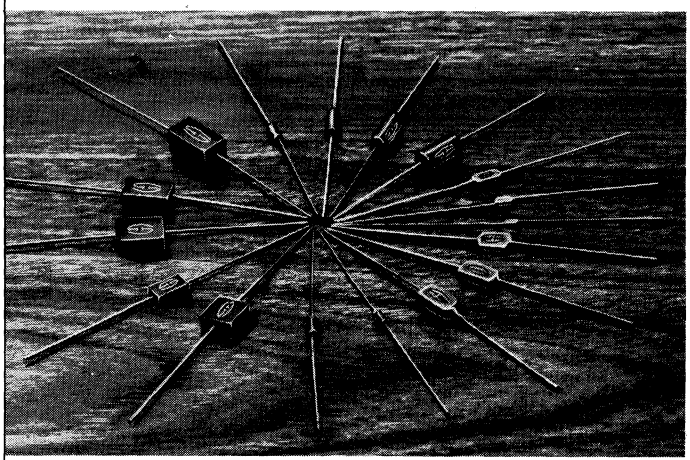
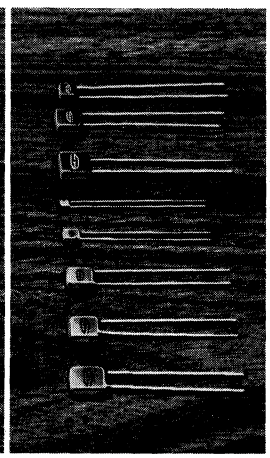
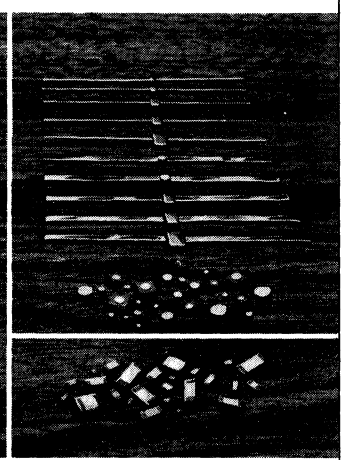
CAL-R® INC. CERAMIC CAPACITORS







Cal-R microminiature ceramic capacitors are manufactured using unique proprietary methods of construction resulting in highly reliable performance characteristics. ■ Having developed advanced technologies in ceramic materials, Cal-R manufactures all the ceramic ware used in their capacitors. This in-house ceramic capability guarantees uniformity and reliability. ■ Cal-R ceramic capacitors have outstanding performance history on major military, space and industrial electronic programs where small package size and high reliability are essential.

AXIAL LEAD CAPACITORS

250 and 300 Series — DIPPED
Size: 7 sizes — from .190 long x .075 diameter.
Capacitance Range: From 1 pF thru 1.0 mFd.
Voltage: 50 WVDC and 200 WVDC.
Capacitance Tolerance: From ±5%.
Dissipation Factor: 2.5% maximum.
Temperature Range: —55°C to +150°C.
with no derating.

250 and 300 Series — MOLDED
Size: 7 sizes — from .200 long x .100 diameter.
Capacitance Range: 1 pF thru 1.0 mFd.
Voltage: 50 WVDC and 200 WVDC.
Capacitance Tolerance: From ±5%.
Dissipation Factor: 2.5% maximum.
Temperature Range: —55°C to +150°C
with no derating.

500 Series — MOLDED
Size: .260 long x .100 diameter.
Capacitance Range: 10 pF thru 22000 pF.
Voltage: 50 WVDC and 100 WVDC.
Capacitance Tolerance: ±10% and ±20%.
Dissipation Factor: Less than 2.5%.
Temperature Range: —55°C to +125°C
with no derating.

CK12/CK15 Mil-type — MOLDED
Size: 4 sizes — from .160 long x .090 diameter.
Capacitance Range: 10 pF thru 1.0 mFd.
Voltage: 50 WVDC and 100 WVDC.
Capacitance Tolerance: ±10% and ±20%.
Dissipation Factor: 2.5% maximum.
Temperature Range: —55°C to +125°C
with no derating.

RADIAL LEAD CAPACITORS

CK07/CK10 Mil-type — DIPPED
Size: 4 sizes from .080 high x .080 wide x .050 thick.
Capacitance Range: 27 pF thru 15000 pF.
Voltage: 50 WVDC.
Capacitance Tolerance: ±10% and ±20%.
Dissipation Factor: 2.0% maximum.
Temperature Range: —55°C to +125°C
with no derating.

710 Series — DIPPED
(NPO and Temperature Stable)
Size: 4 sizes from .080 high x .080 wide x .050 thick.
Capacitance Range: 10 pF thru 1.0 mFd.
Voltage: 25 WVDC and 50 WVDC.
Capacitance Tolerance: From ±5%.
Dissipation Factor: As low as .1%.
Temperature Range: —55°C to +125°C
with no derating.
Temperature Characteristics: From 0 ±30 PPM/°C.

CK05 and CK06 Mil-type — MOLDED
Size: CK05 dimensions .200 high x .200 wide x .100 thick.
CK06 dimensions .300 high x .300 wide x .100 thick.
Capacitance Range: CK05 values 10 pF thru .1 mFd.
CK06 values 1200 pF thru 1.0 mFd.
Voltage: 50 WVDC and 200 WVDC.
Capacitance Tolerance: ±10% and ±20%.
Dissipation Factor: 2.5% maximum.
Temperature Range: —55°C to +125°C
with no derating.

PELLET CAPACITORS

Pellet Series — DIPPED
Size: Various round and rectangular configurations from .050 diameter x .020 thick and .100 long x .100 wide x .030 thick.
Capacitance Range: 22 pF thru .1 mFd (other values available on special order).
Voltage: 50 WVDC.
Capacitance Tolerance: ±10% and ±20% (other tolerances available on special order).
Dissipation Factor: 2.5% maximum.
Temperature Range: —55°C to +150°C
with no derating.
Leads: Disc terminations, ribbon or wire leads.

MONOLITHIC CHIP CAPACITORS

S-Cap. 100 Series
Size: Various sizes from .080 long x .050 wide x .050 thick maximum.
Capacitance Range: 10 pF thru .22 mFd (to 1.0 mFd special).
Voltage: 25 WVDC and 50 WVDC.
Capacitance Tolerance: From ±5%.
Dissipation Factor: From .1%.
Temperature Range: —55°C to +125°C
with no derating.
Temperature Characteristics: From 0 ±30 PPM/°C.
Terminations: Palladium Gold standard (others available).

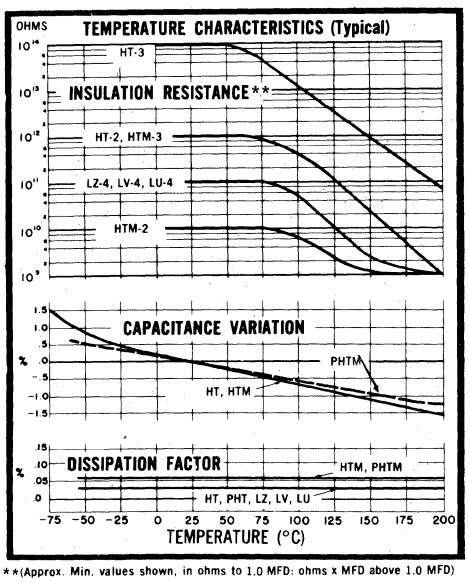
PROCESSED TEFLON† CAPACITORS

TEMP. RANGE: —70°C to 200°C WITHOUT DERATING (SPECIALS TO 250°C)

- LOW TEMPERATURE COEFFICIENT
- HIGHEST INSULATION RESISTANCE
- SUBMINIATURE SIZE
- HIGH STABILITY
- LOW DISSIPATION FACTOR
- LOW DIELECTRIC ABSORPTION
- MIL-C-19978C TYPES AVAILABLE



**(Approx. Min. values shown, in ohms to 1.0 MFD; ohms x MFD above 1.0 MFD)

HT SERIES (EXTENDED FOIL)—HIGHEST INSULATION RESISTANCE

HT series capacitors exhibit the highest insulation resistance obtainable in the present state of the art (to $>10^{14}$ ohms** min. for the HT-3). Other outstanding characteristics include dissipation factor <0.02%, dielectric absorption <0.03%, and low capacitance variation with temperature. For detailed performance characteristics of the basic (HT-2) type, and for higher performance types (HT-3 to HT-9) available—see tables and chart, this page.

LV, LZ SERIES—MINIATURE/LOW VOLTAGE VERSIONS OF HT SERIES

Series LV (50 WVDC) and LZ (15 WVDC) capacitors are designed to occupy minimum physical volume, while retaining most of the excellent electrical characteristics of the HT series. For detailed performance characteristics of the basic (LZ-4 and LV-4) types, and for higher performance types (LZ-5, 8, & 9 and LV-5, 8, & 9) available—see tables and chart, this page.

PHT SERIES—PRECISION/HIGH STABILITY EXTENSION OF HT SERIES

PHT series capacitors are specially processed to obtain very high stability (retrace <0.2%)†, and low capacitance variation with temperature (see table at right). For detailed performance characteristics of the basic (PHT-2) type, and for higher performance types (PHT-3 to PHT-9) available—see tables and chart, this page.

HTM SERIES (METALIZED)—HIGH STABILITY AND SUBMINIATURE SIZE

HTM series capacitors offer very low temperature coefficient (approx. —70 PPM/°C) and high insulation resistance (to $>10^{12}$ ohms** for the HTM-3), in addition to extremely small physical size. For detailed performance characteristics of the basic (HTM-2) type, and for higher performance types (HTM-3 to HTM-9) available—see tables and chart, this page.

PHTM SERIES—PRECISION/LINEAR T.C. EXTENSION OF HTM SERIES

PHTM series capacitors exhibit ultra-stable retrace (<0.02%)† and a low linear temperature coefficient (—70 PPM/°C ±30)†, supplementing the excellent characteristics of the HTM series. For detailed performance characteristics of the basic (PHTM-2) type and for higher performance types (PHTM-3 to PHTM-9) available—see tables and chart, this page.

For Dimensions and Ordering Information of All Types— Refer to Balco Page 4

QT SERIES (EXTENDED FOIL)—HIGH INSULATION RESISTANCE

QT series capacitors provide high insulation resistance (>1 x 10^{11} ohms), miniature physical size, and will operate to 125°C. Extremely modest cost qualifies this series for general purpose applications where high performance is essential. For detailed characteristics of the basic (QT-1) type, and for higher performance types (QT-3 to QT-7) available — see tables and chart, to right.

PQT SERIES—PRECISION/HIGH STABILITY EXTENSION OF QT SERIES

PQT series capacitors are processed for optimum stability, retaining the excellent characteristics of the QT series. Retrace is <0.25%, with very low long term drift effects. The unit exhibits some delayed thermal response during temperature cycling that may require longer than normal stabilization times, which should be considered in sophisticated applications. For detailed performance characteristics of the basic (PQT-1) type, and for higher performance types (PQT-3 to PQT-7) available—see tables and chart, to right.

QTM SERIES (METALIZED)—SUBMINIATURE

QTM series capacitors offer subminiature and ultra-miniature size (type QTM-4), in capacitance ratings to >20.0 mfd. Outstanding electrical characteristics include insulation resistance >5 x 10^{10} ohms. For detailed performance characteristics of the basic (QTM-1) type, and for higher performance types (QTM-3 to QTM-7) available—see tables and chart, to right.

PQTM SERIES—PRECISION/HIGH STABILITY EXTENSION OF QTM SERIES

PQTM series capacitors provide very good stability in addition to the small physical size of the QTM series. Retrace is <0.2%, with very low long term drift effects. The unit exhibits some delayed thermal response during temperature cycling that may require longer than normal stabilization times, which should be considered in sophisticated applications. For detailed performance characteristics of the basic (PQTM-1) type, and for higher performance types (PQTM-3 to PQTM-7) available—see tables and chart, to right.

PT SERIES (EXTENDED FOIL)— HIGH STABILITY

PT series capacitors exhibit high insulation resistance (to $> 5 \times 10^{12}$ ohms for the PT-3), low dissipation factor and very low dielectric absorption, and very good retrace (< .05% for type PT-6). For detailed performance characteristics of the basic (PT-1) type, and for higher performance types (PT-3 to PT-7) available — see tables and chart, to right.

PPT SERIES — PRECISION/HIGHEST STABILITY EXTENSION OF PT SERIES

PPT series capacitors are specially processed and fabricated to obtain highest stability (<0.025% total retrace) and highly linear temperature coefficient (—105 PPM/°C ±15). For detailed performance characteristics of the basic (PPT-1) type, and for higher performance types (PPT-3 to PPT17) available—see tables and chart, to right.

For dimensions and Ordering Information of All Types — Refer to Balco Page 4.

To Order Specify:

(1) SERIES (HT, HTM, QT, QTM, PT, KTM, ETC.)

(2) CHARACTERISTIC NO. (-1, -2, etc., e.g. PT-1, HT-2)

(3) MFD, WVDC, AND TOLERANCE RATINGS

(4) CONSTRUCTION TYPE: (1—Hermetically Sealed Metal Case, 2-Film Wrap, 3-Epoxy Case, or 4-Film Wrap/Epoxy Ends). Type 1 supplied unless otherwise specified.

(5) CATALOG No. 69-I

† DuPont Reg. Trademark

**Available on Request

GENERAL INFORMATION:

***(1) All dimensions given are for Type 1 construction, i.e., Hermetic Metal Case (epoxy filled); Compression Glass Seals; Floating Circuit.**

(2) Tubular cases are brass—100% tinned—(chrome plated brass cans and Stainless Steel cans are available on special request).

(3) The standard tolerances on physical dimensions are ±1/64" on diameter and 1/32" on length. Closer tolerances are available on request.

(4) Leads are tinned copper-clad steel—#20 AWG by 1½" minimum length. #22 AWG standard for cases less than .400 dia. Other types available on request (e.g. Dumet, Nickel, etc.).

ULTRA-STABLE LINEAR TEMPERATURE COEFFICIENT CAPACITORS

- **EXCEPTIONAL TEMPERATURE COEFFICIENT LINEARITY (TO <±4 PPM/°C)**
- **ULTRA-STABLE RETRACE (TO <0.01%)**
- **TYPES AVAILABLE TO 165°C**

Balco's ultra-stable/linear temperature coefficient line, types 1US-1 through 6US-1, offers stability far exceeding the previous state of the art. The outstanding retrace characteristics shown in the table (right) represent the maximum difference between room temperature capacitance values before and after any one complete temperature cycle over the full temperature range. These values are closely approached even after as many as ten complete temperature cycles.

Temperature coefficient linearity is maintained within the definite limits shown in the table (right) for a wide range of ratings. The nominal temperature coefficient value, however, is somewhat dependent on various parameters such as capacitance, size, etc., and for this reason these values are indicated as "approximate." For additional information, write for details.

BASIC CAPACITOR CHARACTERISTICS (Typical)

BALCO TYPE ▸	1US-1	2US-1	3US-1	4US-1	5US-1	6US-1
OPERATING TEMP. RANGE	—70°C to +75°C	—70°C to +85°C	—70°C to +100°C	—70°C to +125°C	—70°C to +150°C	—70°C to +165°C
APPROX. NOMINAL TEMP. COEFFICIENT	—100 PPM/°C (0°C to +60°C)	—100 PPM/°C (—40°C to +70°C)	—70 PPM/°C (—55°C to +100°C)	—70 PPM/°C (—55°C to +125°C)	—70 PPM/°C (—55°C to +150°C)	—70 PPM/°C (—55°C to +165°C)
TEMPERATURE COEFFICIENT LINEARITY	<±4 PPM/°C	<±6 PPM/°C	<±10 PPM/°C	<±15 PPM/°C	<±20 PPM/°C	<±30 PPM/°C
RETRACE (After Temp. Cycling)	<0.01%	<0.02%	<0.02%	<0.02%	<0.03%	<0.03%

*HIGHER VOLTAGE RATINGS AND OTHER CAPACITANCE VALUES AVAILABLE ON REQUEST

OTHER CAPACITOR TYPES

CAPACITORS TO MIL-C-19978B—Teflon, mylar, and polystyrene types available (styles CQ05, CQ08, CQ09, CQ10, CQ11, CQ12, and CQ13)—all capacitance values, voltages, and circuit diagrams.

HIGHEST INSULATION RESISTANCE AT ELEVATED TEMPERATURES—Capacitor types available with insulation resistance exceeding 1×10^{14} ohms at 85°C. Higher temperature types are also available.

MATCHED PAIRS AND SETS—Capacitor types can be matched in pairs with 0.075%. Capacitance at 25°C, and on temperature coefficient within ±10PPM/°C from 25°C to +125°C.

HIGH VOLTAGE CAPACITORS—Types available to 6000 WVDC, with very high insulation resistance, good stability and minimum physical size.

SPECIAL CONFIGURATIONS—Types can be supplied in special enclosures specifically designed for stringent customer space requirements.

HIGHEST RELIABILITY CAPACITORS EXCEEDING MIL-C-19978B—Types available to very tight A.Q.L.'s for advanced environmental requirements, e.g. extended life tests, severe shock and vibration at elevated temperatures, 100% burn-in, etc.

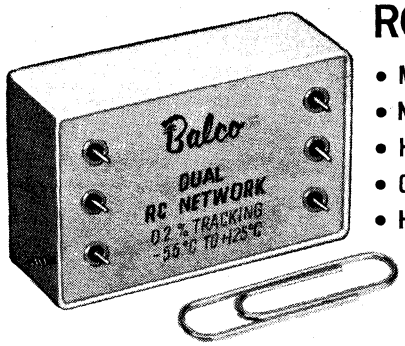
TEMPERATURE STABLE RC NETWORKS



- MINIATURE SIZE
- NEAR ZERO TEMP. COEFFICIENT
- HIGH TRACKING ACCURACY
- CLOSE TOLERANCE
- HIGH TEMPERATURE (TO >125°C)

NOW FOR THE FIRST TIME IN ONE FACILITY, BALCO COMBINES MANUFACTURING CAPABILITIES IN PRECISION FILM CAPACITORS AND PRECISION RESISTORS.

It is no longer necessary to purchase separate components whose compatibility is a matter of chance. Attempting to closely match dissimilar parts is expensive and risky. AT BALCO WE ARE SPECIALISTS. Your RC application will be reviewed by a staff experienced in the pitfalls of network design.

The combined operations of BALCO CAPACITORS and its newly acquired resistor division, MARSTAN ELECTRONICS, represents a truly unique capability to provide the finest in RC networks. With both divisions located in one central manufacturing plant, state-of-the-art RC network performance can now be realized on a production basis.

Our unique side by side processing insures the ultimate in component compatibility and over-all performance. Our files of applications include Integrators, Phase Shifters, Oscillators, Twin-T Filters, etc.

RC product accuracy and stability is dependent on practical restraints on the individual components and, to aid the circuit designer in realistically computing system accuracy, the table to the right has been developed.

NETWORK RC PRODUCT TOLERANCES CAN BE SUPPLIED to ±0.03% of the specified nominal value at any constant temperature. Tolerances on individual capacitive or resistive components can be supplied to <0.02% at any specified constant temperature.

RC PRODUCT VALUES VIRTUALLY TEMPERATURE IMMUNE e.g. ±0.05% max. change from 25°C to 75°C, ±0.10% from 25°C to 125°C, and ±0.15% from 25°C to —55°C. Types are available with combined retrace and hysteresis effects to less than <0.02% even after repeated temperature cycling.

NETWORK PAIRS ("DUAL" NETWORKS) can be supplied with individual RC products matched to within ±0.03% at any specified constant temperature. Absolute tracking accuracy between RC products can be provided to within ±0.10% from —15°C to 85°C and ±0.15% from —55°C to 125°C, including initial tolerance match.

RC NETWORK SETS PACKAGING These devices can be supplied in compact hermetically sealed cases or printed circuit cases, or supplied as individual components.

RELIABILITY & DOCUMENTATION can be supplied to meet and exceed high reliability specifications of standard mil spec. requirements. On special request, documented test data on serialized RC networks can be supplied with each lot shipped.

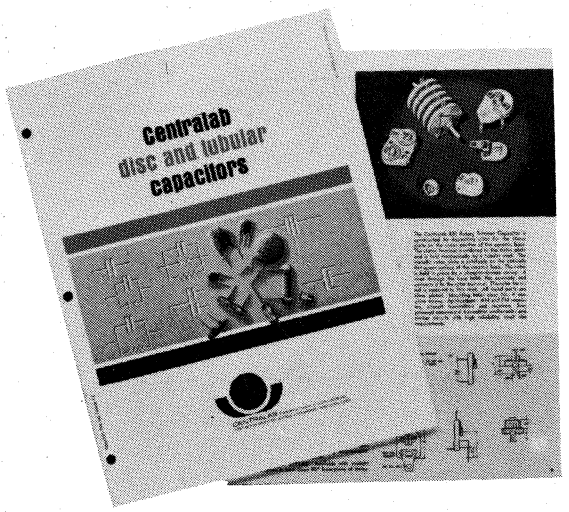
Centralab Ceramic Capacitors Can fill your Capacitor Needs!



Centralab disc and tubular capacitor catalog, as well as the special purpose catalogs cover hundreds of types of ceramic capacitors for military, industrial and commercial applications.

Request your copy through Centralab's advertising department.

Here are typical Centralab Capacitors. Types listed here are not necessarily available, in all extremes of temperature coefficients, capacitance ranges, and tolerances.

Temperature Compensating Discs

WORKING VOLTAGE	TEMPERATURE COEFFICIENTS	CAPACITANCE RANGE pf	CAPACITANCE TOLERANCES
DISCS			
500V	NPO to N5250	1.1-3100	
1KV	NPO to N5250	2.5-2150	±.25 pf and ±.5 pf when nominal capacitance is 10 pf or less. Over 10 pf ±5%, ±10% or ±20%
2KV	N750, N1500, N2200*	17-450	
3KV	N750, N1500, N2200*	12-310	
4KV	N750, N1500, N2200*	12-210	
5KV	N750, N1500, N2200*	18-165	
6KV	N750, N1500, N2200*	17-135	

*Available in all standard TC's in other capacitance ranges.

General Purpose Discs

EIA FORMULATION & T. C.	TOLERANCE	CAPACITANCE TOLERANCE	CAPACITANCE RANGE IN pf	WORKING VOLTAGE
Y5D	±3.3%	±10%, ±20%, GMV	150 to 9700	150, 500V
X5F	±7.5%	±10%, ±20%, +80 −20% GMV	70-6100	150V-6KV

Z5U	+22 −56%	±20%, +80 −20%, GMV	650-34,800	150V-6KV
Z5V	+22 −82%	±20%, +80 −20%	.005MFD-.1MFD	100V

Not all capacitance values at all voltages: maximum capacitance shown available in 500V rated units.

Low Voltage General Purpose Discs (Ultra Kaps)

DC WORKING VOLTAGE	APPROX. DIAMETER	CAPACITANCE TOLERANCE	MAXIMUM DISSIPATION FACTOR	CAPACITANCE RANGE MFD
3	.3 to .9"	+100 −0%	5%	.22 to 2.2
10	.3 to .9"	+80 −20%	10%	.05 to .47
16	.6 to .9"	+80 −20%	10%	.05 to .2
20	.6 to .9"	+80 −20%	10%	.05 to .2
25	.3 to 1.0"	±30% or ±20%	5%	.015 to .2

High Temperature

Wide range of capacities, tolerances, TC & Hi-K bodies for operation at 125°C. Exceptionally stable Hi-K bodies with maximum change in capacity of ±15% from −55°C to +125°C are available.

Polystyrene Capacitors are also available in the Centralab line. These long life, low cost units are the ideal replacements for paper, mica, and Mylar capacitors.

FOR IMMEDIATE DELIVERY — many of these are available through Centralab Industrial Distributors.

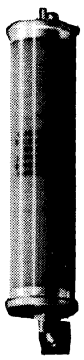
DISC-R-CAP & TUBE-R-CAP®: parallel resistor, capacitor, and spark gap available with 50 to 2500 pf capacitance, 1.4 KVDC, 1 KVDC, 150 VAC, 60 HZ voltage rating.

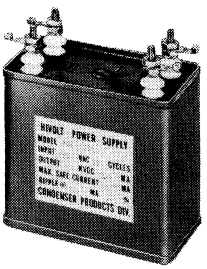
AC LINE DISC CAPACITORS 380-10,000 pf.

CENTRALAB Electronics Division • GLOBE-UNION INC.
5757 NORTH GREEN BAY AVENUE • MILWAUKEE, WISCONSIN 53201

We have the CAPABILITY, RELIABILITY and VERSATILITY for all your high voltage component needs

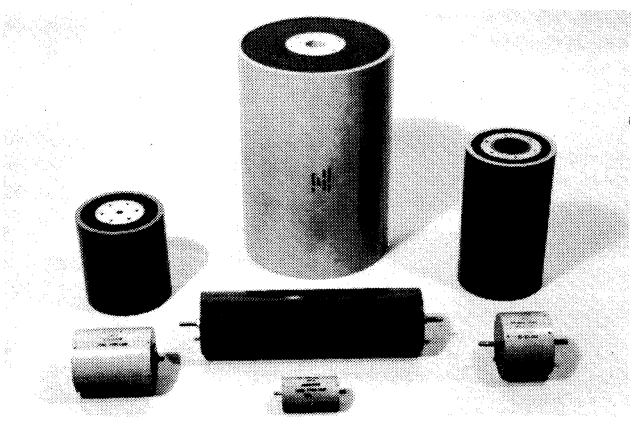


DC FILTER CAPACITORS Miniature glass — 1 to 50 KV standard; Rugged bakelite — 40 to 150 KV standard; CP70 type — 600 V to 50 KV standard
TRANSMITTING CAPACITORS Pulse or RF series — 1 to 30 KV standard; Temperature ranges up to 210°C without derating
LABORATORY AND INSTRUMENTATION CAPACITORS Glass or CP70 containers to 60 KV at 0.1 mfd



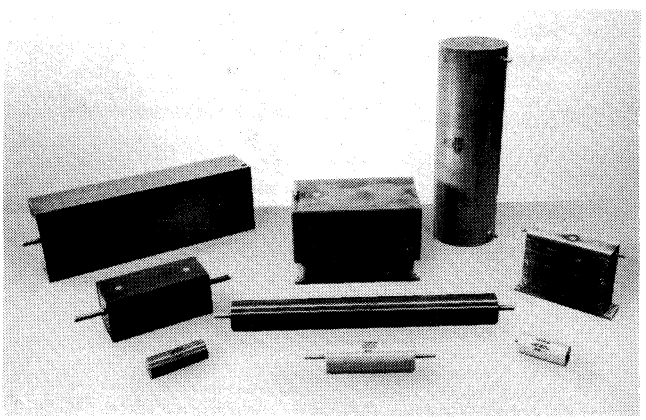
HIGH VOLTAGE POWER SUPPLIES Modular Compact and Capacitor Charging — Output from 1 to 75 KV standard OEM specials promptly quoted
PULSE FORMING NETWORKS Designed to your specifications and application

ULTRA LOW INDUCTION ENERGY STORAGE CAPACITORS



For laser, simulation and spark discharge technology.
FAST DISCHARGE E-Type capacitors feature fast discharge and are designed for quantum electronics in the scientific and industrial optical community.
GUARANTEED ONE YEAR Up to 85°C at up to 100 pps. Ring frequency is measured on every unit — tested one minute at twice rated voltage.

SPECIAL OEM DESIGN



Designed to suit customer applications and space limitations. A wide range of voltages and capacities as well as constructional styles are available to meet your specifications. Call or write for complete technical information. Special requirements tailored to your applications and specifications are promptly quoted.

COMPONENT RESEARCH COMPANY

HIGH RELIABILITY — HERMETICALLY SEALED FILM CAPACITORS

• NEW DEVELOPMENTS

During the early part of 1968 complete re-tooling of our production and test facility was undertaken to further advance the state of the art in film capacitor reliability, electrical performance and miniaturization. This catalog, revision D, reflects several tightened specification areas and new capacitor types added as a result of this expansion effort. By mid 1969, catalog E will be issued to further define existing specifications and to include additional capacitors now in limited production such as re-constituted MICA, 200°C teflon, high voltage, and high current handling capacitors for SCR applications.

• LOW TEMPERATURE COEFFICIENT

CRC capacitor windings are firmly supported within their hermetic enclosures to withstand grade 3 vibration levels per MIL-C-19978. The capacitors are uniquely constructed to provide winding support for the thinnest dielectric films and have stress-free lead terminations that can withstand extended temperature cycling. CRC capacitors are exclusively manufactured under one or more of the following patents and additional patents pending: 3,238,428; 3,260,906; 3,292,063.

• HIGH INSULATION RESISTANCE

CRC has supplied custom made capacitors as large as 1400 Mfd with less than 5 picoamps/Mfd leakage current for ramp and integrating circuit applications. Capacitors are available with insulation resistance values as high as 100,000,000 megohms and capacitors can be supplied with dielectric absorption as low as 0.005%.

• LOW DISSIPATION FACTOR

A measure of the reliability and quality of termination of the electrodes is determined by the 1KHz and 10KHz dissipation factor ratios. Continuous temperature cycling that destroys the electrode bond leading to open circuits of ordinary capacitors, does not impair the dissipation factor of CRC capacitors.

• LONG TERM STABILITY

All capacitors are temperature cycled to obtain improved capacitance retrace. CRC capacitors are frequently purchased for use as secondary standards due to their ability to maintain capacitance value indefinately.

• HIGH PERFORMANCE IN SMALL SIZE

Despite their small size CRC capacitors outperform much larger conventional capacitors proving that reduction in size does not have to result in compromise with performance or quality.

• MASS SPECTROMETER LEAK DETECTION

Component Research is now 100% testing capacitors utilizing the Veeco MS-12AB-P mass spectrometer leak test station with a sensitivity of 5×10^{-12} ATM-CC/SEC which far exceeds the hot oil immersion test method in accuracy and reliability. Maximum leak test rate for each capacitor type is listed in each specification section.

• EXCEEDS MIL-SPEC RELIABILITY

CRC capacitors are manufactured to meet CRC specifications which exceed military specifications in quality limits and measurement accuracy. Freedom from momentary breakdown when used in low level high impedance circuits, low noise and microphonics are contributing factors to their widespread use.

• FULLY QUALIFIED FOR AEROSPACE

CRC capacitors are qualified for use in the following critical applications.

PROJECT	SPECIFICATION	QUALIFIED CAPACITOR DESCRIPTION
APOLLO	441-0849	High-Rel 05TJ Teflon

COMPONENT RESEARCH COMPANY

COMPARISON OF CAPACITOR TYPES

Component Research Company makes an ever increasing variety of film capacitors to provide the project engineer, designer and reliability engineer with a wide latitude of choice in the selection of a capacitor best suited for his application. New items are added to the catalog as significant developments in miniaturization, performance and lower cost result in a product available for immediate delivery.

Although we have recently manufactured plastic cased subminiature capacitors and special high voltage capacitors they will not be listed in this catalog until we have accumulated sufficient data to provide comprehensive engineering information.

The following data has been compiled and tabulated from tests conducted on thousands of capacitors developed and manufactured by Component Research Company. This data takes into account normal production variations from lot to lot which are constantly monitored to afford feedback leading to product improvement and tighter quality control.

The data shown may vary with each catalog revision to reflect improvements in the state of the art of capacitance measurement and our constant effort to further perfect our products.

As a quick guide to the reliability engineer we have set up a "quality level" column in the capacitor comparison data section to indicate where the capacitors are primarily used and the applications they are recommended for. Listed below is a description of the quality level code letters.

CODE LETTER	CODE DESCRIPTIONS
A	Highest reliability level, capacitors have burn-in, extended temperature cycling, redundant quality inspection, serialization. Used in space and critical systems.
B	High reliability, identical in construction to level "A" capacitors. Used in military aircraft, missiles and ground equipment.
C	Our commercial grade which is higher in quality level than MIL-Specification types. Used in military and industrial applications.

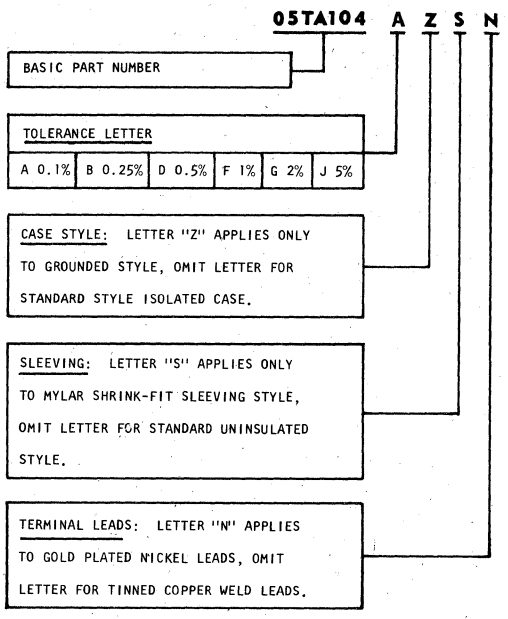
HOW TO SPECIFY COMPLETE PART NUMBER



Example 1—Part 05TA104AZSN shown above is a 50 volt, "TA" Teflon capacitor, 0.1mfd, ± 0.1% tolerance, with a grounded case, mylar sleeving, and gold-plated nickel leads.

Example 2—Part 1PL106F would be a 100 volt, "PL" Polycarbonate capacitor, 10mfd, ± 1% tolerance, standard isolated case, and tinned copperweld leads.

Example 3—Part 05PL1354DS would be a 50 volt polycarbonate capacitor, 1.35 mfd, ± 0.5%, standard case, sleeving, and tinned copperweld leads.

Note: 1354 represents 1,350,000 picofarads. The last digit, 4, indicates the number of zeros.

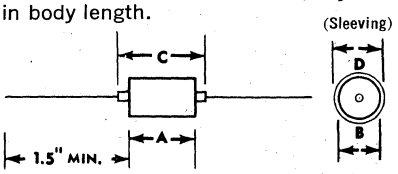
CONSTRUCTION INFORMATION

TERMINALS

#22 AWG leads are supplied with 0.312" and smaller case diameters.
#20 AWG leads are supplied with 0.400" and larger case diameters.
All teflon capacitors other than type "TF" are now manufactured with nickel, gold-plated leads in accordance with MIL-STD-1276 Type N2. Due to existing inventories of capacitors with tinned copper, tinned copperweld and gold-plated nickel leads, either type may be shipped on orders not specifying a particular style lead.

ENCLOSURE

All capacitors listed are hermetically sealed in brass, tin fuse plated cases. The metal case can be supplied with a mylar covering by adding "S" in the part number as shown above. This covering increases the case diameters listed by a maximum of .010". All capacitor dimensions shown are for the standard case style with both leads isolated from the case. Special capacitors can be provided with one lead connected to the case, style "Z", .062" shorter in body length.



MECHANICAL TOLERANCES

A Case length dimensions vary ±.03" max
B Case diameter dimensions vary ±.01" max
C Allow 0.2" overall increase to case length "A" for solder beads
D Mylar sleeve increases case diameter .01" max

PRICES AND TERMS

To expedite the ordering of prototype quantities we have listed small quantity prices. Immediate quotation for any quantity required will be given upon request. Our terms are ½% 10 Days, Net 30, F.O.B. our plant. Minimum order is $10.00.
For best delivery of stock items, please specify that either type leads are acceptable.

AVAILABILITY

A large stock is maintained of most catalog types in standard and non-standard values for immediate delivery Teflon and polystyrene capacitors can be supplied as accurate as ±0.1%, other types ±0.25%.

MEASUREMENT OF CAPACITORS

The high quality of CRC capacitors is difficult to evaluate unless sufficiently sensitive and accurate equipment is utilized with proper measurement techniques. Component Research Company has developed sophisticated methods of 100% testing capacitors to the following accuracies:

1. Capacitance tolerance and dissipation factor	±0.05% of NBS Standards (±0.01% when required)
2. Leakage current	0.1 picoamps
3. Insulation Resistance	10^8 megohms
4. Temperature Coefficient	±0.01%
5. Dielectric Absorption	0.005%

Component Research Company will provide technical assistance to laboratories or inspection departments interested in establishing adequate facilities for measurement and calibration of capacitors.

MEASUREMENT INSTRUCTIONS

Prior to measurement of insulation resistance thoroughly clean the glass surface of the hermetic seals to remove contamination which frequently results from burn-in or life tests, operator handling or flux vapors from soldering near the capacitors. We have found that vapor degreasing in itself does not always remove the contamination and it may require a rubbing action to eliminate the films.
Capacitance bridges equal to the General Radio 1620A are recommended for best accuracy of capacitance and dissipation factor. The dissipation factor of capacitors in values above 1 mfd should be measured at 0.1 KHz due to the inability of capacitance bridges available at this time to accurately measure larger capacitors for dissipation factor at 1 KHz.
At 1 KHz the series resistance of the bridge internal wiring, contact resistance of the test terminals, and connecting cables affect dissipation factor accuracy to a far greater extent than at 0.1 KHz.
When measuring temperature coefficient of capacitors a guard circuit should be used which removes the errors due to cable capacitance in remote measurements performed with capacitors in environmental chambers. Condensation of moisture on the glass surface of the hermetic seals during transit temperatures from cold to ambient may cause appreciable capacitance and dissipation factor reading error. This can be avoided by coating the surfaces with a suitably clean silicone grease and maintaining a dry air condition within the chamber during cycling.
Dielectric absorption measurements are subject to the same errors listed above for insulation resistance and in addition are extremely susceptible to error resulting from moisture absorption of the insulation used in cabling, switching and supporting the test circuit components.

POWER AGING

(Burn-in) is 100% performed on TJ, PK and other high reliability types. This conditioning screens out marginal capacitors and also tends to improve temperature coefficient and stability.

RELIABILITY

See reliability general information section, page 20

COMPONENT RESEARCH COMPANY

TJ TEFLON CAPACITORS

TJ Teflon capacitors meet the highest quality standards of the industry. TJ capacitors are 100% reliability screened, power aged, stabilized, and certified for performance by 100% test. The TJ capacitors are rated at 50 volts, but are also available in 100 volt and 200 volt ratings in the same case sizes as TA Teflon Capacitors.

TJ SPECIFICATIONS

1. **OPERATING TEMPERATURE** —62°C to 125°C at full rated voltage
2. **TEMPERATURE COEFFICIENT OF CAPACITANCE**

+0.4%	max at −55°C	0.0% ref. at	25°C
+0.25%	max at −25°C	−0.15% max at	55°C
+0.2%	max at −10°C	−0.25% max at	85°C
+0.1%	max at 0°C	−0.40% max at	125°C

3. **STABILITY**—Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

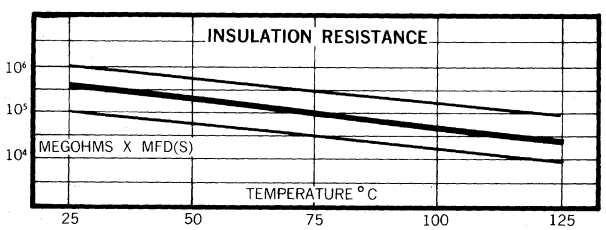
Range	Retrace
−10°C to 85°C	0.01% Max
−62°C to 125°C	0.05% Max

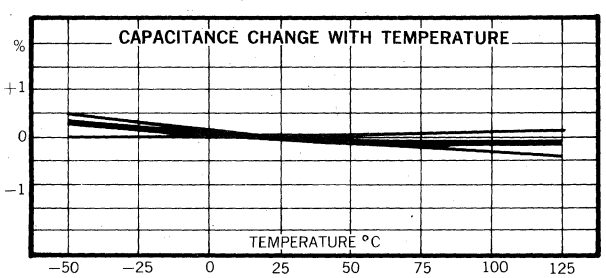
4. **INSULATION RESISTANCE (IR)**

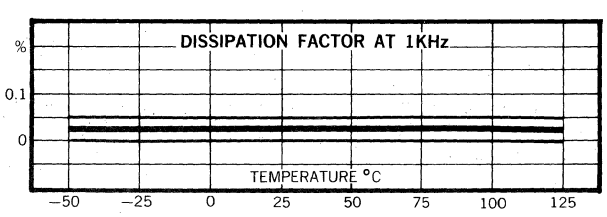
Min IR at 25°C.....250,000 Megohms
at 85°C.....100,000 Megohms
at 125°C..... 25,000 Megohms

5. **DIELECTRIC ABSORPTION**—0.02% max at 25°C.
6. **DISSIPATION FACTOR** — 0.03% max at 1 KHz and 25°C. Values greater tham 1 mfd measure at 0.1 KHz.
7. **DIELECTRIC STRENGTH**—200% of rated volts.
8. **CONSTRUCTION** — Hermetically sealed, extended metal film electrodes, leads isolated from case. Lead material is nickel, gold-plated, per Mil-Std-1276, Type N2.
9. **SEAL TEST** 1 x 10^{-6} ATM-CC/SEC max leak rate.
10. **ENVIRONMENTAL** — Capacitors shall meet all applicable requirements of Mil-C-19978, including Grade 3 vibration.

FOR ADDITIONAL DETAILS SEE GENERAL INFORMATION SECTION, PAGE 3.







Quality Assurance

"TJ" TEFLON CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

RELIABILITY SCREENING

1. *Stabilization by temperature cycling from —62°C to 125°C, 5 cycles minimum.*
2. *Mass spectrometer hermetic seal test per MIL-STD-202, Method 112, condition C, procedure III A.*
3. *Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.*
4. *Insulation resistance at rated voltage and 25°C.*
5. *Capacitance tolerance at 1KHz and 25°C.*
6. *Dissipation factor at 25°C.*

POWER AGING AND STABILIZATION

7. *Burn-in at 125°C and 140% of rated voltage for a minimum of 48 hours.*
8. *Verification of stability by temperature cycling from —62°C to 125°C, 20 cycles minimum.*

PERFORMANCE CERTIFICATION

9. *Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.*
10. *Insulation resistance at rated voltage and 25°C.*
11. *Capacitance tolerance at 1KHz and 25°C.*
12. *Dissipation factor at 25°C.*
13. *Temperature coefficient measured from —55°C to 125°C at a minimum of 5 temperature points.*
14. *Visual inspection for dimensions, marking, and packaging.*
15. *Traceability to production and test records by permanent marking of parts with lot control number.*
16. *Process and inspection data is maintained on file per NPC-200-3 and Mil-Q-9858 quality control standards.*
17. *Capacitors are serialized and packaged with certified test data to accompany each shipment.*

COMPONENT RESEARCH COMPANY

TA TEFLON CAPACITORS

Type TA miniature teflon capacitors are widely used in aircraft and satellite navigational guidance applications which require low loss factor, low temperature coefficient, exceptional stability, and reliability from −62°C to 125°C. (See TJ and TC specifications for high reliability equivalent.)

TA SPECIFICATIONS

OPERATING TEMPERATURE

−62°C to 125°C at full rated voltage

TEMPERATURE COEFFICIENT OF CAPACITANCE

+0.6%	Max at	−55°C
+0.4%	Max at	−25°C
+0.3%	Max at	−10°C
+0.2%	Max at	0°C
0.0%	Reference	25°C
−0.25%	Max at	55°C
−0.5%	Max at	85°C
−0.6%	Max at	125°C

STABILITY

When temperature cycled from −62°C to 125°C for 5 temperature cycles, capacitance drift measured after stabilization shall not exceed:

Range	Retrace
−10°C to 85°C	0.02% Max
−62°C to 125°C	0.1% Max

INSULATION RESISTANCE (IR)

Minimum values for 1 mfd or less. Readings in megohms.

STYLE	VOLTAGE	25°C	85°C	125°C
05TA	50	200,000	100,000	10,000
1TA	100	500,000	300,000	50,000
2TA	200	1,000,000	500,000	100,000

For values above 1 mfd, use meg x mfd, and divide table readings by capacitance in mfd.

Example: A 1 mfd, 200V capacitor at 25°C is 1,000,000 megohms.
A 2 mfd, 200V capacitor at 25°C is 500,000 megohms.

DIELECTRIC ABSORPTION

0.02% maximum at 25°C

DISSIPATION FACTOR 0.03% max at 1 KHz and 25°C. Values greater than 1 mfd measure at 0.1 KHz.

DIELECTRIC STRENGTH

200% of rated voltage.

CONSTRUCTION

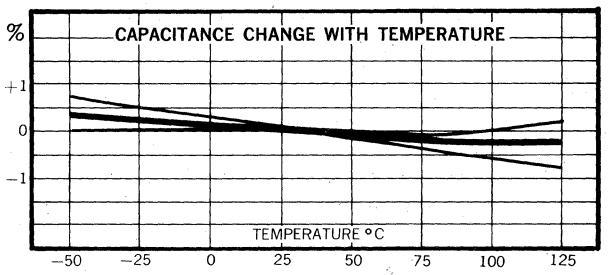
Teflon dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case. Lead material is nickel, gold-plated, per Mil-Std-1276, Type N2.

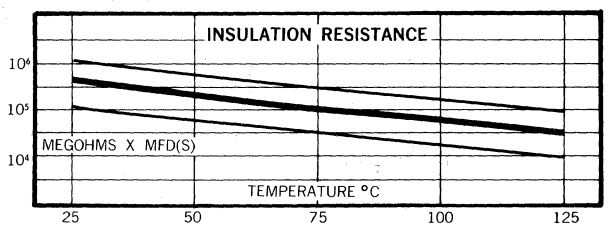
SEAL TEST — 1 x 10^{-6} ATM-CC/SEC max leak rate.

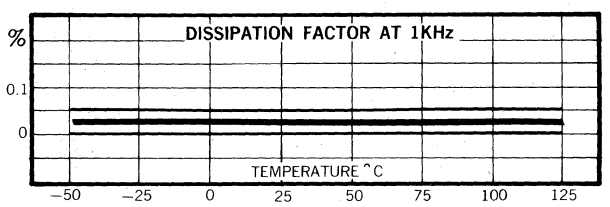
ENVIRONMENTAL

Capacitors shall meet all applicable requirements of Mil-C-19978, including Grade 3 vibration.

FOR ADDITIONAL DETAILS,
SEE GENERAL INFORMATION SECTION, PAGE 3







Quality Assurance

"TA" TEFLON CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

COMPONENT RESEARCH COMPANY

TA TEFLON CAPACITORS

TA INFORMATION

TA Teflon Capacitors are designed for miniature computers and filter networks in space and military electronic applications. The capacitors are extremely reliable for operation in low level high impedance circuits where they are completely free of momentary breakdown or noise. The TA capacitors can safely operate at rated temperatures and voltage indefinately. Destructive type tests recently conducted at up to ten times of rated voltage on typical 0.05Mfd capacitors did not result in capacitor degradation or noticeable parameter shift.

Type TA capacitors are extremely stable, rugged, and can be supplied in production quantities to tolerances as close as 0.1% and in values ranging from 0.001Mfd or more.

The TA Capacitors are frequently used in twin T filters where low dissipation factor and high stability is needed for sharp notch filtering.

Capacitors can be supplied with capacitance values individually marked with significant figures out to five places.

For the ultimate in high reliability, capacitors which meet the TA specifications are subjected to further screening to become type TJ or TC capacitors.

See specifications elsewhere in the catalog for further information.

SPECIAL CASE SIZE SECTION TA CAPACITORS

We have been able to fabricate the TA Teflon capacitors in smaller and non-standard case sizes for applications where our standard items cannot fit. In this section typical combinations are shown for capacitance and case size and in the 05TQ Cordwood section on page 17 as well as the macro-value section on page 20 to provide additional packaging choice. Please contact our sales office for complete information covering part number, specifications and prices when you require a special capacitor.

FOR ADDITIONAL DETAILS,
SEE GENERAL INFORMATION SECTION, PAGE 3

The range of capacitance available for various case sizes is shown below:

Diameter ± .01	Length ± .03	05TA 50 Volt	1TA 100 Volt	2TA 200 Volt
.193	.562	.0033 Mfd	.0033 Mfd	.0022 Mfd

COMPONENT RESEARCH COMPANY

TC TEFLON CAPACITORS

Type TC Teflon Capacitors are type TA capacitors which have been 100% reliability screened, stabilized, and certified for stability by 100% test. Each capacitor is serialized and is shipped with test data certifying to 0.1% maximum drift after 5 temperature cycles from −62°C to 125°C. The type TC Teflon capacitors are available in the same voltage ratings and case sizes as type TA capacitors.

For a higher reliability level and lower temperature coefficient see type TJ teflon capacitors.

TC SPECIFICATIONS

OPERATING TEMPERATURE −62°C to 125°C at full rated Voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE

+0.7% Max at	−55°C
+0.5% Max at	−25°C
+0.3% Max at	−10°C
+0.25% Max at	0°C
0.0% Ref. at	25°C
−0.25% Max at	55°C
−0.50% Max at	85°C
−0.60% Max at	125°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
0°C to 50°C	0.02% Max
−10°C to 85°C	0.05% Max
−62°C to 125°C	0.1% Max

INSULATION RESISTANCE (IR)

Min IR at 25°C	250,000 Megohms
at 85°C	100,000 Megohms
at 125°C	25,000 Megohms

DIELECTRIC ABSORPTION — 0.02% Max at 25°C.

DISSIPATION FACTOR — 0.03% max at 1 KHz and 25°C. Values greater than 1 mfd measure at 0.1 KHz.

DIELECTRIC STRENGTH — 200% of rated voltage.

CONSTRUCTION — Teflon dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case. Lead material is nickel, gold-plated, per Mil-Std-1276, Type N2.

SEAL TEST — 1 x 10^{-6} ATM-CC/SEC Max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of Mil-C-19978, including Grade 3 vibration. For additional details, see General information Section, Page 3.

Quality Assurance

"TC" TEFLON CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

RELIABILITY SCREENING

1. Stabilization by temperature cycling from —62°C to 125°C, 5 cycles minimum.

2. Mass spectrometer hermetic seal test per MIL-STD-202, Method 112, condition C. procedure III A.

3. Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.

4. Insulation resistance at rated voltage and 25°C.

5. Capacitance tolerance at 1KHz and 25°C.

6. Dissipation factor at 25°C.

POWER AGING

7. Burn-in at 125°C and 140% of rated voltage for a minimum of 48 hours.

8. Verification of stability by temperature cycling from −62°C to 125°C, 5 cycles minimum.

PERFORMANCE CERTIFICATION

9. Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.

10. Insulation resistance at rated voltage and 25°C.

11. Capacitance tolerance at 1KHz and 25°C.

12. Dissipation factor at 25°C.

13. Capacitors are 100% tested for 0.1% maximum drift with cycling from −62°C to 125°C.

14. Visual inspection for dimensions, marking, and packaging.

15. Traceability to production and test records by permanent marking of parts with lot control number.

16. Process and inspection data is maintained on file per NPC-200-3 and Mil-Q-9858 quality control standards.

17. Capacitors are serialized and packaged with certified test data to accompany each shipment.

COMPONENT RESEARCH COMPANY

TL TEFLON CAPACITORS

TL Teflon capacitors are the economy version of the TA capacitors and are recommended for industrial applications which do not require the high levels of performance met by TA capacitors. Due to their low cost they are being used in computers as a substitute for larger, more temperature sensitive polystyrene capacitors. TL capacitors are available in 50V and 100V in tolerances of 0.25% to 2% and values from .001 mfd to 2 mfd.

TL SPECIFICATIONS

OPERATING TEMPERATURE
−62°C to 125°C at full rated voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE
± 1% Max −55°C to 125°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
−10°C to 85°C	0.05% Max
−62°C to 125°C	0.25% Max

INSULATION RESISTANCE (IR)
Min IR at 25°C ..... 50,000 Megohms
at 85°C ..... 10,000 Megohms
at 125°C ..... 5,000 Megohms

DIELECTRIC ABSORPTION
0.1% Max at 25°C

DISSIPATION FACTOR
0.15% Max at 1KHz and 25°C

DIELECTRIC STRENGTH
200% of rated voltage

CONSTRUCTION — Teflon dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case. Leads are solderable gold-plated nickel or tinned copper-weld as available from stock at time of shipment.

SEAL TEST — 1 x 10^{-5} ATM-CC/SEC max leak rate.

COMPONENT RESEARCH COMPANY

TU TEFLON CAPACITORS

TU Teflon foil capacitors are unexcelled for high insulation resistance and low loss over a wide temperature range. Thousands of close tolerance TU capacitors have been used in F-104 aircraft and other critical applications. TU capacitors are frequently used in high quality analog computer applications where time constant variations due to dielectric absorption and leakage are critical. TU capacitors are available in 100V, 200V, and 400V in tolerances of 0.1% to 2% and values from .001 mfd to 1 mfd.

TU SPECIFICATIONS

OPERATING TEMPERATURE —62°C to 125°C at full rated voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE

+0.8% Max at	−55°C
+0.6% Max at	−25°C
+0.3% Max at	−10°C
+0.2% Max at	0°C
0.0% Reference at	25°C
−0.2% Max at	55°C
−0.5% Max at	85°C
−0.8% Max at	125°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
—10°C to 85°C	0.05% Max
—62°C to 125°C	.25% Max

INSULATION RESISTANCE (IR) Readings in Megohms

	100 Volt	200 Volt
Min IR at 25°C	4,000,000	10,000,000
at 85°C	1,000,000	2,000,000
at 125°C	100,000	500,000

DIELECTRIC ABSORPTION — 0.01% Max at 25°C.

DISSIPATION FACTOR — 0.005% Max as IKHz and 25°C

DIELECTRIC STRENGTH — 200% of rated volts.

CONSTRUCTION — Teflon dielectric, extended foil electrodes, hermetically sealed, leads isolated from case, leads are nickel, gold-plated, per Mil Std 1276 Type N2.

SEAL TEST — 1 x 10^{-6} ATM-CC/SEC Max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of Mil-C-19978 including Grade 3 vibration.

FOR ADDITIONAL DETAILS,
SEE GENERAL INFORMATION SECTION, PAGE 3

Quality Assurance

"TU" TEFLON CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

1. Stabilization by temperature cycling from −62°C to 125°C, 5 cycles minimum.
2. Mass spectrometer hermetic seal test per MIL-STD-202, Method 112, condition C. procedure III A.
3. Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.
4. Insulation resistance at rated voltage and 25°C.
5. Capacitance tolerance at 1KHz and 25°C.
6. Dissipation factor at 1KHz and 25°C.
7. Visual inspection for dimensions, marking, and packaging.
8. Traceability to production and test records by permanent marking of parts with lot control number.
9. Process and inspection data is maintained on file per NPC-200-3 and Mil-Q-9858 quality control standards.

COMPONENT RESEARCH COMPANY

TF TEFLON CAPACITORS

TF teflon capacitors are recommended for industrial instrument applications where high quality low loss characteristics are desirable at lowest cost.TF capacitors are also being used in military ground communication and check out equipment. (For smaller size and high reliability equivalent see type "TU" or "TA" teflon capacitors).

TF SPECIFICATIONS

OPERATING TEMPERATURE
—62°C to 125°C at full rated voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE
25°C reference ± 1.2% maximum from —62°C to 125°C.

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
—10°C to 85°C	0.1% Max
—62°C to 125°C	0.25% Max

INSULATION RESISTANCE (IR)

Min IR at 25°C	500,000 megohms
at 85°C	100,000 megohms
at 125°C	10,000 megohms

DIELECTRIC ABSORPTION — 0.03% at 25°C

DISSIPATION FACTOR — 0.02% Max at 1KHz and 25°C

DIELECTRIC STRENGTH — 200% of rated volts

CONSTRUCTION— "FEP" teflon dielectric film, extended foil electrodes, hermetically sealed with leads isolated from case, leads are tinned copperweld.

SEAL TEST — 1 x 10^{-5} ATM-CC/SEC max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of Mil-C-19978.

FOR ADDITIONAL DETAILS,
SEE GENERAL INFORMATION SECTION, PAGE 3

Quality Assurance

"TF" TEFLON CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

1. *Stabilization by temperature cycling from —62°C to 125°C, 5 cycles minimum.*
2. *Mass spectrometer hermetic seal per MIL-STD-202, Method 112, condition C, procedure III A.*
3. *Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.*
4. *Insulation resistance at rated voltage and 25°C.*
5. *Capacitance tolerance at 1KHz and 25°C.*
6. *Dissipation factor at 1KHz and 25°C.*
7. *Visual inspection for dimensions, marking, and packaging.*
8. *Traceability to production and test records by permanent marking of parts with lot control number.*
9. *Process and inspection data is maintained on file per NPC-200-3 and Mil-Q-9858 quality control standards.*

COMPONENT RESEARCH COMPANY

PL POLYCARBONATE CAPACITORS

Type PL miniature polycarbonate capacitors are recommended in circuit applications where there is limited space and electrical characteristics must nearly equal that of teflon or polystyrene capacitors.

The PL capacitors have been tested for qualification and approved for use in space, aerospace, and missile programs which required the highest quality and best performance in minimum package size. See type PK polycarbonate for high reliability version. See type PV polycarbonate for smallest precision film capacitors available.

PL SPECIFICATIONS

OPERATING TEMPERATURE —62°C to 100°C at full rated voltage. Derate linearly from 100°C to 50% of rated voltage at 125°C.

TEMPERATURE COEFFICIENT OF CAPACITANCE

−1.5%	Max. at −55°C
−0.5%	Max. at −25°C
−0.35%	Max. at −10°C
−0.25%	Max. at 0°C
0.0%	Reference at 25°C
+0.2%	Max. at 55°C
+0.5%	Max. at 85°C
+1.0%	Max. at 125°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
—10°C to 85°C	0.05% Max.
—62°C to 125°C	0.25% Max.

INSULATION RESISTANCE (IR) — readings in megohms

	30V	50V	100V	200V	400V
Min IR at 25°C	100,000		200,000	500,000	1,000,000
at 85°C	10,000		50,000	100,000	200,000
at 125°C	1,000		10,000	30,000	50,000

Readings shown are for 1 mfd or less. For values over 1 mfd, divide readings by mfd to obtain min IR.

Example: A 10 mfd, 100 volt capacitor at 25°C is

$$\frac{200{,}000 \text{ megs}}{10} = 20{,}000 \text{ megohms}$$

DIELECTRIC ABSORPTION — 0.2% Max. at 25°C.

DISSIPATION FACTOR — 0.2% max at 1 KHz and 25°C. Values greater than 1 mfd measure at 0.1 KHz.

DIELECTRIC STRENGTH — 200% of rated volts.

CONSTRUCTION — Polycarbonate dielectric, extended metal film electrodes, hermetically sealed, leads isolated from case. Leads may be tinned copperweld or gold-plated nickel per Mil Std 1276 type N2.

SEAL TEST — 1 x 10^{-6} ATM-CC/SEC Max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of Mil-C-19978 including grade 3 vibration.

FOR ADDITIONAL DETAILS, SEE GENERAL INFORMATION SECTION, PAGE 3.

30 VOLT PL SUBMINIATURE POLYCARBONATE CAPACITORS

*ADD TOLERANCE LETTER AFTER PART NO.

The subminiature 30 volt PL series capacitors utilize a 2 micron dielectric film thickness yet achieve excellent performance and reliability exceeded only by the "PV", series for their size. The capacitors are normally supplied with gold plated nickel wire and are also available in larger values shown in the macro-value section on page 20 and cordwood lengths shown on page 17.

FOR ADDITIONAL DETAILS,

COMPONENT RESEARCH COMPANY

PK POLYCARBONATE CAPACITORS

PK Polycarbonate capacitors are "PL" capacitors which have been power aged and temperature cycled to provide higher reliability and lower temperature coefficient. The "PK" capacitors have remarkably low temperature coefficient from 0°C to 125°C, particularly for values above 1Mfd. Specially selected PK capacitors in this range can be provided with a temperature coefficient of zero ±10 to ±25 PPM/°C.

PK SPECIFICATIONS

OPERATING TEMPERATURE

−62°C to 100°C at full rated voltage. Derate linearly from 100°C to 50% of rated voltage at 125°C.

TEMPERATURE COEFFICIENT OF CAPACITANCE — 25°C Reference

−0.75%	±0.25% at	−55°C
−0.35%	±0.15% at	−25°C
−0.25%	±0.15% at	−10°C
−0.15%	±0.1% at	0°C
+0.05%	±0.1% at	55°C
+0.15%	±0.15% at	85°C
+0.25%	±0.25% at	125°C

STABILITY

Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
−10°C to 85°C	0.03% Max
−62°C to 125°C	0.2% Max

INSULATION RESISTANCE (IR) — For 1 mfd or less.

	Voltage Range 50V	100V
Min IR at 25°C	200,000 Megs	500,000 Megs
at 85°C	10,000 Megs	100,000 Megs
at 125°C	5,000 Megs	10,000 Megs

Use Meg x Mfd for greater than 1 Mfd.

DIELECTRIC ABSORPTION — 0.2% Max at 25°C.

DISSIPATION FACTOR — 0.2% max at 1 KHz and 25°C. Values greater than 1 mfd measure at 0.1 KHz.

DIELECTRIC STRENGTH — 200% of rated voltage.

CONSTRUCTION—Polycarbonate dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case, leads may be tinned copperweld or nickel, gold plated per Mil-Std 1276, Type N2.

SEAL TEST — 1 x 10^{-6} ATM-CC/SEC Max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of Mil-C-19978, including grade 3 vibration.

FOR ADDITIONAL DETAILS, SEE GENERAL INFORMATION SECTION, PAGE 3

Quality Assurance

PK POLYCARBONATE CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

RELIABILITY SCREENING

1. *Stabilization by temperature cycling from −62°C to 125°C, 5 cycles minimum.*
2. *Mass spectrometer hermetic seal test per MIL-STD-202, Method 112, condition C. procedure III A.*
3. *Dielectric strength test at a minimum of 200% of rated voltage. lead to lead and leads to case.*
4. *Insulation resistance at rated voltage and 25°C.*
5. *Capacitance tolerance at 1KHz and 25°C.*
6. *Dissipation factor at 25°C.*

POWER AGING AND STABILIZATION

7. *Burn-in at 125°C and 140% of rated voltage for a minimum of 48 hours.*
8. *Verification of stability by temperature cycling from −62°C to 125°C, 5 cycles minimum.*

PERFORMANCE CERTIFICATION

9. *Dielectric strength test at a minimum of 200% of rated voltage, lead to lead and leads to case.*
10. *Insulation resistance at rated voltage and 25°C.*
11. *Capacitance tolerance at 1KHz and 25°C.*
12. *Dissipation factor at 25°C*
13. *Temperature coefficient measured from −55°C to 125°C at a minimum of 5 temperature points. (Performed on lot sampling basis, minimum 10 pieces per lot.)*
14. *Visual inspection for dimensions, marking, and packaging.*
15. *Traceability to production and test records by permanent marking of parts with lot control number.*
16. *Process and inspection data is maintained on file per NPC-200-3 and Mil-Q-9858 quality control standards.*
17. *Capacitors are serialized and packaged with certified test data to accompany each shipment.*

PV SUBMINIATURE POLYCARBONATE CAPACITORS

.312 x .813

ACTUAL SIZE 1 MFD CAPACITOR 03PV105

Type PV polycarbonate capacitors represent a breakthrough in the art of precision film capacitor miniaturization. The capacitors are processed and manufactured utilizing the basic CRC patents plus CRC state of the art techniques to wind web materials less than 0.0001 inches in thickness including metal film electrodes. The PV specifications listed do not represent the ultimate in performance the capacitors are capable of. By 100% test and selection we can supply capacitors with an insulation resistance greater than 100,000 megohms at +125°C, higher in stability and lower in temperature coefficient. In the interest of highest reliability we have assigned a 30 volt rating to the PV capacitors although they can safely operate continuously at 50 volts for the same rated conditions. For a lower cost equivalent to the PV type see 03PL and 03PG polycarbonate capacitors elsewhere in the catalog.

PV SPECIFICATIONS

OPERATING TEMPERATURE —55°C to 100°C at 30VDC. Derate linearly by 50% to 125°C.

TEMPERATURE COEFFICIENT OF CAPACITANCE

—1.2% Max. at —55°C	±.15% Max. at 55°C
—0.25% Max. at —10°C	±.25% Max. at 85°C
0% Ref. at 25°C	±.50% Max. at 125°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
—10°C to 85°C	0.03% Max.
—62°C to 125°C	0.2% Max.

INSULATION RESISTANCE (IR) — For 1 mfd or less.

25°C	1,000,000 megs min.	85°C	25,000 megs min.
55°C	500,000 megs min.	125°C	1,000 megs min.

Use meg x mfd for greater than 1 mfd

DIELECTRIC ABSORPTION — 0.2% Max. at 25°C.

DISSIPATION FACTOR — 0.2% max at 1 KHz and 25°C. Values greater than 1 mfd measure at 0.1 KHz.

DIELECTRIC STRENGTH — 400% of rated voltage.

CONSTRUCTION — Polycarbonate dielectric, extended metalfilm electrodes, hermetically sealed, leads isolated from case. Leads are gold plated nickel per Mil Std 1276 type N2.

SEAL TEST — 1 x 10^{-6} ATM-CC/SEC Max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of Mil-C-19978 including grade 3 vibration.

COMPONENT RESEARCH COMPANY

PG POLYCARBONATE CAPACITORS

PG polycarbonate capacitors are lower in specification and quality assurance level than type "PL" capacitors to enable industrial and military usage at lower cost. The PG capacitors utilize the patented CRC supported winding and stress-free lead design and are designed to fill the need for capacitors better than the MIL-SPEC variety yet lower in cost than the "PL" type.

For higher reliability types see "PL", "PK" and "PV" polycarbonate specifications.

PG SPECIFICATIONS

OPERATING TEMPERATURE — −62°C to 100°C at full rated voltage, derate linearly from 100°C to 50% of rated voltage at 125°C.

TEMPERATURE COEFFICIENT OF CAPACITANCE —

± 2% max −55°C to 125°C
± 1% max −25°C to 85°C
±0.5% max 0°C to 55°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
−10°C to 85°C	0.25% max
−62°C to 125°C	0.50% max

INSULATION RESISTANCE (IR) AT RATED VOLTAGE

Temperature	Meg X Mfd	Need not Exceed
25°C	100,000	200,000 megohms
85°C	10,000	20,000 megohms
125°C	1,000	2,000 megohms

DIELECTRIC ABSORPTION — 0.2% max at 25°C.

DISSIPATION FACTOR — 0.3% max at 1 KHz and 25°C. Values greater than 1 mfd measure at 0.1 KHz.

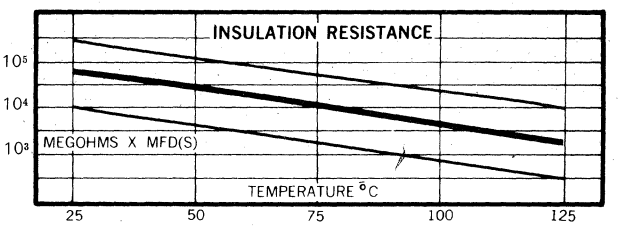
DIELECTRIC STRENGTH — 200% of rated volts.

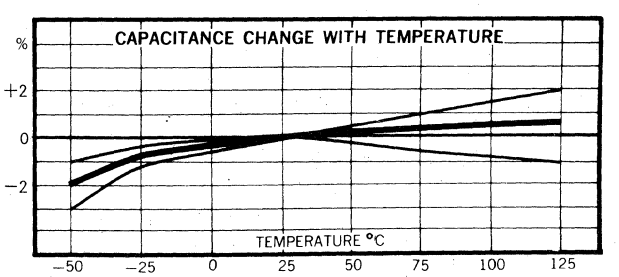
CONSTRUCTION — Polycarbonate dielectric, extended metal film electrodes, hermetically sealed, leads isolated from case. Leads are tinned copperweld, except for gold plated nickel for 30 volt type.

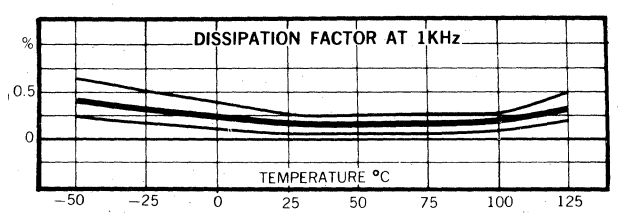
SEAL TEST — 1×10^{-5} ATM-CC/SEC max leak rate.

ENVIRONMENTAL — Capacitors shall meet all applicable requirements of MIL-C-19978 including grade 3 vibration.

FOR ADDITIONAL DETAILS,
SEE GENERAL INFORMATION SECTION, PAGE 3







QUALITY ASSURANCE

"PG" POLYCARBONATE CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

1. *Stabilization by temperature cycling from −62°C to 125°C, 2 cycles minimum.*
2. *Mass spectrometer hermetic seal test per MIL-STD-202, method 112, condition C, procedure III A.*
3. *Dielectric strength test at a minimum of 200% of rated voltage, lead to lead, leads to case.*
4. *Insulation resistance at rated voltage and 25°C.*
5. *Capacitance tolerance at 1 KHz and 25°C.*
6. *Dissipation factor at 25°C.*
7. *Visual inspection for dimensions, marking and packaging.*

COMPONENT RESEARCH COMPANY

CORDWOOD CAPACITORS
HERMETICALLY SEALED

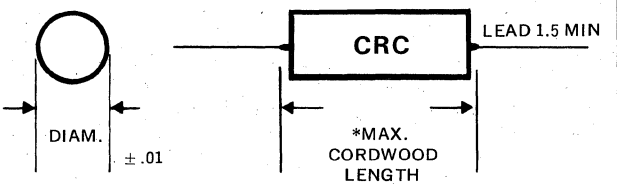
INFORMATION FOR THE PACKAGING ENGINEER

CORDWOOD LENGTH
In applications where length must be held to a minimum we have devised special hermetic seals which provide a maximum increase of 0.063" over the case length for the solder beads and wicking. Any of the capacitors shown elsewhere in the catalog may be obtained with this cordwood maximum on special order.

WELD APPLICATIONS
Capacitors with gold plated nickel leads can be welded within 0.030" of the cordwood dimensions without interference from solder wicking and resultant poor weld reliability. Capacitors with tinned copperweld leads (tinned copper clad steel) can also be welded and wicking is not a problem since it generally increases wire diameter by less than 0.002". Wire samples of either type will be supplied free of charge to assist you in setting up a weld schedule.

MODULAR LENGTHS
A wide variety of custom lengths and configurations can be fabricated. We have listed suggested sizes in an attempt at standardization.

GROUNDED STYLE CASE
The type Z case utilizes one lead soldered to the case and affords a reduction in length of approximately 0.070" from the standard floating style case (cordwood lengths shown below).



*Dimensions listed below apply to floating style case only.

ORDERING INFORMATION Add tolerance letter after Part No. for desired tolerance, J=5%, G=2%, F=1%, D=½%, B=¼%. When mylar thinwall sleeving is required add "S" after tolerance letter, when gold plated leads are needed add "N". See general information for further details. Parts listed have floating case. For grounded case style, max length is 0.070 less. Add "Z" to part number and increase prices shown by 15%.

05PQ POLYCARBONATE 50V CAPACITORS

Type 05PQ capacitors have the same electrical characteristics as type 05PL polycarbonate capacitors. Other voltage ratings, higher reliability types such as PK and other cordwood lengths can be supplied if you furnish us with complete details of your requirements.

05TQ TEFLON 50V CAPACITORS

Type 05TQ capacitors have the same electrical characteristics as type 05TA except that the temperature coefficient is approximately 20% more negative, custom capacitors with higher voltage ratings, higher reliability level or different lengths can be supplied.

COMPONENT RESEARCH COMPANY

PA POLYSTYRENE CAPACITORS

PA Polystyrene capacitors are used in missile and industrial applications for operational amplifiers and network fabrication. Special capacitor modules have been fabricated for a missile program which met extremely rigid qualification requirements for low noise and high insulation resistance within a limited case size. This is another example where our capacitors have demonstrated their superior characteristics. Capacitor modules, decades, and networks can be supplied which exceed industrial and military specifications. PA capacitors are available in 50V and 100V in tolerances of 0.25% to 5% and values from .001 mfd to 10 mfd.

PA SPECIFICATIONS

OPERATING TEMPERATURE — 62°C to 85°C at full rated volts.

TEMPERATURE COEFFICIENT OF CAPACITANCE

+1.0% Max. at	−55°C
+0.5% Max. at	−25°C
+0.35% Max. at	−10°C
+0.25% Max. at	0°C
0.0% Reference at	25°C
−0.3% Max. at	55°C
−0.7% Max. at	85°C

STABILITY — Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

Range	Retrace
−10°C to 85°C	0.05%
−62°C to 85°C	0.15%

INSULATION RESISTANCE (IR)

	50V	100V
Min IR at 25°C	1,000,000 megs	1,000,000 megs
at 85°C	250,000 megs	250,000 megs

Readings shown are for 1 mfd or less. For values over 1 mfd, divide readings by mfd to obtain min IR.

Example: A 10 mfd, 100 volt capacitor at 25°C is $\frac{1{,}000{,}000 \text{ megs}}{10} = 100{,}000$ megohms.

DIELECTRIC ABSORPTION — 0.02% Max. at 25°C.

DISSIPATION FACTOR — 0.02% Max. at 1KHz and 25°C.

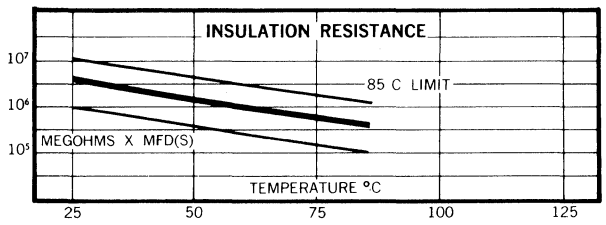
DIELECTRIC STRENGTH — 200% of rated voltage.

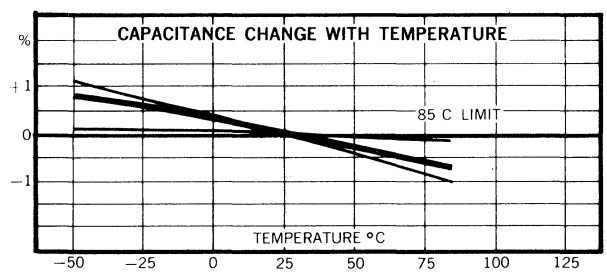
CONSTRUCTION — Polystyrene dielectric, extended foil electrodes, hermetically sealed. Leads isolated from case. Leads are tinned copperweld.

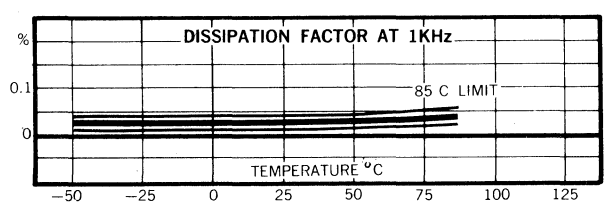
SEAL TEST — 1×10^{-6} ATM-CC/SEC Max leak rate.

ENVIRONMENTAL — Shall meet all applicable requirements of Mil-C-19978 including grade 3 vibration.

FOR ADDITIONAL DETAILS,
SEE GENERAL INFORMATION SECTION, PAGE 3







Quality Assurance

"PA" POLYSTYRENE CAPACITORS ARE 100% PROCESSED AND TESTED AS FOLLOWS:

1. Temperature cycling from -62°C to 85°C, 5 cycles minimum.
2. Mass spectrometer hermetic seal test per MIL-STD-202, Method 112, condition C. Procedure III A.
3. Dielectric strength test at a minimum of 200%of rated voltage, lead to lead and leads to case.
4. Insulation resistance at rated voltage and 25°C.
5. Capacitance tolerance at 1KHz and 25°C.
6. Dissipation factor at 1KHz and 25°C.
7. Visual inspection for dimensions, marking, and packaging.
8. Traceability to production and test records by permanent marking of parts with lot control number.
9. Process and inspection data is maintained on file per NPC-200-3 and Mil-Q-9858 quality control standards.

MA Mylar and MM Mylar CAPACITORS

MA miniature metallized mylar capacitors are extremely compact and rugged. 1MA capacitors are available in 100V in tolerances of 0.5% to 5% and values from .001 mfd to 10 mfd

MM metallized mylar capacitors are reliable, accurate and rugged. Many thousands are used in military equipment where an extra measure of dependability is needed. MM capacitors are available in 200V, 400V, and 600V in tolerances of 0.5% to 5% and values from .001 mfd. to 10 mfd.

MACRO-VALUE
FILM CAPACITORS

COMPONENT RESEARCH CO.

Capacitors 5 Mfd or more, termed macro-value, can be supplied to meet the electrical requirements of our standard metal cased tubular capacitors shown throughout this catalog. The macro-valued capacitors can be supplied in values exceeding 1000 Mfd in voltages ranging in the kilovolt region with case configurations to suit your special requirements.

Custom designs have been fabricated taking into consideration heat sinking problems, high acceleration and shock, extremely low leakage and dielectric absorption, minimum weight and size. Special modules which contain decade values, matched sets or capacitor networks of extreme accuracy can be furnished. We have been supplying space science and military research establishments with polycarbonate capacitors ranging from 20 Mfd to 1400 Mfd and polystyrene capacitors from 10 Mfd to 100 Mfd. These special capacitors have very high insulation resistance, low loss, and high reliability in minimum package size.

The following data will serve as a guide for packaging engineers in calculating the space required for larger valued capacitors. Included are volume ratios for type "PD" polycarbonate which is currently being tested for radar modulator and SCR applications.

RATED VOLTS	CAPACITOR TYPES	MICRO-FARADS PER CUBIC INCH OF VOLUME	CUBIC INCHES PER MICRO-FARAD
	POLYCARBONATE		
30	03PG, 03PL	33	0.03
50	05PG, 05PL	16	0.06
100	1PG, 1PL	7	0.13
200	2PG, 2PL	3	0.35
400	4PG, 4PL	1.5	0.67
1000	10PD	1.3	0.73
1500	15PD	0.5	2.0
2000	20PD	0.3	3.3
	TEFLON		
50	05TA, 05TL	4.5	0.22
100	1TA	2	0.5
200	2TA	1.0	1.0
100	1TU	0.46	2.2
200	2TU	0.25	4.0
100	1TF	0.46	2.2

50	05PA	1.0	1.0
100	1PA	0.46	2.2
200	2PA	0.25	4.0
	MYLAR		
100	1MA	16	0.06
200	2MM	7	0.13
400	4MM	3	0.35

The following capacitors can be fabricated in a hermetically sealed rectangular case approximately 2.88" x 2.25" x 2". in size to assist further in the custom design of large valued capacitors.

CAPACITOR TYPE	MFD	VOLTS	DIELECTRIC
03PL	300	30	Polycarbonate
05PL	150	50	"
1PL	60	100	"
2PL	30	200	"
4PL	12	400	"
05TA	50	50	Teflon
1TA	20	100	"
2TA	10	200	"
05PA	10	50	Polystyrene
1PA	4	100	"

RELIABILITY INFORMATION

Qualification tests are an excellent source for capacitor reliability data if sufficiently sensitive and accurate instrumentation is utilized by test technicians thoroughly familiar with measurement techniques so as to avoid the errors so prevalent with test reports. The measurement section shown on page 3 will provide useful information to technicians contemplating capacitor testing. Further engineering assistance can be provided to engineers in establishing a test flow plan or in test details for qualification or acceptance testing.

The following data covering type "PL" polycarbonate capacitors recently tested and qualified for use in a missile program is included here in condensed form as a guide to the type of changes to be anticipated with life testing. Test conditions were 140% of rated voltage at 105°C for 50 Volt and 100 Volt polycarbonate film capacitors, after 250 hours and 1000 hours of test time. Data is shown for four samples of our 05PL105G, 1 MFD ±2% 50 Volts, and eight samples of our 1PL224F, 0.22 MFD, 1% 100 Volts, capacitors.

Serial No.	% Cap. change after 250 hours	% Cap. change after 1000 hours	% Dissipation factor initial	% Dissipation factor after 1000 hours	Insulation resistance in megohms initial	Insulation resistance in megohms after 1000 hours
1 MFD						
1	−.30	−.40	.10	.08	5×10^5	5×10^5
2	−.36	−.45	.10	.08	6×10^5	2×10^6
3	−.27	−.57	.09	.08	7×10^5	2×10^6
4	−.12	−.16	.09	.08	6×10^5	1×10^6
0.22 MFD						
1	+.11	+.06	.09	.08	1×10^6	1×10^6
2	+.03	.00	.09	.08	2×10^6	3×10^6
3	−.65	+.01	.09	.08	2×10^6	4×10^6
4	−.01	+.16	.08	.07	2×10^6	3×10^6
5	.00	−.08	.09	.08	2×10^6	5×10^6
6	+.04	+.17	.09	.07	5×10^6	5×10^6
7	+.06	+.07	.08	.07	3×10^6	4×10^6
8	−.59	−.19	.09	.07	1×10^6	1×10^6

From analysis of this life test data and many other tests conducted, it appears that most of the capacitance drift occurs within the first 250 hours. We therefore note that burn-in tends to improve stability and have found that burn-in at 125°C will further accelerate the stabilization cycle.

If capacitors have poor quality the life testing generally increases the dissipation factor and decreases the insulation resistance.

The dissipation factor showed improvement for these capacitors and was well within the 0.25% maximum limit for our catalog specifications.

The insulation resistance did not decrease for any unit and instead increased in value for most of the test capacitors.

The capacitors tested are typical of our 1968 production quality level and we believe this quality level will be further upgraded with time as we refine our manufacturing process.

Please contact our sales office for further information concerning the unique performance and reliability of our capacitor products.

We make guys who can't

CHARACTERISTICS

CORNING® CYFM Capacitors give you environment-proof performance at substantial savings. They provide economical stability and reliability in coupling, decoupling, filtering, timing, switching, and many other critical circuits. The CYFM's are electrically and environmentally interchangeable with the CYFR type. We have boiled them in salt water, immersed them in saturated steam and subjected them to 96-hour salt spray and 1200 hours of moisture resistance tests without failure or degradation.

CORNING® CYFR Capacitors give you guaranteed reliability. They have contributed, and continue to contribute to marked improvement in MTBF in many military and space programs such as Titan, Surveyor, Syncom, Mariner, Apollo, and Gemini. Over 64-million unit-hours from lot acceptance tests over a five year period for Minuteman have demonstrated the reliability and reproducibility of the CYFR capacitor from a process under control.

CORNING® TYO Capacitors are ideal for printed circuit applications because of their miniaturization and radial lead configuration. Their design permits upright, flush mounting on circuit boards. Standard gold plated Dumet leads give reliable soldering or welding, and are spaced symmetrically with the case on .1" grids for fast installation on printed circuit boards. The lower prices of CORNING TYO Capacitors now provide a glass capacitor at comparable ceramic prices.

CORNING® CY60 and CY70 Capacitors are excellent for a large variety of radio frequency applications. They are used for power amplifiers, low power transmitters, and many electronic devices in grid, plate coupling, tank, and bypass functions. Because of their small size and minimum weight, these CORNING Capacitors are also suited for airborne equipment and all types of mobile transmitters.

The Glass-K is a miniature stable capacitor that exhibits a high capacitance-to-volume ratio. It offers the size advantages of ceramic types and the consistent performance associated with glass dielectrics.

The Glass-K's physical size and values of capacitance meet the requirements of both military and commercial applications. The larger capacitance values are suitable for point-of-use filtering in computers, and for bypassing and coupling elements in miniaturized circuitry. The smaller capacitance values are suitable for more critical circuit functions.

The Glass-K is designed for general purpose use in bypass, coupling, and filtering applications where the miniature size of ceramics is required and where **better performance** characteristics are desired at **competitive prices.**

*Tolerance ±1PF

Temperature Range
−40°C to +85°C.

Voltage Ratings	Test Voltage
Voltage Ratings	Test Voltage
50V	a minimum
200V	of twice
500V	Working Voltage
750V	

Dissipation Factor < 0.1% at 1000Hz

Temperature Coefficient
−150 ±60 parts per million per °C.

Cyclic Stability
Better than ±0.3%
If 75°C not exceeded and better than 0.5% @ 85°C for 30V Series.

SHIELDING
The outer foil on these capacitors can be indicated by a colored end marking. This will be supplied to special order only.

Insulation Resistance > 10^5 **Megohms**

Ordering Code
This is a five-section code which will serve to identify all the main features of the capacitor.
Type No. / Finish / Wire arrangement / Capacity / Voltage.

Type No. is the letters SF followed by style number; e.g. SF7.

Capacity to be written in picofarads using standard EIA identification code. Tolerance letter follows the capacity value.
e.g. 301J = 300 PF ±5%.
302K = 3000 PF ±10%.

Voltage to be written in Working Volts D.C.
Examples:
SF5-301F20
= Size 5/300pF ±1% 20V.

Tolerances ±5% = J
±1% = F ±10% = K
±2% = G ±20% = M
with a lower limit of ±1PF = F

Specifications

Temperature range: −55°C to +150°C
Test frequency: 100 pf and less — 1 MHz, over 100 pf — 1 KHz
Temperature coefficient: 0 ±30 ppm/°C (EIA char. COG)
Dissipation factor: 0.15% max. @ 25°C
Insulation resistance: 100 K megohms or 1000 ohm-farads (whichever is less) @ 25°C
Test voltage: 4 x rated W. DC below 12000 pf
2.5 x rated WVDC for 12000 pf and above

E.I.A. Code

Capacitance Code examples

below 10 pf:
339 = 3.3 pf
"9" digit signifies .1 multiplier
10 pf and above:
101 = 100 pf
3rd digit signifies number of zeros

Capacitance Tolerance

10 pf or less:
D = ±.5 pf
F = ±1.0 pf
above 10 pf:
J = ±5%
K = ±10%
M = ±20%

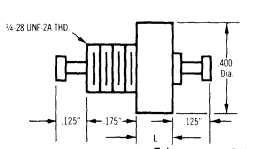
75000 Series EMC/RFI Filters

EMC has developed a new series of EMC/RFI filters for use in low-voltage circuits. A combination of these high-capacitance, low-voltage multi-layer ceramic capacitors and high-current inductors is utilized. These new filters provide more insertion loss in a smaller package than has been attainable previously. The DC resistance is the lowest of any comparable filter currently offered.



Specifications

Meets or exceeds applicable requirements of MIL-F-15733
Operating temperature: −55°C to +125°C
Operating temperature: −55°C 125°C
Dielectric strength: 100 VDC @ 25°C (50 ma max. charging current)
Working voltage: 50 VDC @ 85°C — 35 VDC @ 105°C — 28 VDC @ 125°C
Insulation resistance: 100 megohms min. @ 25°C — after 2 minutes @ 50 VDC (50 ma max. charging current)

Electro Materials Axial Lead Tubular K1800 (W5R) Capacitors

Distributed and stocked by COMPAR

Specifications

Temperature range: −55°C to +125°C
Temperature characteristics: W5R (±15%)
Dissipation factor: ≤2.5% @ 1 KHz, 25°C
Insulation resistance: 100,000 megohms or 1000 ohm-farads whichever is less, @ 25°C
Test voltage: 4 x rated WVDC for values <0.5 μf, 2.5 x rated WVDC for 0.5 and above

E.I.A. Code

Capacitance Code Example

333 = 33,000 pf i.e., third digit signifies number of zeros

Capacitance Tolerance Code

J = ±5%
K = ±10%
M = ±20%

Specifications

Temperature range: −55°C to +150°C
Test frequency: 100 pf and less — 1 MHz, over 100 pf — 1 KHz
Temperature coefficient: 0 ±30 ppm/°C (EIA char. COG)
Dissipation factor: 0.15% max. @ 25°C
Insulation resistance: 100 K megohms or 1000 ohm-farads (whichever is less) @ 25°C
Test voltage: 4 x rated WVDC below 12000 pf
2.5 x rated WVDC for 12000 pf and above

E.I.A. Code

Capacitance Code examples

below 10 pf:
339 = 3.3 pf
"9" digit signifies .1 multiplier
10 pf and above:
101 = 100 pf
3rd digit signifies number of zeros

Capacitance Tolerance

10 pf or less:
D = ±.5 pf
F = ±1.0 pf
above 10 pf:
J = ±5%
K = ±10%
M = ±20%

For Capacitors with GREATER RELIABILITY . . .

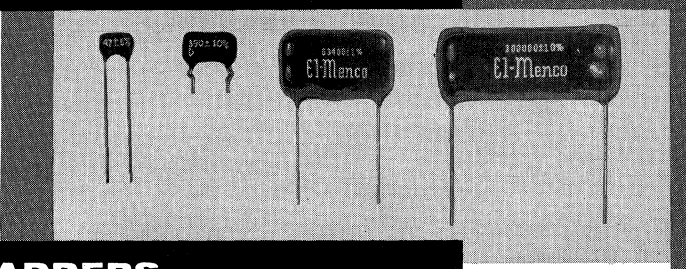
Choose El-Menco

The Capacitors You Find Wherever There's Electronics!

EL-MENCO DUR-MICA CAPACITORS

Only 1 Failure Per 43,000,000 Unit-Hours!

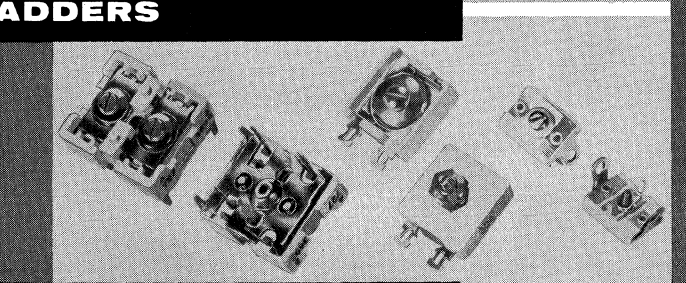
- It has been computed that "debugged" DM30, 10,000 MMF units, when subjected to 257,000 hours of life at 85°C with 100% of the rated DC voltage applied, will yield only 1 FAILURE PER 43,000,000 UNIT-HOURS!
- DM15, DM16, DM19, DM20 . . . perfect for miniaturization and for new designs using printed wiring circuits. Also available in DM30, DM42 and DM43.
- New "hairpin" parallel leads insure easy application.
- Exceed all electrical requirements of military specification MIL-C-5A.



EL-MENCO TRIMMERS & PADDERS

Design Versatility!

- Available in 350 VDC and 500 VDC as well as other test voltages.
- All bases are of low-loss steatite.
- Special lugs are obtainable for printed circuitry.
- Miniature units are available.
- Solder Lugs can be bent in any position without affecting the capacity setting due to the rigid construction.
- Various types of mounting brackets are available for all trimmers.
- Units can be constructed for special applications.

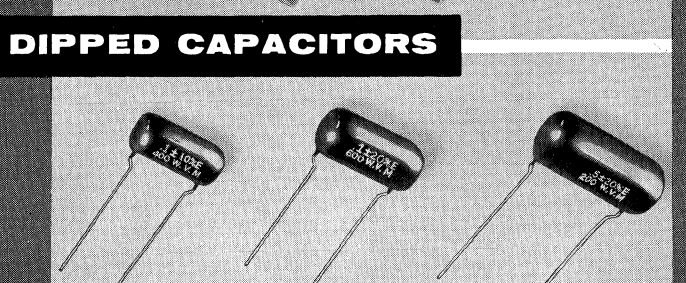


EL-MENCO *MYLAR-PAPER DIPPED CAPACITORS

Only 1 Failure in 14,336,000 Unit-Hours!

- Life tests at 105°C with rated voltage applied have yielded only 1 FAILURE PER 1,433,600 UNIT-HOURS for 1 MFD. Since the number of unit-hours for these capacitors is inversely proportional to the capacitance, 0.1 MFD Mylar-Paper Dipped capacitors will yield only 1 FAILURE PER 14,336,000 UNIT-HOURS!
- Working volts DC: 200, 400, 600, 1000 and 1600.
- Durez phenolic resin impregnated.
- Tolerances: ± 10% and ± 20% (closer tolerances available).
- Dielectric strength: 2 or 2½ times rated voltage, depending upon working voltage.
- Exceed all electrical requirements of E.I.A. specification RS-164 and military specifications MIL-C-91A and MIL-C-25A.

*Registered Trademark of DuPont Co.



EL-MENCO MOLDED MICA CAPACITORS

Superior Performance!

- Unmatched for excellent stability, dielectric strength, high insulation resistance, extremely high "Q" and correspondingly low power factor.
- Units can be subjected to a short "debugging" life test at elevated voltage and temperature for removal of early life failures and for improved reliability.

EL-MENCO OFFERS A COMPLETE LINE OF CAPACITORS . . . STANDS READY TO SERVE ALL YOUR CAPACITOR NEEDS

THE ELECTRO MOTIVE MFG. CO., INC.

WILLIMANTIC, CONNECTICUT

Dipped Mica • Molded Mica • Silvered Mica Films • Mica Trimmers & Padders
Mylar-Paper Dipped • Paper Dipped • Mylar Dipped • Tubular Paper

MANUFACTURERS OF El-Menco Capacitors

West Coast Manufacturers contact: **COLLINS & HYDE CO.**, 900 N. San Antonio Rd., Los Altos, California 94022
5380 Whittier Blvd., Los Angeles, California 90022

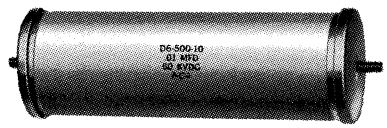
ALSO SOLD NATIONALLY THROUGH ELECTRONIC PARTS DISTRIBUTORS

fci FILM CAPACITORS, INC.

HERMETICALLY SEALED TUBULAR CAPACITORS

Type MD4	Metallized polyester film
Type D4	Polyester film
Type ME4	Metallized polycarbonate film
Type E4	Polycarbonate film
Type A4	Polystyrene film
Type C4	Teflon film

TYPE D6 Available to 60,000 VDC

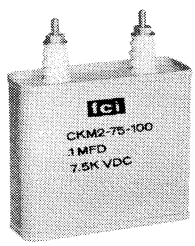


Type D6 Capacitors were designed to assure reliable operation where space is at a premium. The steatite hermetic housing allows for operation under extreme humidity. These capacitors are of extended foil and short lead construction which keeps the inductance to minimum and produces a very high ringing frequency, so desirable for energy storage and pulse capacitors. Specify D6H for 125°C operation.

EPOXY-CASE, RECTANGULAR CAPACITORS, AXIAL LEAD

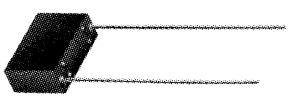
Type ME13	Metallized polycarbonate film
Type MD13	Metallized polyester film
Type D13	Polyester film
Type E13	Polycarbonate film
Type A13	Polystyrene film

TYPE CKM2 Available to 50,000 VDC



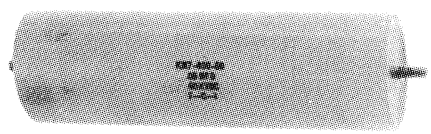
Type CKM2 Capacitors have been designed specifically to meet the need for smaller and more reliable capacitors that will withstand the severe operating conditions encountered in military and industrial electronic power equipment. Rectangular CP70 style cases with solder seal terminals are used to assure a true hermetic seal. Finish is gray lacquer over prime coat. CP07 brackets are available upon request. Specify CKMH for 125°C operation.

EPOXY-CASE, RECTANGULAR CAPACITORS, RADIAL LEAD



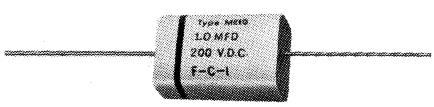
Type ME14	Metallized polycarbonate film
Type MD14	Metallized polyester film
Type D14	Polyester film
Type E14	Polycarbonate film
Type A14	Polystyrene film

TYPE KM7 Available to 150,000 VDC



Type KM7 Capacitors are housed in cylindrical electrical grade phenolic tubes with ¼-20 x ⅞ bolts for terminations. Corona is held to an absolute minimum by the internal construction of the capacitor elements and the elimination of most metals. These capacitors are ideal for use in X-Ray equipment, high voltage power supplies, energy storage etc.

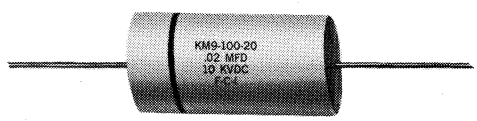
WRAP-AND-FILL OVAL CAPACITORS



Type ME10	Metallized polycarbonate film
Type E10	Polycarbonate film
Type MD10	Metallized polyester film
Type D10	Polyester film
Type A10	Polystyrene film

Add "R" to specify round configuration

TYPE KM9 Available to 12,500 VDC



These popular and economical capacitors were designed primarily for use as filters for power supplies used in electrostatic copiers and precipitators. They are housed in specially treated plastic tubes and end filled with epoxy resin. Copperweld leads are used for convenient terminations. Will meet the humidity requirements of EIA Specification RS-164 with 500 hours exposure at 95% relative humidity and +40°C temperature.

Our unique capability can fulfill your requirement for special designs. A complete file of engineering bulletins is available on all of the above types.

FILM CAPACITORS

F-DYNE quality film capacitors are designed and manufactured to provide optimum electrical characteristics with reliable performance.

The smallest housing that has been developed to date, providing superior performance, is the thermo Mylar® tape wrap. It adds approximately .010" to the diameter of the winding and is capable of meeting all MIL-C-27287 requirements including moisture resistance, vibration, insulation resistance, etc.

F-DYNE capacitors are made with copperweld leads electrically welded to aluminum foil. No high series resistance or high power factor problems are ever encountered with this construction. Even if the leads are cut very short and then soldered into your application with an extra hot soldering iron, the lead connection to the foil will not be affected. In fact, the end of the lead can be burned off with a gas torch flame without effecting the power factor or series resistance. Metallized Mylar, Metallized Polycarbonate and tin lead foil Polystyrene capacitors are the only F-Dyne Capacitors that are made in the conventional manner with leads soldered to the foil. Normal care should be taken when soldering these capacitors into your circuits.

THREE BASIC FILMS ARE USED IN F-DYNE CAPACITORS:

- MYLAR
- POLYCARBONATE
- POLYSTYRENE

ELECTRICAL & MECHANICAL CHARACTERISTICS

All F-Dyne capacitors pass the following requirements.

A. **Dielectric Strength**
F-Dyne quality capacitors will pass a life test at 140% of their DC rated voltage. In addition, they are designed to withstand a voltage of 200% of their rated DC voltage for one minute without any interruption or damage.

B. **Capacitance Tolerance**
When measured at a frequency of 1000 cps at 25°C, capacity will be within the specified tolerance. See charts for variation with temperature and frequency. The standard tolerances are ±½%, 1%, 2%, 5%, 10%. Other tolerances, closer and wider, are available.

C. **Lead Strength**
F-Dyne capacitor leads withstand a five pound pull for a full minute.

D. **Lead Flexibility**
Leads are designed to have full flexibility to insure maximum use without danger of damage or fatigue failure.

E. **% Dissipation factor @ 1000 cps and 25°C**

	FOIL		METALLIZED	
Type	Typical	Spec. limit	Typical	Spec. limit
Mylar	.45	1%	.55	1%
Polycarbonate	.05	.3	.15	.3
Polystyrene	.03	.1	—	—

Note: Capacitors over 5mfd. are tested at 60 cycles.

F. **Insulation Resistance (Megohms x Microfarads)**

	FOIL		NEED NOT EXCEED	METALLIZED		NEED NOT EXCEED
Type	Typical	Spec. limit	Megohms	Typical	Spec. limit	Megohms
Mylar	100,000	50,000	100,000	50,000	25,000	50,000
Polycarbonate	400,000	75,000	500,000	80,000	30,000	150,000
Polystyrene	800,000	100,000	500,000	—	—	—

The above values are read after a two-minute charge at rated voltage at 25°C.

G. **Humidity Resistance**
All foil capacitors meet requirements of MIL-C-27287. Metallized capacitors will exceed requirements of E.I.A. specifications RS-164.

H. **Voltage temperature derating**
All Mylar and Polycarbonate capacitors are rated at 85°C for continuous operation. If ambient temperatures higher than 85°C are encountered, in order to realize the normal life expectancy of the capacitor, the voltage must be derated as follows:

85°C	95°C	105°C	115°C	125°C
80	68	58	48	40
100	88	75	62	50
200	170	140	120	100
400	335	285	240	200

GENERAL APPLICATION INFORMATION

SIZE AND PRICES of the three dielectrics vary in the following order.

1. Mylar least expensive and smallest.
2. Polycarbonate approximately 12% larger than mylar and more expensive.
3. Polystyrene approximately three times as large as Mylar and most expensive of the three dielectrics.

COST AND SIZE

For each of the three dielectrics there are size and price variations.
Standard — least expensive Small — more expensive
Miniature — most expensive

In applications where none of the above types can be used because space is limited, F-Dyne supplies metallized foil capacitors for both the Mylar and Polycarbonate dielectrics. These again vary as follows:
Standard — least expensive Small — more expensive
Miniature — most expensive

ULTRA MINIATURE FLAT

ULTRA MINIATURE FLAT MYLAR AND FLAT POLYCARBONATE ALUMINUM FOIL

Equal to or smaller in size than conventional miniature metallized mylar and metallized polycarbonate capacitors, these capacitors are superior to metallized capacitors because they have a solid aluminum foil conductor approximately .00025 in thickness. Each foil extends beyond the dielectric and the leads are electrically welded to the aluminum foil extensions. Because of this construction these capacitors have the following advantages over comparable sized metallized mylar and metallized polycarbonate capacitors.

	Mylar Foil	Metallized Mylar
Dissipation factor	less than .5% @ 25°C measured at 1000CPS.	less than 1% @ 25°C measured at 1000CPS.
Insulation* Resistance	50,000 megohm micro farads at 25°C rated voltage after 2 min. charging time I.R. need not exceed 100,000 megohms.	25,000 megohm microfarads at 25°C at rated voltage after 2 min. charging time. I.R. need not exceed 50,000 megohms.
Humidity Resistance	meets or exceeds requirements of MIL-C-27287	Exceeds requirements of E.I.A. Spec. 164 para. 2, 3, 8.
Stability of Internal Connections	Welded connection of lead to aluminum foil cannot be disturbed when the capacitor leads are soldered into the circuit regardless of how much they are overheated.	All metallized capacitors are terminated with a metallic spray on the ends and a lead attached with solder. If the lead is overheated when being soldered into the application, the internal connection may be unsoldered causing high series resistance and subsequent failure.

NOTE: Other characteristics same as standard mylar capacitors.

OTHER ADVANTAGES

In addition to the above advantages the foil type capacitors give more dependable stable equipment functioning. On some rare occasions, metallized capacitors have been known to short and clear in application. As a result the equipment malfunctions and the cause of malfunctioning cannot be traced. This cannot happen with foil type capacitors listed on pages 22 and 23.

PRICE

The price of the foil type is lower than the price of metallized capacitors because of the less expensive straight forward simpler construction.

*These characteristics are the same for polycarbonate flat capacitors, except for insulation resistance see page 1.

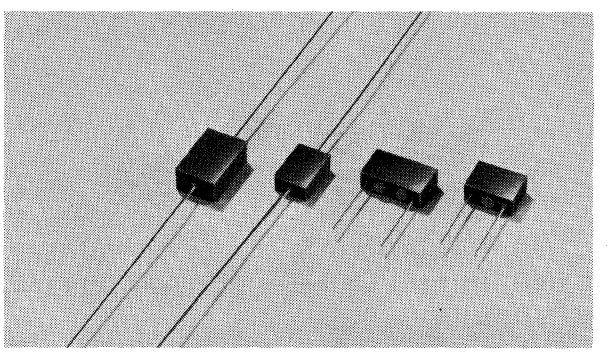
METALLIZED POLYCARBONATE

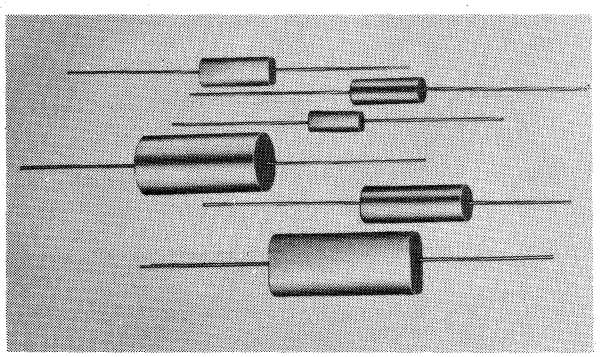
Featuring the new .00008″ film, 50V design, Series 410 offers hermetic sealed miniature metal cases for reliable, stable performance from −55°C to +125°C with no voltage derating. Designs to 400 VDC are backed by life test data.

New optional ceramic end seals offer you the ultimate in volumetric efficiency with no compromise in reliability.



METALLIZED MYLAR AND POLYCARBONATE

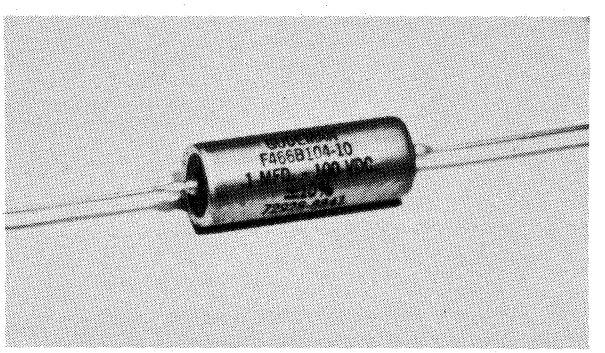
Miniature 50 volt designs of new .00008″ film in rugged epoxy cases and a variety of lead configurations are offered in Series 317-323. Molded standoffs are included on radial lead units for printed circuit board applications. Available in a wide range to 200 VDC and +125°C. Extensive tests back reliability data.



METALLIZED POLYCARBONATE

New 50 volt .00008″ film designs lead our Series 396 and 397 in both flat and tubular configurations. These wrap and fills, epoxy sealed in non-metallic cases, are available to 600 VDC, −55°C to +125°C. Reliability data available.

New undermarked tape guarantees performance to any marking specification.



FLAT TC POLYCARBONATE

Series 466 achieves a uniquely low (+50, −75 ppm/°C), temperature coefficient through use of balanced polycarbonate extended foil design. AC applicability is provided by low DF and proven negligible internal temperature rise. Ideal for space conscious SCR's. DC and AC reliability backed by extensive life tests. 100-600 volts, −55°C to +125°C.

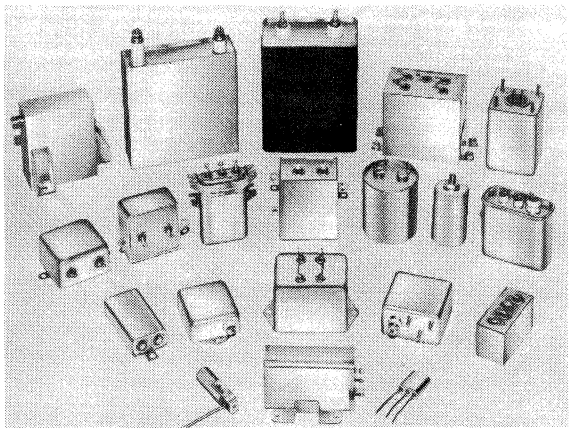
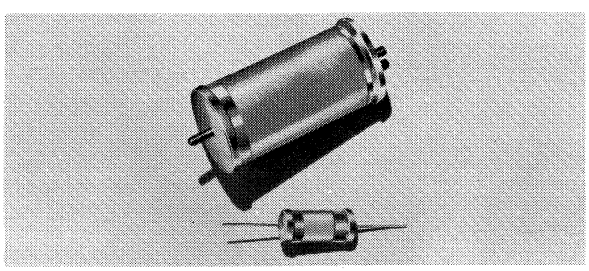
METALLIZED MYLAR

Designed to military standards, Series 68 is also popular in industrial systems where stability, size and life are critical factors. Hermetic seals, metal case, superior insulation resistance and dissipation factor insure performance in severe environments. 100 - 600 VDC from −55°C to +125°C.



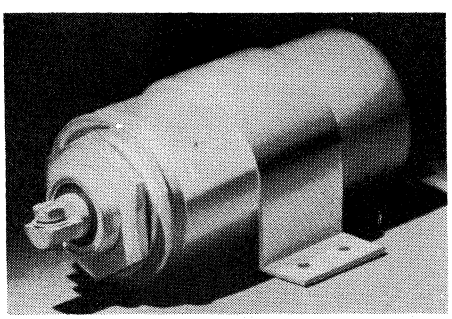
SPECIALS

Thousands of special designs and proven fabrication techniques offer you unique flexibility of choice in solving your capacitor problems. Consult our Engineering staff. Our unusual "design comparison" file can save you time and money.



HI VOLTAGE

Glass case designs of Series 145/146 offer substantial reduction in size and weight compared with comparable voltage ratings of metal cased units. Values to 10,000 WVDC, −55°C to +125°C.



RFI FILTERS

Gudeman offers a full line of commercial and military filters designed to MIL-F-15733E. Many low pass FLO types are stocked for immediate delivery. Insertion loss is guaranteed in accordance with MIL STD-220.

CERAMIC CAPACITORS

Subminiature ML02 and ML03 Series

WORKING VOLTAGE: ---------- 25 VDC
TEMPERATURE RANGE: ---------- -55°C to +85°C
INSULATION RESISTANCE: -------- 2500 megohms-microfarads or 5000 megohms, whichever is less
DISSIPATION FACTOR: ---------- 4% at 1 KC and +25°C (measured at 0.5 VRMS)
TEMPERATURE CHARACTERISTICS: --- Maximum capacitance change -55°C to +85°C, +22%, -56% with zero applied voltage
LIFE TEST: ---------- 2 x WVDC at +85°C for 1000 hours
LEAD SIZE
Radial Leads: ---------- #24 AWG tinned copper
Axial Leads: ---------- #22 AWG tinned copper
ENCAPSULATION: ---------- Wax impregnated phenolic
MILITARY SPECIFICATIONS: ------- Meet or exceed requirements of MIL-C-11015 (latest revision), where applicable

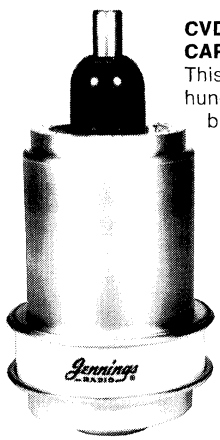
Your best single source for vacuum capacitors, vacuum relays and vacuum contactors.

ITT Jennings is the leading designer and manufacturer of vacuum electronic components, which includes vacuum capacitors, relays, coax relays, contactors, and specialized measuring instruments. Following is a brief sampling of some of the hundreds of standard components available from ITT Jennings. For specific information in any area request the catalog listed.



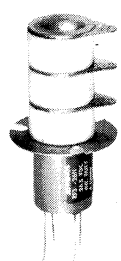
CVDD VACUUM VARIABLE CAPACITOR (Catalog 101)
This capacitor is one of several hundred different vacuum variable capacitors available from Jennings. It possesses all the advantages that have made vacuum variable capacitors famous such as small size, high rf voltage and current ratings, extremely low losses, and high maximum to minimum capacity change ratio. CVDD 500 has a capacity range of 20 pf to 500 pf, peak test voltage to 15 kv, and rf current rating of 80 amps rms at 16 MHz.

CFS SERIES VACUUM FIXED CAPACITORS (Catalog 101)
This series includes the highest capacity vacuum capacitors ever devised. An almost unlimited choice of capacities is available from 250 pf to 25,000 pf. They are much smaller than other capacitors with comparable capacity, voltage, current and dissipation ratings. Peak voltage ratings from 1 kv to 45 kv are also available depending on the unit. Current ratings of 200 amps rms at 1 MHz are typical. The CFS series is characterized by very low losses and internal inductance of less than 10 nanohenries.

Typical uses include plate blocking in medium power transmitters or in tank circuits in induction heating equipment.

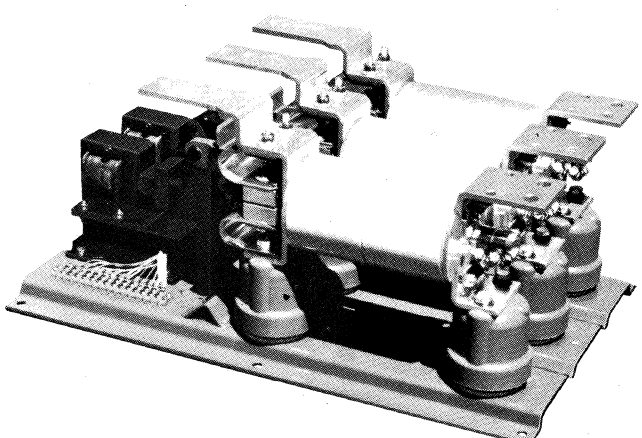
RC63 VACUUM COAXIAL RELAY (Catalog 103)
This tiny single pole double throw coaxial relay operates in a frequency range from 0 to 2400 megahertz. Only 2½ inches long and 4 ounces in weight it will handle 2 kilowatts cw power at 30 MHz. The vacuum dielectric environment shields the contacts from contamination and assures high reliability.

The relay is designed for such applications as antenna-receiver-transmitter switching, data acquisition, and radar transducer circuits.



RF3A NEW MINIATURE RELAY (Catalog 102)
Amazing "powerhouse" of unusual capability and economy. Measures only 2½" long, weighs just 1¾ ounces, but will interrupt 18,000 watts of dc power. Also carries 17 amps rms, withstands 7,500 peak volts at 15 MHz.

Aided by vacuum dielectric, this "mitey mite" will withstand 60 cycle peak voltages of 12,000 volts. Its vibration rating is 10 G to 500 cps; life expectancy is more than a million operations. Ideal for high voltage switching where space and weight are critical.



SERIES 900 VACUUM CONTACTOR (Catalog 104)
Three rugged, single-pole vacuum interrupters ganged in the new Series 900 contactor enable it to perform the switching duties of a NEMA size 6 contactor. This 95-pound, 3-phase unit packs a minimum of 600-volt capacity. The Series 900 includes models that will operate at 1500, 2300 or 5000 volts, 3-cycle operate time and operating currents up to 800 amperes with interrupting abiilty of 12,000 amperes, rms.

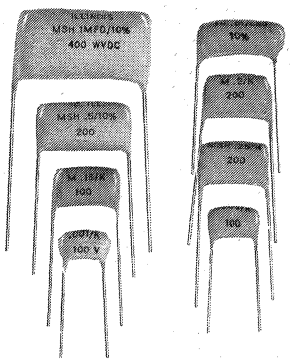
ILLINOIS POLYESTER CAPACITORS

"TIME TESTED QUALITY"

TYPE MSH

RADIAL LEAD METALLIZED POLYESTER CAPACITORS. FORMED OR UNFORMED LEADS. ENCAPSULATED IN HIGH TEMPERATURE THERMO-SET RESIN.

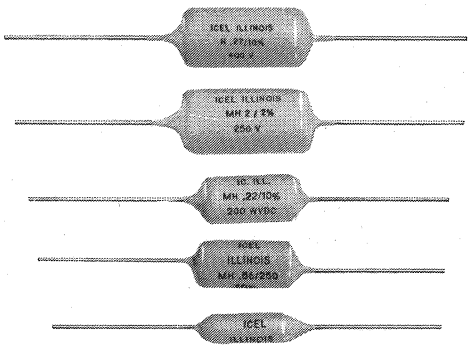
VOLTAGE RANGE 250, 400, 600, and 1000 VOLTS D.C. CAPACITY RANGE .001 MFD to 3 MFD. TOLERANCE OF ±20%, ±10%, ±5%, ±2%, OR ±1%.



TYPE MH

METALLIZED POLYESTER CAPACITORS. AXIAL LEAD. ENCAPSULATED IN HIGH TEMPERATURE THERMO-SET RESIN.

VOLTAGE RANGE 250, 400, 600, and 1000 VOLTS D.C. CAPACITY RANGE .001 MFD to 3 MFD. TOLERANCE OF ±20%, ±10%, ±5%, ±2%, and ±1%.

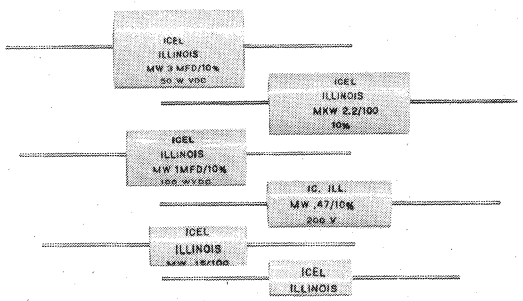


WIDE TEMPERATURE RANGE
LONG LIFE
HIGH DIELECTRIC STRENGTH
LOW DISSIPATION FACTOR
NON-INDUCTIVE WINDING

TYPE MW

METALLIZED POLYESTER CAPACITORS "WRAP AND FILL CONSTRUCTION." PLASTIC RESIN END SEALS. FLAT AND TUBULAR CONSTRUCTION.

VOLTAGE RANGE 250, 400, 600, 1000, AND 1500 VOLTS D.C. CAPACITY RANGE .01 MFD TO 7 MFD. TOLERANCE ±20%, ±10%, ±5%, ±2%, ±1%.



TYPE W

"WRAP AND FILL" POLYESTER CAPACITORS. PLASTIC RESIN SEALS. FLAT OR TUBULAR CONSTRUCTION. VOLTAGE RANGE 250, 400, 600, 1000, and 1500 VOLTS D.C. CAPACITY RANGE .01 MFD TO .47 MFD. TOLERANCE OF ±20%, ±10%, ±5%, ±2%, ±1%.

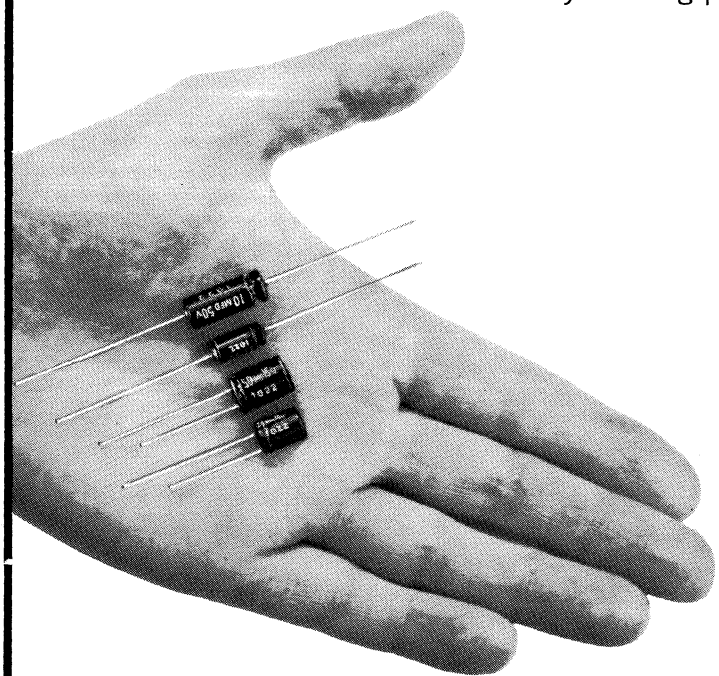
Miniature Aluminum Electrolytic, Polyester Film & Metalized Polyester

CAPACITORS

Ideal where any high quality capacitors are required. Dependable in every application from vacuum tube to solid state circuitry utilizing point-to-point or printed circuit mounting.

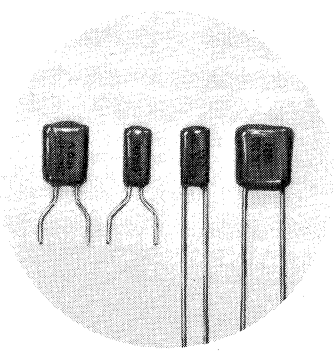


ALUMINUM ELECTROLYTICS

- Vinyl covered aluminum case, axial and radial leads
- Moisture tight end seal
- Welded construction
- Extremely low leakage characteristics
- High purity etched foil
- Excellent performance and long life over specified ranges

	Miniature Low Voltage	General Purpose	Non-Polarized
Voltage Range	3 to 50 volts d.c.	100 to 500 volts d.c.	3 to 50 volts d.c.
Capacitance	0.5 to 3000 uf.	1.0 to 1000 uf.	1.0 to 500 uf.
Operating Temp.	−25°C to +70°C −10°C to +85°C	−25°C to +70°C −10°C to +85°C	−10°C to +70°C −10°C to +85°C

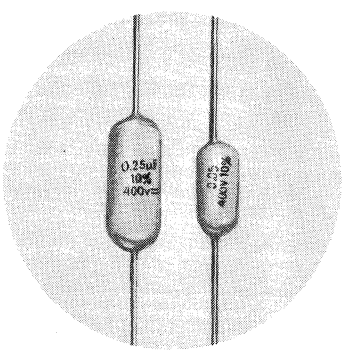
POLYESTER FILM



A broad range of miniature polyester film capacitors, with radial leads. Voltage ranges: 100, 200, 400, 600 volts d.c. Capacitance range: .001 μf. to 0.5 μf. Operating temperature from −40°C to +85°C with no derating. Standard tolerances of ±20%, ±10%; closer tolerances available.

- Temperature stable, low dissipation factor, low leakage, high insulation resistance.

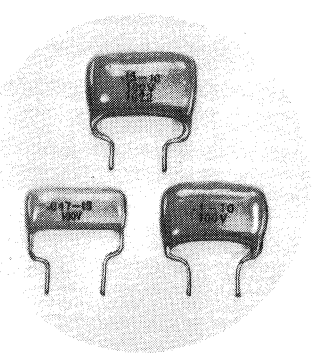
METALIZED POLYESTER



A complete line of sub-miniature metalized polyester film capacitors with axial leads. Wide temperature range, temperature stable, long life. These capacitors have a high dielectric strength, low dissipation factor, and a high insulation resistance. Highly reliable, non-inductive self-healing characteristics.

In voltage ranges of 250, 400, and 600 volts d.c. Tolerances of ±20%, 10% and 5% available. Capacitors will withstand, without injury, flash voltages 1½ times the working voltage, for as long as 5 seconds. Temperature stability of less than ±5% deviation from the 25°C value in the range of −20°C to +85°C.

POLYESTER FILM



A complete line on non-inductively wound polyester film capacitors. These capacitors have uniformly cut and crimped leads which are ideally suited for printed circuit applications. Available in voltages of 100, 200, 400 and 600 Volts "DC" with capacitor tolerance ±20%, ±10%, and ±5%. Operating temperature range −40+85% without derating. They are temperature stable and highly reliable.

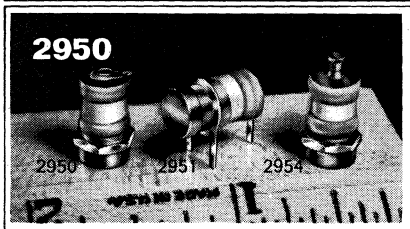
When Reliability is the Rule...

SPECIFY **Johanson** *A COMPLETE LINE OF*

HIGH Q VARIABLE CAPACITORS
AIR • GLASS • QUARTZ

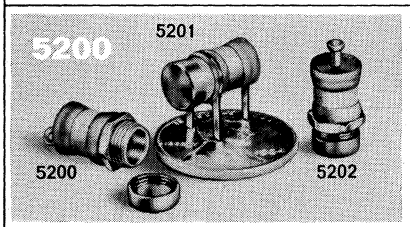
IMPORTANT

All models feature 570°F Solder. Prevents distortion. Not affected by conventional soldering temperature.



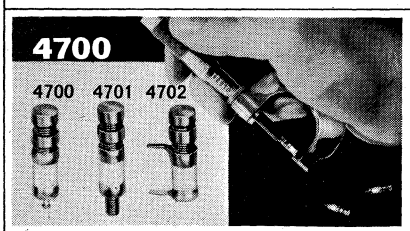
Miniature size, exceptionally high Q, superior ruggedness for protection against shock and vibration, −55°C to +125°C operating temperature range, protection against fungus, salt spray and humidity.

Capacitance Range: 0.8—10.0 pF
Breakdown: > 500 VDC
Q @ 100 mc: > 2000
Moisture Resistance: Ten 24 hour cycles
Shock: 50 g's 11 millisec.
Vibration: 15 g's 10-2000 cps



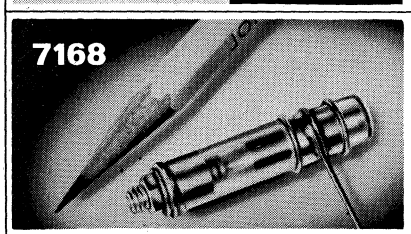
Improved one piece rotor construction with built-in torque for longer and more reliable adjustment life. Reliability tested and certified by independent laboratory. (Results available on request.)

Capacitance Range: 0.8 to 10.0 pF
Breakdown: > 500 VDC
Insulation Resistance: > 10^6 megohms @ 500 VDC
Q @ 100 mc: > 3000
Temperature Coefficient: 0 ±20 ppm/°C
Shock: > 275 g (6.0 millisec.)



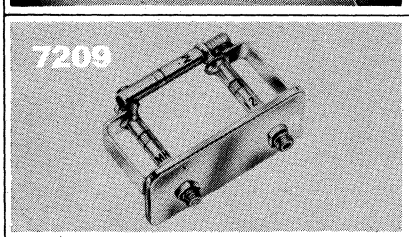
10:1 capacitance ratio in micro miniature size—extra fine tuning < .35 pF per turn. High Q, (greater than 1500 at 500 mc).

Capacitance Range: 0.35 pF to 3.5 pF
Working Voltage: 250 VDC (test voltage 500 VDC)
Q @ 100 mc: > 5000; @ 250 mc: > 2000
Insulation Resistance: > 10^6 megohms
Temperature Range: —55°C to +125°C
Temperature Coefficient: 50 ±50 ppm/°C



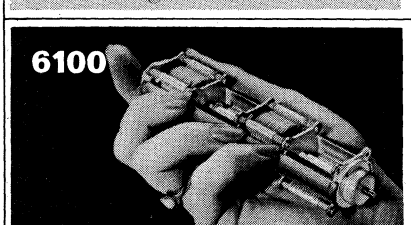
High RF voltage (models available to 4500 volts RF peak at 30 MHz). Low minimum capacitance (.5 pF). High current (models available to 10 amp. RMS).

Capacitance Range: 0.5 pF to 5.0 pF
Working Voltage: 2500 VDC & 2500 v peak RF @ 30 mc applied simultaneously and at 200°C
Q @ 1 mc: > 2000
Dielectric Strength: > 7000 VDC
Temperature Coefficient: 0 ±100 ppm/°C
Operating Temperature: —40°C to +200°C



Unique design provides minimal capacitance drift during vibration. Negative temperature coefficient (Model 7210). The self-resonance exceeds 1200 MHz.

Capacitance Range: .5—7.5 pF (7209)
.3—3.0 pF (7210)
Temperature Coefficient:
0 ±100 ppm/°C (7209)
—300 ±100 ppm/°C (7210)
Working Voltage: 250 VDC (Test voltage 500 VDC)
Finish: gold with coin silver electrode bands
Q @ 20 mc: > 500



Modular design. Available in one to five section modules in a wide variety of capacitance ranges (SLC & SLF).

Capacitance Range:
Max. 145 pF, Min. 9.5 pF per section (180° Rotation)
Capacity Variation: Straight line capacity
Temperature Range: —55°C to +125°C
Breakdown: 1000 VDC
Low Torque: 3-5 oz. in.

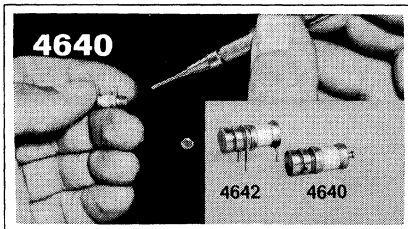
JOHANSON MANUFACTURING CORPORATION

Johanson

HIGH Q VARIABLE CAPACITORS

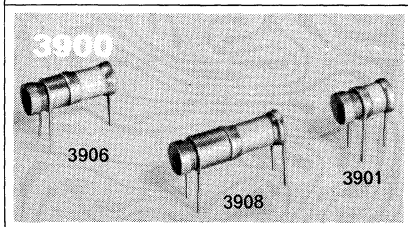
Johanson Capacitors provide construction and performance features that have become the industry standard for excellence.

No compromise is made in materials, design or workmanship assuring, in all cases, the finest performance available for the price. Test Johanson capacitors yourself—under your worst-case test conditions.



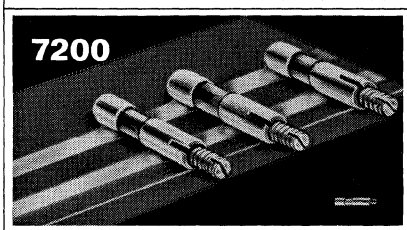
High capacity in a small package—exclusive round nut permits installation in tight places or miniaturized packaging. Ultra-rugged construction.

Capacitance Range: .4 pF to 6 pF (> 8 turns)
Working Voltage: 250 VDC (Test Voltage 500 VDC)
Q @ 100 mc: > 5000
Insulation Resistance: > 10^6 megohms
Temperature Coefficient: 50 ±50 ppm/°C
Temperature Range: –65°C to +125°C



Extended range to 30 pF
- Q (20 pF) > 1200 at 100 mc
- Low temperature coefficient
- All units have a "true" hermetic seal

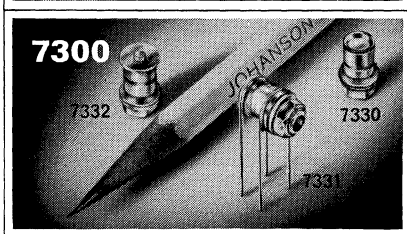
Capacity: 1-14 pF (3901); 1-20 pF (3906); 1-30 pF (3908)
Voltage Rating: 250 VDC (test voltage 500 VDC)
Insulation Resistance: > 10^6 megohms
Operating Temperature Range: –55°C to +125°C
Temperature Coefficient: 0 ±50 ppm/°C (Average @ 75% max. C)



ACTUAL SIZE

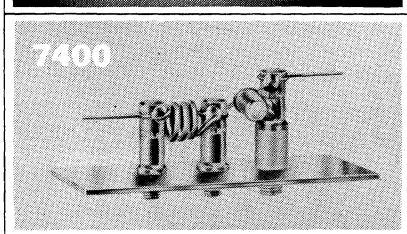
Applications:
- UHF oscillators
- Coupling (VHF & UHF)
- Terminations for UHF coupling links
- Strip lines and modular blocks
- Balancing of semiconductors and microwave components

Capacitance Range: 0.1 pF to 1.3 pF
Working Voltage: 200 VDC
Q @ 200 MHz: > 500
Temperature Coefficient: 50 ±50 ppm/°C
Torque: .1-1 in. oz.
Finish: 24K gold plate



For Military and Commercial Applications. The unique solid metal band design meets electrical and physical requirements beyond the capability of conventional trimmers.

Capacitance Range: 1.0—10.0 pF
Temperature Coefficient: 0 ±50 ppm/°C
Dielectric Strength: 1000 VDC @ 50% RH and maximum rated capacitance
Torque: 1—5 in. oz.
Q @ 1MHz: > 1000



The problems created by lead length at microwave frequencies can be minimized by soldering components directly to the capacitor.

Capacitance Range:
.5-4.5 pF—7400 (PC40J4R5)
.5-8.5 pF—7401 (PC40J8R5)
.7-12.0 pF—7402 (PC40H120)
.7-18.0 pF—7403 (PC40H180)
Vibration: 15 g's 20-2000 cps
Finish: 24K gold plate
Q @ 20 mc: > 500

CONFIGURATIONS

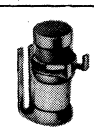
JMC 4140
C_1 = .8—5 pF; C_2 = 1—10 pF
(ranges available for C_1 & C_2 5 to 30 pF.)

JMC 6371
1—10 pF Vertical mount above panel

JMC 4581
4—40 thread
Cap: 0.8—10 pF
Filter application

JMC 4840
Cap: 0.8—10 pF
Non-magnetic

JMC 5046
Cap: 0.8—10 pF



JMC 6230
4.5—23.5 pF
Vertical mount below panel

Other Lines: • Tuners and ganged tuners; linear within ± .3% • Differential capacitors • Mil spec capacitors • Wide range of precision plate capacitors (gear driven). All lines available with special high reliability processing. Includes 100% burn-in and screening and historical test data.

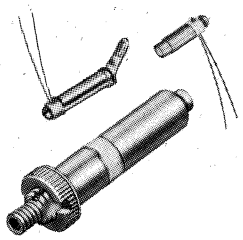
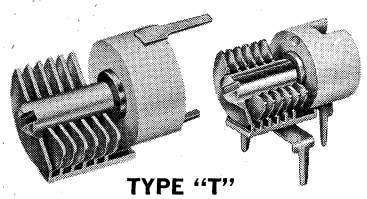
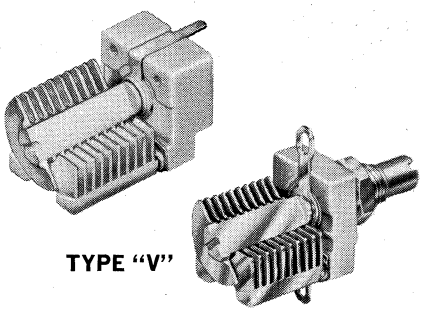
Variable capacitors



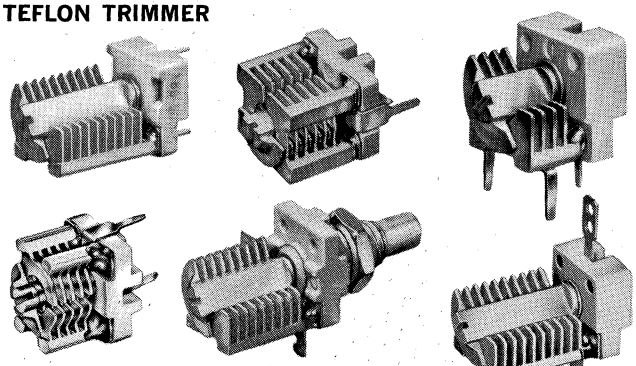
TEFLON TRIMMER



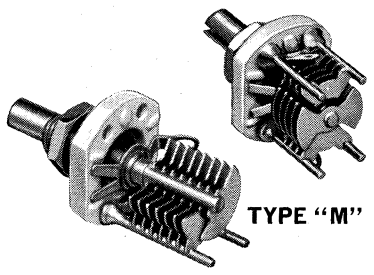
TYPE "T"



TYPE "V"



TYPE "U"



TYPE "M"

Sub-miniature PC types to large, heavy duty units

Whatever the choice . . . sub-miniature capacitors for printed circuit use—or large heavy duty types . . . design and development engineers specify Johnson variable capacitors.

More than eleven basic capacitor series available in a wide selection of single section, dual section, butterfly and differential types. Stock capacitors in a wide range of plate spacings, capacity per section, breakdown ratings, and finishes meet many military and commercial applications . . . specials available in production quantities.

TEFLON TRIMMERS—Ideal for VHF and UHF applications requiring low minimum capacity and delta C . . . high Q (2000 at 1 mHz) . . . linear tuning . . . temperature range —55° to +150°C. Voltage breakdown 2000 VDC. PC mount .25 to 1.5 pf; solder lug .25 to 1.5 pf; panel mount .30 to 2.9 pf.

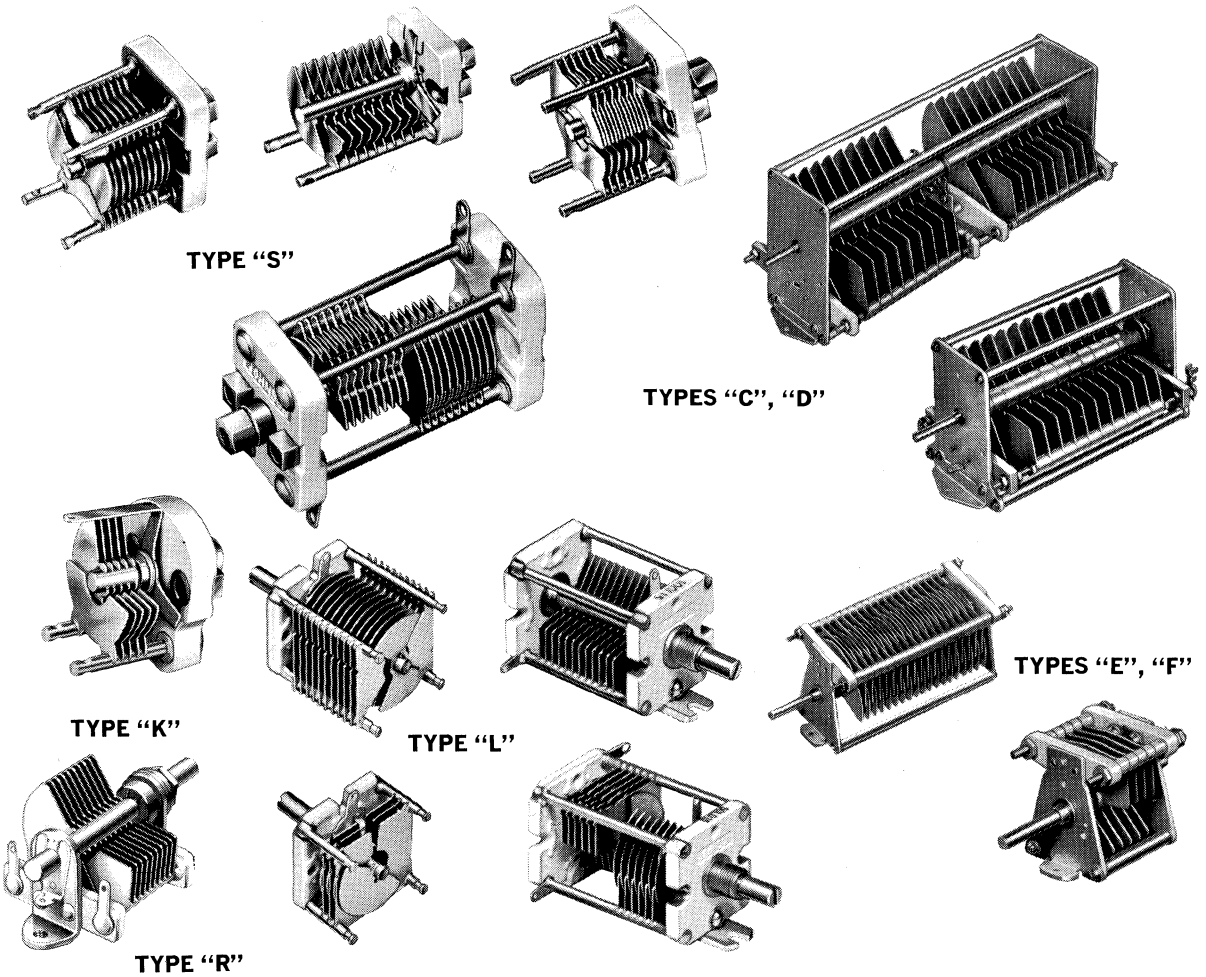
TYPE "T"—New sub-miniature air dielectric trimmer for VHF and UHF applications that call for small size (.310" dia.), high Q (greater than 1500 at 1 mHz), low TC, and low cost. Mounting dimensions of vertical mount "T" identical with ⅜" dia. PC ceramic disc trimmers. Nominal capacities from 1.3 pF to 15.7 pF. Minimum voltage breakdown is 250 VDC. End frame is 95% alumina, grade L624 or better, DC200 treated. Silver plated, Iridited metal parts resist discoloration. Plates are from one piece solid brass for uniformity, stability, and no moisture entrapment. Temp. coefficient is plus 30 ± 15 ppm/°C. Excellent retrace. Outstanding stability during vibration from 10 to 2000 Hz. Withstand the applicable portions of EIA-RS 204, MIL Std. 202C Methods 204A and 201A.

TYPE "U"—less than 0.23 sq. inch mounting area required. Rotors and stators machined from one piece of solid brass. Outstanding reliability with exceptionally uniform delta C and voltage characteristics. Highly resistant to shock and vibration—provide freedom from moisture entrapment. Voltage breakdown to 1100 VDC. Silver-plated metal parts—ceramic is steatite Grade L-423 or better. Single Section types available in: Printed Circuit (vertical and horizontal mounting models), Two-Hole, and Bushing Mount styles—Differential type for Printed Circuit mounting.

TYPE "V"—High capacity in minimum space. Printed circuit and panel mount types mount in less than 0.3 sq. in. area. Rotors and stators precision machined from one piece of solid brass for high reliability and outstanding mechanical stability! High "Q" (greater than 1500 at 1 mHz.) . . . low temperature coefficient (plus 50 ± 20 PPM/°C) . . . exceptionally uniform delta C and voltage characteristics. Metal parts, silver-plated—ceramic is steatite grade L-423, or better. Voltage breakdown rating 650 VDC. Freedom from moisture entrapment. Slotted rotor or shaft extension for convenient adjustment.

Detailed components catalog is available free . . .

CAPACITORS • TUBE SOCKETS • CONNECTORS • PILOT LIGHTS • INSULATORS



TYPE "M"—Mount in 5/8" x 3/4" area. Peak voltage ratings to 1250 volts on .017" spaced units. Soldered plate construction; securely anchored stator supports; DC-200 treated insulator; nickel-plated brass plates. Single Section, Butterfly, and Differential types with straight, locking and screwdriver shafts.

TYPE "S"—Slightly larger than the "M". Peak voltage rating: 850 volts—plate spacing .013", other spacings available. Solder plate construction; securely anchored stator supports; DC-200 treated insulator; nickel-plated brass plates. Single Section, Butterfly, Differential and Dual Types with straight locking and screwdriver shafts.

TYPE "K"—Single Section—widely used for military and commercial applications. DC-200 treated insulator, notched stator terminals; extra rigid soldered plate construction. Peak voltage ratings: 1000 volts. Plate spacing .015". Available in production quantities to MIL-C-92A specifications . . . variations available.

TYPE "R"—Single Section—extra-heavy steatite stator support insulators—soldered .023" thick brass plates. Metal parts heavily nickel-plated. Sturdy brass end frames—double bearing construction—silver-plated beryllium copper wiping contacts. Peak voltage rating 1200 volts. Specials available in production quantities.

TYPE "L"—Extreme stability and strength—rotor bearings and stator support rods soldered directly to heavy 3/16" steatite insulators. Split-sleeve bearing, silver-plated beryllium copper rotor contact for constant torque, smooth capacity variation. Plate spacing .030". Peak voltage rating 1500 volts. Single Section, Dual, Butterfly, and Differential types. Specials available in production quantities.

TYPES "C" AND "D"—Heavy .051" aluminum plates and 5/16" diameter aluminum tie rods; 1/4" cadmium-plated steel shafts; laminated phosphor bronze rotor contact springs; and steatite insulation. Type "C"—overall width: 5 1/2"—height: 5-13/32"—height bottom to shaft center: 3-3/32". Type "D"—overall width: 4 1/4"—height: 4"—height bottom to shaft center: 2-5/32". Dual types have center rotor connection for better balance. End frames tapped 8-32, 3 holes, for panel mounting—brackets furnished for chassis mounting.

TYPE "E" AND "F" CAPACITORS—Large amount of capacity per cubic inch and low capacity to chassis. Heavy aluminum plates .032" thick with rounded edges and large 1/4" tie rods; stainless steel shafts; sturdy phosphor bronze rotor contact springs; and center rotor contact on dual types. End frames tapped 8-32, 3 holes for panel mounting—brackets furnished for chassis mounting.

MIAL polystyrene capacitors

that out-perform...cost less than other capacitors.

General purpose polystyrene capacitor style 611

- *Capacitance Range:* 20 to 100,000 pF
- *Temperature Coefficient:* N150 ±50 ppm/°C
- *Capacity Tolerance:* from ±1pF to ±20%
- *Voltage Range:* 33, 63, 160, 630 & 1000 VDCW
- *Q Factor:* Over 2,000 at 100 KC +25°C

The MIAL Style 611 general purpose polystyrene capacitor with a temperature coefficient: N150 ±50 ppm/°C has a better tolerance characteristic than Mica Class B, C or D. Ideally suited for TV, radio, stereo and instrumentation applications requiring long life, high reliability, and complete freedom from drift. All this, for a cost of only pennies per unit.

For Your Convenience

- Popular values are stocked in depth at Nutley, N. J. for same day shipment.

TYPE	Capacitance pF Min. – Max.	Dimensions in Inches: Max. Length "L"	Max. Diameter "D"	Lead Diameter "d" ±.002

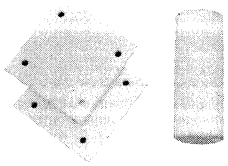
RMC DISCAPS



NEW!!

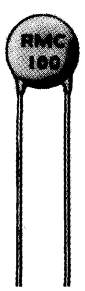
Alumina Ceramics

RMC's expanded capabilities include the production of High Alumina substrates with a range of finishes suitable for both thick and thin film deposition. Flat plate and extruded rod shapes are available.

Low Voltage Subminiatures

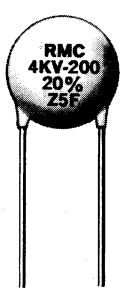
For applications requiring components with higher capacitance values at lower voltages ratings, RMC lists:

TYPES CM, SM, BT, or TA



Temperature Compensating TYPE C or CG

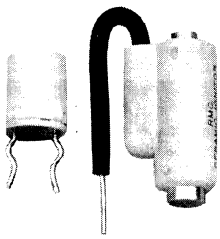
Type C DISCAPS are designed for applications requiring a rating of 1000 volts D.C. Where a 500 volt D.C. rating is adequate. Type CG can be specified. Both types meet or exceed EIA specifications and are ideal for VHF or UHF applications.



High K-High Voltage

Maximum capacities combined with high voltage ratings are available in this line. Rated from 2000 to 6000 VDC in Z5F or Z5U temperature coefficients. Tolerances are ±10%, ±20%, +80-20% or GMV. **NEW! Additional ratings of 7½, 10 and 15 KV are now available for high voltage supply applications.**

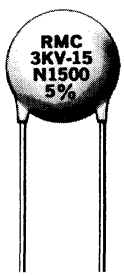
THE STANDARD OF PERFORMANCE THROUGHOUT THE ENTIRE ELECTRONICS INDUSTRY



NEW!!

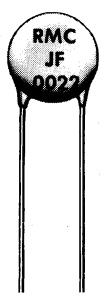
Piezoelectric Ceramics

RMC can now supply your requirements for a variety of Piezoelectric Devices. Radial mode resonators for filter applications and spark ignition devices are currently available.



T.C. High Voltage

These components are suited to high frequency, corona free applications. Available in working voltages from 2000 to 6000 VDC in temperature coefficients of N-750, N-1500 or N-2200.



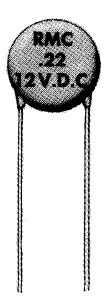
High Dielectric Constant

The industry's broadest line of high dielectric constant ceramic disc capacitors in wide capacitance ranges, select working voltages and tolerances.

Featured are:

TYPES B, JL, JF, JE, JK, BA, JG, BG

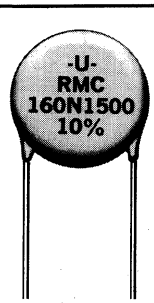
Complete specifications listed in detailed RMC catalog.



Magnacaps

Designed for application in low voltage circuits, Magnacaps combine very high capacitances with small physical sizes. These components are available in 3, 12, 16 and 25 volt ratings in wide capacity ranges.

TYPES M3, M12, M16 and M25



Specials

Widest variety of special components for varied applications. Featured are Type U, TC Solder-Ins, Sparkcaps, and Low Voltage "Chip" Capacitors. For special requirements, contact RMC.

Standard Mallory components are available from authorized Mallory distributors throughout the United States.

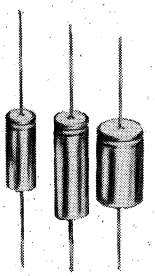
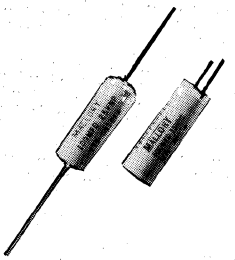
MALLORY

MALLORY ELECTROLYTIC CAPACITORS

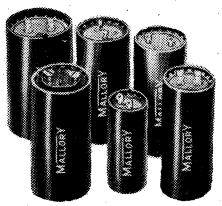
Aluminum Electrolytics



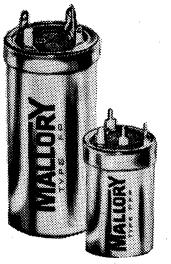
TCW — Axial lead, tubulars. Sizes from ½" to 1" diameter. Voltages to 450 VDC. Wide range of capacity ratings, temperature to 85°C. All welded terminations. **Bulletin 4-66**



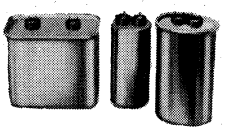
MTA-MTV — Low cost, plastic molded capacitors. Axial or radial leads. For printed circuit board insertion. **Bulletin 4-74**



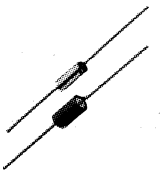
AC Motor Start — A/C capacitor for motor starting and other intermittent service. Plastic case. Various mounting hardware available. **Bulletin 4-22.**



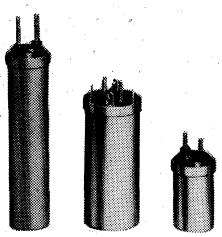
FP & PFP — The original 85°C capacitor for radio and TV applications. Twist prong or printed circuit type terminals, multiple ratings in one case. **Bulletin 4-11**



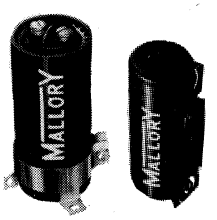
AC Oil — Paper dielectric capacitors for continuous operation in AC powered equipment. Used for air conditioners, refrigeration equipment, business machines and industrial controls. **Bulletin 4-14**



TT-TTX-TTQ — Axial lead miniature tubular capacitors for transistor circuitry, computer and entertainment applications — TTQ type for longer life reliability, TTX for better cold temperature impedance. **Bulletins 4-33, 4-75**

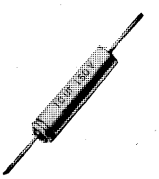


PG — Premium grade, long life, high reliability capacitors developed specifically for the telephone systems industry. Suited for use in other high reliability applications. **Bulletin 4-56**



HC & NP — For heavy duty industrial electrical applications. Type HC is polarized. Type NP is non-polarized. **Bulletin 4-46**

CG & CGS — The original computer grade capacitor. Widely used for high reliability energy storage and filtering in power supply circuits. Temperature ranges to 65°C and 85°C. Voltages top to 450 VDC. **Bulletins 4-80, 4-81**



TPG & VPG — Long life 85°C tubular capacitors both axial and radial leads. Ultimate in reliability for a miniature aluminum electrolytic capacitor. Molded elastomer end seals, all welded terminations, safety vents. **Bulletin 4-67.**

Standard Mallory components are available from authorized Mallory distributors throughout the United States.

MALLORY CAPACITOR COMPANY

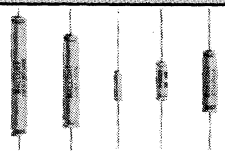
MALLORY ELECTROLYTIC CAPACITORS

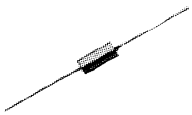
Tantalum Electrolytics

FOIL TYPES

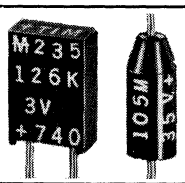


TFS-TFE — Available in plain or etched foil; polarized or non-polarized. All ratings and sizes of MIL-C-3965. Higher capacity ratings available on special order. **Bulletin 4-65**

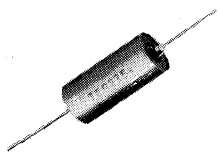
SOLID ELECTROLYTE TYPES



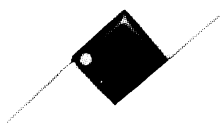
TAS — Hermetically sealed, designed for miniaturized equipment. Extremely high capacitance per unit volume. Sintered anode type. **Bulletin 4-40.**



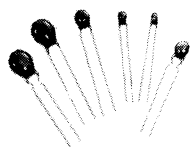
TIM & TAC — Molded epoxy case. Three axial lead sizes, four radial lead sizes. Uniform size for automatic assembly methods. **Bulletin 4-82**



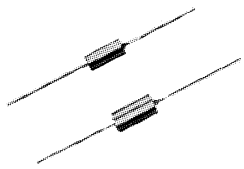
TER — Four hermetically sealed case sizes for high reliability and aerospace applications. Meets MIL-C-39003 L, M & P failure rates. **See military specification.**



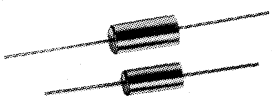
TUR — Chip capacitors for applications involving IC's thin film circuits and other microelectronic circuitry. Unencapsulated, variety of geometrics.



TDC — Dip coated with radial leads for printed circuit commercial and consumer applications. Inexpensive, four sizes. **Bulletin 4-810**

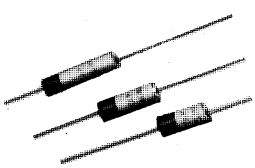


THF — Hermetically sealed. Excellent frequency response characteristics, higher ripple current, low ESR. Available in military C & D case sizes. **Bulletin 4-83**



TAE — Rugged construction for proven reliability in high vibration and/or shock environments. Axial load, metal case, epoxy end poured construction. **Bulletin 4-85**

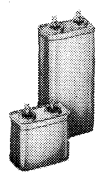
LIQUID ELECTROLYTE TYPES



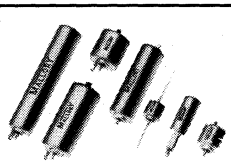
TNT & TAP — Miniature liquid electrolyte capacitors. Five sizes, high capacity per unit volume, elastomer sealed, economical for industrial and ground communications gear. **Bulletin 4-38, 4-52**

MTP & MTPH — Extremely high capacitance per unit volume. Ideal for microelectronic applications where size and reliability is needed. **Bulletin 4-70**

TLS — Meets MIL-C-3965 specifications, styles CL 64 and 65. Low DC leakage is especially suited for low current timing circuits. **Bulletin 4-71**



TL — Hermetically sealed package. Equivalent to style CL 55 of MIL-C-3965. Six ratings in each of 5 case sizes. Large capacity ratings for filtering applications. **Bulletin 4-79**



XT Series (XTM, XTK, XTH, XTL, XTV) — Hermetically sealed capacitors in a wide variety of ratings and sizes. For extreme aerospace environments or precision industrial equipment. Temperature range to 175°C. MIL-C-3965, styles CL 10 through CL 18. **Bulletin 4-84**

Standard Mallory components are available from authorized Mallory distributors throughout the United States.

"Designed for Application"® CAPACITORS

No. 25000 miniature, precision, high Q variable air dielectric capacitors with high reliability are machined from solid bars of extruded brass. Knob or screw-driver adjust from the front. Single hole mount, mount with two screws, or with tabs. 0.010" air gap. 350V. 21 plate **25035** is 4.0 to 35.8pf. 0.750" x 0.562" x 23/32"L.

No. 20000 Ceramic end plate 1-3/16" x 1-5/16". Silver plated plates. 0.015" air gap — 600V. peak or 0.045" air gap — 1400V. peak.

20005 2.0-4.5pf. 600V. ¾"L—**20100** 5.2- 111pf. 600V. 1½"L

20904 2.5-3.8pf. 1400V. ⅞"L—**20935** 6.7-39.5pf. 1400V. 2⅛"L

No. 22000 Ceramic end plate 1-1/16" x 1-7/16". Single bearing or double bearing. Air gap 0.020"—800V. peak or 0.060"—2000V. peak.

22006 2.8- 7.5pf. 800V. 1⅛"L—**22200MK** 11-207pf. 800V. 2-9/16"

22910 4.1-12.5pf. 2000V. 1¼"L—**22950MK** 8.5-57.0pf. 2000V. 3"L

No. 23000 Ceramic end plate 1-7/16" x 1½". Single bearing or double bearing. Single or dual section. Balanced or inline rotor. Air gap 0.020"-800V. peak or 0.060"—2000V. peak.

23907MKY 3.5-7pf. 2000V. 1-9/16"L—**23140MK** 10-146.5pf. 800V. 2⅛"L

No. 26000 Ceramic end plate 15/16" x 1-7/32". Silver plated plates. 0.015" air gap — 600V. peak or 0.045" air gap — 1400V. peak.

26010 2.9-11pf. 600V. ⅞"L—**26100** 5.5-109pf. 600V. 1-9/16"L

26910 3.3-11pf. 1400V. 1⅛"L—**26935** 6.8-39.5pf. 1400V. 2-3/16"L

No. 28000 Straight line capacity or **No. 29000** straight line frequency. Double ceramic end plates 1-9/16" x 1-11/16". Double bearing. Single or double section. Balanced or inline rotor. Air gap 0.022"-850V. peak, 0.040"-1350V. peak or 0.066"—2250V. peak.

28227MKW 16-227pf. 1350V. 4-1/16"L—**29025KM** 3.9-23.3pf. 850V. 1-9/16L

No. 19000 Ceramic insulators. Cross section 1-9/16" x 1-11/16". Double bearing. Air gap 0.022"-850V. peak, 0.040" — 1350 V. peak or 0.066" — 2250V. peak. Single section. Tapped mounting brackets.

19335 14.7-339pf. 850 V. 2⅜"L—**19950** 11.6-60pf. 2250V. 2¼"L

No. 15000 NEUTRALIZING CAPACITORS. Parallel discs or concentric cylinders. **15011 Disc** 3.5pf. at 0.4" gap to 18pf. at 0.04" gap.

15005 Cylindrical Capacitor — 3.5pf. to 16.2pf. — 4000V. peak.

15006 Cylindrical Capacitor — 3.2pf. to 9.7pf. — 6000V. peak.

No. 11000 TRANSMITTING CAPACITORS. 16/1 or 48/1 ratio center gear drive. Ceramic insulation. Air gap 0.077"-3000V. peak or 0.176"-6000V. peak. Polished aluminum plates 0.040" thick. Dual section.

11035 5.3-34pf. 3000V. 5-7/16"L—**11090** 10-93pf. 3000V. 7⅜"L

No. 12000 TRANSMITTING CAPACITORS. Rigid, heavy channeled aluminum end plates. Ceramic insulation. Single or dual section. Air gap 0.077"-3000V. peak or 0.176"-6000V. peak. Polished aluminum plates 0.040" thick. Unpolished plates available for 3000V. gap.

12536 9.7-28pf. 6000V. 4"L—**12515** 16-150pf. 3000V. 5¼"L

No. 04000 BALANCED TRANSMITTING CAPACITORS. 1/1 right angle center gear drive. Adjustable drive angle for sloping panel. Sturdy cast aluminum frame. Ceramic insulation. Air gap 0.077"-3000V. peak, 0.171"-6000V. peak or 0.265"-9000V. peak. Polished plates.

No. 16000 TRANSMITTING CAPACITORS. Ceramic insulation. Air gap 0.077"-3000V. peak, 0.171"-6000V. peak or 0.265"-9000V. peak. Polished aluminum plates 0.050" thick. Single or dual section.

16550 13-52pf. 6000V. 3⅜"L—**16530** 45-297pf. 6000V. 12½"L

16559 11-65pf. 9000V. 6¼"L—**16512** 40-128pf. 9000V. 11½"L

MONOLITHIC CERAMIC CHIP CAPACITORS • TYPE K • 1200

MDI offers a truly solid-state capacitor featuring monolithic construction which is inherently impervious to moisture and contamination — yet without space and cost consuming exterior encapsulation.

A new breakthrough in the state-of-the-art enables MDI to provide capacitance ranges previously unattainable in comparable sizes and characteristics.

GENERAL SPECIFICATIONS

Capacitance Range: 5 pF to 2.5 Mfd
Tolerance: ±20% std., ±10%, ±5% and GMV
Dissipation Factor: Less than 2% @ 1 kHz
Insulation Resistance: 1000 megohm-mfd or 100,000 megohms @ 25°C and VDCW (÷10 for 125°C)
Temperature Coefficient: ±15% max, −55°C to 125°C
Voltage-Temperature Coefficient: +15%, −25%, −55°C to 125°C
MIL Specifications: Meets applicable portions MIL-C-11015 and MIL-C-39014
Working Voltage: 25/50/100/200 VDC

Flash Test: 3 × VDCW below .1 Mfd
2.5 × VDCW .1 Mfd and above
(5 sec @ 25°C, 50 ma max)
Life Test: 2 × VDCW @ 125°C, 1000 hrs
Electrodes: .015 min silver band-width standard; other noble metals available
Inspection Sequence:
1. Capacitance
2. Dissipation Factor
3. Insulation Resistance
4. Flash Test

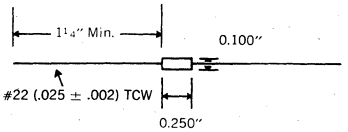
STANDARD COMPONENTS GROUP

CERAMIC CAPACITORS

The DECI-CAP

4.7pf to 27,000pf in 46 values. Standardized size 0.100" by 0.250". Designed to meet the requirements of MIL-C-11015. Epoxy molded for highest performance and reliability. High density cordwood packaging.



The **DECI-CAP** offers the design engineer unique epoxy-molded reliability and a new high standard in performance. This subminiature ceramic capacitor features a low power factor and exhibits outstanding stability over its entire —55° to +125°C operating range. Its rugged epoxy molded envelope and high quality ceramic dielectric insure that the DECI-CAP meets the environmental requirements of MIL-C-11015D.

ELECTRICAL CHARACTERISTICS

Capacitance Range: 4.7pf to 27,000pf.

Tolerance: ±10%.

Working Voltage: 4.7pf to 470pf: 200 Volts D.C. 560pf to 27,000pf: 100 Volts D.C.

Insulation Resistance: 20,000 Megohms Minimum.

Dielectric Strength: Withstands an applied voltage of 500 Volts D.C. to 470pf; 250 Volts D.C. from 560pf to 27,000pf.

Dissipation Factor: .025 Max.

Capacitance Change with Temperature: ±15%; −55 to +125°C.

Note: Also available at 50 WVDC to 47,000 pf.

DENSITY CHARACTERISTICS

Volume: 0.002 Cubic Inches **Weight:** 0.352 Grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Life Test: 1000 hours at 125°C under twice rated voltage.

Moisture Vibration, and Shock Resistance: Meets the requirements of MIL-C-11015.

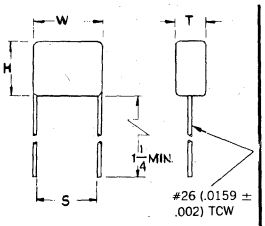
The HY-CAP

High Capacity Ceramic Capacitor Capacitance Range .01 mfd to 2.5 mfd.* Less than ±15% capacitance change from —55°C to 125°C. Voltage: 100 Volts D.C. No derating to 125°C. Designed to meet MIL-C-11015.

Nytronics offers the **HY-CAP** Ceramic Capacitor to accommodate design application in coupling, bypass, and filter circuits where temperature stability and high capacitance are mandatory.

ELECTRICAL CHARACTERISTICS



Capacitance Range: .01 mfd to 2.5 mfd.*
Tolerance: ±20%.
Working Voltage: 100 Volts D.C. (No derating to 125°C).
Dissipation Factor: .025 Max.

For values down to 4.7 pf and ±10% tolerance, check Nytronics new **FLAT-CAP** line.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Life Test: 1000 hours at 125°C under twice rated voltage.

Moisture, Vibration, and Shock Resistance: Meets the requirements of MIL-C-11015 (body mounted).
*Higher values available on special order.

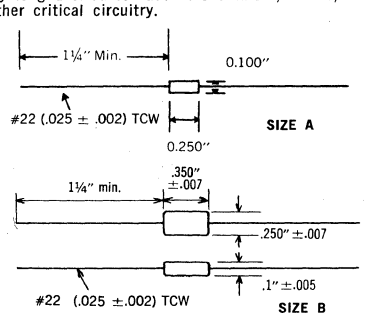
The NYT-CAP

Ultra High Stability — TC of 0±25 ppm/°C. Miniature Molded Epoxy Case suitable for high component density applicaitons. 200 Volt D.C. rating.

A new development from Nytronics' ceramic research laboratory now makes possible the manufacture of an extremely stable ceramic capacitor in a miniature package size. Now you can have the capacitor stability long desired for use in oscillators, filters, and other critical circuitry.



ELECTRICAL CHARACTERISTICS

Capacitance Range: 4.7 pf to 4700 pf.
Capacitance Tolerance: ±10% standard.
Working Voltage: 200 Volts D.C.
Temperature Coefficient: 0±25 ppm/°C over temperature range of −55°C to +125°C.
Dissipation Factor: Less than 0.001 at 25°C.
Insulation Resistance: 1,000,000 Megohms at 25°C.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Case Size: A: 0.1" dia. x 0.250" long.
B: 0.350" x 0.250" x 0.1".
Case Material: Epoxy.
Volume A: 0.002 cubic inches.
B: 0.0088 cubic inches.
Weight (Maximum): 0.352 grams.
B: 0.69 grams.

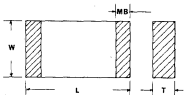
The NYT-CHIP

Ultra High Stability — TC of 0±25 ppm/°C. 200 Volt D.C. rating. Compatible with: Integrated Circuitry; Thick and Thin Film Microcircuits; LSI.

The **NYT-CHIP** provides in slug form all of the high stability and low loss features of the epoxy molded **NYT-CAP.** This configuration yields the greatest possible packaging density and has the highest degree of mounting flexibility for use with all presently used packaging techniques. **NYT-CHIPS** are supplied with "wrap-around" tinned terminals permitting connection to either face or to the ends of the chip.

ELECTRICAL CHARACTERISTICS



Capacitance Range: 4.7 pf. to 4700 pf.
Capacitance Tolerance: ±10% standard.
Working Voltage: 200 Volts D.C.
Temperature Coefficient: 0±25 ppm/°C over temperature range of −55°C to +125°C.
Dissipation Factor: Less than 0.001 at 25°C.
Insulation Resistance: 1,000,000 Megohms at 25°C.

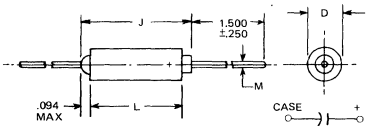
NOMINAL CAPACITANCE IN PICOFARADS. FIRST TWO DIGITS ARE SIGNIFICANT FIGURES. LAST DIGIT SPECIFIES NUMBER OF ZEROS TO FOLLOW.
EXAMPLE:
565 = 5,600,000 pF
OR
5.6 µF

K = ±10%
M = ±20%

ESTABLISHED AT 60% CONFIDENCE LEVEL IN % PER 1000 HOURS.
L = .2%
M = .1%
P = .1%
R = .01%
S = .001%

*COMPLETE TYPE NUMBER INCLUDES A FOUR-DIGIT SUFFIX FOLLOWING THE FAILURE-RATE DESIGNATION. SEE STANDARD RATING TABLES BELOW.

STANDARD DIMENSIONS



Case size	Dimensions L ±.031	D +.016 −.015	M ±.002	J Max
A	.286	.135	.020	.422
B	.474	.185	.020	.610
C	.686	.289	.025	.822
D	.786	.351	.025	.922

NOTES:
1. Dimensions are in inches.
2. These capacitors are not intended to be mounted by their leads.
3. The case insulation shall extend .015 inch (.38 mm) minimum beyond each end. However, when a shrink-fitted insulation is used, it shall lap over the ends of the capacitor body.
4. Example of marking:

83125	+	Source Code (Federal Supply Code)+
67139-JAN		Date (2 Digits) & Lot No. (3 Digits)
M39003/	+	Part of Part No. (Polarity)+
01-2001		Balance of Part No.
5.6 µF 6VDC 10%		Capacitance, Voltage, Tolerance

When size of can does not provide sufficient space for complete marking shown above, the following alternate markings are used:

83125+		J+
67139-J	OR	M390
M39003/		03/01
01-2001		-2001

5. Case: Type – Tubular, insulated.
   Material – Metal.
   Type of seal – Hermetic.
6. Leads: Nickel, Tin-lead coated.
7. DC rated voltage: Above 85°C voltage derating is required, as follows:

AT 125°C	
SYMBOL	RATED	SURGE
B	4	5
C	7	9
D	10	12
E	13	16
F	23	28

1/ Complete type designation will include an additional symbol to indicate failure rate level.
2/ For information only.
3/ Dash numbers – 2001 through – 3193 of this specification shall unilaterally supersede and be acceptable alternates for dash numbers – 0001 through – 1045 of MIL-C-39003/1 for units of equivalent capacitance, capacitance tolerance, voltage rating, failure rate level, and case size.

WE ALSO MAKE WET-TANTALUM, FILM, AND PAPER DIELECTRIC CAPACITORS.

Capacitor Division

MILITARY DESIGNATION BREAKDOWN	CP	04	A	1	E	B	333	K/3
	Style	Case	Terminal (Axial wire lead)	Circuit	Characteristic	Voltage	Capacitance	Tolerance

Characteristics
Circuit 1: E = −55°C. to + 85°C. K = −55°C. to +125°C.
Circuit 3:

Voltage
B = 100 V.
C = 200 V.
E = 400 V.
F = 600 V.
G = 1000 V.

Tolerance
K = ±10%
M = ±20%

Vibration Grade*
1 10-55 cps
3 10-2000 cps

INSERTED TABS (CP04 — Uninsulated; CP05 — Insulated)

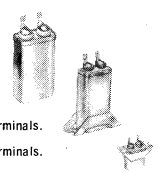
K/3 designates available per MIL-C-25C, which specifies K characteristic, K tolerance, and vibration grades 1 or 3 only.

Type PKM Small-Base Oil-Paper Capacitors (CP61, CP63, CP65 also CP90 and CP91)

Section assembled in hermetically sealed tin-coated container. Mineral-oil impregnated and filled. Lug-type terminal seals. Suitable for use in compact equipment. Meets electrical requirements of MIL-C-25C.

Temperature Rating: −55°C to +85°C.
Standard Tolerance: −10% to +20%.



PKM VARIATIONS

PKM Basic type similar to MIL Type CP61. Example: PKM4-S5
PKMF Similar to CP61 with CP06F footed bracket. To order: add F after PKM. Example: PKMF4-S5
PKMS Similar to CP61 with CP06S spade bracket. To order: add S after PKM. Example: PKMS4-S5
PKMT Similar to CP63 with channel bracket on end opposite terminals. To order: add T after PKM. Example: PKMT4-S5
PKMB Similar to CP65 with channel bracket on same end as terminals. To order: add B after PKM. Example: PKMB4-S5
PKMT, PKMB Channel Bracket Dimensions:
Overall Length: 2 5/16".
Overall Width: 45/64" (max.).
Length between Mounting Slot Centers: 1 15/16".
Mounting Slot Width: 3/32".

Catalog Number	Cap. in UF	Size in Inches Length	Width	Height	Dealer Net

PKM10-P5	.5	1 3/16	47/64	2 1/2	2.43

Type PEM Small-Base Oil-Paper Capacitors (CP67, CP69)

Section assembled in hermetically sealed tin-coated container. Mineral-oil impregnated and filled. Lug-type terminal seals. Suitable for use in compact equipment. Meets electrical requirements of MIL-C-25A.

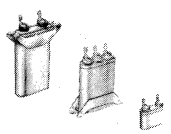
PEM VARIATIONS

PEM Basic Type. To order: see Catalog Listing. Example: PEM6-S5

PEMT Similar to MIL Type CP67, with channel bracket on end opposite terminals. To order: add T after PEM. Example: PEMT6-S5.

PEMB Similar to CP69, with channel bracket on same end as terminals. To order: add B after PEM. Example: PEMB6-S5

Standard Tolerance: −10% to +20%.
Temperature Rating: −55°C to +85°C.



PEMT, PEMB Channel Bracket Dimensions:
Overall Length: 2 5/16".
Overall Width: 1/64" (max.).
Length between Mounting Slot Centers: 2 1/8".
Mounting Slot Width: 3/32.

NYTRONICS, INC.
STANDARD COMPONENTS GROUP

GLASSEAL PAPER CAPACITORS
OIL-PAPER CAPACITORS

CP 25 to CP 29 (TYPE PTM)

Available in capacitances from .003 thru 0.1 mf and voltages of 1500 V.D.C.

CP 40, CP41 (TYPES PCM, PCIM)

Available in capacitances from .25 mf thru 4.0 mf and voltages of 600 V.D.C. thru 1500 V.D.C.

Type PDM Bathtub-Type Oil-Paper Capacitors MIL TYPE CP53 54 55

Section assembled in hermetically sealed tin-coated drawn-shell container. Mineral-oil impregnated and filled. Lug-type terminal seals. Meets requirements of MIL-C-25C.

Temperature Rating: −55°C to +85°C.
Standard Tolerance: −10% to +20%.

PDM VARIATIONS

PDM Similar to MIL Type CP53, with terminals on side. Example: PDM4-S5

PDMT (CP54) With terminals on top. To order: add T after PDM. Example: PDMT4-S5

PDMB (CP55) With terminals on the bottom. To order add B after PDM. Example: PDMB4-S5.

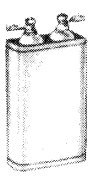
* Add 1/16" to Height for units with top or bottom terminals.

Type PLM High-Voltage Oil-Paper Capacitors (CP70 SERIES)



Section assembled in lacquer-finished terneplate case. Mineral-oil impregnated and filled. Ceramic terminal insulators with screw studs. Designed for heavy-duty continuous service. Fulfills the exacting requirements of power-supply and filter applications. Meets electrical requirements of MIL-C-25C. For higher voltage ratings and enginering data write to Sales Engineering Department.

PLM VARIATIONS

PLM Basic type similar to MIL Type CP70. Example: PLM6-P5.

PLMF Similar to CP70 with CP47F footed bracket. To order: add F after PLM. Example: PLMF6-P5.

PLMS Similar to CP70 with CP07S spade bracket. To order: Add S after PLM. Example: PLMS6-P5.

PLMU With universal mounting bracket. To order: add U after PLM. Example: PLMU6-P5.

PLMR With solder-lug MIL Type B terminals (furnished only through 2,000 VDCW rating). To order: add R after PLM. Example: PLMR6-P5.

Temperature Rating: −55°C. to +85°C.
Standard Tolerance: ±10%.

Type PJ High-Voltage Oil-Paper Capacitors—6000 thru 25,000 Volt Series

Section assembled in container of heavy gage steel, welded oil tight and hot tinned. Mineral-oil impregnated and mineral-oil filled. Case and terminals are bonded together. Low leakage current and negligible capacity change over wide range of operating temperature. Fir higher voltage ratings and engineering data write to Sales Engineering Department.

THINLINE

Mucon's Thinline Capacitors are made of the following 13 different ceramic bodies for a broad choice of size and electrical properties:

Temperature-Compensating Materials:			
	NP0	N080	N150
	N220	N330	N450
	N750	N1400	N2400
	N3300	N4700	N5600

General Purpose Materials LOW-VAR, STABLE-K, HIGH-K & SUPER-K for wide range of stability and capacitance.

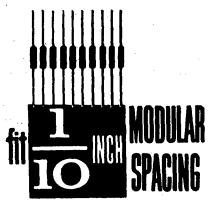
SPECIFICATIONS

Capacitance Range: TEMP.-COMP. BODIES 1/2 pf - 2200 pf; GEN. PURPOSE BODIES 50 pf - 150,000 pf
Voltages: 25 WVDC, 50WVDC, 200 WVDC and 500 WVDC
Leads: Tinned Copper, Nickel or Dumet to MIL Spec.
Shapes: Square, rectangular, single or multiple element.

CHIPS SINGLE LAYER

Sizes: .030" Sq. and up
Capacitance: SUPER-K Ceramic 150 PF. to 10,000 PF.
HIGH-K " 100 PF. to 5,000 PF.
STABLE-K " 50 PF. to 2,700 PF.
LOW-VAR " 20 PF. to 1,000 PF.
TEMP. COMP. " 1 PF. to 330 PF.
Electrodes: Normally silver. Other precious metals on request
Voltage: 50 WVDC

NARROW-CAPS®



NARROW-CAPS are designed for 1/10" modular spacing on printed circuits, or for cordwood applications.

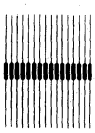
SPECIFICATIONS

Capacitance Range: 5 pf - 100.000 pf
Voltages: 10 WVDC - 50 WVDC
Sizes: .095" max. wide x 1/4" max. long x .095" max. thick through 750 pf. Larger values 5/16" max. long.
Leads: #26 Tinned Copper, Nickel or Dumet to MIL Spec.

CHIPS MONOLITHIC MULTILAYER

Sizes: From .050" x .050" x .050" to .610" x .310" x .080"
Capacitance: STABLE-K Ceramic 10 PF. to 2 MF.
NPO " 1 PF. to .027 MF.
Electrodes: Normally silver. Other precious metals on request
Voltage: 50 WVDC

SLIM-CAPS ®



Designed for applications which require capacitors slimmer than NARROW-CAPS. SLIM-CAPS are .065" wide x .065" thick max. Body lengths from .100"—.250" max.

SPECIFICATIONS

Capacitance Range: 1/2 pf - 20,000 pf
Voltages: 50 WVDC
Leads: #30 Tinned Copper, Nickel or Dumet to MIL Spec.

STANDOFFS

Standoffs are furnished in the shapes shown above, using any one of the Mucon temperature-compensating bodies or general purpose bodies.

RIBBON LEADS

Style RLA

Size and specifications same as "Thinline" capacitors shown above, except radial and axial tinned copper ribbon leads, approximately .006" thick x 3/32" wide for units with max. size of .150" and up; .045" wide for smaller units.

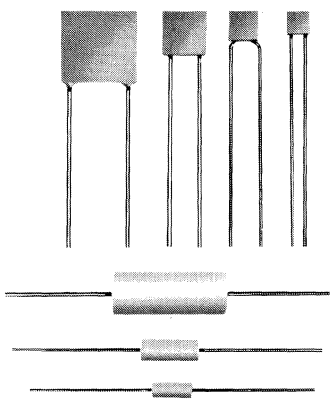
WEST-CAP© CAPACITORS AND FILTERS

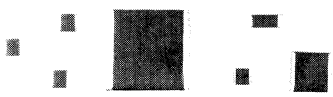
CERAMIC CAPACITORS

RECTANGULAR AND TUBULAR STANDARDS



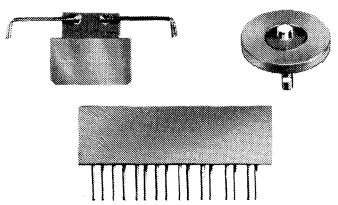
CAPACITANCE VALUES
from 5pf to 10μf
(medium "K" dielectric)
from 1pf to .2μf (NPO)
VOLTAGE: 50 to 500 VDC
TOLERANCE: down to 1%
TEMPERATURE RANGE:
—55°C to 150°C
Meets or exceeds
MIL-C-11015,
MIL-C-39014

CHIPS FOR HYBRID CIRCUITRY



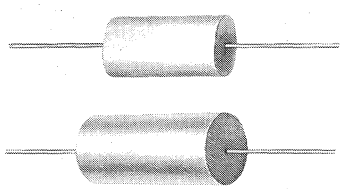
CAPACITANCE VALUES
from 5pf to 2μf
(medium "K" dielectric)
from 1 pf to .2μf (NPO)
VOLTAGE 50 to 500 VDC
TOLERANCE: down to 1%
TEMPERATURE RANGE:
—55°C to 150°C

SPECIAL DESIGNS
We invite you to consult with us on your special requirements.



"RAP-N-FIL" CAPACITORS

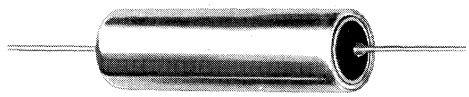
CAPACITANCE VALUES
from .001μf to 12μf
VOLTAGE: 50 to 1000 VDC
TOLERANCE: down to 1%
MYLAR: — 55°C to 125°C
(CMT style meets
MIL-C-27287)
POLYSTYRENE:
—55°C to 85°C
METALIZED MYLAR:
—55°C to 125°C
POLYCARBONATE:
METALIZED
POLYCARBONATE
—55°C to 125°C



HERMETIC CAPACITORS

Metal case
with compression glass seals
APPLICABLE MIL SPECIFICATIONS
MIL-C-25
MIL-C-14157C
MIL-C-18312
MIL-C-19978
Available in all capacitance values, voltages, and tolerances per applicable MIL specifications.

- Paper-Foil
- Metalized Paper
- Mylar
- Metalized Mylar
- Polycarbonate
- Metalized Polycarbonate
- Polystyrene
- Metalized Polystyrene
- Teflon
- Metalized Teflon



EMI / RFI FILTERS

RFI POWER LINE FILTERS
Meets applicable portions of MIL-F-15733E.
ATTENUATION: 100db at 14KC up to 10GC, 30KC up to 10GC, 100KC up to 10GC. 20, 30, 50, 75, & 100 amp ratings in single, dual or triple circuit models.

SUBMINIATURE RFI FILTERS
VOLTAGE RATING:
20, 100,
200 VDC — 115 VAC
OPERATING CURRENT:
60 mA thru 15.0 amps.
OPERATING TEMPERATURE:
—55°C to +125°C

17 SERIES — METALIZED MYLAR

For circuits that require the ultimate electrical properties Non Polar coupled with the smallest size over a wide temp. range.

- IR: 50K Meg × MFD Min. +25° C
- DF Less Than 1% IKHZ at +25°C
- Dielectric Strength: 200% of rated VDC 1 Min. Max.
- Temperature Range: −55° C to +125° C
- Voltage versus Temp.: 100% rated Voltage to 100° C 50% derating to +125° C
- Capacity versus Temp.: −55° C to +25° C, +5% change; +25°C to +85° C, +3%, and +25° C to +105° C, +7% change
- Quality Control and Production Tests consist of 100% group A requirements of MIL C 18312 on hermetic seal style E and all tests except for moisture leak tests on styles W-U-R-N-B-D.

22 SERIES — METALIZED POLYCARBONATE

For circuits that require flat T.C., low losses, small size over a wide temperature and frequency range. Used in many wave filter, discriminator and critical timing circuits.

- IR: 100K Meg × MFD Min. at +25° C
- DF less than .3% measured IKHZ at 25° C
- Dielectric Strength: Up to 200% of rated VDC Max. I Min.
- Temperature Range: −55° C to +105° C. When properly encased will operate to +125° C
- Temperature Coefficient: From −55° C to +25° C, 1.5% max change; +25° C to +105° C, −.7% max. change.
- QC & Production Tests consist of 100% to group A requirements MIL C 18312 on hermetic seal style E and to all except moisture leak test on styles W-U-R-N-B-D.

13 SERIES — POLYSTYRENE

For the instruments that require long term stability, low leakage, minimum dielectric absorption.

Used in many critical computer timing and hybrid circuits.

- Temperature Range: −55° C to +85° C
- IR: 100K Meg × MFD Min +25° C
- DF: .05% Max IKHZ at +25° C
- TC: 130 PPM / ° C ±20 PPM
- Quality and Production test consists of 100% to group A level of MIL C 19978 on style E and all requirements except moisture leak test on style R.

ORDERING AND PART NUMBER INFORMATION

The sizes shown are maximum capacity for each size versus VDC. The dimensional tolerances for case styles R-W-U-D are ±.05. Styles G-B-N-E are ±.031, on length, and ±.015 for other dimensions. All units are available in any value, ranging from .001 MFD to their maximum capacity, with tolerances to ±1%. Standard tolerance is ±20%. Other types of leads, configurations, and encasements are available upon request to meet your special requirements.

Get SPRAGUE CAPACITORS... RESISTORS... INTERFERENCE FILTERS from Key Distributors... OVERNIGHT!

Sprague's key electronic parts distributors located throughout the country are ready to save you time, save you money, on the highest quality line of capacitors, resistors, and interference filters in the industry. Popular military and industrial components are available in pilot production quantities... at regular factory prices... overnight!

MAKE YOUR SELECTION FROM THE 1969 EDITION OF The Radio-Electronic MASTER

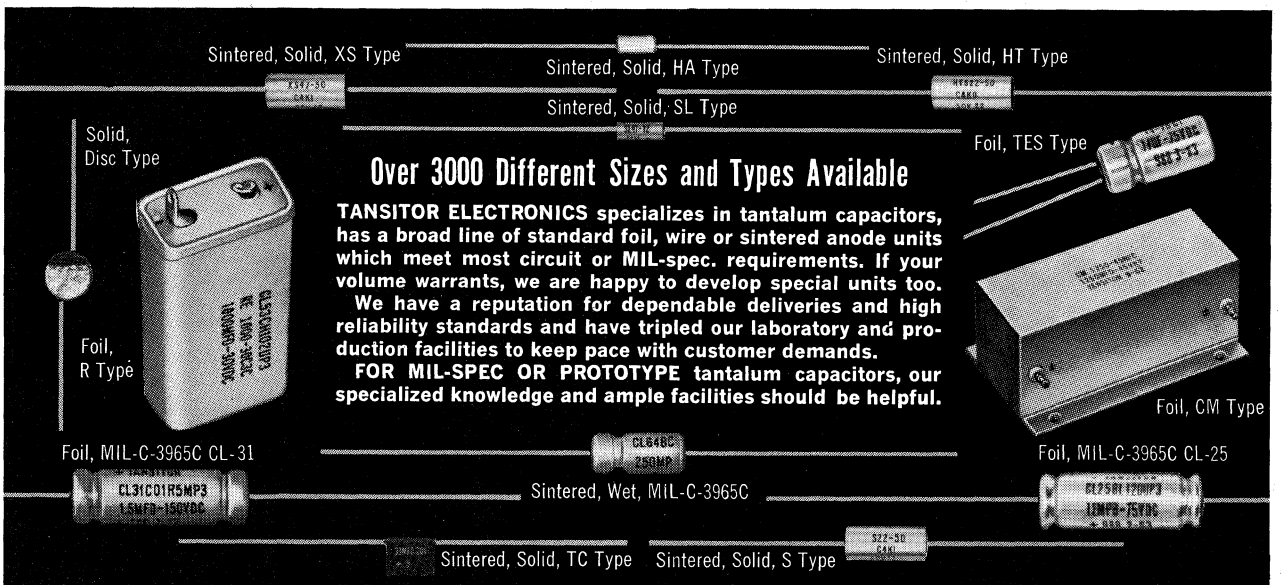
TANTALUM CAPACITORS?

Your choice is practically unlimited at TANSITOR



Over 3000 Different Sizes and Types Available

TANSITOR ELECTRONICS specializes in tantalum capacitors, has a broad line of standard foil, wire or sintered anode units which meet most circuit or MIL-spec. requirements. If your volume warrants, we are happy to develop special units too.

We have a reputation for dependable deliveries and high reliability standards and have tripled our laboratory and production facilities to keep pace with customer demands.

FOR MIL-SPEC OR PROTOTYPE tantalum capacitors, our specialized knowledge and ample facilities should be helpful.

Type	Tansitor Part No.	Temp. Rating	Voltage Range	Capacitance Range, Mfds		Size Range Inches

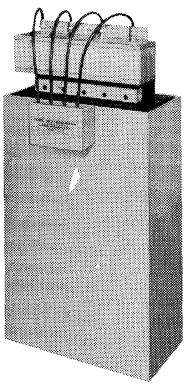
HIGH-VOLTAGE FAST-DISCHARGE CAPACITORS

Developed in response to customers' inquiries, these capacitors meet exacting requirements in energy discharge applications.

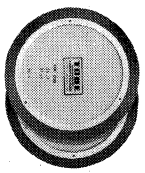
PULSE LASER CAPACITOR
(Pat Pending)

Model ESC-302: 0.01μf, 20kv, 3 nanohenries; life: 10^8 shots at a repetition of 100 pps. Size: 4½" dia x 3" high.



LOW INDUCTANCE CAPACITOR & DISCHARGE SWITCH
(U.S. Patent 3 343 051)

Model ESC-248A: 3 kilojoule, 20kv, 5 nh, with Model SBG-5 discharge switch and trigger assembly. Size: 14" x 7" x 31" high overall.



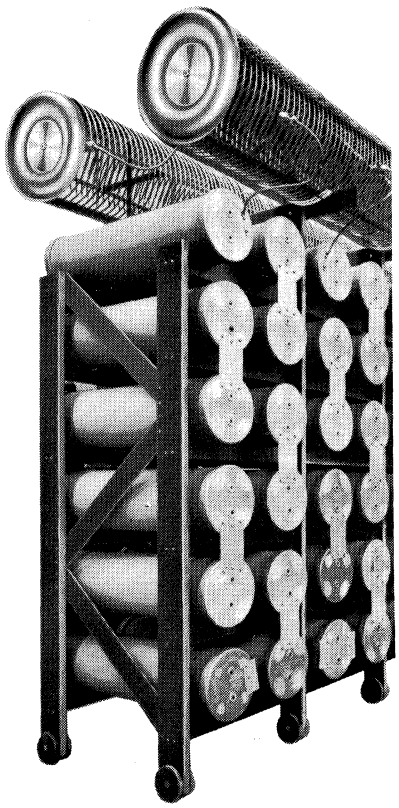
COAXIAL-DISC CAPACITOR
(U.S. Patent 3 346 790)

Model ESC-328A: 0.1μf, 20kv, 1 nh.

A new version of our patented coaxial-disc capacitor — it is expressly designed to facilitate assembly of low inductance capacitor stacks to operate at the megavolt levels required in EMP research. Photo shows 2 capacitors slightly offset. A single capacitor measures 11¼" dia x 0.437" thick. Units available to 50kv.

PULSE-FORMING NETWORKS

...from the smallest to the largest



Model PCE-1: Pulse-forming network installed at Griffis AFB. Peak charge voltage: 252kv; peak power: 180 megawatts; PRF: 180 pps; ripple: less than 1%.

TOBE DEUTSCHMANN pulse-forming networks range from miniature units to high-power installations like the one shown above. This unit, designed and built to a rigid performance specification, is more than 8 feet high, 5 feet wide, and 22 feet long.

Whatever your requirements for PFN's, low-Z pulse lines, or pulse capacitors, we can design and build reliable units to satisfy your need.

MICA-PAPER PLASTIC FILM CAPACITORS

rated for high-voltage pulse & dc applications feature:

- High Reliability.
- Encapsulated Construction.
- Extremely Low Dissipation Factor.
- Close Tolerance Matching Between Sections.
- Compact Size.

Size 4½" x 2 9/16" x 2¼" high.

Developed for airborne radar modulators, TDL mica-paper capacitors are available as multiple section E-line pulse networks with internal or external coil. Prototype quantities to your specifications can be supplied on short delivery.

Model PRN-368: Five-section pulse capacitor; capacitance per section: 0.0225μF; difference between adjacent sections: less than 450pf; life: 10,000 hrs min at 65C; PRF: 200pps at 4100 volts; pulse width: 5.7 μ sec.

RADIO INTERFERENCE FILTERS...

The name TOBE DEUTSCHMANN has been synonymous with pioneering efforts in the field of RFI filters.

TDL has currently under development a new series of filters to meet the advanced requirements of industry and the military. If you have an application for radio interference filters write or call on your specific needs.

Our units have proved their reliability worldwide in both research and industrial installations. For high voltage capacitors, discharge switches, pulse networks, pulse capacitors, and RFI filters, write or call...

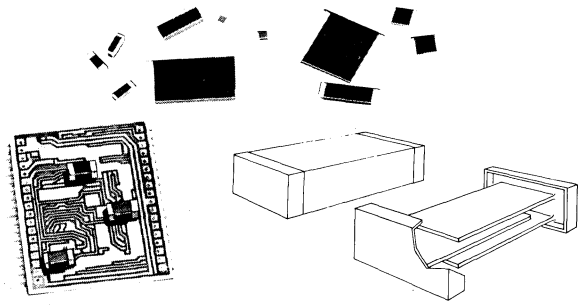
MULTILAYER CERAMIC CAPACITOR ELEMENTS

- ☐ HIGH CAPACITANCE TO SIZE RATIO
- ☐ TEMPERATURE COEFFICIENTS TO 30 PPM/°C
- ☐ ACCURACIES TO 5%
- ☐ RADIATION RESISTANT
- ☐ MIL-C-11015 PERFORMANCE
- ☐ VOLTAGE RATINGS TO 200VDC
- ☐ 12 STANDARD SIZES
- ☐ CAPACITANCE FROM 5 PICOFARAD TO 2 MICROFARAD



DESCRIPTION — Multilayer Ceramic Capacitor Elements, often referred to as "chips", are barium titanate ceramic capacitors designed for use in all miniaturized circuitry. Connections to chip capacitors are made via metallized end terminations and are accomplished by conductive epoxy bonding, ultrasonic alloying, or specialized soldering techniques. Chips offer the circuit designer the highest volumetric efficiency available in capacitors today.

APPLICATION — The primary application for chip capacitors is in hybrid integrated circuits.

Hi K CAPACITORS fill the circuit requirements when large capacitance is needed in small size, and accuracy and stability are not critical. Characteristic curves for Hi K chips are given on the bottom of the page. Careful evaluation of these curves will yield most of the information necessary for proper utilization. Typical circuit uses for Hi K chips are coupling and bypass applications.

NPO CAPACITORS do not give the volumetric efficiency of Hi K units; however, they are smaller than other comparable capacitor types, by a ratio of approximately three to one based on volume, and are virtually unaffected by environment (see specifications for exact figures). Capacitors of NPO ceramic will satisfy the accuracy and stability need for all but the most stringent circuit requirements.

DESIGN AND OPERATIONAL FEATURES — Chips are manufactured by "stacking" thin layers of "green", barium titanate base ceramic which have been deposited with noble metal plates and firing the stacks to form dense multilayer ceramic blocks. The alternate capacitor plates of these blocks are exposed at opposite ends only. The exposed ends of the plates are then coated with metallized paste and fired. This process forms electrical continuity between alternate capacitor plates and seals the ends of the chips. Capacitors made in this manner are resistant to environment per MIL-STD-202 tests and inherently more reliable than their encapsulated counterparts. Chips are available with various alloy metallized ends for substrate compatability. Complete traceability is maintained on all components manufactured by Ultronix.

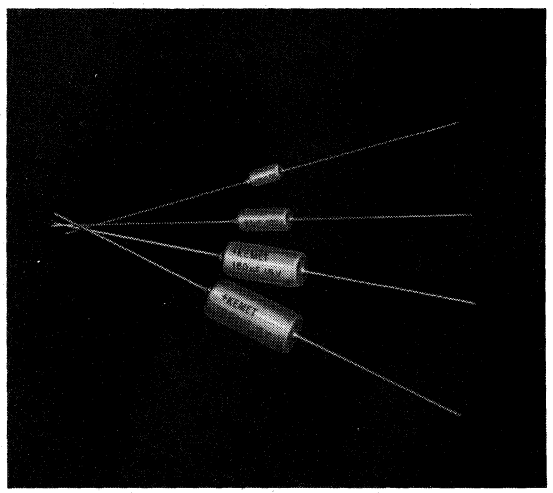
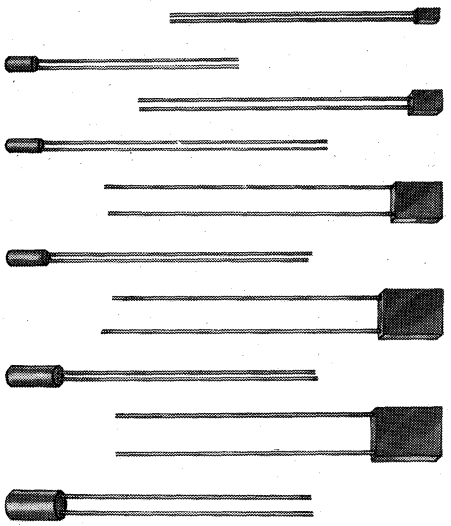
KEMET® UNION CARBIDE ELECTRONICS UNION CARBIDE

KEMET® SOLID TANTALUM CAPACITORS

- Complete Line for all Industrial, Military, and Commercial Applications
- Available to Mil-C-39003A (Styles CSR13 & CSR09) • National Sales & Distribution Network



KEMET J-Series



KEMET Micron Series

Series	Description & Features	Capacitance & Voltage Range	Size Range (Inches)	Leads	Request Catalog
C	Molded epoxy, polar, self insulating. Ideal for commercial and industrial applications which do not require performance standards of hermetically sealed capacitors. Precision dimensions suitable for automatic insertion equipment. Bullet shaped for positive polarity identification.	.1—220 μF 6—50 VDC	4-case sizes .138 x .390 to .365 x .875	Axial	F-2622B
D	Extended range molded sub miniature sizes featuring extremely high capacitance-to-volume ratio. Dimensions and tight lead wire-to-body concentricity permit automatic insertion by same equipment used for diodes and resistors. Suitable for decoupling, blocking,by-passing and filtering applications.	.0047—68 μF 6—50 VDC	3-case sizes .100 x .290 to .190 x .530	Axial	F-2632
E	Dip coated plastic encapulation providing the widely recognized shelf and operational life performance characteristics inherent in solid tantalum capacitors at prices competitive with conventional electrolytics. The dipped plastic case provides a tough barrier coating against moisture and shock and maintains precision lead spacing.	.1—330 μF 6—50 VDC	4-case sizes .175 x .350 to .760 x .600 x .275	Radial	F-2638B
J	Popular military hermetic sealed A, B, C & D case solid tantalum capacitors conforming to all requirements of Mil-C-39003A. Designed for miniaturized circuitry, they exhibit excellent stability, long life, extremely low DC leakage and D.F. over a wide temperature and frequency range.	.0047—330 μF 6—125 VDC	4-case sizes .125 x .250 to .341 x .750	Axial	F-1851D
MICRON	A complete line of microminiature capacitors designed for use in high density military, industrial and consumer circuits. Combines space saving advantages of .003 Mil MYLAR cases and KEMET's reliability engineering to achieve outstanding performance. Available in a wide variety of case styles, sizes and lead configurations.	.001—220 μF 2—100 VDC	29-case sizes .125 x .070 x .040 to .475 x .374 x .150	Axial & Radial	F-2710

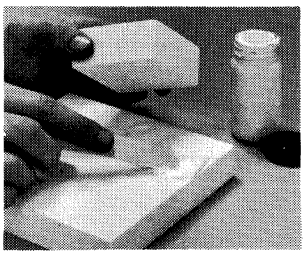
Melbond ceramic adhesive

TYPE CA-100

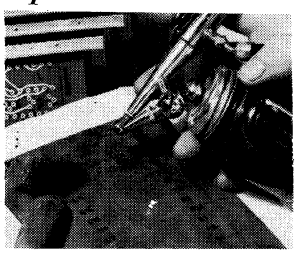


- **High service temperature**
- **Low curing temperature**
- **Excellent bonding strength**

MELBOND CA-100 is a ceramic adhesive with excellent bonding strength when used with refractory materials such as ceramics. Service temperature exceeds 2600°F after being cured at only 250°F. MELBOND has a paste like consistency and can be used for coating items requiring a high temperature protection.

Mel-Ink marking compound

TYPE M-100A



- **Heat Resistant**
- **Excellent Solvent Resistance**
- **Long Pot Life**

Permanent marking is no problem with nonconductive MEL-INK M-100A. This epoxy base marking compound can be sprayed on metals, plastics, glass, and wood. MEL-INK M-100A is available in black and white and a wide range of colors.*

Its hard-setting epoxy base eliminates smeared stencil information and resists the action of ultrasonic cleaning solutions such as xylene, toluene, Chlorothene, Solox, methylisobutylketone, and butyl and isopropyl alcohol. MEL-INK markings on aluminum and epoxy glass laminated test specimens can withstand more than fifty hours in a salt spray environment. Markings are color stable on surfaces exposed to temperatures up to 425°F for the black compound and 350°F for the white compound. MEL-INK M-100A markings satisfy the requirements for permanence of MIL-STD-130 **without** the use of a protective coating.

Typical uses of MEL-INK include identifying nomenclature on printed circuit boards, sheet metal chassis, and components of most types. Meets rigid government specifications for permanent marking applications.

*Color chart on MEL-INK M-100A is available on request.

Mel-Ink marking compound

TYPE M-300

- **Solvent Resistant**
- **Resist Salt Spray**
- **Permanent Marking**

MEL-INK M-300 is a permanent marking compound with a viscosity* suitable for machine and hand stamping as well as screen application. Presently available in black and white, this MEL-INK can be used to imprint identifying nomenclature on printed circuit boards, sheet metal chassis, glass, plastics, and components of most types.

The hard-setting epoxy of MEL-INK M-300 prevents smearing of stamped information upon completion of the curing cycle. Preliminary tests have indicated the excellent solvent resistance of this marking compound. Meets rigid government specifications for permanent marking applications.

Distributor quantities are presently available for immediate delivery from Newark Electronics Corp., 500 N. Pulaski Road, Chicago, Illinois 60624.

Melpar epoxy cement

TYPE MC-400

- **High Service Temperature**
- **Strong Bond**
- **Easy to Use**

MC-400 provides a strong bond to metals, plastics, glass and wood. Tests indicate that it has excellent heat and solvent resistance characteristics. Thousands of applications exist in the electronics industry for this epoxy insulating adhesive.

Melpak® casting resin

TYPE E-200

- **Room temperature curing**
- **Low shrinkage**
- **Self-extinguishing**

One of a series of Melpar epoxy resins, MELPAK E-200 satisfies the requirements for most general purpose potting, encapsulating, and casting applications. Easy to mix and use, and with relatively low toxicity, this versatile unfilled epoxy provides crack-free castings without an oven cure. MELPAK E-200 offers superior electrical and physical properties, as well as excellent adhesion to most plastics, metals, and ceramics. It is readily machinable, meets the self-extinguishing requirements of ASTM D63556, and produces bubble-free castings without vacuum treatment.

Melvar insulating varnish

TYPE V-500

- **Alcohol resistant**
- **Wear resistant**
- **Heat resistant**

MELVAR V-500 is a clear epoxy insulating varnish that provides high resistance to heat and solvents. This versatile material provides a lustrous finish, and can be applied to metals, plastics, glass, or wood by dipping, brushing, or spraying. Tests indicate that MELVAR V-500 exhibits superior weather and salt spray resistance and is fungus non-nutrient, making it particularly applicable in semi-tropical or marine environments. The excellent alcohol, heat, and wear resistance of MELVAR V-500 has led to its use as protective coating in industry as well as in the home. Typical applications include use on boats, indoor and outdoor furniture, bowling alleys, printed circuit boards, and truck trailers.

HumiSeal Coatings
GENERAL CHART

Listed in this General Chart of Properties are ten of the most frequently used HumiSeal Protective Coatings and their principal properties. These have been tabulated in order to facilitate comparison of their characteristics and selection of the most suitable type for a specific application. In addition to these HumiSeal types we manufacture a variety of coatings for special purposes, including high temperature applications. Should none of the coatings listed in this chart fulfill your requirements, we suggest that you contact us for recommendations.

	PROPERTIES OF LIQUID HumiSeal										THERMAL PROPERTIES		
HumiSeal Type[1]	Specific Weight (lbs. per gallon)[2]	Solids Content (% by weight)[3]	Viscosity, with catalyst when applicable (centistokes)[4]	Flash Point (°F)[5]	Drying Time for Handling[6]	Recommended Curing Conditions	Time Required to Reach Optimum Properties	Pot Life, at Room Temperature	Shelf Life, at Room Temperature	Coverage per gallon (in sq. ft.) After One Dip	Continuous Use Temperature Range (°F)	Thermal Shock Test[7]	Solderability[8]

HumiSeal TYPES LISTED IN BOLD PRINT COMPLY WITH THE REQUIREMENTS OF MIL-I-46058B

All technical data in this bulletin are based on test results using the stated standards and are believed to be correct. However, since the end use of HumiSeal materials (and the manner of storing and handling them) is beyond our control, we make no warranty — expressed or implied — as to the fitness of use, results to be obtained from or effects of use with respect to these materials. Their use shall be solely by the judgment of and at the risk of the end-user notwithstanding any statement contained in this bulletin.

1. The first digit in the type number specifies whether the product is a one-, or a two-component system.
2. Fed-Std 141a, Method 4184.
3. Fed-Std 141a, Method 4044.
4. Fed.Std 141a, Method 4287.
5. Fed-Std 141a, Method 4291.
6. Fed-Std 141a, Method 4061.
7. Mil-I-46058B.
8. Visual evaluation for ease of soldering with an 85 watt iron through a 2 mil film.
9. Fluorescent or color coding dye may be added if required.
10. Fed-Std 141a, Method 2121.
11. Fed-Std 406, Method 7031, Procedure A.
12. Fed-Std 141a, Method 6303.
13. ASTM-D150-65T, at 1 MHz and 25°C.
14. Mil-I-46058B. Insulation resistance during 10th cycle, at 65°C and 98% RH.

FOR ELECTRONICS

OF PROPERTIES

HumiSeal Protective Coatings are available in one-quart or one-gallon cans, five-gallon pails, or fifty-five gallon drums. HumiSeal types 1B15 and 1A27 are also available in 16-ounce aerosol containers. All HumiSeal types listed in this chart may be applied by dip, brush or spray. Our recommended techniques for the proper application of coatings and the preparation of the substrates are described in our booklet titled "How to Use Protective Coatings Efficiently" which will be mailed to you on request (Ask for Bulletin No. 79).

A STRONG LINE-UP OF ETCHANTS

ULTRA-SPEED ETCHANT

Ultra-Speed Etchant is a superior ferric chloride-type etchant that combines an extremely fast etch rate with cleaner etching and a high capacity for copper. It is ideally suited for high production etching of the inner layers of multi-layer printed circuit boards and flexible circuitry.

HI-SPEED CIRCUIT ETCH

Hi-speed Circuit Etch is a fast etching ferric chloride-type etchant that has a high capacity for copper. It is compatible with all types of silk screen inks, photo resists, plus certain precious metal plated resists.

R.C.E.® SOLUTION

R.C.E.® Solution is a versatile ferric chloride-type etchant designed for the etching of both ferrous and non-ferrous alloys, in addition to being a dependable etchant for copper laminates. Its controlled quality and consistency make it ideal for precision etching of printed circuits and micro devices.

NO. 826 ETCHANT

No. 826 Etchant is a special ready-to-use chrome-type etchant with a very high capacity for copper. It etches very rapidly and maintains a fast etch rate over a longer period. It is compatible with all common plated metallic and organic resists.

MULTI-CIRCUIT ETCH

Multi-Circuit Etch is a versatile chrome-type etchant that offers greater economy as a concentrate. It is compatible with all circuit-plating metals, silk screen inks and photo resists. It etches rapidly and has a good capacity for copper.

S.C.E.® SOLUTION

S.C.E.® Solution is a chrome-type etchant similar to Multi-Circuit Etch in etching properties, but packaged as a convenient ready-to-use solution. It eliminates inconsistencies due to improper mixing of the etching solution and is compatible with all common plated metallic and organic resists.

ALK-ETCH

Alk-Etch is an alkaline etchant for copper laminates especially recommended where plated bimetallic resists are specified. It has a high capacity for copper, etches rapidly, and produces a minimum of undercut. (Licensed for use under Patent No. 3231503).

K-1 ETCHANT CONCENTRATE

K-1 Etchant Concentrate is a concentrated chrome-type solution for the precision etching of expansion alloys. It etches rapidly and produces smooth etched surfaces throughout the life of the etching bath.

PHILIP A. HUNT CHEMICAL CORPORATION

WE HOLD THAT LINE WITH A POWERHOUSE OF PHOTO RESISTS

WAYCOAT IC RESIST

Waycoat IC Resist, a recent development of Hunt Research, is a highly purified photosensitive material for high yield production of integrated circuits, semi-conductors and other sophisticated devices in the microelectronic field.

WAYCOAT RC RESIST

Waycoat RC Resist is a photosensitive material specifically designed for use in roller coaters. It forms a resilient coating of uniform thickness capable of prolonged exposure to commonly used etching and electroplating solutions.

WAYCOAT PHOTO RESIST NO. 20

Waycoat Photo Resist No. 20 is a photosensitive material with improved covering power that provides maximum resistance to commonly used electroplating baths and etching solutions. It can be applied full strength by dip coating or diluted for spray coating to give a variety of coating thicknesses.

WAYCLEAN . . . a chemical cleaner that provides a tarnish-free and chemically clean surface for maximum adhesion of any photo resist on copper surfaces.

WAYCOAT PHOTO RESIST STRIPPER . . . an easy-to-use stripper for the complete removal of all resists used in the production of printed circuit boards. (Works at room temperature).

MICROSTRIP . . . a highly refined blend of solvents and surface active agents formulated for the removal of Waycoat IC Resist and other resists used in the microelectronic field.

And don't forget that Hunt manufactures a complete line of complementary photo resist chemicals, such as Thinner, Developer, Dye and Strippers.

12	±0.012%	±0.010%	−25 to + 85°C	0.500W × 1.50L	1.400L × 0.35H
13	±0.006%	±0.005%	0 to + 50°C	0.500W × 1.75L	1.400L × 0.35H
14	±0.003%	±0.003%	Temp. ± 5°C(2)	0.500W × 1.75L	1.500L × 0.35H

Specify Part Numbers as Follows: JPN—(Number of Bits)—(Case Style)—(R Value)(1)

NOTES: (1) R values for the standard series extend to 75 K ohms. For higher resistance values, and other configurations and accuracies, see the section on custom networks.
(2) Fourteen bit networks are designed for operation in a controlled temperature environment. (Any nominal temperature can be specified from +20°C to +85°C.)

CONSTRUCTION: The basic resistive element used in the JPN network is the JXP precision metal film resistor. The reliability of these resistive elements is documented by data gathered over 27,000,000 unit test hours, under a wide variety of load conditions.

☐ **Case:** Hard Diallyl phthalate. ☐ **Leads:** Standard lead material is No. 22 AWG, 100% low oxygen content copper, gold plated over a nickel flash. Other lead materials are available upon request. ☐ **Internal Construction:** All welded assembly. ☐ **Potting Material:** Mineral filled epoxy compound. ☐ **Potting Process:** High vacuum potting to provide void free encapsulation.

STABILITY: The ratio stability of the component resistors has been established to be well within tolerances required to maintain long term network accuracies under normal operating conditions.

ACCURACY: The accuracy of R2R networks is given as a worst case cumulative error, stated in terms of a percentage of the full-scale network output. For most applications, an accuracy which will give a resolution better than one-half the least significant bit is deemed adequate.

NETWORK RESPONSE TIME: The settling time of a network is normally specified as that period of time for an applied input pulse to go from its starting point to the stated accuracy percentage of its final value.

The response of any network depends upon several parameters, such as resistance values of the resistors used and stray capacitance due to the number of resistors and their physical arrangement. However, the settling time of a JPN network is generally below 100 nanoseconds. Settling times below 50 nanoseconds are possible in the lower impedance levels.

DIE STAMPED AND ETCHED CIRCUITS

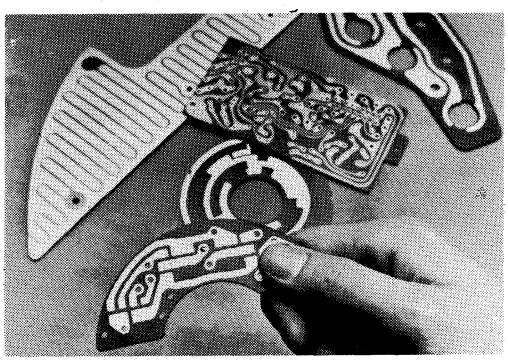
Die stamped circuits by GTI have these advantages over etched circuits:

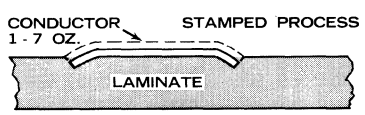
Tucked-in edge conductor that's ideal for cams, commutators, switches, slip rings.

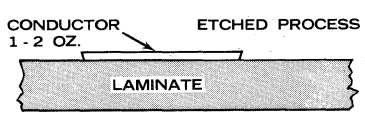
Thicker conductors up to 10 oz./sq. ft. and 0.150 in. thickness with heavier current carrying ability, increased life in switching functions and greater thermal capacity and heat dissipation.

Die stamping is a dry process — chemicals are not used to print or laminate circuitry. Voids are eliminated, as well as pinholes, shorts, or undercuts. There are no chemicals that can leach out later, when circuits are in use.

Positive and accurate registration is maintained throughout the production run. Conductors are embossed and the board is blanked from the same locator holes.







TEST SPECIFICATIONS

The following specifications have been certified by Detroit Testing Laboratory, Detroit, Michigan.

HUMIDITY **Die stamped boards will withstand:**
1. 100°F @ 100% R.H. for 2 hours.
2. 160°F @ 100% R.H. in 1 hour for 3 hours.
3. 100°F @ 100% R.H. over 6 hour period.

Repeat cycle five times, totalling 60 hours, and following this:

THERMAL **Die stamped boards will withstand:**
1. From −40°F to +160°F over 3 hour period.
2. +160°F for 1 hour to −40°F over 3 hour period.
3. −40°F for 1 hour.

Repeat cycle five times, totalling 60 hours.

Die stamp circuits will pass these tests and show no broken conductors, no adhesive bond failures, no base material delamination, no excessive warpage. There will also be no loss of electrical continuity in hardware connections.

This is true also in economy grade base laminates: IE: XP, XXP.

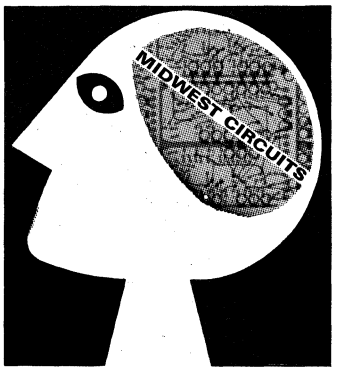
TECHNICAL COMPARISON

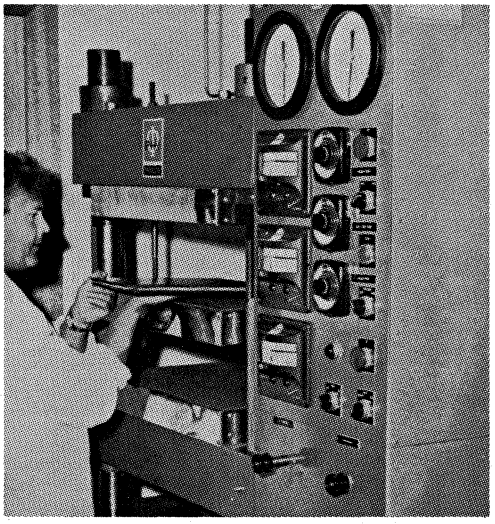
	DIE STAMPED	ETCHED
LAMINATES		
Standard	XP, XXP, XXXP, FR-2, FR-3, CE, LE, G10, FR4 and glass polyester.	Same
Special	Epoxy coated metals Nylon paper Flexibles	Flexibles only
CONDUCTORS	1 oz., 10 oz. electrolytic copper.	1 - 2 oz. electrolytic; aluminum; nickel
FINISHES	Solder hot flow, silver plate, solder mask, seal brite, tin, lead, precious metals.	Same
HARDWARE	Connector pins, terminals, eyelets, blades, contacts.	Same
HOLES		
Punched	.020 holes in 1/16" thick paper phenolics, .030 holes in 1/16" thick glass base	Same
Drilled	.0132 in any material	
TOLERANCES		
1. Registration (Hole to conductor)	**Standard** / **Special**	
Temporary Tools	±.015 / ±.010 ±.005	Same
Permanent Tools	±.010 / ±.005	
1a. Repeatability of registration (throughout production run)	±.003	Same
2. Punching	±.003 minimum / ±.005 standard	Same
3. Angular	±1° / ±0°30′	Same
4. Line width	.030" minimum, 1-2 oz. (Slightly wider on heavier copper)	Less than .030"
5. Line spacing	.030" minimum, 1-2 oz. (Slightly wider on heavier copper)	Less than .030"
ECONOMIC	If the board can either be etched or die stamped, die stamping becomes more economical at about 3500 square feet of circuitry/yr./part., where die stamping has features superior to etching, such as ramp angle, heavier copper, or dry processing, it is economical in lesser quantities	
CONTAMINATES	None	Inks, etchants, and cleaners
ADHESION	Exceeds NEMA standard	Equal to or greater than NEMA standards
TOOLING		
1. Prototype (Temporary)		
Artwork	Yes	Yes
Emboss section	Yes	No
Drill template	Yes	Yes
Router guide	Yes	Yes
2. Production (Permanent)		
Artwork	Yes	Yes
Emboss die	Yes	Prepunch die
Pierce & blank die	Yes	Yes
FLATNESS (NEMA standards) .025"/Lin. inch)	Exceeds NEMA standards	Equal NEMA standards
ENVIRONMENTAL TEST	Dytronics D100 specification (See test specifications)	XP and XXP will not pass D100
UNDERWRITERS LABORATORY APPROVAL	Yes	Yes

NOTE: We do not supply precious metals in either our etching or die stamping with the exception of silver on die stamped circuits.

KEEP US IN MIND

when your printed circuit job demands exceptional quality





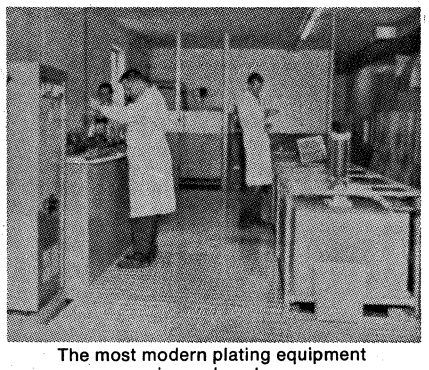
DESIGN and ENGINEERING

Midwest Circuits has the engineering and production capability to handle all or part of your printed circuit board requirements.

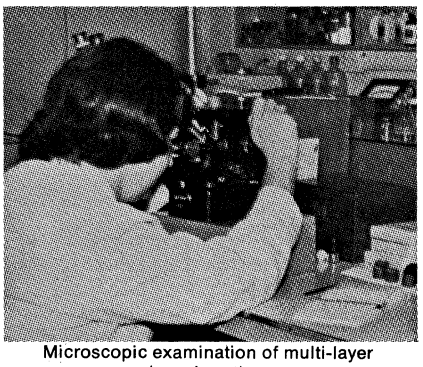
This broad capability covers development of customer schematics or rough drawings to the finished board, including multi-layered, plated-thru-hole, double or single sided.

FACILITIES

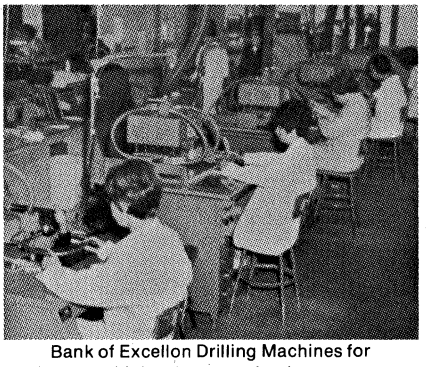
Midwest Circuits maintains two of the finest design and production plants in the industry. Both contain the latest equipment for precision multi-layer production. Teamed to this specialized equipment are skilled technicians, engineers, chemists and photographic experts prepared to give you "on-time" delivery of a quality product.



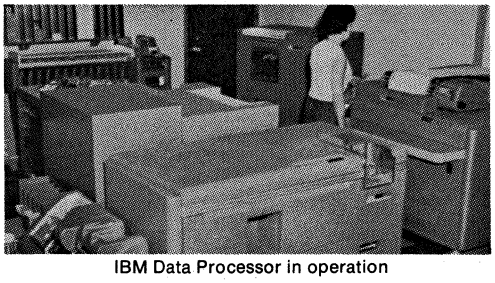
The most modern plating equipment is employed



Microscopic examination of multi-layer board section



Bank of Excellon Drilling Machines for high volume production



IBM Data Processor in operation

QUALITY CONTROL

Midwest Circuits meets and exceeds "industry standards" and the requirements of all military and NASA specifications. This is accomplished through constant monitoring of all production processes. Product precision and tolerances are maintained through the use of "in-process" inspection stations coupled with special IBM computer equipment. The results from each inspection is compiled and analyzed to assure product perfection prior to delivery. It's just one more reason why we'd like you to KEEP US IN MIND when your job demands exceptional quality.

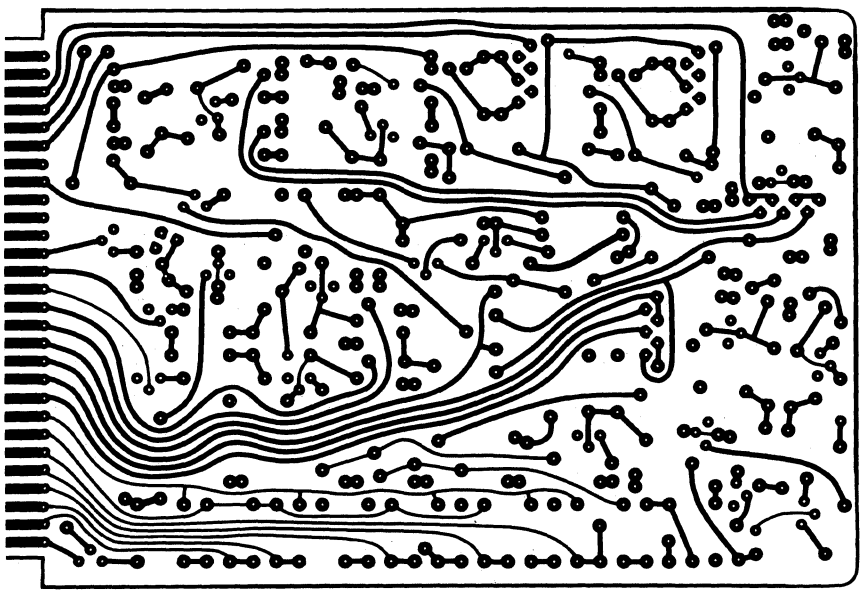
A COMPLETE SOURCE OF RELIABLE PRINTED CIRCUIT BOARDS

DESIGN ENGINEERS ARE SPECIFYING PHOTO ETCHED



Nutronics, has been a manufacturer of printed circuit boards for a number of years to the electronic industries manufacturers of equipment for industrial and military use. Nutronics maintains constant quality control through strict adherence to specification to meet exacting requirements by highly trained personnel, with continuous inspection at all times. Specialized technicians maintain highest quality workmanship. Volume production facilities utilizing latest manufacturing equipment enable us to economically price our circuit boards.

All printed circuits are manufactured by direct photographic process method to precision requirements.

We offer all phases of manufacture with any type of board or finish to meet your requirements. Plating of precious metals is processed in our own plant.

Nutronics quality control is an essential part under constant supervision.

Prototype and small orders requiring urgent delivery receive prompt attention.

Fast delivery on rigid and flexible circuits. We invite you to discuss your circuit board needs.

For a prompt quotation send prints. Call or write for more information.

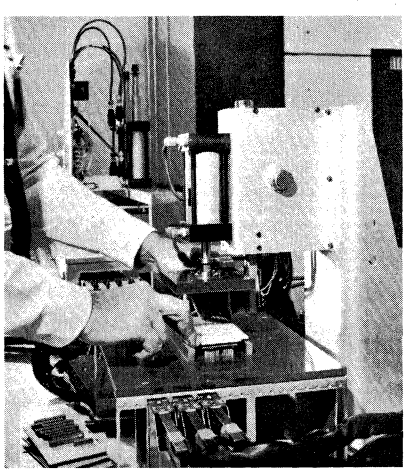
Specify TI multilayer boards

...whether you need one in two weeks–or 2,500 a week!

When your needs are critical for fast delivery of high performance, reliable multilayer boards, specify Texas Instruments. Recently for one customer, TI went from schematic, through design, to delivered prototype of an automatrix multilayer board in just two weeks. For another customer, TI is currently delivering 2,500 complex multilayer boards a week!

Whatever your program requirements, call upon Texas Instruments for complete interconnection system support. Customer services available include complete computer design from schematic or data list level, computer generated artwork from your layouts, or manufacture of boards from your artwork.



Reliability assured — through 100 percent electrical test of every board.

Processes, production facilities, and manufacturing procedures meet military specifications.

How about TI multilayer board reliability? Through 15 October we have recorded 400 million joint hours of operational testing *without a single joint failure.*

When you need multilayer boards, many or just one fast prototype, and you require quick, accurate design and high reliability, call (214) 238-2903, or write: Advanced Circuit Board Department, Texas Instruments Incorporated, P. O. Box 5303, M.S. 979, Dallas, Texas 75222.

JEFFERS MOLDED INDUCTORS

JEFFERS inductors are for use at radio frequencies and in pulse circuitry. The listed standard inductors, in values from 0.1 μh through 10,000 μh, are designed to meet the requirements of MIL-C-15305 Revision C.

Important features of JEFFERS standard inductors.

- High Reliability, proven by over 253,470,000 unit test hours.
- High Q and SRF.
- Maximum protection with minimum dimension as a result of full encapsulation in a thermosetting mineral filled plastic jacket.
- Assured uniformity of product, a result of stringent Quality Control and Inspection procedures at every production stage.

Suffix letter on part number denotes standard tolerance. J = 5%, K = 10%, M = 20%.

These inductors, in standard tolerances, are available for immediate delivery from your local Airco Speer Distributor.

INDUCTOR LEAD MATERIAL

Standard All leads are 1⅝" minimum length.

The leads of standard sizes cataloged, are 99.9% oxygen free copper. Before manufacturing, the coating is pure tin hot dipped to a minimum thickness of 0.0006 inch. After manufacturing into molded inductors the leads are hot dip coated with 60/40 tin-lead solder with a minimum thickness of 0.0006 inch.

Formerly Jeffers Electronics Division Speer Carbon Co.

TOROIDS, OSCILLATORS, AMPLIFIERS

ALWAYS IN STOCK AT ALLEN ELECTRONICS.

Allen Electronics Division manufactures these components in quantity, under the most rigid quality controls, including thorough inspection and testing, for use in the world's finest electronic organs. For this reason we constantly maintain a complete inventory, which is also available to you who desire the added benefits of lower-than-competitive prices and immediate out-of-stock delivery.

TOROIDS

Available from stock. They have been used successfully in such areas as: telemetry, sound and intercommunication systems; geophysical applications; mobile communications; filters; oscillators; and test equipment.

OSCILLATORS

TYPE "C" AUDIO OSCILLATOR

This compact unit is designed for applications that have moderate requirements for stability in respect to temperature and frequency drift. The transistorized package is completely encapsulated and provides a construction that is extremely rugged.

SPECIFICATIONS
- Frequency — Any frequency from 15 Hz. to 10 kHz.
- Frequency Accuracy — ± .2% of specified frequency with 12V. D.C. input, resistive load of 200K ohms and 24° C. ambient.
- Frequency Drift — Approximately 1% from -20°C. to +45°C. Less than 0.3% with input voltages from 10 to 14V. D.C.
- Frequency Adjustment Range (using external components) — ± 2.0% (see arrangements two and three below)
- Input Voltage — 5 to 15V. D.C.
- Input Current — Does not exceed 5 ma. @12V. D.C.
- Output Voltage — Proportional to input voltage. Typically 1.5 to 2.0V. RMS with 12V. D.C. input and a load resistance of 200K ohms.
- Output Wave Shape — Sinusoidal. Total distortion approximately 2.0% with 12V. D.C. input.
- Dimensions — 15 — 249 cps. 4 3/8" x 2 13/16" x 1½" 250 — 10,000 cps. 3 9/16" x 2½" x 1 1/8"

The Type "C" oscillators can be produced in the following arrangements:
1. Any specific frequency in the range at an ambient temperature of 24° C. and with no provision for frequency adjustment.
2. Provision for frequency adjustment of ±2% of a specified frequency by means of an externally connected capacitor (Type "C"). A capacitor will be furnished which will provide the specified frequency at 24° C. ambient.
3. Provision for continuously variable frequency adjustment of ± 2% of a specified frequency by means of an externally connected variable resistance and a fixed capacitor. External components not furnished but component values are specified. This feature is very convenient when a "front panel" fine adjustment of frequency is desirable.

PRICE — Order by specifying type, frequency and arrangement number.

Frequency	Price
15 — 20 Hz.	$37.00
21 — 100 Hz.	$25.00
101 — 500 Hz.	$20.00
501 — 10,000 Hz.	$25.00

QUANTITY DISCOUNT
Discount is applicable for quantities of one frequency only.

Quantity	Discount
1 — 10	Net
11 — 50	Less 15%
51 — 99	Less 20%
100 — up	Less 25%

TYPE "P" SINE WAVE OSCILLATOR

A plug-in unit with a standard octal tube base type connector. A knurled thumbscrew type adjustment on top of the unit provides for variable, fine adjustment of frequency, plus or minus two per cent of the specified frequency.

SPECIFICATIONS
- Frequency — Any frequency from 20Hz. to 200 kHz.
- Frequency Drift — Approximately 1% from -20° C. to +45°C. Less than 0.3% with input voltages from 10 to 14V. D.C.
- Input Voltage — 5 to 15V. D.C.
- Input Current — Does not exceed 5 ma. @ 12V. D.C.
- Output Voltage — Proportional to input voltage. Typically 1.5 to 2.0V. RMS, with 12V. D.C. input and load resistance of 200K ohms.
- Output Wave Shape — Sinusoidal. Total distortion approximately 2.0% with 12V. D.C. input.
- Dimensions — Mounting area — 2 3/16" square. Overall height — 4 3/4" max. Height above octal mounting socket — 4" max.

PRICE — $33.00. Order by specifying type and frequency.
QUANTITY DISCOUNT—Same discount schedule as Type "C"

AMPLIFIERS

The T-20 and T-50 transistorized amplifiers utilize the latest developments in solid-state technology. This outstanding equipment demonstrates all the characteristics normally associated with such circuitry, namely compact design and low heat dissipation. Conservatively rated, these units have demonstrated their ability to operate over a wide ambient temperature range.

TYPICAL SPECIFICATIONS — T-50 AUDIO AMPLIFIER
- Power Output — 50 W. @ 8 ohms; 35 W. @ 15 ohms.
- Frequency Response — ± 0.75 db. 20 cps. to 20 kcs.
- Harmonic Distortion — 0.38% 1 db. below clipping.
- Intermodulation Distortion — 1.1% 1 db. below clipping.
- Noise — Less Than 2 mv.
- Input Sensitivity — 50 mv. for 1 db. below clipping.
- Output Impedance — 8 to 16 ohms.
- Input — 117v. 60 cps.
- Maximum Dimensions — 10¼" L. x 7¼" W. x 6 1/8" H.
- Weight — 7 3/4 lbs.

PRICE — $98.00 net
DISCOUNT SCHEDULE: 1 — 4 net; 5 — 9 less 5%; 10 — 24 less 7.5%; 25 — up less 10%

TYPICAL SPECIFICATIONS — T-20 AUDIO AMPLIFIER
- Power Output — 18 W. @ 8 ohms.
- Frequency Response — ± 1.0 db. 20 cps. to 20 kcs.
- Harmonic Distortion — 0.3% 1 db. below clipping
- Intermodulation Distortion — 0.4% 1 db. below clipping.
- Noise — Less than 2 mv.
- Input Sensitivity — 50 mv. for 1 db. below clipping.
- Output Impedance — 8 ohms.
- Input — 117 v. 60 cps.
- Maximum Dimensions — 8" L. x 7" W. x 6 1/8" H.
- Weight — 4 lbs.

PRICE — $76.00 net
DISCOUNT SCHEDULE — Same as for T-50.

SPECIAL ASSEMBLIES

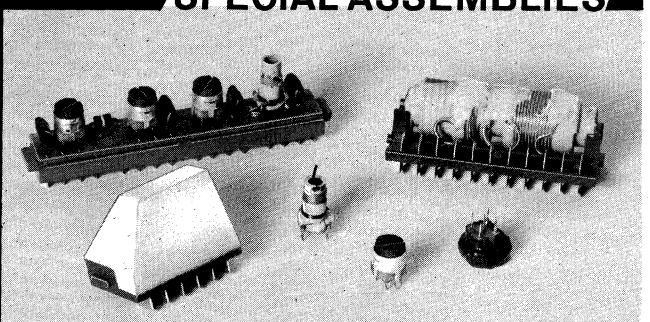
In addition to its standard line of off-the-shelf components, Autonatic specializes in the design and manufacture of almost any type of coil (variable pitch winding, RF coils and toroids in a wide variety of ranges, encapsulated, etc.). The range of transformers, discriminators and filters custom tailored to your requirements is virtually unlimited. Automatic has the facilities to design and produce complete I-F assemblies, printed circuit modules and others to your specifications.

Automatic's Royal line is designed especially for projects where specifications call for high reliability or for rigid temperature coefficients.

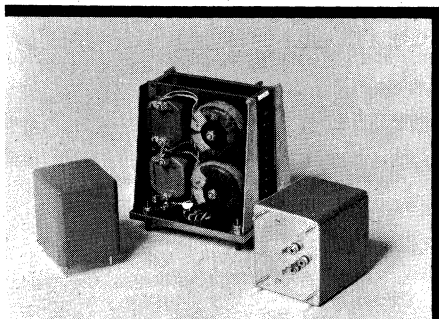
Where capacitors, inductors or toroids are combined to make up a network such as a filter or delay line, all items are seasoned and de-bugged through four cycles providing assurance that all questionable sections will be detected.

A unique encapsulation technique contributes to greater reliability. When an end product is to be encapsulated in epoxy resin, each component is covered with unsintered teflon and coated with a semi-rigid epoxy resin. The assembly is then encased in a rigid epoxy. This shell-within-a-shell relieves the end product from the strains caused during temperature variations normally experienced in rigid epoxy encapsulation.

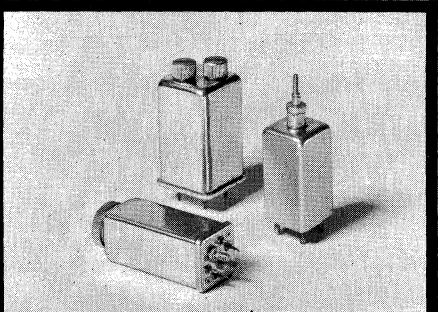
Where items are hermetically sealed in metal cases, stainless steel studs are provided. Pressure type header terminal assemblies are used to meet the most rigid requirements of MIL T-27A specifications.



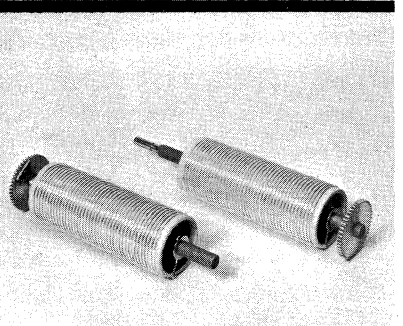
COIL ASSEMBLIES
Shown here are typical special coil assemblies manufactured for use in the U.S. Navy WRC-1 Receiver-Transmitter System (Receiver R1051, Transmitter 827, Amplifier AM-3007, Antenna Coupler CU-937)



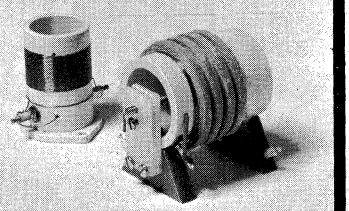
DISCRIMINATORS & FILTERS
Band Pass, Band Rejection, Low Pass, High Pass. Various types of discriminators from 1000 hertz to 3000 hertz seasoned and hermetically sealed.



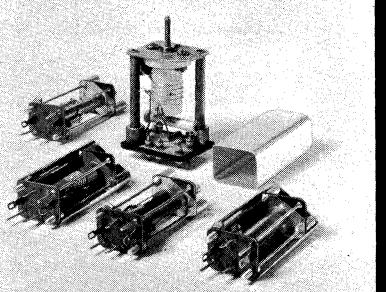
R-F & I-F XFMRS
Hermetically sealed R-F and I-F transformers for military and high quality commercial application.



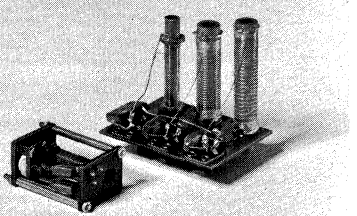
RF COIL ASSEMBLIES
These high frequency, precision coil assemblies are produced for the U.S. Navy PRC-47 Personnel Radio Communication System.



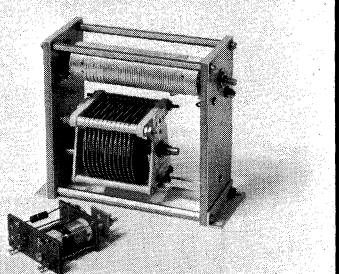
R-F HIGH VOLTAGE XFMRS
Radio frequency high voltage power supply transformers, used on the Radar Jitter Tester.



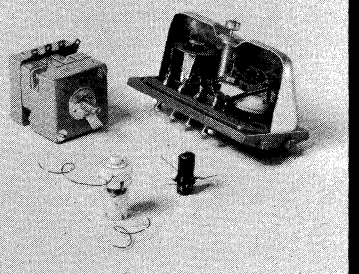
TRANSFORMERS
The complete set of 11 transformers, consisting of R-F, I-F, Limiter & Discriminator for the GRC/R108, R109 and R110 Radio Receiver Signal Corps.



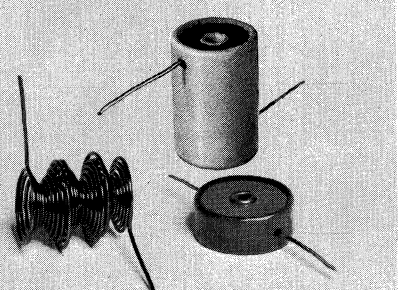
VARIABLE PITCH COILS
Complete facilities for variable pitch winding, to customer's specific requirements.



VARIABLE INDUCTOR & CAPACITOR ASSEMBLY
Link transformer, variable inductor and capacitor assembly for a 10 K.W. Transmitter manufactured for the Navy. (FRT-17)



MICA FILLED SUPPORTS & ASSEMBLIES
for low loss transformers and R-F coils.



R-F CHOKE COILS
Low distributed capacity R-F Choke Coils — for the Radio AN/GRR-5.

AUTOMATIC COIL DIVISION OF DESIGNATRONICS

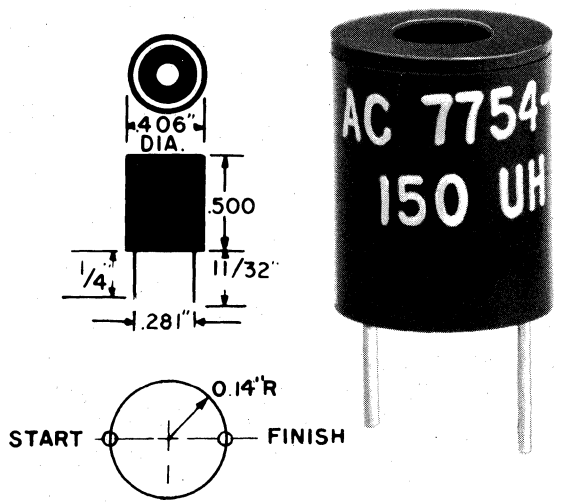
76 E. Second Street, Mineola, New York 11501/Telephone (516) 741-7070/TWX 510-222-5889

MINIATURE VARIABLE INDUCTORS

Available in inductance ranges from 0.1 to 4700 uH
Designed to meet MIL-C-15305C

Designed for printed circuit application, this Automatic Coil series offers high reliability and exceptional stability over extreme temperature variations. For high reliability, inductors are fully epoxy-encapsulated. They are shock-proof and moisture-proof.

Ideal for printed circuit application, these high-Q units measure 13/32" in diameter by 1/2" high. Two mounting terminals are spaced 9/32" on center for vertical mount. The tuning access is from either end.



ELECTRICAL CHARACTERISTICS

Inductance Range: 0.33 to 4700μH Tunable Range ±20%
0.15 to 0.22μH Tunable Range ±15%
0.1μH Tunable Range ±10%
All measurements at 25°C on Q-Meter using miniature alligator clips mounted ¼" from body.

Self-Resonant Frequency: Minimum f_o to be not less than 80% of published data as measured with Grid-Dip Meter

DENSITY CHARACTERISTICS

Volume: 0.063 cubic inches

Weight: 2.6 grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Torque: 0.75 to 5.0 inch-ounces

Operating Temperature: −55°C to +125°C

Terminal Strength: Meets five pound pull tests.

Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305C, Grade 1, Class B. Vibration: Low frequency 10 Hz to 55 Hz at .06" total excursion at rate of 1 linear sweep per minute for 2 hours repeated for each of 3 mutually perpendicular planes. Shock: 50G, 11ms.

Marking: Manufacturer data printed.

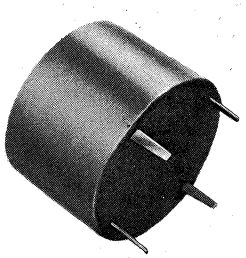
MPC SERIES COLOR-CODED TOROIDS

Molded printed circuit toroids available in ten coded E.I.A. colors. Designed to speed production of printed circuit assemblies, the color coding can be used to indicate the correct value toroid to use and where to position it on the PC board.

Inductance values range from 100 microhenries to 500 millihenries. The toroid can be furnished tapped or with a secondary winding to satisfy requirements.

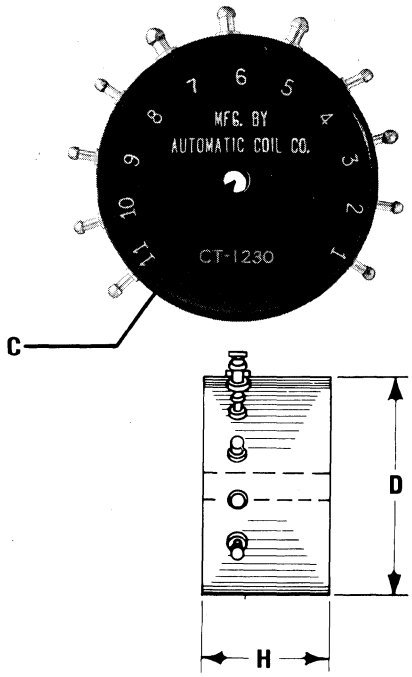
Dimensions are: O.D. 27/32"; height: 5/8" max.; pins: 1/8" long +1/16"−0.



AUTOMATIC COIL DIVISION OF DESIGNATRONICS

76 E. Second Street. Mineola, New York 11501/Telephone (516) 741-7070/TWX 510-222-5889

TOROIDS



HIGH TEMPERATURE PLASTIC-CASED CONVERTER

Toroids designed to exceed MIL-T-27A grade 5 class R requirements with added life expectancy thru increased efficiency and reliability.

Normal operation frequency between 1500 and 5000 Hz. Special designs obtain operating frequency to 10,000 Hz.

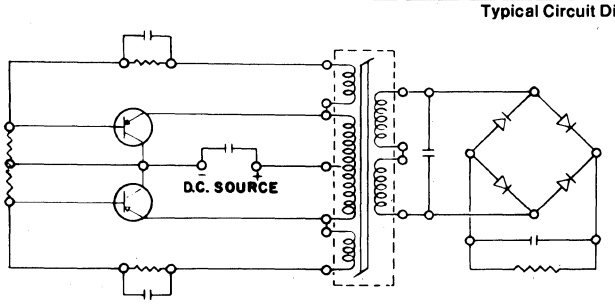
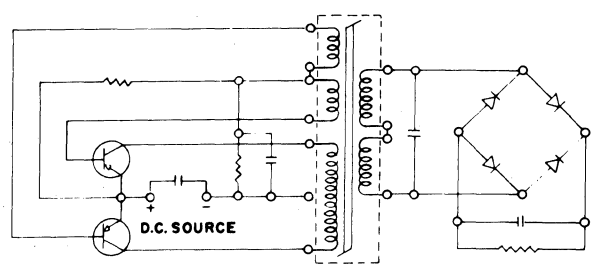
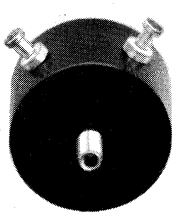
Typical Circuit Diagrams for CT Toroids







HF SERIES HIGH FREQUENCY MINIATURE TOROIDS

The HF5 high frequency toroids are precision wound to specific inductance and held to ±0.5% at 1000 Hz.

Improved stability results from the unique method of enclosing the wound toroid in a teflon jacket which is then encased in a semi-rigid epoxy coating prior to rigid encapsulation. The dual method of encapsulation results in uniform properties from toroid to toroid and from year to year.

Case size 5/8" O.D. x 1/2" high. Center stud 4-40 x 5/16" long. Turret type 7/32" long terminals spaced 90°.

Model	Inductance Value ±0.5% F = 1000 Hertz	Apparent Luft at RF	C Typical

IMAGE ORTHICON • SPEAKERS • TRANSFORMERS

Cleveland Electronics offers more than twenty years of technical experience in the design, development and manufacture of superior electronic components. Design leadership is your assurance in such product areas as T.V. Camera Deflection Components, Sound Reproduction Devices, Transformers, and Miscellaneous Electro-Mechanical Assemblies.

The CLETRON Deflection Components Division has provided engineering, design, and development leadership for every major T.V. camera manufacturer for the last thirteen years. Commercial, Broadcast, Military, and Aerospace electronics depend on CLETRON component quality.

The facing catalog page illustrates only a sample listing of CLETRON components. Over nine hundred basic components, a majority with two or more mechanical variations, can be developed to meet specific customer requirements.

In addition to this listing, components of 1/2", 2", and 4-1/2" Vidicons, 4-1/2" Image Orthicon tubes, and all other types of pick-up tubes are available. All components are available in 1%, 2%, and 3% geometric distortions. Most components can be made to meet military requirements such as MIL-E5400 and/or others. Components also available in matched sets for color application at your request.

Call on CLETRON for your next exacting component requirement. Our facilities provide complete design and manufacturing services.

COLLINS TOROIDS

Collins' many core types and case configurations offer the designer a wide choice of characteristics for his specific application. The standard types are listed below.

Types MP and MPF

These toroids are built and tested to the requirements of MIL-T-27B, Grade 5, Class R, Life Expectancy X. Parts are transfer molded in high temperature thermo-setting resin. Available with internal screw threads (specify B) or with a clearance type mounting hole (specify A).

Type PCT

These toroids are built and tested to the requirements of MIL-T-27B, Grade 5, Class S, Life Expectancy X. The units are transfer molded of hi-temp epoxy. The leads are spaced to match 0.1 inch circuit board grids.

Types HS, HSA, HSD

These hermetically-sealed toroids are built and tested to the requirements of MIL-T-27B, Grade 4, Class R, Life Expectancy X. The metal case provides excellent magnetic and electrostatic shielding and extremely long-term stability.

Types MIC and MIH

The MIC micro inductor is built and tested in accordance with MIL-T-27B, Grade 4, Class R, Life Expectancy X. The MIH, designed for higher frequency applications, is built and tested in accordance with MIL-C-15305, Type LT7J. Both are hermetically sealed in nickel steel TO-5 type cases for improved magnetic and electrostatic shielding.

Type MIC Micro Inductors

Standard inductance values are available in 20% increments from 1 MH to 500 MH for frequencies up to 200 kHz. MIC case (TO-5) type (see left). Combines high Q (more than 30 at 20 kHz; 120 at 200 kHz) with small size for nearly any use. Dielectric strength, 100 V rms. Insulation resistance 10,000 megs min. at 100 VDC. Temp. range, −55°C to +85°C ambient, with inductance change ±2% over −20°C to +85°C range. Inductance tolerance: ±5%.

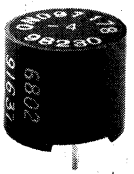
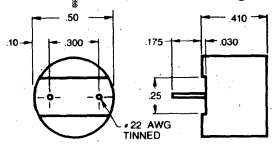
50	.52	85	1	1	2	3	4	ITV-1042-1

TYPE ITP Toroidal Filter Inductor Encapsulated



FEATURES

- Meet MIL-T-27, Grades 2 & 5, Classes Q, R, S, V.
- PC mounting
- High Q
- Moisture relief pads
- Compact
- Exceptional magnetic stability



ITP 1021 SERIES
TOROIDAL FILTER INDUCTORS

NOTES: 1. **L** = Effective inductance as measured on a "Q" meter.

2. **ΔL** = Tuning range above and below nominal "L" value, expressed in % of nominal value. Percentage shown is the minimum amount of ΔL available for the respective model number.

3. **Turns Ratio** = The actual ratio of the turns as wound on the coil. In calculating impedance ratios, allow for about 90% coupling in the coil.

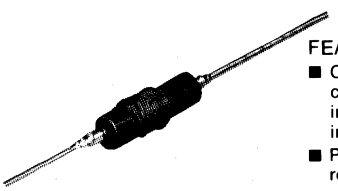
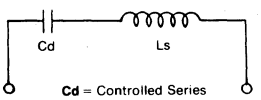
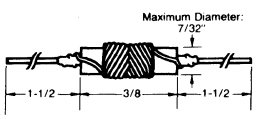
SERIES RESONANT TRAPS





Cd = Controlled Series Capacitance

Ls = Series Inductance



FEATURES

- Combines the electrical characteristics of an inductor and a capacitor in series
- Provides controlled self-resonance in a miniaturized circuit
- Saves space, reduces inventory
- Speeds assembly

BASIC SPECIFICATIONS

- Can be designed for any resonant frequency from .4 MHz to 50 MHz.
- Impedance at design frequency: 15 ohms or less.
- Impedance at ±50% of design frequency: 1500 ohms minimum.
- Frequencies readily available: 10.7, 12, 14, 18 MHz.

ORDERING INFORMATION

WHERE TO ORDER:
- From your Dale Representative
- From DALE ELECTRONICS, INC.
  Sioux Division, Box 180
  Yankton, South Dakota 57078

  Phone: 605–665-9301

TERMS: 1/2% 10-Net 30 F.O.B. POINT Yankton, S.D.

NOTE: Prices and specifications on all products are subject to change without notice.

SPECIAL CHARGES: Minimum Order Charge...$10.00
Minimum Item Charge ...$ 7.50

NON-STANDARD PRODUCTS
When your requirements are for special products not covered here, please send an outline of your needs to Sales Department, Dale Electronics, Inc., Sioux Division, Box 180, Yankton, South Dakota 57078.

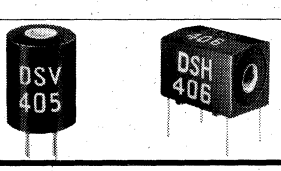
Designed to fit inside or outside IC's.

.100″ Square .150″ Square .250″ Square

For chassis or AC mounting, crimp on terminals.

Fine tuning — 80 threads per inch.



Delevan coils offer the designer a wide choice of characteristics for specific applications. Standard coils are listed above. For information on custom designed coils, contact your nearest Delevan Representative . . . he's listed in the back of this book . . . or, call Delevan Electronics direct.

To obtain factory prices in quantities up to 2,500, contact the Delevan Distributor listed in the back of this book. To order, indicate series number and inductance desired. Many items are available from Distributor inventories.

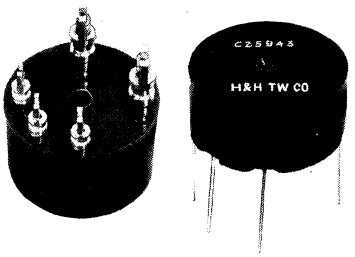
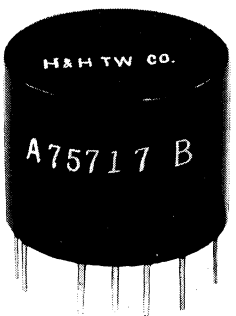
First on the list... (even the moon's)

H. & H. specializes in the design and manufacture of magnetic components for military and industrial applications. When the successful Lunar Excursion Module hit the front pages, H. & H. made the newspapers . . . after much hard work.

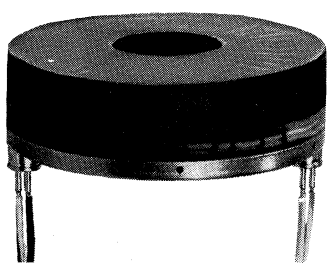
H. & H. isn't only "first on the moon." It's first on many, many lists. If we aren't first on yours . . . we really should be.



✓ *Both of these H. & H. units feature extremely critical electrical characteristics. Fully encapsulated and using unusual pin design, both are now being used aboard the U.S. Navy's underwater missiles.*

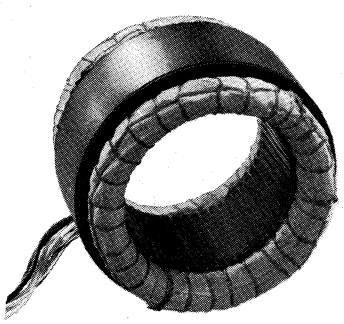


✓ *The trick to turning out this magamp (for motor speed controls) both economically and with minimal lead-time, is production "know-how."*

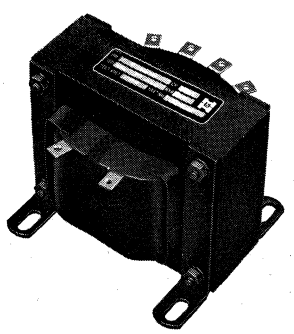


✓ *H. & H. won the bid for this alternator-stator. It's an encapsulated energy supply source for one of the DOD's latest undersea operations*

✓ *H. & H. toroids used in solid-state controls for total energy systems are climbing in demand. Assembly methods are the very latest. Prices are unusually low and quotes are "hand tailored."*



✓ *This H. & H. stator —featuring high reliability—was quickly accepted by one of the nation's leading areospace component manufacturers. Its quality is hard to surpass.*



✓ *Transformers ("C", "EI" and three-phase "E" core) for static converters, inverters and machine control. These highlight close tolerance both on electrical and mechanical characteristics.*

When you have a question . . . call us. We can help you find the answers. We're at 216/486-0744.

H & H TOROIDAL WINDING CO

TOROIDAL INDUCTORS

Hisonic Toroidal Inductors are wound on either nickel-iron molybdenum (molybdenum permalloy) or carbonyl iron powder cores. Standard tolerance is 1% and values are true inductance. Units are available uncased, molded or cased as shown. Molded units are compression molded in high strength, high temperature thermosetting resin and pass requirements of MIL T 27 Grade 5 Class R. Cased units are hermetically sealed in shield cans and pass requirements of MIL T 27 Grade 4 Class R.

Above units also available in encapsulated construction with pin terminals arranged for printed circuit board applications. Write for information on 5101 - 5103 and 5105 series.

The above units represent only a small percentage of those available as standard from Hisonic, but represent those most commonly used. Thousands of additional standard inductors are available, one of which should meet your requirements. Special requirements get prompt and accurate development from Hisonic Custom Design Service.

Hisonic, with a background of 23 years experience in toroidal components, is headquarters for all your needs.

Write today for the Hisonic, Inc. catalog which contains full information on all Hisonic standard Toroidal Inductors and Hisonic Custom Design Service.

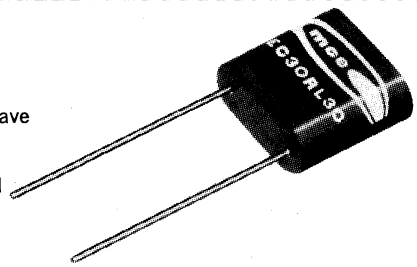
MCE PRODUCT BULLETIN — SUB-MINIATURE LINE — EC30RL

TOROIDAL CHOKES

APPLICATION FEATURES

SELF SHIELDING—Toroidal configuration at low cost minimizes stray field effects. For use as noise suppressor in switching circuits and in high frequency or square wave power supplies. Also can be used as non-critical inductor in oscillator, filter, and wave shaping networks.
PACKAGING FOR P.C. BOARDS — Epoxy Encapsulated unit for plug-in on Standard 0.1 inch grid spacing. "Crystal" case requires small board area.



SPECIFICATIONS

1. Initial Inductance, Lo, is at corresponding test voltage and frequency as measured on ESI Impedance Bridge Model 250 or equivalent.
2. Self-Resonant Frequency is based upon a distributed capacitance of approx. 140 pf.
3. 100% I Milliamps is for a temperature rise of 50°C.
4. Max. temperature rating = 130°C.
5. Dielectric Withstanding Voltage = 1500V-RMS 60Hz & Insulation Resistance ≧ 1000 megohms at 500VDC from coil to mounting plate.
6. All electrical data at 20 ±5°C.

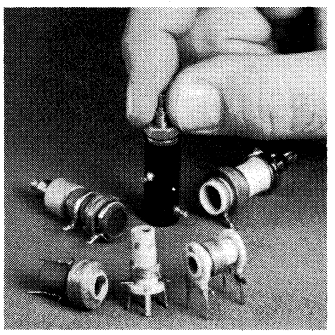
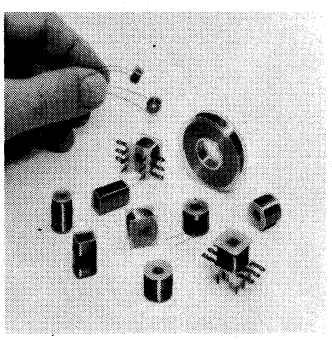
Special Coils

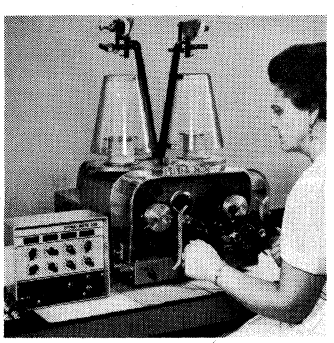
Special 16 Pi/30 KV windings for oil-filled high voltage transformers . . . special coil samples are shipped within 1 to 2 weeks after receipt of order.



Production shipments of special coils begin within 3 weeks after sample approval. Intensive specialization in coil design and manufacture assures excellent performance.



Where space limitations dictate one or more dimensions, Miller engineers will make recommendations to help you obtain optimum performance in your circuit.

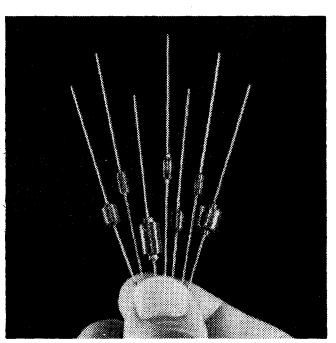


Custom wound bobbins are now available in an extensive range of inductance values and current ratings on many standard forms.

Custom Wound Bobbins

Standard Coils

Series 7830 heavy duty filter chokes provide up to 250 uh, carry up to 75 amps; widely used for RFI filters and reducing surge peaks; available from L.A. shelf stock.



RF and IF coils, chokes and filters are carried in stock, in depth, in extensive range of values and ratings, most are available from distributors' shelves at factory prices.

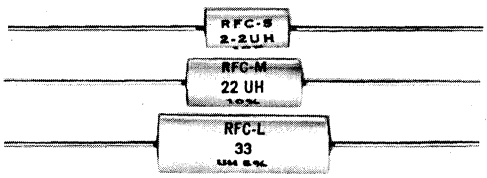
"SPECIAL" AND STANDARD INDUCTANCES CATALOG LISTS THE COMPLETE MILLEN LINE OF INDUCTORS

JAMES MILLEN MFG. CO., INC.
MAIN OFFICE AND FACTORY
MALDEN, MASSACHUSETTS, U.S.A.

NYTRONICS, INC.
STANDARD COMPONENTS GROUP

INDUSTORS



S-M-L INDUCTORS — Non-shielded with inductance range 0.1 to 10,000uH. Designed to meet MIL-C-15305, Grade 1, Class B.
Molded Envelope: "S" Type — 0.188" diameter x 0.44" length
"M" Type — 0.25" diameter x 0.60" length
"L" Type — 0.31" diameter x 0.90" length.

DECI-DUCTOR — Subminiature with inductance range 0.1 to 1,000uH. Designed to MIL-C-15305, Grade 1, Class B.
Molded Envelope: 0.100" diameter x 0.250" length.

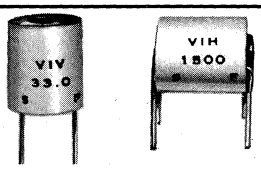
WEE-DUCTOR — Magnetically shielded with inductance range 0.1 to 180,000uH, designed to MIL-C-15305, Grade 1, Class B.
Encapsulated Envelope: 0.157" diameter x .450" length.

SUPER WEE-DUCTOR/90537 TYPE — Manufactured in accordance with MS90537, Molded Magnetically shielded with inductance range 0.1 to 100,000uH ±10% tolerance.
Molded Envelope: 0.163" diameter x 0.410" length.

WEE WEE-DUCTOR — Magnetically shielded with inductance range 0.1 to 10,000uH. Designed to MIL-C-15305.
Encapsulated Envelope: 0.125" diameter x 0.335" length.

SUPER WEE-WEE-DUCTOR — Miniature shielded with inductance range 0.1uH to 10,000uH. Designed to MIL-C-15305, Grade 1, Class B.
Epoxy Molded Envelope: 0.125" diameter x 0.335" length.

WEE CHIP-INDUCTOR — Magnetically shielded wrap-around termination permitting contact to either face or ends. Designed to meet MIL-C-15305, Grade 2, Class B. .280" x .195" x .100". Presently available .15uH to 1,000uH.



VARIABLE INDUCTOR — Unshielded with adjustable range 0.1 to 4700uH. Designed to meet MIL-C-15305, Grade 1, Class B.
Encapsulated Envelope: 0.400" diameter x 0.500" length. Vertical or Horizontal mounting.

WEE V-L — Magnetically shielded adjustable range 0.1 to 100,000uH. Designed to MIL-C-15305, Grade 1, Class B.
Epoxy Molded 0.300" diameter x 0.400" length.

ADJUSTOROID — Adjustable toroid available in nominal values from 0.01Hy to 12Hy. This unit provides stepless adjustment in a completely hermetically sealed package.

FOR COMPLETE LINE OF THE ABOVE INDUCTORS—SEE CURRENT RADIO ELECTRONIC MASTER. ALSO CONTACT US FOR CERAMIC CAPACITORS; THIN FILM RESISTORS; AND DELAY LINES . . .

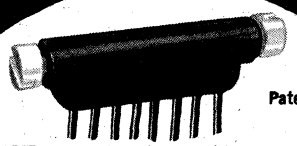
PICONICS Inc.
MICROELECTRONIC COILS

SPECIALISTS IN MICROELECTRONIC REACTIVE DEVICES



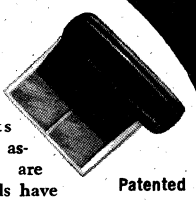
Patented

L AND I SERIES DEVICES—Types and electrical geometry dependent upon specific application. Frequency ranges from 100 kc to 200 mc. These devices are all custom designed to the specific circuit requirements. They are useful in standard f-m receivers, frequency deviating sensors, frequency locking circuits and related applications. They are also made in discriminator designs.

B SERIES INDUCTORS AND TRANSFORMERS—feature molded diallyl phthaldate case and high temperature delrin self locking screw. This is a well shielded, temperature stable device which has permitted 80% size reductions in conventional rf and if circuits and has better shielding and good temperature stability. Available electrical values from 7 nh - 7 mh.

Patented

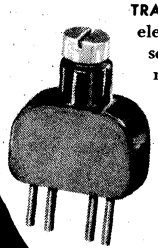
P TYPE CHIP INDUCTORS—for use with hybrid circuits where automatic assembly techniques are employed. These coils have a gold-plated ceramic bonding pad for gap welding, soldering, hot chisel bonding, or ultrasonic welding. Both fixed and tunable designs available in values to 100 μh. Heights of .050 in. and .100 in. depending on electrical value.



Patented

M SERIES CUSTOM DEVICES—These devices are made to the specific requirements of the customer. They may vary in size and shape from the stock items. Electrical parameters may be considerably different from standard items. Some applications of these items are: plasma physics experiments, absolute 0 applications and high temperature use.

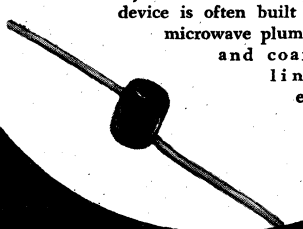
TT SERIES TUNABLE INDUCTORS AND TRANSFORMERS—offer the same electrical characteristics as the B series in a different mechanical geometry. It is designed for crowded printed circuit boards where top tuning is required. It meshes in between transistor cans for compact amplifier designs. This device is one-third the size of a TO-5 can.



Patented

ACTUAL SIZE

S SERIES MICROWAVE INDUCTOR—This device is used as a choke at frequencies in the 1 to 2 KMhz range. It is a low Q broadband choke with high current capability. It is only available in values of 25 nh and 35 nh. Special features are small size and very low insertion loss. The device is often built into microwave plumbing and coaxial lines, etc.



C AND G SERIES— ribbon leaded inductors are available in fixed and tunable versions with either silver plated copper ribbon or Kovar ribbon leads. These components are used in hybrid circuitry and subminiature modules. The tunable devices have a slide tuning mechanism that has reduced tuning time to ⅓ that of other approaches.

Patented

A new dimension in inductance is presented by a radically designed component with more features than the most reliable standard sized inductors available. These inductors have approximately one tenth the weight and size of other microelectronic inductors. The new design permits greater tuning range combined with smaller size in a more rugged construction. Advanced welding techniques permit welding the internal connections to provide extremely high reliability. Extremely large values of inductances which have not been obtainable in microminiature sizes are now available.

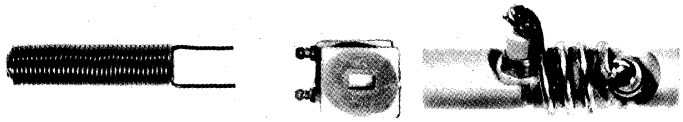
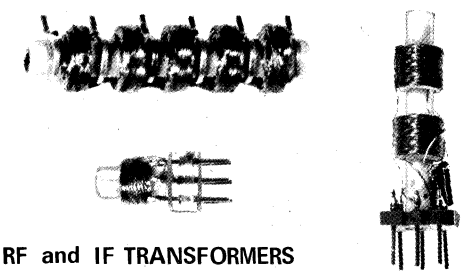
CUSTOM DESIGN

In addition to the comprehensive inductor line, Stanwyck offers the electronic design engineer a variety of special custom design electronic components. Illustrated in this section are examples of Stanwyck capabilities along these lines.



RELAY BOBBIN COILS, HASH CHOKES



RF and IF TRANSFORMERS

The engineering staff at Stanwyck is supported by one of the most modern and fully equipped environmental test laboratories in the industry. Extensive product life testing plus rigid quality control standards result in superior custom design electronic components.

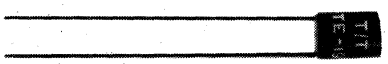
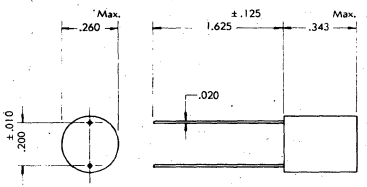
MINI-L ENCAPSULATED R.F. INDUCTORS — TE SERIES

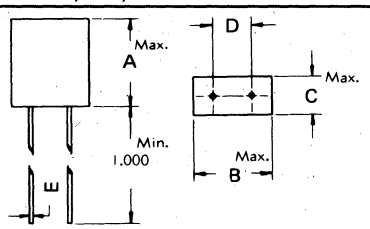


- DESIGNED TO MEET MIL-C-15305 C, GRADE 1 CLASS B (−55°C to +125°C).
- INDUCTANCE VALUES: 0.10 mh to 220.0 mh.
- FREQUENCY RANGE: 25 KHz to 2.5 MHz.
- DIELECTRIC WITHSTANDING VOLTAGE: 500 volts rms.
- RATED TEMPERATURE RISE: 35°C at an ambient temperature of 90°C.
- LEADS: Tinned Copper. Weldable leads available by special order.



MINI-L ENCAPSULATED R.F. INDUCTORS — TA, TB, TD & TF SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-C-15305 C, GRADE 1, CLASS B (−55°C to +125°C).
- DIELECTRIC WITHSTANDING VOLTAGE: 700 volts rms.
- RATED TEMPERATURE RISE: 35°C at an ambient temperature of 90°C.
- LEADS: Tinned Copper. Weldable leads available by special order.



DIMENSIONS

Series	A	B	C	D	E	Max. Power
TA	.225	.210	.110	.100	.020	0.2 Watt
TB	.300	.280	.160	.200	.025	0.33 Watt
TD	.390	.390	.197	.200	.025	0.5 Watt
TF	.225	.210	.110	.100	.020	0.2 Watt

TA SERIES

- MIN. "Q": 60 to 70.
- INDUCTANCE RANGE: .1 to 10 uh.
- FREQUENCY RANGE: 1 to 50 mcs.
- INDUCTANCE TOLERANCES: Less than 1.0 uh, ±10%. Greater than or equal to 1.0 uh, ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: +50 PPM/°C maximum.
- MAXIMUM POWER DISSIPATION: 0.2 watt.

TF SERIES

- MIN. "Q": 60 to 80.
- FREQUENCY RANGE: 20 to 300 mcs.
- INDUCTANCE RANGE: .01 to 1 uh.
- INDUCTANCE TOLERANCES: Less than 0.1 uh, ±20%. Greater than or equal to 0.1 uh, ±10%. Closer tolerances available by special request.
- INDUCTANCE TC: +200 PPM/°C maximum.
- MAXIMUM POWER DISSIPATION: 0.2 watt.

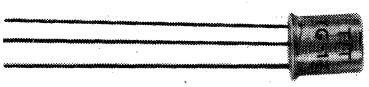
TD SERIES

- MIN. "Q": 40 to 30.
- INDUCTANCE RANGE: 100 to 10,000 uh.
- RECOMMENDED FREQUENCY RANGE: 50 kcs to 10 mcs.
- INDUCTANCE TOLERANCE: ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: From +60 PPM/°C maximum to +300 PPM/°C, maximum, depending upon inductance value.
- MAXIMUM POWER DISSIPATION: .50 watt.

TB SERIES

- MIN. "Q": 50 to 80.
- RECOMMENDED FREQUENCY RANGE: 50 kcs to 35 mcs.
- INDUCTANCE RANGE: 10 to 1000 uh.
- INDUCTANCE TOLERANCE: ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: From +60 PPM°/C maximum to +300 PPM/°C maximum, depending upon inductance value.
- MAXIMUM POWER DISSIPATION: .33 watt.

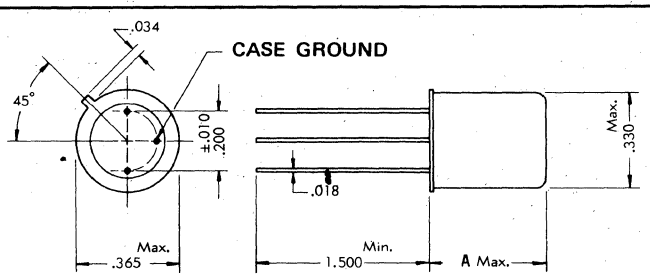
MINI-L HERMETICALLY SEALED R.F. INDUCTORS — TG & TH SERIES



- HERMETICALLY SEALED, HIGH "Q" INDUCTOR IN A T-05 TRANSISTOR CONFIGURATION.
- LOW EXTERNAL MAGNETIC AND ELECTROSTATIC FIELD.
- AMBIENT TEMPERATURE RANGE: −55°C to +85°C.
- DIELECTRIC WITHSTANDING VOLTAGE: 100 volts rms.
- INSULATION RESISTANCE: 10,000 meg. ohms Min.

TG SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-T-27B, GRADE 4, CLASS R.
- FREQUENCY RANGE: 10 to 500 KHz.
- INDUCTANCE RANGE: 1 to 500 mh.
- INDUCTANCE TOLERANCES: ±5%.
- INDUCTANCE STABILITY: ±2% (−20°C to +85°C).



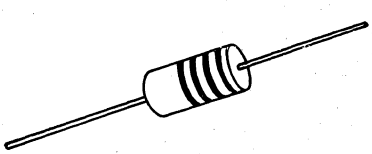
DIMENSIONS

Series	A
TG	.390
TH	.350

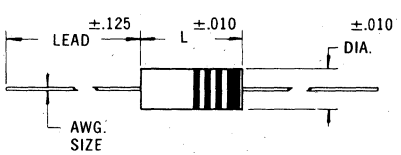
TH SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-C-15305C, GRADE 1, CLASS 0.
- FREQUENCY RANGE: 100 KHz to 10 MHz.
- INDUCTANCE RANGE: 10 to 1000.
- INDUCTANCE TOLERANCES: 10 uh through 33 uh ±10%, 39 uh through 130 uh ±5%, greater than and including 150 uh ±3%.
- INDUCTANCE STABILITY: ±2% (−20°C to +85°C).

MOLDED R.F. CHOKES



- DESIGNED TO MEET MIL-C-15305C, GRADE 1, CLASS B.
- EPOXY MOLDED FOR HIGH RELIABILITY. EXCELLENT RESISTANCE TO IMMERSION, MOISTURE RESISTANCE, VIBRATION AND SHOCK TESTS.



- OPERATING TEMPERATURE EXTREMES FROM −55°C TO 125°C (35°C RISE AT 90°C AMBIENT.
- OPERATION TO ALTITUDES OF 70,000 FEET.
- COLOR CODED PER MIL-C-15305C.
- TINNED COPPER LEADS. WELDABLE LEADS AVAILABLE UPON REQUEST.

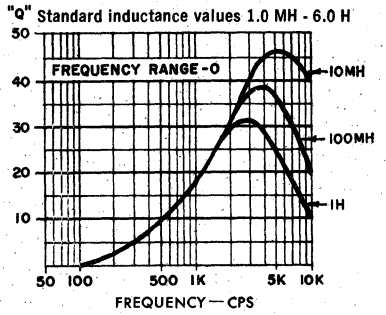
TORWICO ELECTRONICS TOROIDAL INDUCTORS

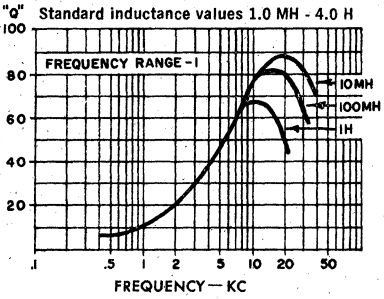
TWC Series

"Q" Standard inductance values 1.0 MH - 6.0 H



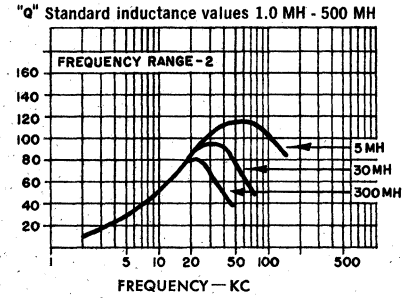
A. DC resistance (nominal) = 280 ohms/henry
B. DC current (ma) for 5% decrease in L = 135
C. Maximum AC current (ma) = 372 $\sqrt{mh}$ / $\sqrt{mh}$

"Q" Standard inductance values 1.0 MH - 4.0 H

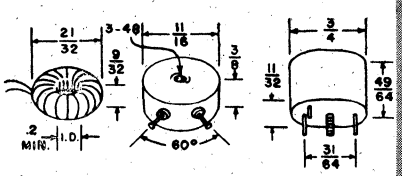


A. DC resistance (nominal) = 520 ohms/henry
B. DC current (ma) 5% decrease in L = 210
C. Maximum AC current (ma) = 424 $\sqrt{mh}$ / $\sqrt{mh}$

"Q" Standard inductance values 1.0 MH - 500 MH

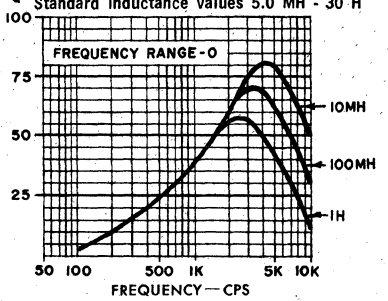


A. DC resistance (nominal) = 1100 ohms/henry
B. DC current (ma) for 5% decrease in L = 340
C. Maximum AC current (ma) = 453 $\sqrt{mh}$ / $\sqrt{mh}$



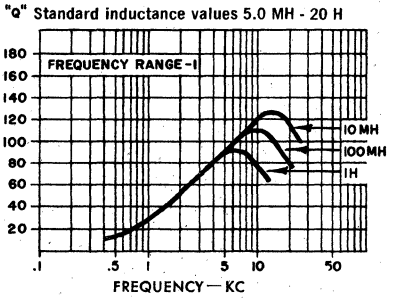
TWS Series

"Q" Standard inductance values 5.0 MH - 30 H



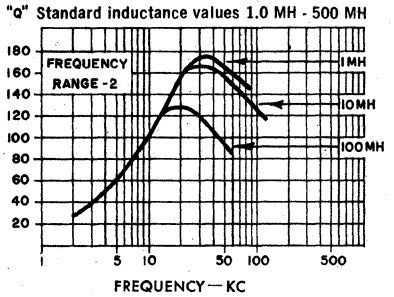
A. DC resistance (nominal) = 135 ohms/henry
B. DC current (ma) for 5% decrease in L = 320
C. Maximum AC current (ma) = 708 $\sqrt{mh}$ / $\sqrt{mh}$

"Q" Standard inductance values 5.0 MH - 20 H

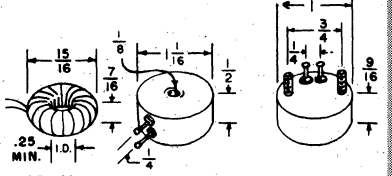


A. DC resistance (nominal) = 255 ohms/henry
B. DC current (ma) for 5% decrease in L = 380
C. Maximum AC current (ma) = 790 $\sqrt{mh}$ / $\sqrt{mh}$

"Q" Standard inductance values 1.0 MH - 500 MH

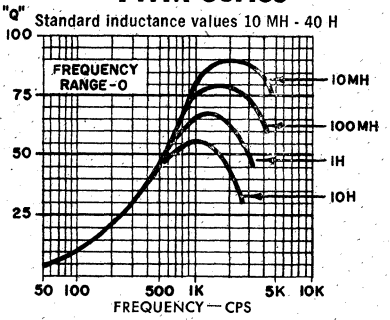


A. DC resistance (nominal) = 630 ohms/henry
B. DC current (ma) for 5% decrease in L = 420
C. Maximum AC current (ma) = 822 $\sqrt{mh}$ / $\sqrt{mh}$



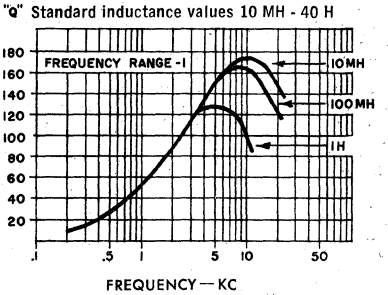
TWM Series

"Q" Standard inductance values 10 MH - 40 H



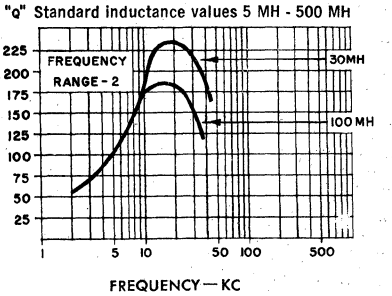
A. DC resistance (nominal) = 60 ohms/henry
B. DC current (ma) for 5% decrease in L = 500
C. Maximum AC current (ma) = 1300 $\sqrt{mh}$ / $\sqrt{mh}$

"Q" Standard inductance values 10 MH - 40 H

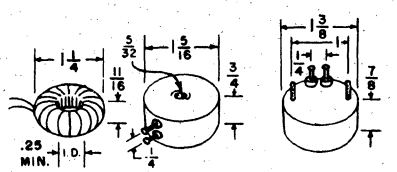


A. DC resistance (nominal) = 115 ohms/henry
B. DC current (ma) for 5% decrease in L = 550
C. Maximum AC current (ma) = 1415 $\sqrt{mh}$ / $\sqrt{mh}$

"Q" Standard inductance values 5 MH - 500 MH



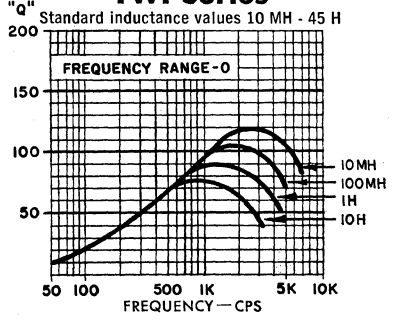
A. DC resistance (nominal) = 250 ohms/henry
B. DC current (ma) for 5% decrease in L = 880
C. Maximum AC current (ma) = 1548 $\sqrt{mh}$ / $\sqrt{mh}$



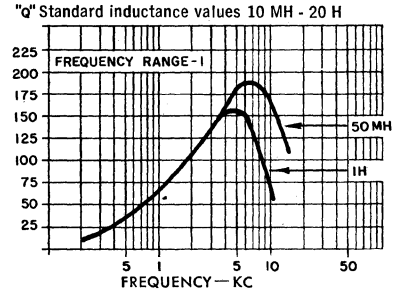
TORWICO ELECTRONICS INC. LAKEWOOD, N.J.

TORWICO ELECTRONICS — TOROIDAL INDUCTORS

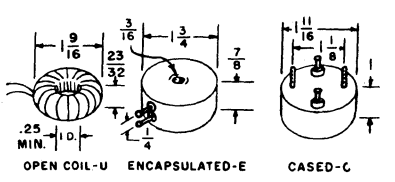
TWI Series



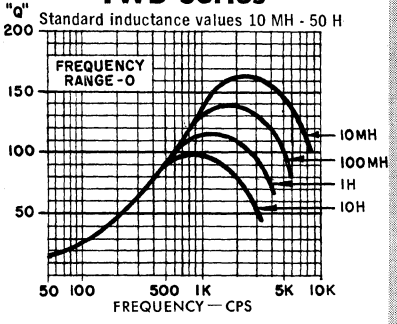
A. DC resistance (nominal) = 45 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{715}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{1500}{\sqrt{mh}}$ $\sqrt{mh}$



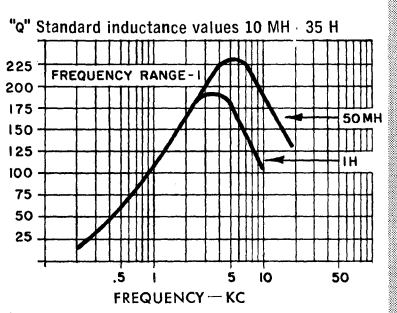
A. DC resistance (nominal) = 94 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{900}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{1644}{\sqrt{mh}}$ $\sqrt{mh}$



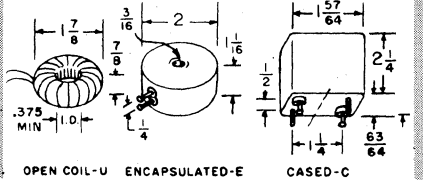
TWD Series



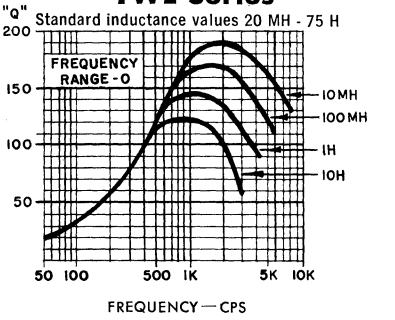
A. DC resistance (nominal) = 27 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1100}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{2000}{\sqrt{mh}}$ $\sqrt{mh}$



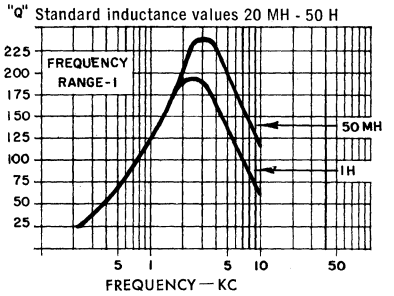
A. DC resistance (nominal) = 54 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1200}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{2264}{\sqrt{mh}}$ $\sqrt{mh}$



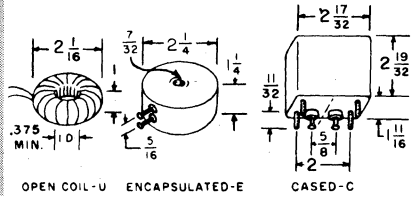
TWL Series



A. DC resistance (nominal) = 21 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1450}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{3100}{\sqrt{mh}}$ $\sqrt{mh}$



A. DC resistance (nominal) = 35 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1700}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{3290}{\sqrt{mh}}$ $\sqrt{mh}$



HOW TO ORDER

Order these standard inductors by their part number.
Example: **TWC100MHOE**

TWC	100MH	0	E
(1)	(2)	(3)	(4)

(1) Size: TWC, TWS, TWM, TWI, TWD, TWL

(2) Inductance:

Use MH—for millihenry designation below 1.0 henry
H—for henries above 1.0 henry

(3) Frequency Range: 0, 1, 2

(4) Packaging: U—Open Coil E—Encapsulated C—Steel Cased

GENERAL SPECIFICATIONS

Tolerance—The tolerance on standard inductors is ± 1%

Test Level—Standard inductors are adjusted at 1.0 volts, 1000 cps

Maximum Voltage—The maximum voltage across standard inductors shall be 115 VRMS

Insulation Resistance—10,000 megohms minimum, except for open coil versions which shall be 1,000 megohms minimum

Standard Torwico Inductors are designed to meet the following MIL-T-27 requirements:
Open Coil—Grade 6, Class S, Life Expectancy X
Military Designation: TF6SX04ZZ

Encapsulated—Grade 5, Class S, Life Expectancy X
Military Designation: TF5SX04ZZ

Steel Cased—Grade 4, Class S, Life Expectancy X
Military Designation: TF4SX04YY

Detailed information on request!

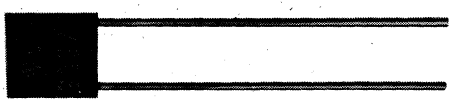
TORWICO ELECTRONICS INC. LAKEWOOD, N.J.

VANGUARD/WYLE

Vanguard's precision inductive components are known for high reliability throughout the aerospace/military and industrial electronics fields. Long-term experience, specialized manufacturing and full environmental test facilities are combined to assure economy, product dependability and delivery to schedule.

FIXED TOROIDAL INDUCTORS

Encapsulated Miniature and Subminiature



For use in printed circuits and modules in tuned circuit, filter and network applications.
Designed to meet MIL-C-15305, Grade 1, Class B (−55°C to +125°C).
Moisture and shock resistant, immersion proof.
Powdered iron toroidal core, low external magnetic field.
Developed for applications requiring high reliability and stability.
Standard leads are tinned copper wire. Also available with weldable gold-plated Dumet leads or weldable nickel.

RADIAL LEAD TOROIDS

SERIES 91
Inductance range: 0.01 μh to 1.0 μh
Frequency range: 25 MHz to 150 MHz
Inductance TC: +150 ppm/°C nominal
Dimensions: 0.20 (w) x 0.10 (thick) x 0.20 (h)

SERIES 92
Inductance range: 0.10 μh to 10 μh
Frequency range: 1 MHz to 50 MHz
Inductance TC: +20 ppm/°C nominal
Dimensions: 0.20 (w) x 0.10 (thick) x 0.20 (h)

SERIES 93
Inductance range: 10 μh to 1000 μh
Frequency range: 50 kHz to 50 MHz
Inductance TC: to 270 μh, +25 ppm/°C nominal; 330-1000 μh, +125 ppm/°C nominal
Dimensions: 0.27 (w) x 0.15 (thick) x 0.27 (h)

SERIES 94
Inductance range: 100μh to 10,000 μh
Frequency range: 50 kHz to 50 MHz
Inductance TC: to 1000 μh, +25 ppm/°C nominal; 1200-10,000 μh, +125 ppm/°C nominal
Dimensions: 0.375 (w) x 0.187 (thick) x 0.375 (h)

SERIES 95
Inductance range: 10 MH to 100 MH
Frequency range: 50 kHz to 5 MHz
Inductance TC: +125 ppm/°C nominal
Dimensions: 0.500 (w) x 0.300 (thick) x 0.562 (h)
Other series are available in high inductance ranges as well as high and lower frequency ranges.

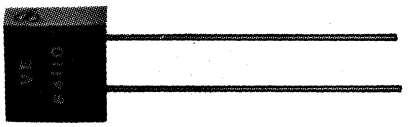
SIDE LEAD TOROIDS

Same specifications as for toroidal inductors above.
Add suffix "S" to series number.
For applications where axial lead locations are more convenient.

NEW! VARIABLE TOROIDAL INDUCTORS

VAROIDS

(Adjustable) Encapsulated Miniature Toroids



Nominal inductance values in steps of 5% with adjustability from nominal value of ±5%.
Permit use of fixed capacitors for smaller printed circuit assemblies.
Inductance values from 0.1 to 1000 microhenries.

VARIABLE INDUCTORS

- Moisture and shock resistant, immersion proof
- Designed to meet MIL-C-15305, Grade 1, Class B (−55°C to +125°C)
- Inductance variation: ±20% or more from nominal

SEALED CORE INDUCTORS

Encapsulated

- Tuning core sealed off
- Torque device: preassembled compression spring that allows manual adjustment while preventing unintentional detuning
- Inductance TC: −50 to +100 ppm/°C

Series 3 (Miniature)
Inductance range: 0.1 μh to 15μh
Dimensions: 0.34 in. (dia) x 0.69 in. (max.)

Series 1
Inductance range: 0.1 μh to 22 μh
Dimensions: 0.40 in. (dia) x 0.94 in. (max.)

Series 2
Inductance range: 33 μh to 10 mh
Dimensions: 0.53 in. (dia) x 1.06 in. (max.)

Series 1BF (Bifilar Tunable RF Transformer)
Inductance range: 0.1 μh to 15 μh
Dimensions: 0.40 in. (dia) x 0.94 in. (max.)

OPEN CORE INDUCTORS

Encapsulated Miniature & Subminiature

- Applications: printed circuits and modules
- Low external field (magnetically shielded types)
- Tuning: unique torque device allows smooth, manual inductance adjustment while preventing unintentional detuning

Vanguard Electronics
Division of Wyle Laboratories / 930 West Hyde Park Blvd. / Inglewood, Calif. 90302 / (213) 678-7161 / TWX: 910 328-6126

VANGUARD/WYLE

Vanguard's precision inductive components are known for high reliability throughout the aerospace/military and industrial electronics fields. Long-term experience, specialized manufacturing and full environmental test facilities are combined to assure economy, product dependability and delivery to schedule.

VARIABLE INDUCTORS - CONT.

Series 51, 61 (Magnetically Shielded)
Inductance range: 0.1 μh to 1000 μh
Inductance TC: +30 ppm/°C nominal
Coupling coefficient between adjacent inductors: 1% max.
Dimensions
Series 51: 3/8 in. (dia) x 3/8 in.
Series 61: 3/8 in. (dia) x 1/2 in.

Series 71 (Magnetically & Electrostatically Shielded)
Magnetically and electrostatically shielded version of Series 61. Same specifications and electrical parameters.
Dimensions: 0.40 in. (dia) x 0.50 in.

Series 52 (Magnetically Shielded)
Inductance range: 1.0 μh to 22,000 μh
Inductance TC: to 470 μh, 25 ppm/°C nominal; over 470 μh, 75 ppm/°C nominal
Coupling coefficient between adjacent inductors: 1% max.
Dimensions: 1/2 in. (dia) x 1/2 in.

Series 53, 53A, 63 (Unshielded)
Inductance range: 0.1 μh to 10 μh
Inductance TC: +30 ppm/°C nominal
Dimensions
Series 53: 1/4 in. (dia) x 1/4 in.
Series 53A: 1/4 in. (dia) x 5/16 in.
Series 63: 1/4 in. (dia) x 3/8 in.

Series 54, 54A, 64 (Unshielded)
Inductance range: 15 μh to 1000 μh
Inductance TC: +75 ppm/°C nominal
Dimensions
Series 54, 54A: 5/16 in. (dia) x 5/16 in.
Series 64: 5/16 in. (dia) x 7/16 in.

RF CHOKES

Encapsulated

- Designed to meet MIL-C-15305, Grade 1, Class B (−55°C to +125°C)
- Moisture and shock resistant, immersion proof

Series 78/278: Magnetically Shielded
(Series 278 is MS 90537 equivalent)
Inductance range: 0.10 μh to 100,000 μh
Dimensions (max.)
Series 78: 0.190 in. (dia) x 0.415 in.
Series 278: 0.167 in. (dia) x 0.415 in.

Series SMS (MS 18130)
Inductance range: 0.15 μh to 33.0 μh
Dimensions (max.): 0.166 in. (dia) x 0.385 in.

Series MMS (MS 75008)
Inductance range: 0.15 μh to 27.0 μh
Dimensions (max.): 0.218 in. (dia) x 0.469 in.

Series LMS (MS 91189)
Inductance range: 1.2 μh to 120.0 μh
Dimensions (max.): 0.312 in. (dia) x 1.0 in.

Series 101, 102, 103
Inductance range and dimensions (max.)
Series 101:
0.10 μh to 15 μh; 3/16 in. (dia) x 15/32 in.
Series 102:
22 μh to 120 μh; 5/16 in. (dia) x 15/16 in.
Series 103:
150 μh to 10,000 μh; 9/16 in. (dia) x 1-1/16 in.

Series S, M, L
Inductance range and dimensions (max.)
Series S:
0.10 μh to 100 μh; 0.188 in. (dia) x 0.44 in.
Series M:
1.0 μh to 1000 μh; 0.25 in. (dia) x 0.60 in.
Series L:
10 μh to 10,000 μh; 0.31 in. (dia) x 0.90 in.

FILTERS

High Pass, Low Pass, Band Pass and Band Reject

Custom Filters

Designed to meet your specifications within the following parameters:
20 Hz to 100 MHz
Impedances up to 40 Kilohms
Controlled amplitude and phase characteristics
Temperature range: −55°C to +85°C operating; −65°C to + 125°C in storage
Designed to meet the requirements of MIL-F-18327

Standard Filters F-11 Series

Maximally flat amplitude response
Frequency range: 20 kHz to 100 MHz
Impedance: 50 ohms
Bandwidth (band pass only): 5% of center frequency min., 100% max.
Two to five sections in miniature sealed cases.
Printed circuit mounting.

TUNED CIRCUITS

Single & Double, Shielded
- Three Series: 10, 20, 30
- Frequency range: 50 kHz to 100 MHz
- Inductance range: 0.1 μh to 22,000 μh
- Dimensions: 3/4 in. x 3/4 in. x 2 in. (h); also available in smaller sizes

NETWORKS, FILTERS, DELAY LINES AND RLC CIRCUITS

Vanguard resistive-capacitive-inductive encapsulated networks eliminate the solder joints that occur when individual components are incorporated in a package, as well as greatly reducing the packaging density of finished equipment.

These modular units are produced in various combinations —RLC, RC, RL, LC—and in various configurations. Custom engineered to meet particular circuit requirements, also available in standard packages, eliminating engineering cost on prototype quantities.

All units are completely encapsulated in MIL-grade epoxy resin. The circuits are designed to meet or exceed existing environmental testing requirements. Available with tinned copper or gold-plated Dumet leads.

IMMEDIATE DELIVERY ON ALL STOCK ITEMS

ELECTRIC WAVE
FILTERS

Almost forty years of experience in the design and production of electric wave filters have resulted in UTC being a first source for top quality, reliability and advanced engineering . . . for both special and stock applications. Present designs incorporate a wide variety of core structures, winding methods, and capacitors to provide maximum performance. stability and reliability. Military (to MIL-F-18327C) and industrial types are available both metal cased and molded. Range of frequencies is from DC to 30 MHz.

HIGH Q
INDUCTORS

Almost four decades of specialization in high Q coils are reflected in the permalloy dust toroid, ferrite, and laminated structures produced by UTC today. The foremost engineering staff of its type is supported by the most modern, fully equipped materials and test laboratories. In addition, extensive life testing and rigid quality control standards create the top quality and highly reliable components associated with the UTC name. Metal cased and molded units are engineered to specifications or available from stock. Inductors ranging in applications from DC to 30 MHz, both military (to MIL-T-27C) and commercial types, are available, offering maximum Q for minimum size.

TOROIDS • TAPPED TOROIDS • LOW FREQUENCY • L DECADES • VARIBALE • TAPPED VARIABLE • VERNIER VARIABLE • MINIATURE

POWER
INDUCTORS

UTC's capabilities in range run from fractions of micro-henries to many thousands of henries, limited only by the physical size of the unit. Almost forty years of specialization in the design and production of iron core components have resulted in UTC being a first source of supply for difficult units. Military (to MIL-T-27C) and commercial types are available in all standard UTC case configurations, plus units to your specifications. Metal cased, molded, encapsulated, open, and potted units of the highest quality and reliability are available. The largest engineering staff of its kind is supported by the most modern, fully equipped materials and test laboratories. In addition, extensive life testing and rigid quality control measures assure the advanced designing and high reliability associated with UTC products.

These hermetically sealed coils are used for high Q's up to 200 kcps. Temperature stability of the inductance and dependence of Q from frequency is shown here.

Constructed to meet MIL-T-27B-TF4RX20YY

All units have gray finish and are stamped with schematics legibly marked.

These hermetically sealed high Q inductors have high permeability steel enclosure for magnetic shielding.

Constructed to meet MIL-T-27B-TF4RX20YY. Inductances are shown with no DC mA in coils. Inductance is practically unchanged at the frequency range shown here.

Units are legibly marked with schematics and come with gray finish.

Typical Q curves are shown here.

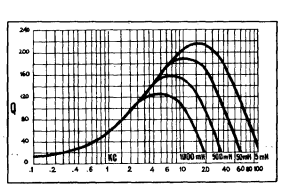
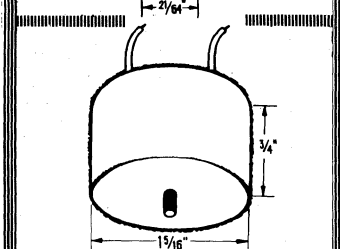
These inductors have characteristics which permit high Q, power level, and stability with a reasonable size and weight.

Available with a 4-40 threaded rod of ¼ long for easy and fast mounting and two 12" long #24 teflon insulated leads.





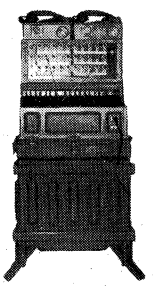
TELEPHONE EQUIPMENT

FOR MILITARY and COMMERCIAL APPLICATIONS

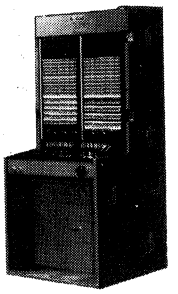
SWITCHBOARDS • CENTRAL OFFICE EQUIPMENT • HANDSETS • COMPONENTS • EARPHONE & MICROPHONE ELEMENTS • ACCESSORIES

TELEPHONE SWITCHBOARDS, CENTRAL OFFICE EQUIPMENT AND HANDSETS

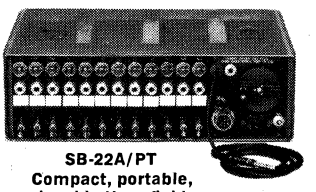
We are prime producers of manual and dial military switchboards, central office equipment and versatile handsets for many applications. Telephone facilities from 12 to 1,000 lines can be provided, for up to 160 manual or dial trunks, with our various equipments. Adaptations of standard equipment can be made to specifications.



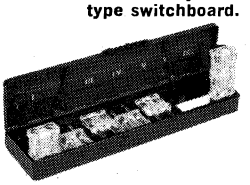
SB-86/P
Portable, local battery, field type manual switchboard.



AN/GTA-14V
Complete, transportable manual telephone central office.



SB-22A/PT
Compact, portable, local battery field type switchboard.

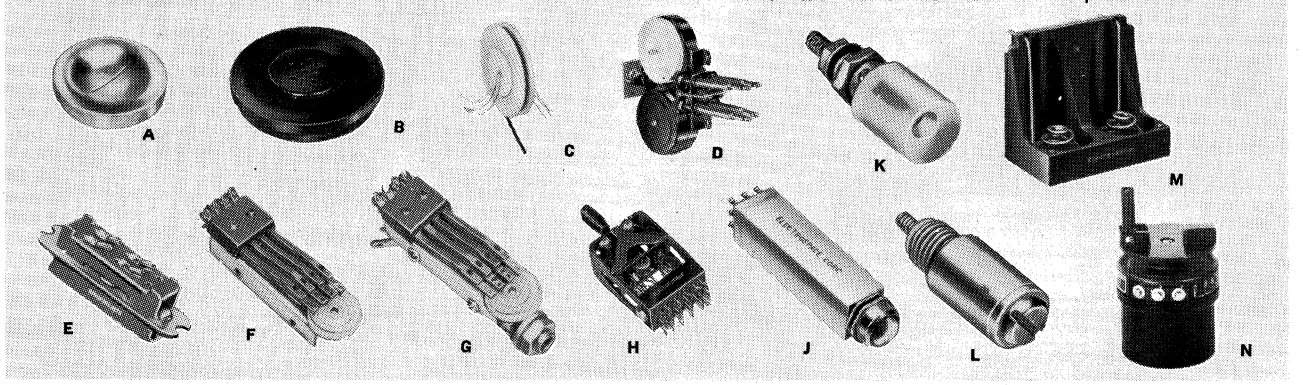


SB-993
Manual telephone switchboard for stacking conference calls.

H-33F/PT
Waterproof handset supplied with U-161/U connector.

TYPICAL TELEPHONE COMPONENTS

Widest Choice Available of Components, Elements and Accessories To Meet All Requirements.



(A) B3001P-1 MICROPHONE ELEMENT. Carbon capsule. Impedance: 40 ohms nominal. Frequency Response: 300-4000 Hz. Temperature Range: −40°F. to +150°F. Adaptable to standard WECO handsets. Made to MIL-M-11095A.

(B) C3001P-10 EARPHONE ELEMENT. Magnetic type. Impedance: 300 ohms nominal. Frequency Response: 300-4000 Hz. Temperature Range: −40°F. to +150°F. Reliable mechanical and acoustical stability. Adaptable to standard WECO handsets. Made to MIL-H-11134D.

(C) D3014-362 REEL & CABLE ASSEMBLY, RETRACTABLE. Accepts various cord types and sizes. Extends cord up to 4 ft. Provides neat, convenient cord storage. Readily applicable for use in telecommunication systems, test equipment, and others.

(D) D3014-318 TELEPHONE SWITCHBOARD MODULE. Shows typical application of Reel & Cable Assembly (−362) for field or stationary switchboards.

(E) B3001-18 BAR SWITCH. Double pole. 1 amp. 30V D.C. contact rating. Instantaneous actuation with nominal pressure at any point on bar. Operating life tested in excess of 500,000 cycles.

(F) C3014-105 THUMBWHEEL SWITCH. Flat, horizontal construction saves valuable panel space. One-finger operation. Permits multi-position, multi-circuit control. Heavy duty contacts mounted on leaf springs.

(G) D3014-76 THUMBWHEEL SWITCH & JACK ASSEMBLY. Shows typical application of switch (−105) with switchboard plug-in jack.

(H) D3014-320 LEVER SWITCH. Exceptionally rugged construction provides greatest operation dependability. Positive detent action. Return spring design reduces contact bounce and chatter. Three-position, multi-circuit contacts available.

(J) C3014-77 SIGNAL INDICATING RELAY. Requires only ¾" dia. panel space. Gives positive indication of relay operation. Combines signal-relay operation in one package. Operable from either of two individual coils.

(K) D3014-38 HOLE-IN-HEAD BINDING POST. Saves space. Provides easy, convenient, positive connection. Wire inserted at front of post instead of side. "PUSH-INSERT-RELEASE" — wire positively locked in place.

(L) B3014-39 CIRCUIT PROTECTOR. Reusable protective device for communication systems. Shorts the circuit to be protected against high voltage surges. Factory adjustable to break-down voltage required.

(M) B3014-54 BATTERY BLOCK. Provides convenient storage and method for connecting two "D" size cells into circuit.

(N) G-42A/PT HAND RINGING GENERATOR. Used for ringing field telephones. Centrifugally operated switch operates at a crank speed of about 140 rpm. The generator delivers 100 volts at 20 cycles at a crank speed of 200 rpm.

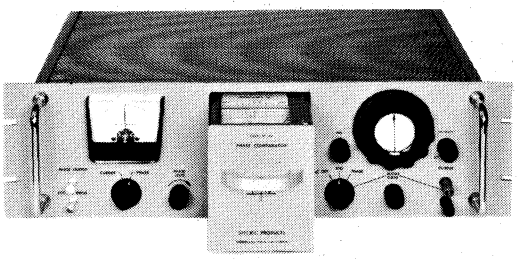
STANDARD TIME & FREQUENCY RECEIVERS

TIME & FREQUENCY STANDARDIZATION TO THE NATIONAL BUREAU OF STANDARDS

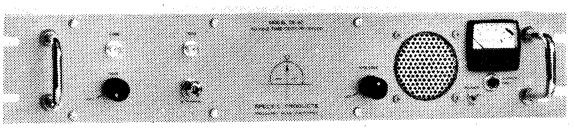


MODEL SR-60
60 KC PHASE COMPARATOR RECEIVER

Calibrates any local standard up to 5 - 10^{10} within a short period.

The Model SR-60 is the first low cost VLF Phase Comparison Receiver designed to permit phase comparison measurements between a local oscillator and the National Bureau of Standards transmitted 60 Kc/s from WWVB, Fort Collins, Colorado. The receiver is a straight-forward Tuned Radio Frequency receiver and can be used in any location in the United States with highly satisfactory results. Can be operated by any technician.

PRICE: $890.00



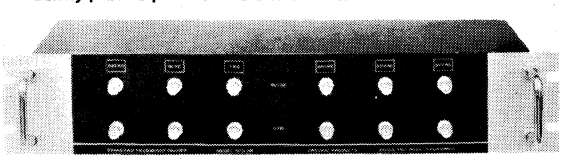
MODEL CS-60
60 KHZ TIME CODE RECEIVER

HIGH POWER • LOW CURRENT

A new, low current drain time code receiver, so sensitive that it will receive NBS signals from 2,000 or more miles away. Original and unique circuitry developed at the Seismological Laboratory in Pasadena, California. The unit will receive Radio Station WWVB signals, considered to be the most accurate time signals available. Intermediate frequency is 2kHz. It is designed for long term, remote, unattended operation as it requires power of only + 12 vdc ± 1 vdc at 1.5 ma without audio (35 ma with audio).

PRICE: MODEL CS-60A $580.00

Battery powered portable field unit available.

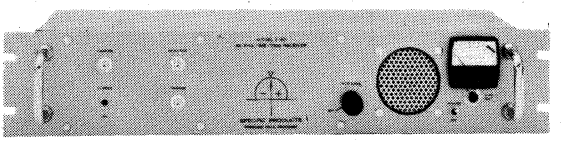


MODEL SFD-6R
STANDARD FREQUENCY DISTRIBUTION SYSTEM

- **COMPLETE STATION ISOLATION**
- **POWERED FROM INPUT LINE**
- **SOLID STATE**

The input is 100 kHz, and 18 vdc on distribution line from Model DAP-100 Distribution Amplifier. The outputs are 100, 10 and 1 kHz sine and square waves all available simultaneously. The modular construction allows for easy additions, deletions and inspection. Available in a rack—bench cabinet.

PRICE: Depends on modules selected. ($90.00 each)



MODEL T-60 60 KHZ TIME CODE RECEIVER

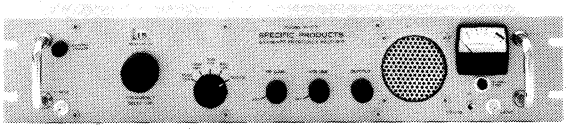
- **Round The Clock Binary Time Code Broadcasts from WWVB • Most Accurate Time Signal Available • Can Be Recorded Continuously**

Radio Station WWVB is broadcasting complete time information using a level shift carrier time code (10 db level changes). This code, which is binary coded decimal (BCD) is broadcast continuously and is synchronized with the 60 khz carrier signal. The Schmitt BCD output can be completely automated for continuous monitoring of extremely accurate real time and time interval information.

PRICE: MODEL T-60A $480.00

3½" x 19" rack panel with 5" depth behind panel. Includes 117v, 50 to 400 cps supply, or an external 12 to 16 volts may be used.

Battery powered portable field unit available.



MODEL WVTR WWV RECEIVERS MARK II
All Silicon Transistor

COMPLETE MODULAR CONSTRUCTION • CERAMIC FILTERS DOUBLE SHIFT SUPERHETERODYNE • 1 $_{u}$V SENSITIVITY

Crystal controlled front end receivers for 2.5, 5, 10, 15, 20 and 25 MHz frequencies. 2nd I.F. frequency for high selectivity. Has built-in filter for ticks and tones. Receiver has carrier level "S" meter, speaker and output jack on front panel. Audio output available on rear.

PRICE: $590.00 with AC Power Supply

Battery powered portable field unit available.

MODEL SR-7H STANDARD FREQUENCY RECEIVER

The Model SR-7 is a small crystal controlled front end receiver covering 2.5, 5, 10, 15, 20 and 25 MHz, with double conversion. 2 MHz first I.F. and 175 kHz second I.F. The receiver has a carrier level "S" meter, speaker and output jack on the front panel.

MODEL SR7-R Rack Model: $385.00; MODEL SR7-H Bench Model: $385.00

MODEL SR7-F — offers filtered outputs. Any two tones 1200, 1000, 600 or 440 may be selected by front panel switches. Rack mount: **$475.00**

MODEL AR-4 AUTOMATIC WWV RECEIVER

Automatic selection of strongest signal of any WWV frequency — or manual selection. Receives 5, 10, 15 and 20 MHz (other frequencies available). Unattended operation where around the clock signals are required without manual switching.

PRICE: MODEL AR-4 $1785.00

RACK MOUNT: 3½" x 19" x 7"

Send for complete specifications. Prices and specifications subject to change without notice. F.O.B. Woodland Hills, Calif. Net 30 Days.

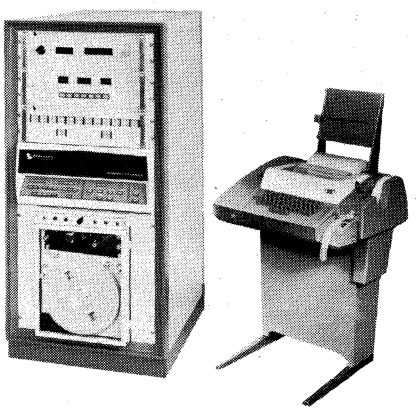
SERIES 100M

The Series 100M Datalogger accepts up to 100 channels of analog signals, digitizes the information, and records the data on computer compatible 7 or 9 track magnetic tape at 200, 556, or 800 BPI. The system is capable of recording up to 1200 characters/second (asynchronous) or up to 3,000 characters/second (synchronous).

Basic System Price: $13,200.00

The Series 10M Datalogger uses a combined scanner and A/D Converter to accept up to 10 channels of analog data for recording on computer-compatible 7 or 9 track magnetic tape. The same speeds and bit densities are available as for the 100M.

Basic System Price: $11,000.00

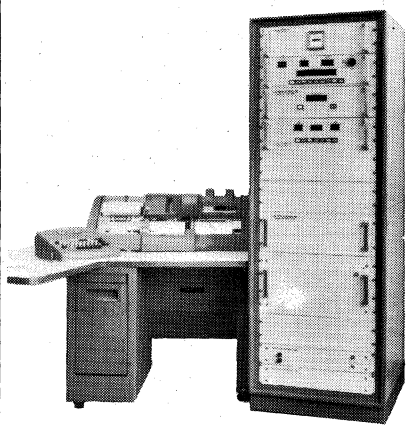


SERIES 100C

The Series 100C Datalogger is controlled by a computer with 4,096 words of core memory. Now discisions can be made for each channel instantaneously as data is being acquired. On line computations can be performed with results read out in engineering units.

Basic System Price: $22,500.00

Up to three extra 4,096 word memory modules are available for expandability allowing a wide range of applications. A.D.D.S. standard output devices, mag tape, paper tape printers, or card punch may be used with any of our dataloggers.



SERIES 100R

The Series 100R Datalogger is designed specifically for resistance measurement. Using A.D.D.S. unique "Automatic Bridge" principle, it automatically scans and accurately measure resistors in batches of up to 100.

Basic System Price: $14,000.00
(less card punch)

The Model 100 XR resistance tester accurately records readings as a percentage deviation from a standard value. Voltage deviation will be a positive or negative function of the ratio of the measured resistance to the standard resistance.

Basic System Price: $15,500.00
(less card punch)

Many options are available to complement A.D.D.S. product line. Scanners up to 1000 channel capacity and A/D Conveters are available in either binary or BCD format for full computer compatibility. Pin board programs are available for the A/D Converter to allow datalogging of signals from 10M volt full scale to 10 volt full scale. An instrumentation amplifier used when guarded measurements are required includes manual and relay switching of 7 gains — 1 to 1,000.

A/D CONVERTERS

Series 013 Converters operate at incremental tape recorder speeds. Operated manually or controlled by peripheral equipment, they include the features most sought after by designers of data acquisition systems and automatic checkout equipment.

SPECIFICATIONS

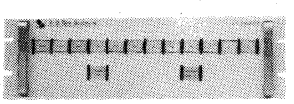
Range: 0 to ±10 volts
Input Impedance: 4K ohms
Conversion Time: 10 microseconds/bit including polarity decision

ACCESSORIES

Buffer Amplifier — extends range of converter and increases input impedance to 10^5 megohms.
Price: $110.00

Sample & Hold Circuit — eliminates ambiguous readings when sampling rapidly changing inputs.
Price: $200.00

Autoranger — used with converter to allow switching of 7 gains from 1 to 1,000.
Price: $1,650.00



013-112 11-bit binary plus sign

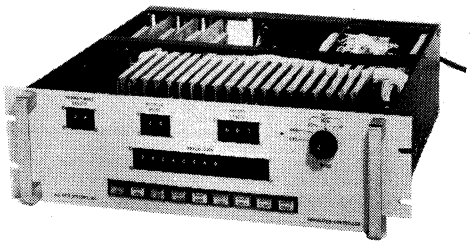
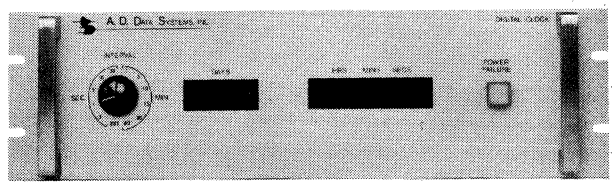
DIGITAL CONTROL COUPLERS



The Series 016 Digital Control Couplers are extremely flexible couplers and system controllers designed for use as an interface between digital outputs and recording media. The control section of the instrument provides for internal and external rate control, determination of word and record length, recycle point, and up to 12 characters of manual data. Series 016 couplers can operate a magnetic tape recorder, paper tape punch or card punch simultaneously by additions of a plug in driver card.

Price: $2,750.00

DIGITAL CLOCKS

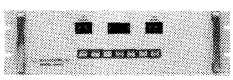


Series 015 Digital Clocks may be used with any standard A.D.D.S. instrument or independently for time display and control functions. Featuring I.C. design, the clocks are resettable, providing elapsed time indication, both visually and electrically. Nine decades of time data in BCD 1-2-4-8 code are available for recording.

Model 015-005 — Measures time in 23 hours, 59 minutes and 59 seconds. **Price: $1,320.00**

Model 015-010 — Measures time in 365 days, 23 hours, 59 minutes and 59 seconds. **Price: $1,650.00**

REED RELAY SCANNERS



Using a unique modular design, the switching sections of our scanners are built up from individual modules, providing a wide range of channel capacities and wiring options as well as ease of expansion.

MODEL 126 CONTROL

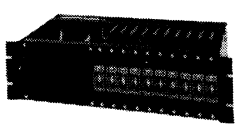
100 channel capacity for local or remote operation. Uses 2, 3, or 4 wire channel input cards (see listing at right).

Model 126
less modules $1,375.00

MODEL 127 CONTROL

Model 127 control may be used in conjunction with No. 162 module chassis to expand capacity to 1,000 channels.

Model 127
price less modules..$1,595.00



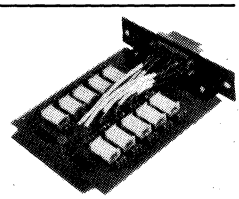
Reed Relay Module Chassis

These chassis are rack mountable and capable of holding 10 reed relay modules. Used with scanner control units, each chassis has up to 100 input channels pre-wired to connectors at the rear. Mating connectors are supplied.

Price less modules.....$250.00

REED RELAY MODULES

Reed Modules plug into the scanner unit or the module chassis. Two types of reed relays are available: Standard (for extremely low level signals). List shows configuration now available.



Used with 126 and 127 controls and Model 162 Chassis:

Module 485 — 10 2 pole switches. Standard Reed.....**Price: $ 65.00**

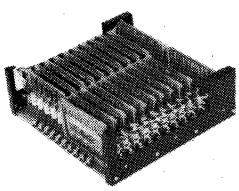
Module 483 — 10 3 pole switches. Standard Reed.....**Price: $ 95.00**

Module 484 — 10 4 pole switches. Standard Reed.....**Price: $125.00**

Module 476 — 10 3 pole switches (2 wires plus shield). Low Thermal.....**Price: $185.00**

Module 493 — Program Board for programming of special conditioning equipment on individual channels .....**Price: $ 95.00**

REED RELAY MATRICES



Reed Relay Matrices are high speed signal routing devices which by latching the appropriate crosspoints, will connect any or all of the inputs to any or all of the outputs. A fully equipped matrix with 20 crosspoint cards, yields a ten by ten array containing one hundred crosspoints. Ten signal paths are designated X0 through X9 and ten coordinate signal paths are designated Y0 through Y9. A unique "memory" is provided so that when a point is latched by a signal pulse, it remains latched until another pulse is issued. A plus 5 volt logic level can be brought out as a selected crosspoint indication. Two basic chassis are available depending on your requirement. Two coaxial connectors used in parallel allow multiplying matrices for large arrays.

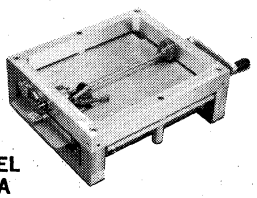
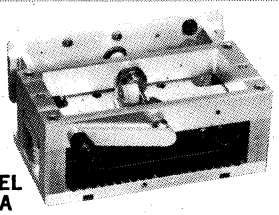
AMP INTRODUCES A COMPLETE FAMILY OF CARD READERS

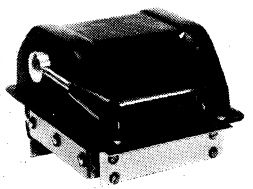
for process control, machine control, test programming, computer input, production control, status indication and access limitation



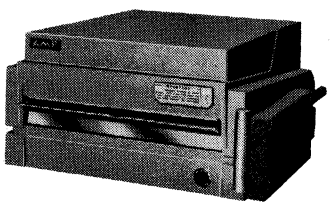
MODEL 2981A
- Industrial full IBM card reader
- Front panel space 3¾" x 8⅝"
- Gold plated contacts rated 0.25 amp
- Available bussed by column, by split column and by row
- 160 six bit word capability and complete alphanumeric coding with 160 diodes instead of 960



MODEL 2900A
- Low cost industrial Model
- IBM format up to 264 switches
- Gold plated double wiping contacts, contact rating 0.25 amp
- Supplied motor operated, manual model available
- Available bussed by row, by one-half column and full column



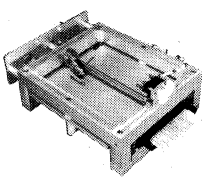
MODEL 2924
- Isolated switch industrial programmer
- Full IBM reader, 2 amp DC
- Remote switch operation
- Precious metal clad contacts
- Contacts tested to 1,000,000 cycles



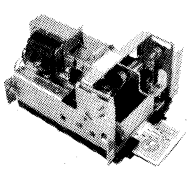
MODEL 1042 DESK
- Double wiping action
- IBM format to 960 switches
- Available in matrix or isolated outputs
- Tested to 100,000 cycles
- Contact rating 0.25 amp DC

OTHER MODELS AVAILABLE

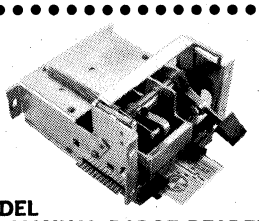
AMP has the largest line of card readers in the world. If you have special requirements, write for more information.



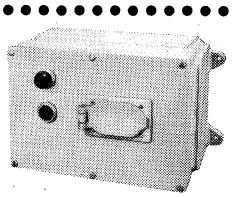
MODEL 2980A
- Motor operated full IBM card reader
- Semi-automatic card insertion and extraction
- Available bussed by column, by split column and by row
- Gold plated double wiping contacts
- Behind panel mounting



MODEL 360 SOLENOID BADGE READER
- Card operated reader similar to time clock or continuous duty
- Uses 15, 20, or 22 column badge
- Design life 500,000 cycles
- 115 Volt AC and 28 Volt DC solenoids available
- Maximum 264 switches



MODEL 361 MANUAL BADGE READER
- One handed automatic operation
- Uses 15, 20 or 22 column badge card
- Design life 1,000,000 cycles
- Cross matrix or individual outputs
- Maximum of 264 switches
- Nominal card thickness up to 0.030", maximum 0.040"



ALL-WEATHER READER
- Designed for outdoor or industrial environment
- Bifurcated contacts
- Up to 12 x 22 contacts, 264 cross points
- Indicator lamps and release switch available
- Air purge available

LET THIS DATA CARD . . . . **be your control board . . . it can switch 960 circuits simultaneously**

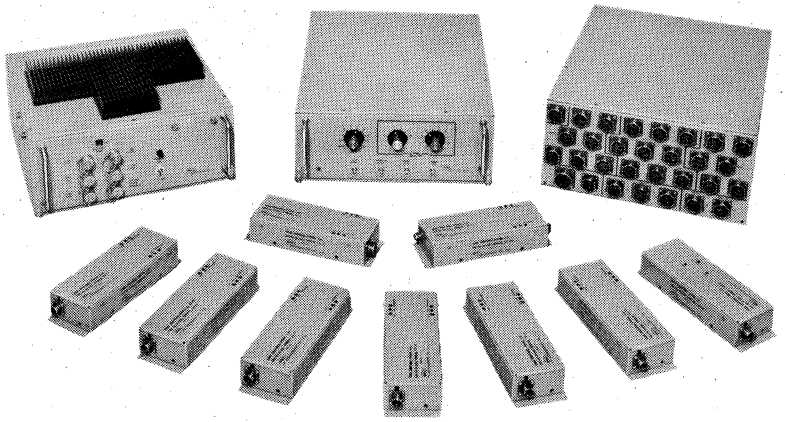
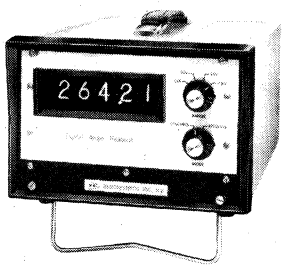
Analog to Digital Converters



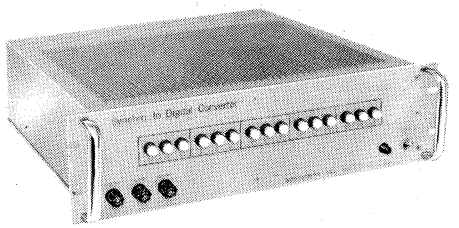
Multiplexed Analog to Digital PCM System

Astrosystems solid state Multiplexed PCM System is a 50 channel data acquisition system which converts synchro and linear AC inputs to a serial PCM output for data recording and/or telemetering. The basic unit provides a resolution and accuracy of 15 binary bits (.003%). Signal conditioning modules are provided for all inputs, with typical characteristics of 13 megohms input impedance and 80 db common mode rejection. The basic system includes power supplies, signal conditioners, multiplexer, converter and PCM code conversion. Write for Data File No. 109.

Digital Angle Readout



Astrosystems Digital Angle Readout is a simple, reliable and accurate device for converting synchro and resolver input angles to a direct in-line decimal display and electrical digital format. Guaranteed accuracy is 0.01° **peak** error from all causes. The standard model accepts either synchro or resolver inputs at 11.8, 26 or 90 volts line-to-line. Both the visual and electrical outputs continuously track the synchro input. Write for Data File No. 110.



Synchro to Digital Converters

Astrosystems high accuracy Synchro to Digital Converters convert angle inputs from synchros to an equivalent binary or BCD output. Resolutions from 12 to 18 binary bits are available. Accuracy is ±1 bit total peak error including digitizing errors. Converter operation is ratiometric using toroidal transformers which make the units insensitive to transformation ratio and phase shift variations as well as harmonic distortion and noise. Write for Data File No. 101.

Mutiplexed Synchro to Digital Converter

Multiplexed Synchro to Digital Converters feature a high accuracy ultra-reliable method of converting multiple synchro and resolver inputs to parallel or serial digital outputs. The converters are completely solid state and have a basic accuracy of 16 binary bits (20 seconds of arc). The units are insensitive to wide variations in input voltage and frequency. Write for Data File No. 109.

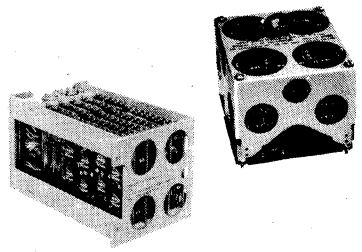
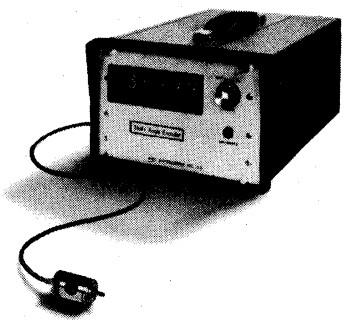
Digital to Analog Converters



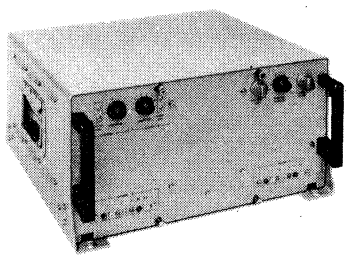
Airborne Digital to Analog Converters

Airborne solid state Digital to Analog Converters feature high reliability, high density packaging and low power consumption. Units are available to provide synchro, resolver or AC output signals to a resolution and accuracy of 16 binary bits. A full range of standard card and circuit designs are available to enable quick delivery of special units. Converters meet the requirements of MIL-E-5400 for airborne equipment. Write for Data File No. 103.

Shaft Angle Encoder



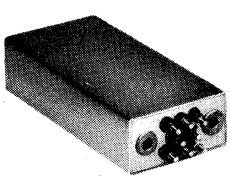
This unique solid state Shaft Angle Encoder is a completely self contained system for transforming shaft rotations into a direct decimal visual display and a digital output capable of feeding computers, printers and various types of off-line equipment. A magnetic transducer is used for long life and high reliability. Angle measurement is absolute, not incremental, to high resolution and accuracy. Data File No. 115.



Multichannel Digital to Analog Converter

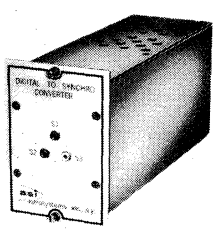
Multichannel solid state Digital to Analog Converters provide AC and/or DC voltage output signals proportional to a digital input. Units feature 15 bits resolution and accuracy. The DC as well as the AC outputs are floating and completely isolated from each other as well as from the digital inputs. Standard interfaces are available to match most computer and peripheral equipment interfaces. Write for Data File No. 102.

Synchro to DC Converters

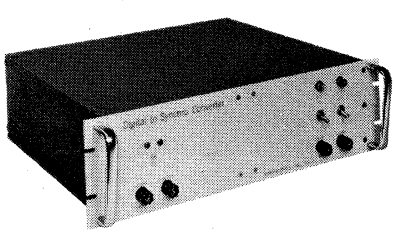


Synchro to DC Converters accept as an input 3-wire synchro or 4-wire resolver signals and provide a high accuracy DC output directly proportional to the input angle. The units are ideal for multiplexed systems which already have a DC to digital capability. A wide range of units are available covering the frequency range from 60Hz to 10K Hz at all standard synchro and resolver voltages. Write for Data File No. 116.

Low Cost Commercial Units



This solid state integrated circuit Digital to Synchro Converter is designed particularly for simulation and industrial control applications. Input is a 10 bit binary signal and output is a 3-wire 11.8 volt 400 Hz synchro signal capable of driving high power torque receivers. Logic levels are DTL or TTL compatible. Data File No. 112.



Digital to Synchro Converters

Digital to Synchro Converters accept and register digital angles in binary or BCD code and convert these inputs to an equivalent synchro or resolver output. Standard models are available to operate as synchro transmitters (CX) or synchro control transformers (CT). Accuracy and resolution to 18 bits is obtained through the use of tapped high precision toroidal transformers to derive the required output voltages. Write for Data File No. 102.

ASTRODATA

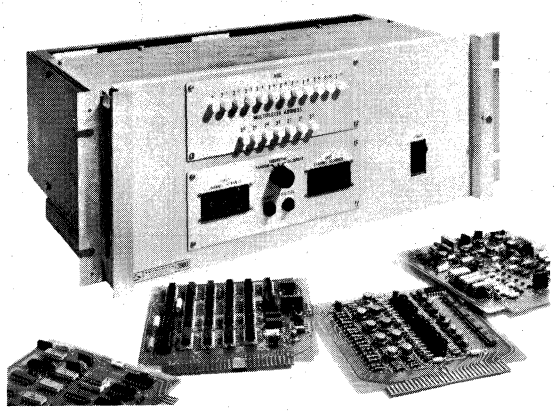
THE ASTROVERTER—
A New Concept in Data System Design

WHAT IS THE ASTROVERTER

The Astroverter is an entirely new concept in data system packaging.

It consists of a 7-inch high rack adapter, a built-in power supply, sixteen card slots and a whole family of interchangeable plug-in cards including:

- **High Speed Multiplexers**
- **High Speed Analog to Digital Converters**
- **Digital to Analog Converters**
- **Sample and Hold Amplifiers**
- **High Level Differential Buffer Amplifiers**



With these plug-in components virtually any type of data acquisition system can be designed.

Need an ADC? It takes only two cards. Add sample and hold with another card. Sixteen channels of multiplex fill up just two more slots. You still have room for a few channels of quick look with Astroverter DACs. Or up up to 128 channels of multiplexed input. Maybe you want sample and hold ahead of each multiplexed channel. No problem with the Astroverter. Or 14 channels of quick look . . . just fill up the 7-inch rack with DACs.

There has never been a system as flexible and as economical as the Astroverter, fast too, 100 KHz thruput rates.

FEATURES

IT'S FLEXIBLE . . .
An unlimited number of data acquisition system configurations are made easy using the large family of plug-in cards. Multiplexed ADC systems. Quick-look outputs. Sample and Hold. Computer Programmed Buffers. All on interchangeable 5″ x 5″ cards.

IT'S FAST . . .
Five microsecond digitizing. Less than 5 microseconds for multiplexer switching and settling. The time from addressing a channel to completion of digitizing is only 10 microseconds . . . A true thru-put rate of 100 KHz.

IT'S ECONOMICAL . . .
The Astroverter is surprisingly low priced. Like a 16 channel multiplexed ADC system with sample and hold for only $1,875. A 14 channel DAC package for $5,000. A 128 channel system for just $4,000. The Astroverter is hundreds of dollars less than slower competitive models.

IT'S SMALL . . .
A 128 channel multiplexed ADC system in only 7 inches of rack space. Or 16 Sample and Hold or Buffer Amplifiers. Or 14 Quick Look channels. You save valuable space and have configurations unlimited.

IT HAS APPLICATIONS GALORE . . .
The Astroverter offers the flexibility, speed, economy and reliability necessary in today's world of real time applications.

It can function as an interface between an analog and digital computer in hybrid computer systems.

It is ideal as a peripheral device for general purpose digital computers.

It fills a growing need in industrial process control systems.

The ability to mix multiplexers, ADC.

FRONT PANEL CONTROLS AND INDICATORS ARE OPTIONAL

For just a slight additional cost you can specify front panel controls and indicators.

Optional front panel controls include switches for first and last channel scan, a RANDOM / SEQUENTIAL / CALIBRATE switch, manual digitize and manual reset.

Optional indicators include a row of 12 indicator lamps to provide a binary readout of the 11 ADC bits plus sign, and a row of 7 lamps which gives a binary indication of channel address.

When optional controls and/or indicators are specified, a wiring control card is inserted in the extreme left hand card slot. This eliminates wiring to the front panel from other system cards.

ASTRODATA INC. P. O. BOX 3003 • 240 E. PALAIS ROAD, ANAHEIM, CALIF. • (714) 772-1000

Burroughs Computer System Components

Magnetic Tape Transports

Free-standing Units.

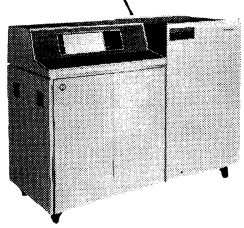
Several models are offered to meet various tape speed requirements. Bi-directional units operate up to 120 inches per second. All models feature gentle tape handling, end-of-tape sensing, fast start/stop, remote and local control, easy threading and dust-free operation. Packing densities up to 800 bits per inch; transfer rates up to 72 KC per second.

4-station "cluster" Units.

Unique Burroughs design permits four tape drives to share common electronics and cabinetry. Compact, economical, easy to use. Uses 7 or 9 channel tapes, or both. Packing densities up to 1600 bits per inch; transfer rates up to 36KC per second.

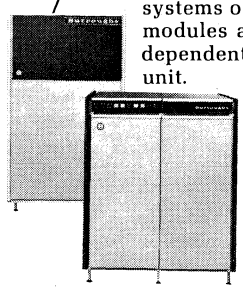
Line Printer

High speed drum printer offers 64 alphanumeric and special characters, prints 132 characters per line. Features a 132-character print buffer, plus immediate access print cycle. Handles multipart forms 5 to 20 inches wide. Available in 700 and 1040 line per minute models.



On-Line Disk File

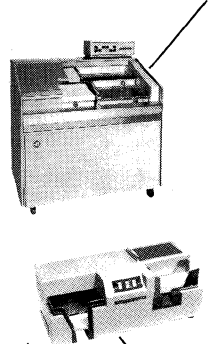
Full electronic switching via individual, fixed read/write heads provides very high speed access to every disk address regardless of total capacity. Fast, flexible, and fully proven. Individual modules available in 16-, 80- and 160-megabit capacities, with transfer rates up to 9 megabits per second. Expanded systems of up to 100 modules are possible dependent upon control unit.



Punched Card Reader

This reliable, high speed Burroughs reader handles short cards as well as standard 80-column cards. Features photoelectric reading and positive strobing of each card column. Unit shown reads 1400 cards per minute. 475 and 800 cpm models also available.

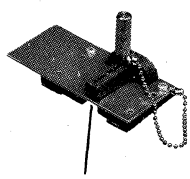
New Low-Cost Card Reader! Operates at 300 cpm flow mode, and 200 cpm demand mode. Same reliable photoelectric reading principle as higher speed units. Reads standard 80-column cards with strobe output for each card column.



Decimal Keyboard

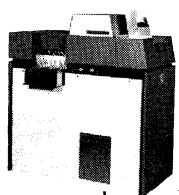
A modestly priced, versatile input device adaptable to a wide variety of data processing and communications systems.

A compact 13-key unit with a feather-light touch for high speed indexing.



Manual Tape Punch

A precision unit for adding information to an already prepared tape. Fast, easy, and accurate. No need to reinsert the tape in the main perforator. Accommodates standard Teletype and Commercial Control Flexowriter tapes. Corrects up to an 8-hole code. Tape slips in easily, and is held in perfect registration.



Card Punch

300 card per minute punch features magnetic core buffer, solid-state echo check punching verification, low maintenance. Unit may be loaded or unloaded while operating; can idle indefinitely without card damage. 3 program-selected stackers.

Integrated Circuit Logic Cards

(PARTIAL LISTING)

BASIC BUILDING BLOCK ELEMENTS	
F1-4	4 Universal J-K Flip-Flops
F2-8	8 R-S Flip-Flops
2N-11	11 Two-Input NAND Gates
3N-8	8 Three-Input NAND Gates, One Inverter
4N-6	6 Four-Input Expandable NAND Gates
7-4	4 Seven-Input NAND Gates
4LDN-6	6 Four-Input Expandable NAND Buffers
MG-9	Mixed NAND Gates; 2, 3, 4 Input Gates
4GE-6	6 Four-Input Gates Extender

SYSTEM FUNCTIONAL BLOCKS	
4BC-1	4 Bit Binary Counter
4BC-2	Dual 4-bit Binary Counter
DC-1	BCD Decade Counter
DC-2	Dual Decade Counter
4SR-1	Four-Bit Shift Register
4SR-2	Dual Four-Bit Shift Register
4PBC-1	4-Bit Serial Carry Synchronous Binary Counter
6PBC-1	4-Bit Serial Carry Synchronous Binary Counter
4RBC-1	4-Bit Reversible Decade Counter
RDC-1	BCD Reversible Decade Counter
SR-84	MOS Shift Register; 4 21-Bit Registers; including DTL compatible interfaces
SR-126	126-Bit MOS Shift Register
BDD-IN	BCD Decade Decoder Driver for NIXIE tubes
BDD-IL	BCD Decade Decoder Driver for relays, lamps or DTL Logic
PSRG-1	Power Supply Reset Generators
BDC-1	Binary/Decimal Decoder

ANALOG SYSTEMS ELEMENTS	
OA-1	Wide Band Operational Amplifier, 86 db gain, 10 MHz bandwidth
LD (V)	Level Detector provides system output when preset level is crossed by either positive or negative crossings
LD (OD)	Differential zero Crossing Detector (comparator)
DAC-4	Four-Bit D/A Converter
RPS-15	Precision Reference Power Source (+15 volts) long term stability .005%
RPS-15	Precision Reference Power Source (−15 volts)

LOGIC INTERFACES — OUTPUT ELEMENTS	
I 1-4	Four Positive Output Interface
I 2-4	Four Positive Input Interface
I 3-4	Four Negative Output Interface
I 4-4	Four Negative Input Interface
I 5-4	Neon or NIXIE Indicator Drivers
I 6-4	4 Relay/Lamp/Logic Drivers
I 6-10	10 Relay/Lamp Drivers
I 7-4	4 High Speed Logic Drivers
I 8-4	4 Transmission Line Drivers
I 9-8	Eight Negative Input Interface
2RN-10	10 Two-Input RTL/NAND GATES
SD-3	3 Solenoid Drivers
ST-4	Four Schmitt Trigger circuits
CR-4	4 Form C contact relays with drivers
MLR-2	2 Form C contact magnetic latching relays with drivers
RRA-4	4 Form A reed relays with drivers
RRC-3	3 Form C reed relays with drivers

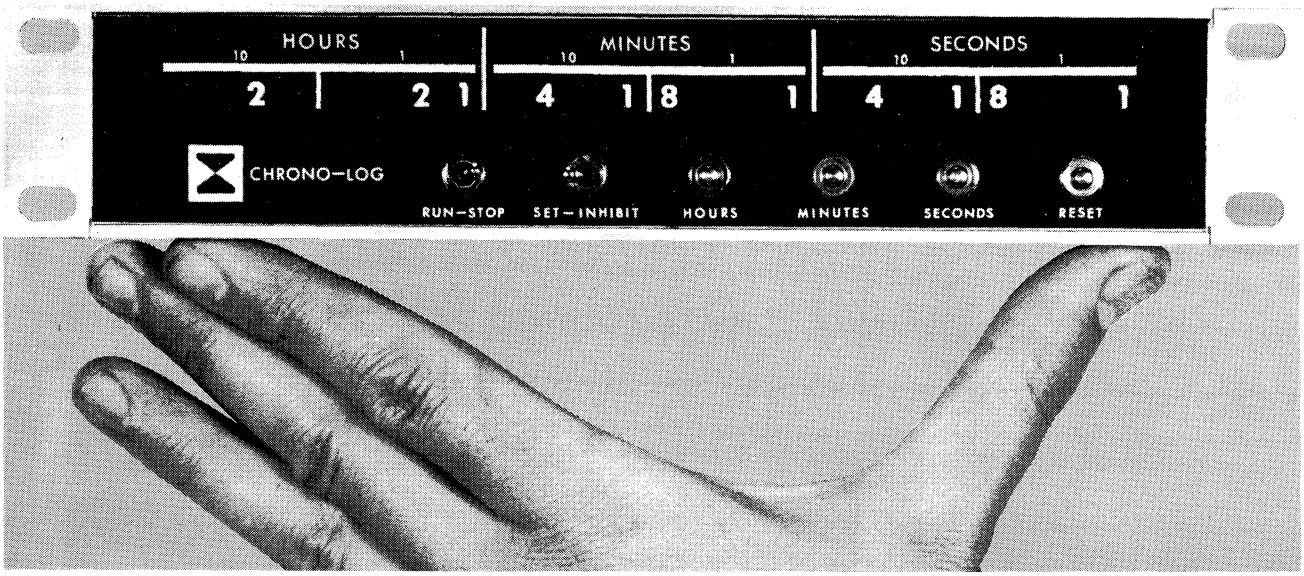
Whatever your requirements for TIME CODE EQUIPMENT...

Look to Chrono-log



Series 30,000

INTEGRATED CIRCUIT CLOCK/CALENDARS

Meet specific system needs at off-the-shelf prices

Applications
Wherever a digital output of real or elapsed time is required such as data logging, data transmission, data processing, time display, telemetry and digital printout systems.

Versatility, at low cost
Over 7,000 standard configurations available to meet specific system requirements at off-the-shelf prices which are less than the prices of electromechanical clocks. Use of common interface wiring and logic levels save you the costs of making engineering and documentation changes from one application to the next. Options include:

- BCD or NIXIE-type front panel displays
- Outputs of hours, minutes and seconds or other time ranges
- Day-of-the-year or month-and-day calendars
- Parallel and/or serial outputs
- Commercial or military temperature ranges
- A variety of internal or external time bases
- Various power supply inputs

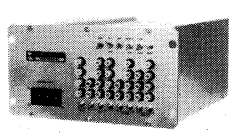
System compatibility
Use of TTL monolithic units, DTL and TTL circuits provide the optimum characteristics for clock applications, permitting simple interface with the most popular integrated circuit families. Chrono-log clock circuits are extremely reliable and provide excellent noise immunity.

Small size
Measures only 1¾ in. high, 9½ in. wide (half rack), and 8¾ in. deep.

For complete details request Bulletin 30,000.

OTHER CHRONO-LOG TIME CODE EQUIPMENT:

Time Code Generators — for recording, telemetry, range timing and other real time systems using IRIG, NASA, Vela or other time code formats. Both parallel outputs and serial modulated carrier outputs are provided for analog magnetic tape recording systems.



Low Power Time Code Generators — for field and airborne systems. Operate up to 60 hours from internal standby batteries. Internal oscillator has stability of 2 parts in 10^9 per day.

Time Code Readers — accept serial time code input in forward or reverse direction, fast or slow speed. Available for a variety of time codes or in universal multi-code models. Displays time reading and produces parallel and serial outputs of time for data processors, graphic recorders and other data devices.

Automatic Tape Search Control — controls tape drive to search for data at high speed and play back selected portions of recording. Provides front panel selection of start and stop times. Eliminates manual searching and playback.

Whatever your requirements for time code equipment, look to Chrono-log to fulfill them. For more information, contact your local Chrono-log field engineer or write us directly.

Truth is stronger than fiction.

The truth about our A/D converters is stronger than the fiction you hear about others.

The truth about ours is that word lengths vary from 4 bits to 9 bits; word conversion rates vary from 1 MHz to 25 MHz; and aperture time is as low as 0.2 nanosecond!

Prices range from only $4,200 to $9,660 and include internal sample-and-hold, power supplies, and self-test features.

Not only that . . .
We also have D/A converters that match our A/D's in speed and accuracy. Honest!

COMPUTER LABS

GREENSBORO, N. C. 27403

The D/A for stingy engineers

You want to convert from 4 bits at 25 MHz; or 9 bits at 10 MHz (or anywhere in between); and be ±2 millivolts accurate in less than 90 nanoseconds.

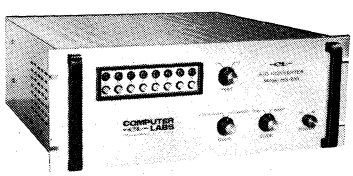
But you also want to vary external bias and reference from dc to 25 MHz.

That way, your converter can be used as a function generator, a modulator, or a programmable attenuator.

But you want to pay only $1480 to $1760 for any of six models.

You're not stingy. You're thrifty.

You want our HS-2000 Series D/A Converters.



Not only that . . .
As a thrifty engineer, you would also like our A/D converters that require no external test equipment.

Word conversion rates can vary from 1 MHz to 25 MHz; and aperture time is as low as 0.2 nanosecond!

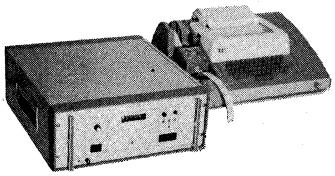
Data Loggers

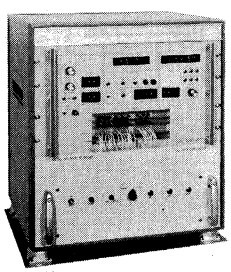
SERIES 110 LOW COST DATA LOGGERS



For scanning, digitizing, and recording analog voltages for computer entry. Two models available, one for recording low-level, low-frequency voltages on punched paper tape, the other for recording high-level, higher frequency voltages on magnetic tape. Each Data Logger contains a scanner, A/D converter with display, digital time base generator, output buffer, recording device, and desktop instrument cabinet.

CAPSULE SPECS: MODEL 112: 10 to 100 channels, 10 MV and 100 MV FS, 10 megohm differential inputs with 120 db CMR, 1 chan/sec scanning, 5-digit-plus-sign integrating ADC with Nixie display, Model 33 teleprinter with keyboard, page printer, tape punch, and reader. Basic Price: $4,950. MODEL 114: 10 to 100 channels, 10 volts FS, 10 megohm single-wire inputs, up to 2,000 chan/sec scanning, 11-bit plus sign ADC with binary display, 7-track, 556 bpi, or 9-track, 800 bpi, magnetic tape recorder with both incremental and slew writing capability. Basic Price: $8,750.

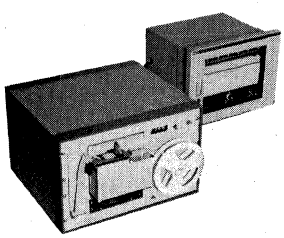
SERIES 120 DIGITAL DATA LOGGERS



For automatically measuring and recording both analog and digital signals from multiple installations of transducers for computer entry or manual study. Wide-range specifications with many options. Each Data Logger contains a scanner with display, A/D converter with display, time-of-day digital clock with display, digital data entry, output buffer, and recording device — mag tape recorder, paper tape punch, card punch, teleprinter or line printer.

CAPSULE SPECS: 10 to 1,000 channels, 10 MV to 10 volts FS with auto ranging, high-impedance differential inputs with high CMR, 0.02% system accuracy, 4-digit resolution, high-speed computer-compatible recording of time, digital data, channel and analog data. Price Range: $9,000 to $16,000.

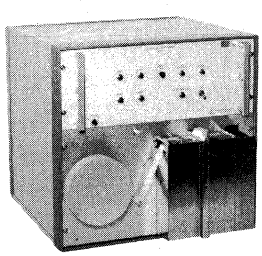
SERIES 140 MULTIPOINT RECORDER LOGGERS



Connect directly to standard multipoint recorders, digitize and record data for computer entry. Loggers are synchronized to recorders, log each data point on punched paper tape. Two models are available, one for use with single recorders, the other with 2 to 12 recorders. Simple installation, unrestricted recorder operation, automatic unattended operation.

CAPSULE SPECS: 4-digit record of each data point, punched paper tape output in 8-level ASCII or IBM code, 1,000-foot tape supply, all logging synchronized to recorders, no restrictions on multipoint recorder operation. Model 141 (single channel): $3,950. Model 142 (2-12 channels): $2,950 plus $950/channel.

SERIES 310 INTERFACE BUFFERS



For sequencing parallel digital data to magnetic tape and paper tape recorders and teleprinters. Use to record data from DVM's, counters, and other digital devices for later computer entry or manual study. Buffers control operation of recording device. Output format is programmed by user. Time-of-day digital clock and manual data entry available.

CAPSULE SPECS: 4-bit, 6-bit, or 8-bit character inputs, 0 and +5 volt logic levels, record command input and busy output. Recording rate determined by recording device. Data storage and logic level converters available. Price Range: $3,000 to $10,000, including recording device.

CONTROL LOGIC, INC.

SYSTEM PRODUCTS AND SERVICES

SERIES C MICRO LOGIC CARDS — A complete family of compatible micro logic cards for total capabilities in digital system design and construction. This series includes:

C110 DC to 1 MHz Logic Cards employing DTL-930 integrated circuit modules. This family offers economy with logical flexibility of collector ORing and input expansion. Including 4 flipflop cards, 8 gate cards, 10 timing and interface cards, 10 functional counters and registers, and 3 functional gating cards.

C150 DC to 5/10 MHz Logic Cards with SUHL I TTL logic in hermetically sealed ceramic modules. This high performance series operates at rated speed with up to 400 pf of load capacity. Including 5 flipflop cards, 8 gate cards, 10 timing and interface cards, 11 functional counters and registers, and 6 functional gating cards, plus 8 cards for A/D and D/A applications.

C150T DC to 5/10 MHz Logic Cards uses the 74N Series integrated circuits to provide the speed advantage of TTL with the cost advantage of epoxy packages and MSI functions. Includes 3 flipflop cards, 5 gate cards, 11 timing and interface cards, 7 functional counters and registers, and 3 functional gating cards.

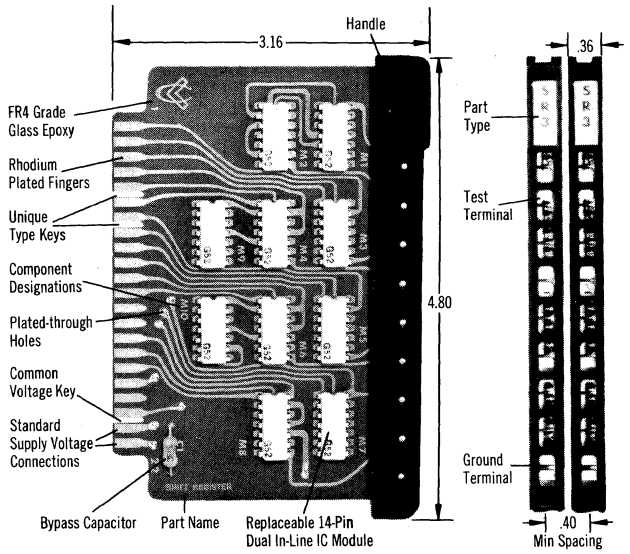
C120 DC to 20/30 MHz Logic Cards with SUHL II providing a high frequency extension to the C150 family. These cards are directly interchangeable with equivalent C150 types. Including 3 flipflop cards, 3 gate cards, 2 timing and interface cards, and 2 registers.

SERIES P PACKAGING PRODUCTS — This series provides a selection of over 100 packaging and accessory products for Series C micro logic cards. A unique modular design allows the packaging needs for any requirement to be solved with standard catalog components.

SERIES A COMPATIBLE ANALOG PRODUCTS — For analog to digital conversion, and analog measurement and test.

SERIES N SOLID STATE PRODUCTS — For industrial measurement and control. A family of system, accessory, and packaging components which supplement Series C and Series P products to provide one source of supply of components for industrial measurement and control systems. Series N provides complete electrical isolation between the logic unit and the outside world, to completely eliminate problems of electrical noise.

SERIES C CARD FEATURES



SERIES S DESIGN AND ASSEMBLY SERVICES — Control Logic offers computer aided design, automated wiring, and assembly services to assist you in your system design and construction. In addition, our Systems Department provides engineering design services to provide turnkey systems.

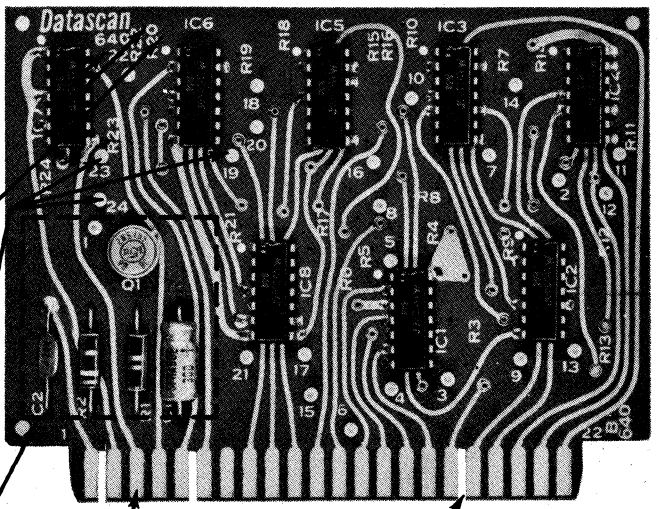
The Integrated Circuit Logic Card with *More Value* Built In

Datascan now offers you the most complete line of *function* IC cards — DTL 200 series, TTL 600 series and HTL (High Noise Immunity) 400 series, power supplies, hardware and accessories. All three card lines are pin for pin interchangeable.



Pull-Up Resistors
Provision for mounting resistors right on card — reduces number of interconnections, cards and cost.

Test Points
Optimum number with no added capacitance or sacrifice in function capacity.

Dynamic Decoupling™
Exclusive with Datascan — eliminates high and low frequency noise for extremely reliable system operation. The decoupling circuit is right on the card.

Edge Connections
44 pins for economy, availability, reliability—compatible for any type of termination.

Card Keying
Unique 3 slot interpin keying — prevents accidental interchanging or reversing—saves all 44 pins for active connections.

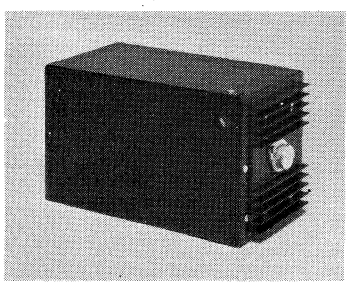
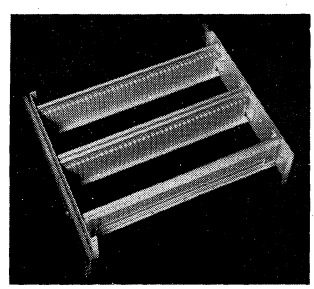
POWER SUPPLIES



Solid state units, with current limiting and overvoltage protection. Available for use with or without dynamic decoupling in the logic system.

CARD DRAWERS



Datascan offers standard card drawers with 1 rack (40 slots), 2 racks (80 slots) or 3 racks (120 slots). All drawers are furnished with a finished 5¼" front panel, handles and holes for mounting chassis slides. Drawers can be furnished, at the customer's option, with solder, wire-wrap, Termi-Point or taper pin connectors; chassis slides; 4-layer power buss and rear connector panel.

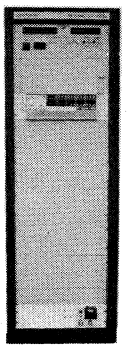
MODEL 1000 DATACOUPLER ®



datatron's digital data products and systems...

IN THE FIELDS OF DATA ACQUISITION AND REDUCTION, DATATRON CAN PROVIDE THREE ALTERNATE APPROACHES TO SYSTEM IMPLEMENTATION.

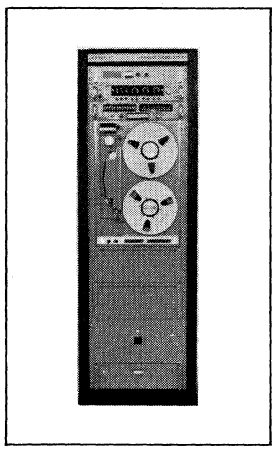
1. A broad range of high performance, low cost products which can be incorporated into user-designed systems.
2. The design and construction of complete, fully integrated systems.
3. An extensive line of linkage equipment for the interconnection of subsystems.

products

A key example of Datatron's design and productive capabilities is the MODEL 1000 DATACOUPLER®(as illustrated). Like all Datatron products and systems, this unit is entirely solid state making almost exclusive use of integrated circuits. In itself a complete multipurpose data system, the Model 1000 provides the capacity for both data acquisition and reduction. When used to acquire data, the unit accepts multichannel analog or digital inputs. All analog input data is digitized utilizing a self-contained analog-to-digital converter option. The resultant digital data is recorded on devices such as an incremental tape recorder, paper tape punch, or line printer. Other options including a digital clock, provisions for constant data insertion, and an intervalometer permit the tagging of the recorded data and the selection of the interval between data scans. When a digital recorder is used, the Model 1000 can assist in data reduction. Front panel rotary thumbwheel switches permit the operator to automatically search for a preselected file, record number, or time tag information. Once located, the entire record or selected channels of the record can be outputted to a line printer or converted back to analog form for "quick look" analysis.

systems

Datatron has purposely concentrated on the growing market for low through medium cost digital data systems. Examples include low or high level, low or high speed analog-to-digital conversion and recording systems; analog data reduction systems; and digital data reduction systems. These systems can be either the hard wire program type or stored program type making use of a central data processor. In each instance, Datatron will provide a fully compatible system including (as in the latter case) all necessary system software. Datatron has also achieved an impressive background of experience in the design of tape format converter systems (IBM to ASCII, etc.).



the datatron family of timing instrumentation

3000 Time Code Translator/Generator

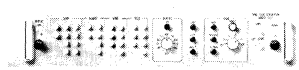
The Model 3000 Time Code Translator/Generator provides a complete, highly flexible timing system for those facilities where both data acquisition and reduction will be performed. As a generator, the unit accumulates time from a precision internal frequency standard. Synchronization controls permit close correlation, if desired, to an external time standard. The Model 3000 generates up to five serial time codes simultaneously while also outputting pulse rates and parallel data. As a translator, the unit will accept different time codes simply by changing a printed circuit card. High or low speed, forward or reverse translation is provided. Such items as input carrier filters, and digital error bypass logic usually found only on much more expensive units are included as standard features in the Model 3000.

3100 Time Code Generator

Where timing is required for data acquisition at a site remote from the data reduction station, the Model 3100 Time Code Generator is an ideal solution. This generator accumulates time from an internal precision crystal oscillator, includes synchronization logic, and outputs up to five serial time codes along with pulse rate and parallel outputs.

3200 Time Code Translator

The Model 3200 Time Code Translator permits high or low speed, forward or reverse translation of a time code from magnetic tape or can be utilized as a terminal device to accept a time code over telephone line or RF link. The unit provides serial time code outputs for the redubbing on magnetic tape or "quick look" on strip chart recorders, parallel outputs for entry into digital data systems or time tagging of recorded digital data and pulse rates for system synchronization.



3110 Time Code Generator

The Model 3110 Time Code Generator is an extremely low power generator, designed primarily for portable and airborne applications. Depending upon the frequency standard utilized in the generator, the unit can generate five simultaneous time codes while consuming less than one watt of power. The Model 3110 is designed to mount in a standard nineteen inch rack and is 3-1/2 inches high. The unit is also available in a portable carrying case and can be configured to fit specific airborne or portable packaging requirements.

3400 Tape Search Unit

The Model 3400 Tape Search Unit complements the Model 3000 Time Code Translator/Generator and Model 3200 Time Code Translator. When used in conjunction with a translator, this unit provides automatic search for a data interval as programmed by front panel rotary thumbwheel switches or by a digital computer.

3350 Digital Clock

The Model 3350 Digital Clock accumulates time-of-day and day-of-year utilizing either an internal crystal oscillator or the 60-cycle power line as a frequency source. Digital outputs are available for time tagging data when the clock is used in data system applications. Accumulated time is displayed on the front panel. The unit is entirely solid state but is priced competitively with electro mechanical or mechanical units.

linkage equipment

Where a complete system is in existence but specialized equipment for the interconnection of subsystems is required, Datatron's capability for building a wide range of linkage equipment can be of great value. Typical linkage systems would connect a digital computer to a digital tape deck, telephone data set, xy plotter, timing system, or existing data system. Other linkage systems connect digital tape transports to telephone data sets, teletype, computer, punched paper tape, printer, xy plotter, etc.

DATATRON

Datatron manufactures an extensive line of digital data products and systems, timing instrumentation, and data transmission equipment and systems. Detailed information and literature can be obtained by writing Datatron or contacting one of our field representatives. Our staff is available at all times to offer additional assistance in any of these areas or for special projects.

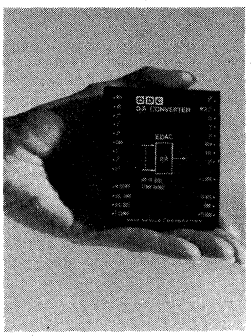
9-13 BIT DIGITAL/ANALOG CONVERTERS
UDAC Series Specifications — Electrical
at 25°C and rated supplies unless othewise noted

Digital/Analog Converter Model		UDAC-9	UDAC-11	UDAC-13
PARAMETER	UNIT		VALUE	
RESOLUTION	# of Bits(1)	9	11	13
ACCURACY	% of F.S.(2)	±0.1	±0.025	±0.0005
TEMP. COEF.(3)	% of F.S./°C(2)	±0.006	±0.002	±0.0005
SETTLING TIME(4)	μs	5 typ.; 10 max.(5)		
REFERENCE		±10 V (DC to 10 KHz)		
INPUT LOGIC		DTL or TTL, one line, one load per bit		
CODING(6)		Ones's complement, two's complement		
RATED OUTPUT				
Voltage	V		±10	
Current	mA		±5	
POWER SUPPLY REQUIREMENTS				
Voltage	V	+5	+15	−15
Current	mA	50	70	20
Accuracy(7)	%	2	1	1

NOTES: (1) Including sign; (2) F.S. = 20 V pp; (3) Lower T.C.'s available; (4) To within 1 LSB; (5) 5 μs max. available; (6) Other codes available; (7) Drift vs. power supply 1 mV/% for ±15V supplies.

Price (1-9) from $200



8-11 BIT DIGITAL/ANALOG CONVERTERS
EDAC Series Specifications — Electrical
at 25°C and rated supplies unless otherwise noted

Digital/Analog Converter Model		EDAC-8	EDAC-9	EDAC-10	EDAC-11
PARAMETER	UNIT		VALUE		
RESOLUTION	# of Bits(1)	11	11	11	11
ACCURACY	# of Bits(1)	8	9	10	11
	% of F.S.(2)	±0.2	±0.1	±0.05	±0.025

Price (1-9) from $300
MIL SPEC VERSION AVAILABLE

14 BIT MINIATURE DIGITAL/SYNCHRO CONVERTERS
EDSC Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY(1)	±4 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
LOGIC	parallel, positive logic, TTL levels
OUTPUT(2)(3)	3 wire synchro 11.8V rms L-L 400 Hz driving up to 300 ohms L-L balanced
REFERENCE INPUT(2)(3)	26V rms 400 Hz
POWER SUPPLY REQUIREMENTS	+15V at 100mA, −15V at 80mA, +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies, ±10% amplitude and frequency variation and up to 10% harmonic distortion of the reference and for any balanced load from no load to 300 ohms L-L.
(2) Other input and output voltages and frequencies available.
(3) Transformer isolated.

Price (1-9) from $495

13 BIT MINIATURE SYNCHRO/DIGITAL CONVERTERS
ESDC Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY(1)	±4 minutes ±0.5 LSB
RESOLUTION	13 Bits
CODING	natural binary 'angle'
DIGITAL OUTPUT	parallel, positive logic, TTL levels 13 angle data and 1 inhibit lines
SYNCHRO INPUT(2)(3)	11.8V rms L-L 400 Hz (ESDC-L), 90V rms L-L 400 Hz (ESDC-H)
REFERENCE INPUT(2)(3)	26V rms 400 Hz (ESDC-L), 115V rms 400 Hz (ESDC-H)
SYNCHRO INPUT RATES	0 to 360°/sec for full accuracy
POWER SUPPLY REQUIREMENTS	+15V at 40 mA, −15V at 20mA, +5V at 200mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of synchro and reference inputs.
(2) Other input voltages and frequencies available.
(3) Transformer isolated.

Price (1-9) from $645

14 BIT MINIATURE DIGITAL/RESOLVER CONVERTERS
MDRC Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY(1)	±4 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
LOGIC	parallel, positive logic, TTL levels
OUTPUTS	10 $\sin\theta \sin\omega t$ and 10 $\cos\theta \sin\omega t$ volts at 5mA. where θ = digitalinput angle and ω = reference input frequency
REFERENCE INPUT(2)	26V rms 400 Hz transformer isolated
POWER SUPPLY REQUIREMENTS	+15V at 30mA, −15V at 10mA +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of reference.
(2) Other input voltages and frequencies available.

Price (1-9) from $425

MINIATURE RESOLVER/SYNCHRO CONVERTERS
ERSC Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY(1)	±2 minutes
INPUTS(2)	resolver voltages, ±10V peak at 400 Hz
INPUT IMPEDANCE	10 megohms min.; 50 pF max.
OUTPUTS(2)	3-wire synchro voltages, 90V rms L-L no load 400 Hz transformer isolated
OUTPUT IMPEDANCE	100 ohms L-L max. balanced to 5%
LOAD	any balanced load from no load to 2500 ohms L-L
POWER SUPPLY REQUIREMENTS	±15V at 550mA peak at full load

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies, ±10% amplitude and frequency variation and up to 10% harmonic distortion of the inputs and for any balanced load from no load to 2500 ohms L-L.
(2) Other input and output voltages and frequencies available.

Price (1-9) from $295

14 BIT MINIATURE SOLID STATE CONTROL TRANSFORMER
SSCT Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY(1)	±4 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
DIGITAL INPUT	parallel, positive logic, TTL levels
SYNCHRO INPUT(2)(3)	11.8V rms L-L 400 Hz (SSCT)-L); 115V rms L-L 400 Hz (SSCT-H)
REFERENCE INPUT(2)(3)	26V rms 400 Hz (SSCT-L); 115V rms 400 Hz (SSCT-H)
OUTPUTS	AC(3) and DC(3), output gradient controllable by an external resistor
POWER SUPPLY REQUIREMENTS	+15V at 30mA, −15V at 10mA, +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortio nof synchro and reference inputs.
(2) Other input voltages and frequencies available.
(3) Transformer isolated.

Price (1-9) from $400

ELECTRONIC CONTROL DIFFERENTIAL TRANSMITTER
ECDX Series Specifications

PARAMETER	VALUE
ACCURACY(1)	±4.5 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
LOGIC	parallel, positive logic, TTL levels
OUTPUTS	10 $\sin\theta \sin\omega t$ and 10 $\cos\theta \sin\omega t$ volts at 5mA. where θ = digital input angle and ω = reference input frequency
SYNCHRO INPUT(2)	11.8V rms 400 Hz transformer isolated
POWER SUPPLY REQUIREMENTS	+15V at 30mA, −15V at 10 mA, +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of synchro input.
(2) Other input voltages and frequencies available.

Price (1-9) from $635

The Model VA-23 is our latest high speed data amplifier for fast conversions. Slew rate is 1000 V/μs; frequency for unity gain 150 MHz typically. See Section 1100.

PLEASE SEE SECTIONS 1100 AND 4900

All specifications subject to change without notice.

Oh, you'll put it together, all right, and after a while, it'll work, more or less.
Then you'll take the prototype to engineering for board design, get it back, attach the components, test it, make a few compromises, try it again. What you have then is an engineering model.
Then the manufacturing design. Back to engineering for debugging. More testing. Parts procurement. Incoming inspection. Telephone calls. Late deliveries. More testing. Heartache.
Final release and the module is ready for manufacture. Maybe.

All this time, an already designed, fully debugged, guaranteed, computer-tested, solid state module sits on Digital's shelf. Fifty engineers in offices around the country wait for your call to help. Application notes, installation drawings, catalogs sit in our mail room.
Power supplies, hardware, racks are piled high in the stock room.

M Series modules are the most complete, fully compatible, fast, all IC, TTL, inexpensive solid state logic available anywhere. With a few million modules in our recent history, and a few million dollars worth of test equipment, we really know how to put them out.
Read all about them in the new Logic Handbook. Free.

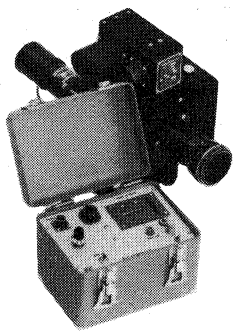
SOLID STATE TIMER WITH OUR NEW SOLID STATE RELAY SERIES 40

Replace your electro-mechanical timers with these Solid State, totally integrated Timers, and cut down on repair and maintenance costs. Trouble-free operational life extends to 500 million cycles!

GENERAL SPECIFICATIONS

INPUT POWER: 115 VAC 60 Hz, or 12 to 48 VDC.
TEMPERATURE: −10° to +170°F.
REPEAT ACCURACY: ±1% of dial setting with ±10% input voltage variation.
RESET TIME: 50 milliseconds.
RELIABILITY: timing unaffected by line voltage fluctuation or transients (up to 1000 volts).
LOAD CONTACT RATINGS: 2.0 AMPS at 25°C, 115 VAC inductive or resistive.



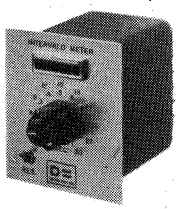
INTERVALOMETER SERIES 390

APPLICATIONS

- ☐ Time lapse photography including traffic control, construction progress, building security, school teaching methods etc.
- ☐ Life, product and stress-type testing.
- ☐ Photocopying Systems.
- ☐ Research in medical, laboratory, biological, botanical and small life studies.
- ☐ Weather, and Underwater Research.
- ☐ Dispensing of flares, etc.

GENERAL SPECIFICATIONS:

INPUT POWER: 115 VAC (±10%) 60 Hz or 400 Hz or 12 to 48 (±10%) VDC—120 MA.
DIMENSIONS: 5" high x 5" deep x 7" long.
OUTPUT CONTACT RATING: 10 Amps. at 12 to 48 VDC or 110 VAC.
POWER REQUIREMENT (excluding load): 120 MA DC models only.
REPEATABILITY: ±1%.
FRAME COUNTER: 9999 counts resettable to zero.
MANUAL OVERRIDE: Control for extra pictures.

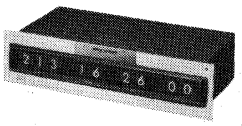


SERIES 500 REPEAT CYCLE OR SEQUENCE TIMER INTERVALOMETER

Upon application of operating power, the first timing interval is initiated. At the completion of the first timing interval the contacts transfer and the second timing interval is initiated. At the completion of the second interval timing contacts transfer and the cycle is repeated. This timing cycle is repeated for as long as operating power is applied.

GENERAL SPECIFICATIONS:

INPUT POWER: 115 V.A.C., 60 Hz. or 12-48 V.D.C.
TEMPERATURE: −10°C to +65°C.
REPEAT ACCURACY: ±2% of dial setting with ±10% input voltage variation.
RESET TIME: 50 milli.sec.
LOAD CONTACT RATINGS: 10 amps at 115 V.A.C. resistive One Form C.
LOAD SWITCH: External plug in relay (See options).
MOUNTING: Two 6/32 screws. Supplied.
MOUNTING DIMENSIONS:
A. For round casing, 3¾ diameter hole size.
B. For rectangular casing, 2.450W 3.300H hole size.
C. Overall size of timer 3.150W 3.650"H 3.500"D with external relay add 1.450" to depth.



CALENDAR CLOCKS SERIES 700

The Digital Instruments Series 700 Integrated Circuit Calendar-Clocks are a group of low cost date and time clocks, featuring easy-to-read visual displays and **digital electrical readout. The** electrical readout **can be used as direct computer input or to actuate a hard-copy printer.**

These units are successfully used in broadcast studios, process control systems, and for general purpose data logging and computer time-updating. An internal time base of either the 60 Hz power line or tuning fork type is available. Crystal control is an option.

BIDIRECTIONAL COUNTER SERIES 900 WITH ROTARY SHAFT ENCODER

GENERAL SPECIFICATIONS

BIDIRECTIONAL COUNTER
PULSE INPUT RATE: DC to 5 MHz.
MINIMUM PULSE "ON" TIME: 100 nanoseconds.
MINIMUM PULSE "OFF" TIME: 100 nanoseconds.
PULSE AMPLITUDE AND SHAPE: positive going +1 volt to +7 volt square wave.
INPUT IMPEDANCE: 10K ohms (diode input).
DISPLAY: backlighted projection of standard shape arabic numerals; 1 inch character height.
AMBIENT LIGHTING: visible under normal room lighting up to 100 feet (160°).
FRONT PANEL CONTROLS: reset and polarity reversal switches.
ELECTRICAL OUTPUT: 10-line or BCD, up to 48 VDC at 150 MA. Output rise time 30 nanoseconds minimum.
POWER REQUIRED: 115 VAC ±10% at 1.2 amps.
AMBIENT OPERATING TEMPERATURE: −5°C to +51°C.
DIMENSIONS: 3½" hgh x 9½" wide x 10" deep (half rack).

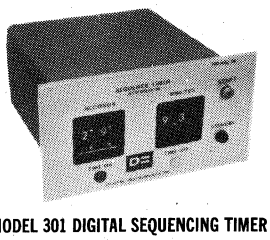
ELECTRONIC COUNTER SERIES 200

GENERAL SPECIFICATIONS:

COUNTING SPEED: 0 to 15,000 counts per minute.
INPUT PULSE SHAPE: Square waves or positive-going pulses with amplitudes of 1 volt minimum.
INPUT PULSE DURATION: 1 millisecond minimum pulse width, with 3 milliseconds minimum quiescent time.
RESET: Remote or manual.
OPERATING TEMPERATURE RANGE: −5°C to +65°C.
SUPPLY VOLTAGE: 115 VAC ±10%, 50/60 Herz, single phase.
SIZE: 3" high x 9" wide x 8" deep.
OPERATING LIFE: 500 million cycles minimum.
PRICE: $198.00.

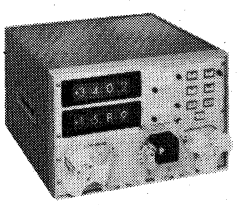
APPLICATIONS

- ☐ Automatic packaging systems
- ☐ Cut-to-length systems
- ☐ Process control systems
- ☐ Industrial counting systems
- ☐ Winding and turns counting systems, etc.



MODEL 301 DIGITAL SEQUENCING TIMER

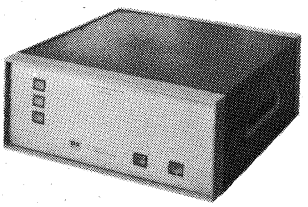
A solid-state counter is utilized to count clock pulses between outputs and therefore allows a programmed time to be selected. Thumbwheel switches are a boon to the operator for programming the desired sequence or time range. These positive-acting thumbwheel switches greatly reduce the possibility of operator error.



NUMERICAL POSITION CONTROL

Locates pre-programmed x-y positions with paper tape input.

Applications: Component insertion in PC boards, automatic drilling, automatic wire-wrapping, etc.

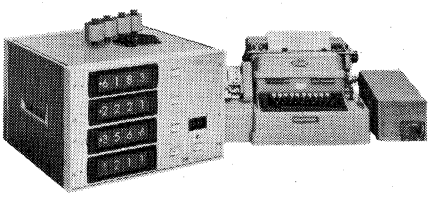


INTERFACE, CODE CONVERTER UNIT SERIES 300

The Digital Instruments Model 300 Interface Unit accepts counter inputs in binary, BCD, or 10-line form and converts them to **BCD, 10-line, ASCII** or any other form for transmission to the recording device.

The Model 300 Interface Unit times the successive serial characters. This unit also **formats, synchronizes** and **alarms** if something is wrong.

The versatile Model 300 is also capable of transferring data between **two recording media,** such as **card-to-punch, card-to-automatic typewriter, paper tape-to-magnetic tape,** and other combinations.



INTEGRATED DATA LOGGER SERIES 1800

APPLICATIONS

Analog

- ☐ Pressure
- ☐ Strain
- ☐ Voltage
- ☐ Current
- ☐ Flow rate
- ...and many others

Digital

- ☐ Assembly line counting and data logging
- ☐ X-Y-Z position display and recording (machine tools, drafting machines, coordinatographs, motion analyzer with fiducial inputs)
- ☐ Geophysical exploration data recording
- ☐ Continuous process data logging (metal rolling mills, chemical plants, furnaces)
- ☐ Preparation of numerical control tapes
- ☐ Precision microscope and optical comparator measurement recording
- ☐ Telemetry...and many others

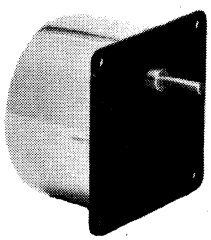
1. Teletype or other automatic typewriter.
2. Digital scanner input, DI Model 1297.
3. Analog-to-Digital (voltage-to- frequency) converter input, with or without multiplexer, DI Model 1296.

Digital Instruments' Product Line: TIMERS / HIGH-INTENSITY FLASHERS (Aircraft-Marine type) / INTERVALOMETERS / SOLID STATE RELAYS / NUMERCIAL POSITIONING CONTROLS / UNI-BIDIRECTIONAL COUNTERS WITH PRINTOUT / GRAPHIC & MOTION PICTURE DATA ACQUISITION AND PROCESSING SYSTEMS / COMPUTER INTERFACE / PUNCH CONTROLS (with Data Inverters) FOR AUTO-TYPEWRITERS, PRINTERS, TELETYPE, IBM (026, 029, 526 etc.), DATA-PHONES & MAGNETIC RECORDERS / DIGITAL CLOCKS & CALENDARS / HARD COPY COMPUTER INPUT SYSTEMS / OPTICAL SENSORS.

DIGITAL INSTRUMENTS, INC.

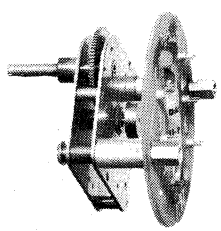
DISC ROTASWITCH® ENCODERS *(naked or cased)*

Here are shaft position encoders made to fit *any* application or design. The Disc ROTASWITCH Encoder line extends from an inexpensive, uncased Model 111 to the sophisticated Model 835, a photoelectric, bidirectional unit. In between you have an extensive choice of pulse rates, pulses per shaft revolution, and other parameters to meet your exact engineering requirements. The selection chart below will enable you to choose a ROTASWITCH Encoder as an off-the-shelf item, but if your problem needs a not-so-standard solution, please contact our Engineering Department.

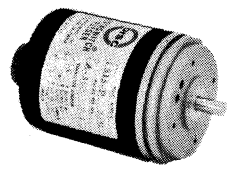


Model 111 ROTASWITCH Encoder

Mercury Wetted ROTASWITCH Encoder—Model 111. Why use switching devices with short life expectancy and innate design problems when the Model 111 ROTASWITCH incremental shaft encoder is available for *under* $50.00? With pulse rates up to 6000/min. it offers an inexpensive and reliable method of metering, measuring, controlling, and counting. Mercury wetted contacts prohibit contact bounce for long service life, and it's available without a case for direct incorporation into your design.



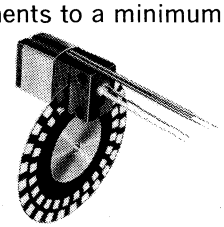
Model 111 ROTASWITCH Encoder (Naked)



Model 815 ROTASWITCH Encoder

Photoelectric ROTASWITCH Encoders—Series 800. Photoelectric encoders are available in 7 basic models to provide the designer with a wide range of operating parameters from which to select. Pulse rates go all the way to 30,000/sec., resolution up to 1000; both uni- and bi-directional versions, with square or sine wave outputs available.

The 800 series can also be specified without cases if the designer wishes to build in the encoder. The naked version consists basically of the rotating slotted disc and a photohead, cutting costs and space requirements to a minimum.



Typical 800 Series ROTASWITCH Encoder (Naked)

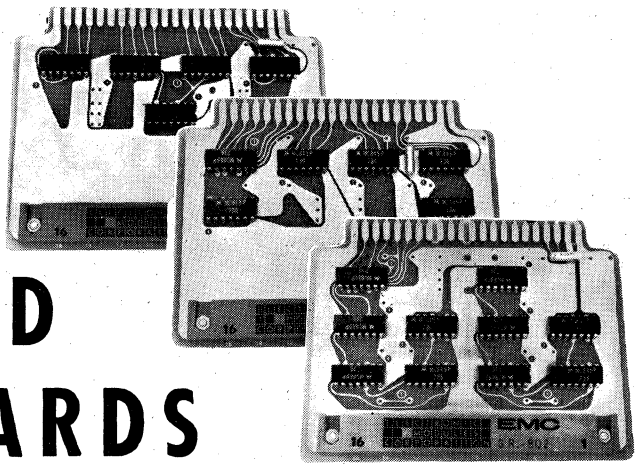
SPECIFY EMC INTEGRATED LOGIC CARDS



EMC's 800 series 5 MHZ Integrated Circuit Logic Cards feature the popular DTL 930 family in the plastic dual-in-line package, already mounted on printed circuit cards ready for plug-in use. The 4.5-inch x 3.5-inch glass epoxy cards incorporate a standard edge connector with 44 rhodium plated tabs, and feature heavy power leads and large ground planes to reduce the effect of noise. A quality test point block accepts 16 standard 0.080-inch probes. Cards are keyed to prevent insertion in wrong connectors. Operating temperature range for commercial cards is 0°C to 75°C. Military versions offer broader temperature range. Card mounting racks, drawers, power supplies, etc. are available. For higher speed applications, the EMC 900 Logic Card family offers the 7400 series TTL integrated circuits on the same card configurations as the 800 series described above.

DESCRIPTION	Part	1-24	Part #	1-24
Two 4-Bit Shift Register	SR802	$62.10	SR902	$65.40

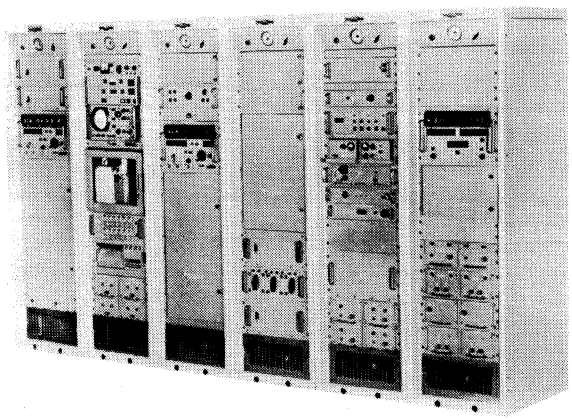
GEO SPACE SYSTEMS, INC.

DIGITAL SYSTEMS AND TIMING EQUIPMENT

COMPLETE TIMING SYSTEMS



APOLLO TIMING SYSTEM

The most sophisticated central timing systems built by Geo Space Systems, Inc. were installed onboard the National Aeronautics and Space Administration's new Apollo instrumentation ships. The system generates time codes and a varety of standard and non-standard reference frequencies and distributes them to range instrumentation equipment located throughout the ships. It provides time signals that are synchronized within one ten thousandth of a second with the Naval Observatory.

Outputs, derived from precise rubidium and crystal frequency standards by redundant master time-of-year clocks and time signal generators, include standard NASA and IRIG time codes, serial binary time-of-year and time-of-day, serial binary-coded-group time-of-year and paralleled BCD time-of-day. Elapsed time clocks are incorporated for complete pre, or post event timing, and feature manual or automatic initiation. All frequencies and time codes are channelled through a system patch panel for programmable distribution. A time scaler produces time and event markers for use with event recorders and plotting boards.

The system's time comparison equipment includes a WWV receiver, a VLF receiver, chart recorders and an oscilloscope featuring a plug-in unit to make it readily available for use in synchronizing, timing procedures and troubleshooting. VLF doppler effect is corrected by a ships motion compensator.

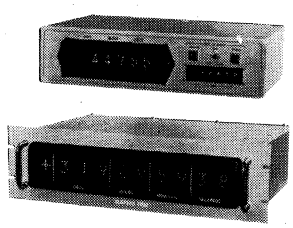
The utmost in operational dependability has been incorporated into this system, exemplified by: The crystal frequency standard, phase-locked to the rubidium frequency standard to within ±0.2 degrees, is automatically switched in place of the rubidium standard if the rubidium standard output drops to half amplitude or if there is a dropout of a whole cycle. A monitoring circuit accomplishes similar switching between master time-of-year clocks. Synchronous, non-transient switching between time signal generator outputs is provided by the transfer switch unit.

Redundancy also exists in the system master power supplies. An internal battery pack is also automatically selected in the event of main power failure. System battery chargers keep the stand-by pack ready at all times.

DIGITAL EQUIPMENTS AND SYSTEMS

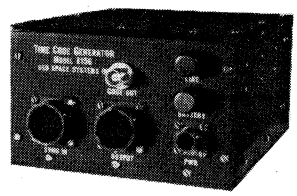
TIME CODE GENERATORS

This line of advance-design equipments begins with the GTG-1000, developed to meet the most stringent time correlated instrumentation requirements; and extends to the GTG-3000, designed for applications requiring a reliable, low-cost time signal source of ±1 second accuracy.



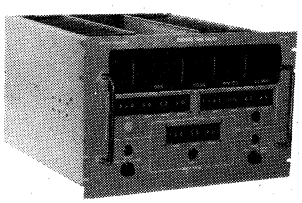
REMOTE DISPLAYS

Digital display indicators are available individually, or as companions to GSS time code generators. Simple time-of-year, time-of-day, and elapsed time indicators are featured, as well as models which incorporate selected time of event output. They are available in individual cabinets finished to customer specifications, or as rack mounted units.



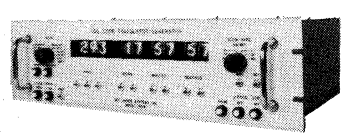
AIRBORNE TIME CODE GENERATOR

Model 8156, qualified for airborne use, is 5.6 x 6.6 x 3.5 inches and weighs only 3.2 pounds. It generates modified IRIG B time code with frequency stability of 1 x 10^{-6} and drift rate parts of 10^{8} per week provided by an internal temperature-compensated crystal oscillator. Time is preset by a 20-bit parallel BCD time-of-day input and an external switch or relay closure. An internal nickel-cadmium battery provides backup power during input power dropouts.



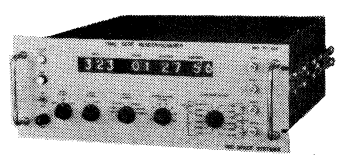
ELAPSED TIME CLOCKS & COUNT-DOWN GENERATORS

Capable of countdown and countup, with controls for hold count and count adjust, these units can be started automatically at a preset time-of-year, by an external start pulse, or manually by a front panel pushbutton. Preset time-of-year and preset initial elapsed time value (plus or minus) are set in by convenient front panel thumbwheel switches.



RANGE TIME CODE TRANSLATOR/GENERATOR

This RTC T/G is capable of functioning either as a subcentral timing system or an independent timing generator. Using dual-in-line integrated logic, the Model 8174 generates all the necessary timing signals and pulse rates for use in radar systems and computers. This includes NASA BCD and serial codes as well as binary time-of-year in tenths of seconds. Solid state components and technology are used throughout.



TIME CODE READER SCANNER

The GSS Time Code Reader/Scanner, Model 8108, provides reliable phase-coherent serial and parallel outputs when reading noisy time code signals with non-coherent carriers. An acquisition/lock feature assures coherent time outputs for up to 32 frames of signal dropout once sync is initially acquired. The standard unit handles the NASA 36-bit time code at the standard 1 kHz rate and four non-coherent carrier rates. Other codes and rates are optionally available.

Followng the introduction of silicon integrated circuit micrologic modules, Geo Space Systems, Inc. redesigned its line of standard building block module cards and incorporated them into a new family of timing system equipments. The company meets the needs of government and industry from a simple clock to a dual or triple-redundant, highly sophisticated digital system.

In the data display field, a team of engineering specialists is available to analyze customer needs and custom tailor our standard system configurations to their specific needs.

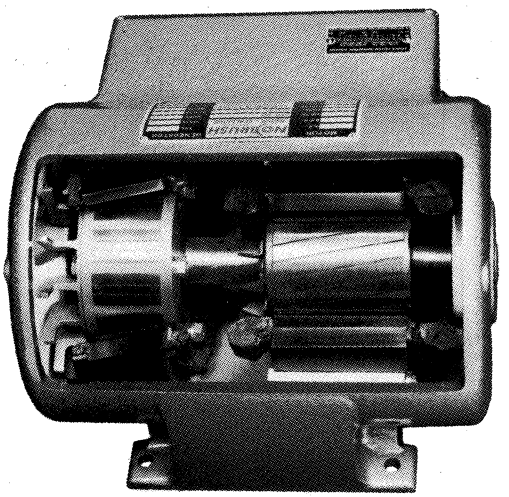
NOBRUSH® MOTOR GENERATOR SETS FOR COMPUTORS

Computer designers need a power supply that will give them highly stable output with freedom from noise. There are a number of ways to accomplish this, but in most cases the packages are too large and have too many parts that could fail. Motor generators have been proven to be the most efficient method for reasons of reliability, size, simplicity of design and over-all costs.

A Motor Generator set works on the simple principle of Mechanical Energy Storage. The essential component of a Motor Generator is a large rotating mass with high enough inertia to absorb power line transients. Its main function is to isolate the computer from the power line and provide stable output power. The rotating mechanism maintains the voltage output overriding input voltage changes. Even during short-term total power outage, a Motor Generator set will maintain usable output.

GEORATOR manufactures NoBrush®, an exclusive Permanent Magnet motor generator set designed for the highest efficiency and greater reliability.

Cutaway model of "NoBrush"® frequency converter shows simplicity of internal design.



FEATURES

MULTIPLE OUTPUTS
Up to 10 separate voltage outputs available at various current levels.

HIGH FREQUENCY OUTPUT
180 Hz to 840 Hz, usually three phase.

DC RECTIFICATION
Rectifier-filter package eliminates further circuitry.

IDEAL FOR INTEGRATED CIRCUIT SUPPLIES
NoBrush® sets provide low voltage, high current outputs.

HIGH EFFICIENCY
Design quality minimizes windage, IR drop, excitation and other losses.

RFI
Reduced by brushless design . . . zero for most applications.

EMI
Complete electrical isolation between motor and generator keeps EMI at extremely low levels.

SHORT CIRCUIT PROOF
Permanent magnet design provides built-in protection.

Upper Trace-Input Voltage 60 Hz. Lower Trace-Output Voltage 180 Hz. Note that with complete power outage for several cycles, energy is still being delivered to the load. Typical curve illustrates percent output voltage available after total input power interruption. Note that even after outage of 100 milliseconds, output voltage is still within 93% of normal.

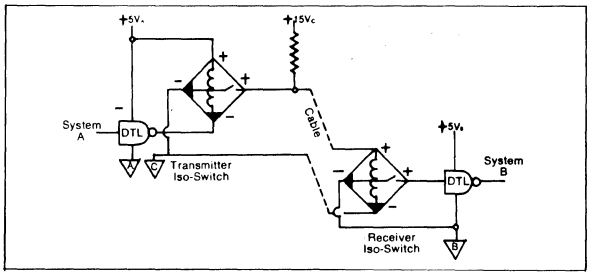
ISO-SWITCH® ISOLATED 1MC DIGITAL SWITCH*

Iso-Switches are isolating digital data couplers for computer-oriented electronic systems. They offer "universal interface" flexibility, DC-to-1 mc. switching rates, direct compatibility with IC logic elements, and many other advantages including low cost and small size:

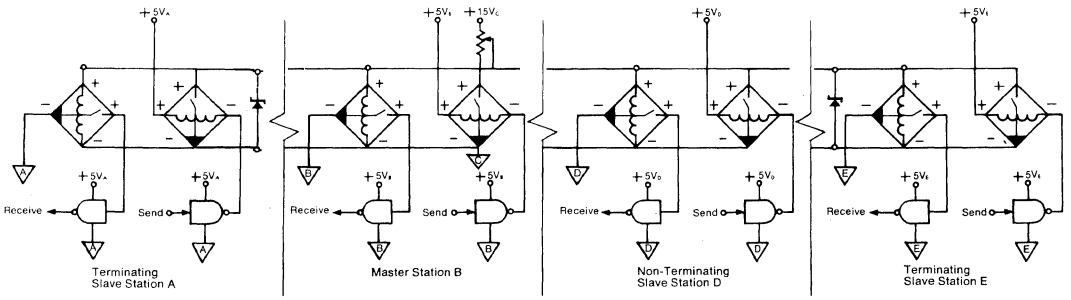
Features: no power supply — operate on signal power only, input isolated from output — no common connections — dual outputs available — isolated, floating packaged for p.c. card mounting — .100 grid packaged for dual-in-line 14-pin IC socket.

Isolating Digital Line Driver — $24.30 per line
200 feet twisted pair at 1 MC
4,000 feet twisted pair at 100 KC

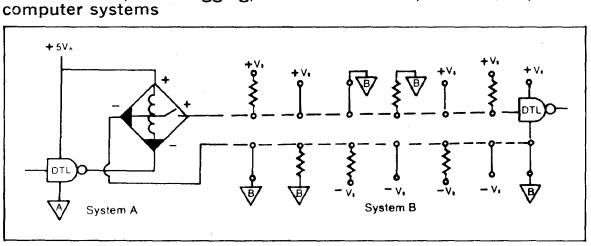
Isolating Digital Line Receiver — $24.30 per line
Eliminates ground loops. Avoids common mode noise problems. Allows DC offset up to 500 V.



Trunk Line Half-Duplex Send/Receive Network — $48.60 each station
Save wire cost. All stations isolated from each other.



Universal Level Shifter/Digital Coupler
Total isolation, Data Logging, data transmission, black boxes, computer systems



Abbreviated Specifications (for further information, contact factory)
Input: DTL compatible — draws 5 ma or approx. 3 DTL loads (singles), 10 ma or approx. 6 DTL loads (duals).
Output: Depending on model, will switch 0 to 60 V max, and 0 to 150 ma max.
Isolation: Input/Output 12pF paralleled with 10^{10} ohms.
Power Supply: None required to operate switch. Runs on signal power only.

Packaging — Two basic Iso-Switch package styles are offered: one is similar to operational amplifier modules (uses .030 dia. pins arranged on a .100 layout grid) and the second is similar to the popular DIP I.C. logic elements — (uses flat pins arranged for direct "plug-in" to 14 or 16 pin I.C. sockets and printed circuit layouts). Signal pins in and out avoid power and ground bus assignments for DTL and TTL. The layout grids on both packages are symmetrical about the center-lines for length and width.

Available On Standard Logic Cards — Available from EECo as Long Line Isolating Driver/Receiver catalog module #D4047, D4048, D4049, D4050, D4051.

Available from Raytheon Computer as Universal Interface and Driver/Receiver catalog #MUI1, MUI2, MUI3, MUI4, MUI5, MUI6.

Available from Iso-Switch Corp. for Scanbe/Applied Development family and for other standard logic card families. Contact factory with your design requirements.

Operating Principles — The Iso-Switch is a solid-state circuit using a high-efficiency oscillator and detector to control the ON-OFF state of an NPN transistor switch (Oscillator ON = Switch ON; Oscillator OFF = Switch OFF). The "black box" function analogy is a single-pole-single throw relay with blocking diodes in the coil and contact circuits; that is, when polarized drive power is fed to the coil (oscillator), polarized load current will pass through the contacts (switch). In dual Iso-Switches, dual isolated output switches are provided, and the analogy of a double-pole - single - throw relay is applicable.

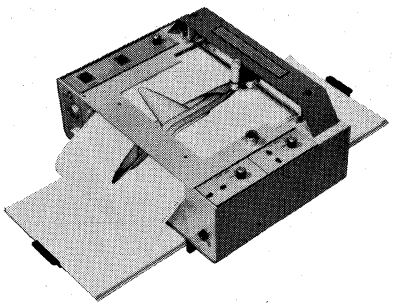
ISO-SWITCH Corp. 2955 Randolph Street, Costa Mesa, California 92626 (714) 540-3244 *Patent Applied For

CØMPLØT™: For Digital

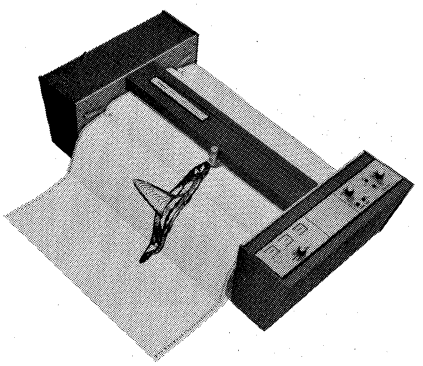
DP-1 Digital Incremental Plotter designed for use online, offline or with time sharing. Produces clean, clear graphic records annotated with alphanumerics at 300 increments/sec. Two step sizes: .01″ or .005″, Z-fold paper moves bi-directionally and is perforated for tear out to file size. Paper is 11″ wide x 144′. Accepts AC or DC coupled inputs. Free 5 year software update service. Request Bulletin #468 DP-1.

Price $3550



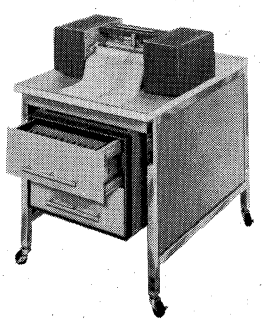
DP-3 Digital Incremental Plotter with 22″ wide plotting surface. Plots at 300 increments/sec. with .01″ or .005″ step size. Step size can be changed in minutes. Z-fold paper 22″ wide x 144′ is perforated for convenient tearout. DP-3 can be used online, offline or in time share mode. Accepts AC or DC coupled inputs. 5 year software plan included. Request Bulletin #868 DP-3.

Price $6400



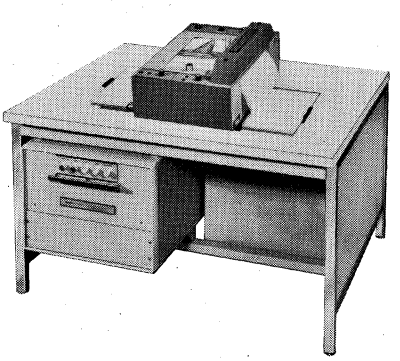
DP-5 Ultra High Speed Digital Incremental Plotter for computer graphics. Plots at a continuous speed of 1200 increments/sec. Conventional (300 increments/sec.) programs can be used at approximately 4 times normal speed. Step size is factory set at .005″ or .0025″. DP-5 features 11″ wide x 144′ long Z-fold paper for operational convenience. May be used online or offline, and accepts AC or DC coupled inputs. Housekeeping software for plotting for 5 years. Request Bulletin #269 DP-5.

Price $11,000



PTC-3 Plotter/Teletypewriter Controller allows graphic plotting at a remote time share terminal. PTC-3 acts as the interface between a 103A2 Data set, or equivalent, or an appropriate acoustical coupler and the teletypewriter and plotter. Incoming data can be accepted normally on the TTY or displayed graphically on the plotter. Controller is available in a desk or housed in a wrap-around case for bench or table mounting. May be used with DP-1 or DP-3. Request Bulletin #468 PTC-3.

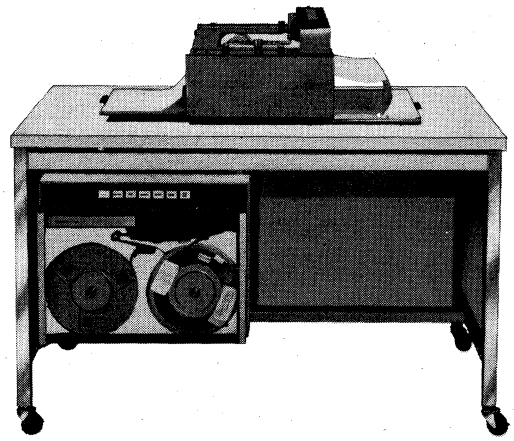
Price $5250



Graphics At Its Best

MTR-1 Magnetic Tape Reader operates with the DP-1, DP-3 or DP-5 to form a complete offline plotting system. MTR-1 is available for 200 BPI 7 track, 556 BPI 7 track or 800 BPI 9 track tape. Unit accepts 8½" reels. Drives 300 step/sec. plotters, DP-1 and DP-3, or 1200 step/sec. plotter, the DP-5. Rewind speed is 75 IPS. Single capstan drive and single edge tape guides minimize tape wear. Entire unit is supplied in a desk allowing convenient surface to set plotter. Request Bulletin #868 MTR-1.

Price 200 BPI, 7 Track
$12,500 (less plotter)



MTR-9 Offline Digital Plotting System offers fast computer plotting with *10 to 40 times less* computer time and tape usage. MTR-9 features Mohawk Data Recorder for I/O capability. Available for 7 or 9 track IBM format and operates DP-5 (DP-1 or DP-3) incremental plotters. New End-Step tm Mode software compresses computer time and tape length by a factor of 10 to 40. High speed search with block selection and many other features. Mohawk 700 or 900 owners need not purchase entire system and save $8000.00. Housekeeping software for plotting for 5 years included in price. Request Bulletin #369 MTR-9.

Price 200 BPI, 7 Track
$21,000 (less plotter)

METRIC Systems Corporation

CUSTOM DIGITAL SYSTEMS FROM STANDARD SUBASSEMBLIES

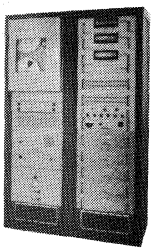
DATA TRANSMITTERS

HIGH DENSITY DATA TRANSMITTER

MODEL 8062

Model 8062 High Density Data Transmitter will accept serial Azimuth, Elevation and Range data words from a radar set. Timing pulses and a parallel time word are obtained from a time code generator.

The transmitter will accept 17 serial bits of Azimuth and Elevation data, a 20-bit Range word and two 36-bit auxiliary words which may be manually set in through the use of front panel switches.

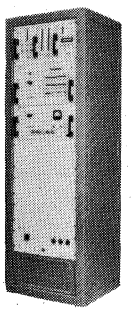


LOW DENSITY DATA TRANSMITTER

MODEL 8031

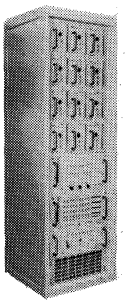
Model 8031 (CASY II) receives digital Radar Acquisition Data from a 7094 computer in the form of three 13-bit data words, 6 auxiliary bits and one sub-synch. The words are parallel dumped into a 45-bit input buffer register, transferred to a shift register and shifted out serially at 480-bits/10 frames per second rate.

The output bits modulate a 1920 CPS carrier to drive a standard 600 ohm telephone line. An internal test generator is provided which is capable of simulating computer commands.



MULTIPLE RADAR DATA TRANSMITTER

MODEL 8023



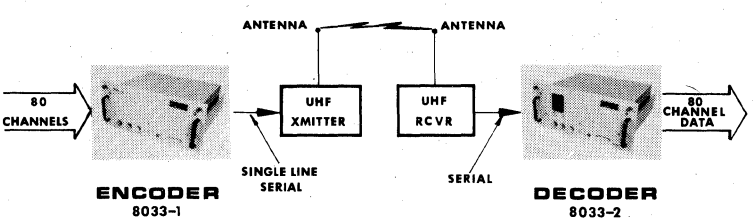
Model 8023

Real Time Data System, Model 8023, is the entire digital data link between 4 AN/FPS-16 radars and a Univac 1218 computer. Interrogate and Shift commands generated by the system are transmitted to the 4 radars. Incoming digital radar coordinate words are tagged with 9-bit identification and 23-bit time information, converted to Univac format, stored, and fed into the computer upon command.

DATA DISTRIBUTION SYSTEMS

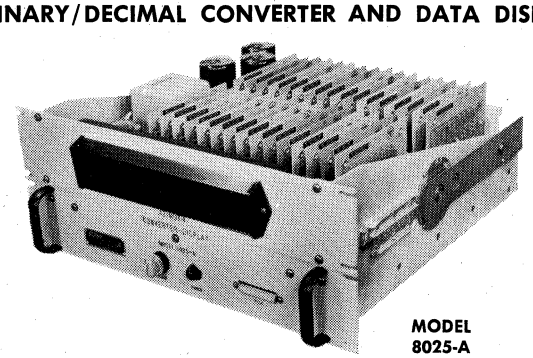
Model 8033 Data Distribution System transmits up to 80 channels of digital data from a centrally located transmitting station to any number of remotely located receiving stations. A complete Data Distribution System consists of a single 8033-1 Encoder unit located at the central transmitting station and a 8033-2 Decoder unit located at each receiving station. The Transmitting Encoder accepts up to 80 separate input data lines and converts to a single output line suitable for transmission by a radio link. The Decoder receives the single line serial information and reconstructs the original 80 channel input data. Each of the 80 data channels may be operated at bit rates as high as 1000 bits per second. The system contains a unique frame format and precision crystal clock to insure that the output data is an accurate reproduction of the input information. The system is all solid-state using Metric Systems' standard plug-in printed circuit cards.

DIGITAL DATA DISTRIBUTION BY RADIO LINK



BINARY/DECIMAL CONVERTERS

BINARY/DECIMAL CONVERTER AND DATA DISPLAY



MODEL 8025-A

The Model 8025-A Binary-to-Decimal Converter/Display is a device for the rapid conversion of straight binary coded words of up to 19 bits to their decimal equivalent and displaying the result.

The unit illustrated can complete the conversions and present a display of up to six digits in less than one millisecond.

The converter requires parallel input, one line for each bit. The input word is scanned from the most significant bit, in turn, to the least significant bit. If a "1" is present, pulses equal to the decimal equivalent of that particular bit are sent to the decimal counter. After all the bit lines have been scanned, the decimal counter will contain a count equivalent to the decimal value of the input binary word. The decimal counter output, which is a 1-2-4-8 code, is converted to straight decimal in a series of NIXIE DRIVERS which drive the indicator tubes.

It can be seen that since each decade is loaded with its decimal equivalent of a binary bit in a parallel fashion, most significant bit first, the time required for a complete conversion is far less than that required by simply counting up the bit equivalent one pulse at a time. Furthermore, since the display is loaded by pulses equal in number to a particular bit equivalent, the bit equivalent is a matter of choice or mathematical relationship making it possible to read the input binary word in any terms, i.e., bits, radians, degrees, minutes, seconds, miles per hour, pounds, ounces, feet per second, etc., in fact, any function that can be quantized.

Metric Systems Corporation produces an assortment of digital equipment ranging in scope from simple logic modules to complex digital instrumentation systems. Digital Systems designed and fabricated by Metric Systems are now in operation on both the Atlantic and Pacific Missile Ranges and most other Aerospace Instrumentation installations. Metric Systems invites your inquiries for solutions to problems involving special applications.

METRIC

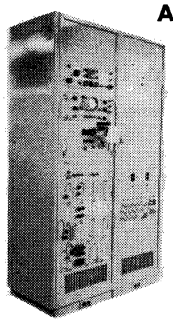
Systems Corporation

CUSTOM DIGITAL SYSTEMS FROM STANDARD SUBASSEMBLIES

TIMING EQUIPMENT

AMR TIMING SYSTEM

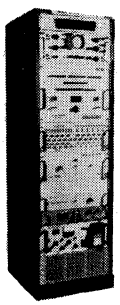
Model 8379



Timing System Model 8379 provides Atlantic Missile Range Time Codes B1, B2, C1, D1, and D5. The system features automatic or manual WWV synchronization, a WWV receiver, a synchronization oscilloscope, a waveform monitoring oscilloscope, a test point selector switch, and a versatile output patch panel. Models designed for ground station, airborne, or shipborne operation are available.

IRIG TIMING SYSTEM

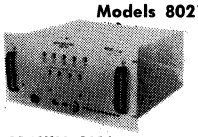
Model 8020



Timing System Model 8020 generates IRIG Codes A, B, C, and D. The system contains receivers for automatic or manual synchronization to WWV, VLF or LORAN "C". Other features are: a Decimal Time Display in Hours, Minutes, and Seconds, an oscillator stability of 1 part in 10^{10} per day, an oscilloscope for waveform monitoring and fine synchronization, and an output panel for patching time codes and pulse rates to any one of 10AC and 12DC line driver amplifiers.

CAMERA TIMING UNITS

Models 8021 & 8024

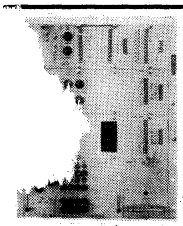


ASKANIA 8021 **BOWEN 8024**

The Askania and Bowen Camera Demodulators extract remote camera control and timing signals from the IRIG Time Code "B" signal. The units provide relay closures initiating shutter operation and high level neon outputs for film track timing. Three cameras may be started or stopped, remotely and independently, using three camera demodulators with channel selector switches set for three different IRIG "B" control function bit channels.

AMR TIME CODE GENERATOR

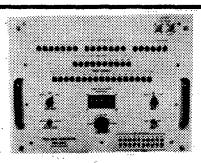
Model 8379-1



Time Code Generator Model 8379-1 is designed for mobile operation and is suitable for either airborne or shipborne use. Relay and neon output amplifiers are provided. The unit generates AMR Time Codes, Numbers B1, B2, C1, D1, and D5. Solid-state modularized construction permits expanding to additional codes by adding appropriate code generator modules.

IRIG TIME CODE GENERATOR

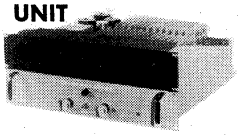
Model 8020-1



Model 8020-1 Time Code Generator simultaneously generates IRIG Codes A, B, C, and D synchronized to within 1 microsecond. Additional features include: Solid-state printed circuit card construction, taperpin wiring, propagation delay correction to better than 1 microsecond, digital time retard and advance, parallel binary coded decimal Time-of-Day, and parallel straight binary Time-of-Day in millisecond increments. Other output formats and pulse rates are available on special order.

TIME DISPLAY UNIT

Model 8729

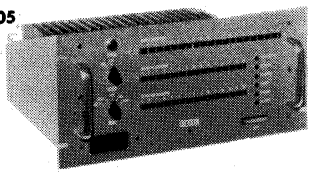


Time Display Unit Model 8729 is a digital code format translator and visual indicator, designed to accept one of several standard time codes and present a decimal time display in hours, minutes, and seconds. The unit is completely self-contained, including power supply and removable indicator section. Solid-state modular construction is employed throughout and provisions are incorporated for driving as many as 12 remote indicator units.

DIGITAL DATA PROCESSING EQUIPMENT

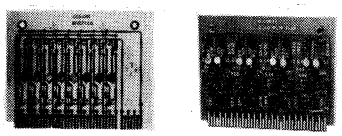
DATA FORMAT CONVERTER

Model 8005



Digital Data Format Converter (DECON), Model 8005, accepts 5 separate digital words in parallel reflected binary code and provides readout information in serial straight binary code. The unit is designed for standard 19-inch rack mounting and is entirely solid-state except for indicator lamps.

STANDARD PRINTED CIRCUIT CARDS

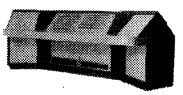


Metric Systems produces a large variety of Standard Printed Circuit modules. Most often used types are stocked for rapid delivery on custom data systems. Printed Circuit modules are fabricated on 41 pin 4½" x 5½" epoxy impregnated fiber glass boards. Each printed circuit logic module is individually inspected for quality of construction and tested for circuit performance.

MANUAL INTERVENTION & DISPLAY SYSTEM

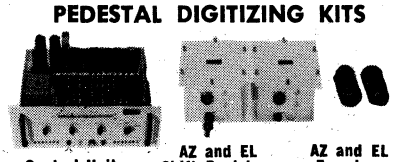
MAID

MODEL 8038



The Manual Intervention and Display System (MAID), Model 8038, was developed to provide a means for controlling the IBM 7094 Computer on a real time basis from a remote location. Real time control and intervention can, in many cases, eliminate the necessity of reprogramming the computer when unaccounted for developments arise. A more flexible control is obtained over the computer by having real time manual intervention.

PEDESTAL DIGITIZING KITS



Control Unit **AZ and EL Shift Registers** **AZ and EL Encoders**

Metric Systems manufactures a variety of digitizing kits for use on two-axis pedestals having accuracies ranging from 13-bits to 21-bits. The kits provide serial data suitable for recording on magnetic tape and a Decimal Display for operator use. Digitizing kits include the following items: Azimuth and Elevation Shaft Angle Encoders, Azimuth and Elevation Data Registers, Data Control Unit, and Azimuth and Elevation Decimal Display Units (optional).

DIGITAL MOVING TARGET SIMULATOR

Model 8007M

Simulator Model 8007M is designed for use with "multiple time around" tracking radars. Late model radars, such as the AN/FPS-16 (V) radiate a number of transmitter pulses before the first distant echo is received. To simulate a distant target, the simulator must be capable of receiving several input pulses before producing the first delayed echo pulse. Conventional simulators are not capable of responding to an input pulse before the delay interval is completed. In Metric's Model 8007M Simulator, as many as eighteen (18) pulses may be propagating through the delay section simultaneously.

AUTOMATIC DIGITAL DATA LOGGER

MODEL 8054

The Automatic Digital Data Logger, Model 8054, performs storage, conversion, parity generation, and logging of binary coded decimal (BCD) data generated by the AN/GJQ-9(V)2 Checkout Sequence Programming Set. The input data to this system is recorded on magnetic tape in an IBM compatible format.

The record length is variable and in the case of manual data, is controlled by manual operation of an "end of record" switch. Record length is limited only by the computer or the interface equipment.

Metric Systems Corporation produces an assortment of digital equipment ranging in scope from simple logic modules to complex digital instrumentation systems. Digital Systems designed and fabricated by Metric Systems are now in operation on both the Atlantic and Pacific Missile Ranges and most other Aerospace Instrumentation installations. Metric Systems invites your inquiries for solutions to problems involving special applications.

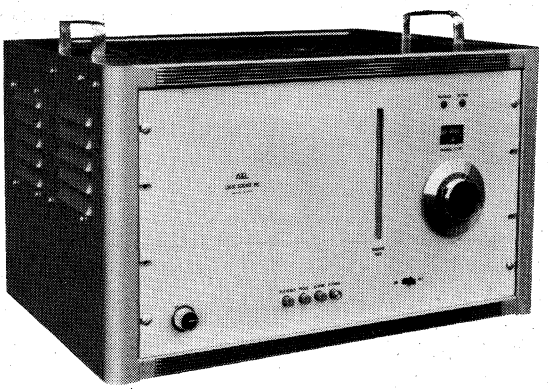
ΛΣI LOGIC SCIENCE, INC.

SERIES 93 multi-channel TAPE RECORDER

- SCHOOLS
- INDUSTRY
- OFFICES



FEATURES

- 30 hours uninterrupted stereo playback/automatic rewind
- Random selection from 81 22-minute programs
- Record capability from tuner, phono, or recorder
- Monitored lapsed-time indication on front panel
- Optional remote-control mode... other access
- Harmonic distortion less than 0.3%
- Signal-to-noise ratio greater than 40 DB
- Stereo separation greater than 30 DB
- Frequency response 50 Hz to 13 kHz

SERIES 70-3000 DIGITAL LOGIC CARDS

- FLEXIBLE—Fundamental I C family with flexibility to meet diverse and complex applications. Both DTL and TTL logic are employed to avoid design limitations.
- SYSTEM DESIGN—Full compatibility for diversity of application and high reliability to guarantee advantageous cost/performance index.
- RELIABLE—Rigid quality control and conservative component ratings to guarantee maximum performance

OCT21	Octal decoder, buffered inputs
SG21	Selector gate/2 sets of 8 2-input gates, 1 to each of 2 outputs
SG22	16 selector gates to a single output line
SRN21 -23	8-channel negative data receiver shaped, 5-, 10-, 20usec
SRP21 -23	8-channel plus data receiver shaped, 5-, 10-, 20usec
STP21	4-channel data xmtr shaped, 5-, 10- 20 usec
UG25	6, universal f/f
UF28	8, universal f/f
VFO22	Variable-frequency oscillator, voltage-tuned
XCG21	Crystal oscillator, with or without crystal
BR21	15-bit register/common clock & DC reset
CDA21	6, 4-input buffer/drivers
CDA31	6, 4-input hi-speed NAND gates
CR31	8-bit clocked counters
DRN21	8-channel data receiver/—signals
DRNS21	Same as above, shaped
DRP21	8-channel data receiver/+ signals
DRPS21	Same as above, shaped
EG21	8, 4-input expander gates
ND21	12, 2-input NAND gates
ND22	9, 3-input NAND gates
ND23	6, 4-input expandable NAND gates
ND24	Same as above, wired for OR
ND31	12, 2-input hi-speed NAND gates
ND32	9, 3-input hi-speed NAND gates
ND33	3, 4-input hi-speed NAND gates
ND35	5, 8-input hi-speed NAND gates

Add 200 to card model designation for full-ceramic integrated circuitry.

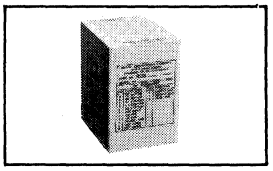
NATEL

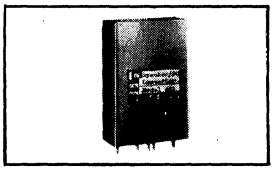
SPECIALISTS IN SIGNAL CONDITIONING AND SYNCHRO CONVERSION

NATEL SYNCHRO TO DC & DIGITAL CONVERTERS



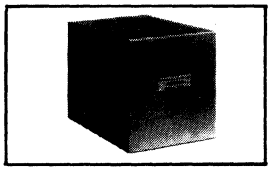
SYNCHRO TO DC CONVERTER MODEL 406

Provides one DC output voltage (either 0 to +5 or +10V) linearly proportional to rotor shaft angle (0 to 360°). Accuracy: ±6 min.



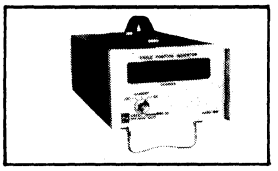
SYNCHRO TO SINE/COSINE CONVERTER MODEL 401*

Provides 2 DC output voltages: one proportional to sine of rotor shaft angle and the other proportional to cosine of rotor shaft angle. Accuracy: ± 3 min.



SYNCHRO TO DIGITAL CONVERTER MODEL 4060

Provides either a 12-bit parallel or a 4-character BCD output corresponding to rotor shaft angle. Accuracy: ± 6 min.



SYNCHRO TO DIGITAL CONVERTER WITH DISPLAY

(Angle Position Indicator)

MODEL 4061**

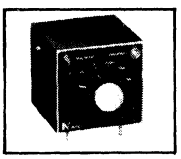
Provides a 4-digit display as well as same outputs as Model 4060. Accuracy: ±6 min.

GENERAL SPECIFICATIONS FOR ALL ABOVE MODELS: (1) All accept standard 3-wire synchro or 4-wire resolver inputs; 11.7, 57, or 90 VRMS, 400 or 60 CPS. (2) All are solid-state. (3) Tracking Speed: 7000° per sec. (4) Five to fourteen options available for each model resulting in maximum flexibility of models for your application.

*Also available Model 411, same as Model 401, but insensitive to reference voltage and frequency variations. **Model 4062 dual speed (1:36) also available.

NATEL DEMODULATORS & MODULATORS

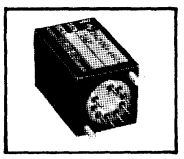
AMPLIFIER-DEMODULATOR (Phase Sensitive)



SERIES	LINEARITY & RIPPLE
D6006	.5%
D7006	.1%
D8006	.05%

INPUTS: From 0 — 1 mv to 0 — 25v (Multi-range units also available)
OUTPUTS: From 0 to ±1v to 0 to ±10vdc
REFERENCE: From 5 — 115v (fixed) @ 60, 400, 800, or 1000 Hz
NULL & GAIN STABILITY: To 20uv/°C
INPUT IMPEDANCE: 500K
FREQUENCY RESPONSE: To 20% of ref.

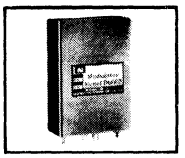
DEMODULATORS (Phase Sensitive)



SERIES	LINEARITY & RIPPLE
D500	.5%
D600	.1%

INPUTS: From 0 — 1v to 0 — 50v
OUTPUTS: From 0 to ±2.5v to 0 to ±10v
REFERENCE: From 5 — 115v (fixed) @ 60, 400, 800, or 1000 Hz @ 100 mw power max.
NULL OFFSET: ±.02%FS (D600); ±.1% (D500)
FREQUENCY RESPONSE: ±3 db to 20% of carrier (D500); to 10% of carrier (D600)
ISOLATION: Input, output & reference are isolated from each other by 50 megohms

MODULATORS (Phase Sensitive)



SERIES	LINEARITY
D6003	0.5%

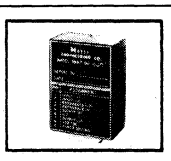
INPUTS: From 0 to ±10v to 0 to ±100vdc
OUTPUTS: From 3.5 to 30 vrms
OUTPUT WAVESHAPE: Sine
DISTORTION: 2% max.
MODULATION INTELLIGENCE: 20% of carrier
NULL: .1% of full scale output p-p
GAIN STABILITY: .005%/°C
OUTPUT POWER: Models up to 5 watts available

NATEL TRANSDUCER AMPLIFIERS

AC TO DC TRANSDUCER AMPLIFIERS

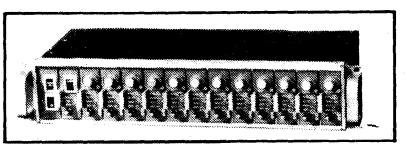
(Carrier Amps)

SERIES 800



INPUTS: From 0—2.5 to 0—100 mv rms.
OUTPUTS: From ±1v to ±10vdc or ±10 ma.
LINEARITY & RIPPLE: ±0.5%
GAIN ADJ.: 4:1 or 5 positions.
SHORT CIRCUIT PROOF.

CARRIER AMPLIFIER SYSTEM



For airborne strain gage or pressure measurements. Designed to accommodate half or full bridge and LVDT type transducers. Calibration and bridge completion networks are provided internally. Provides 5 vrms into ten 120 ohm strain gage bridges, plus powering the carrier amplifier demodulators. The amplifier demodulators provide four gain ranges, i.e., 1 mv to 100 mv input provide ±1 volt or ±1 madc full scale output.

This is typical of the many systems Natel has designed. Send us your specs for a thorough analysis of your requirements.

PROMPT DELIVERY AVAILABLE ON ALL MODELS

For new complete catalog or further data on your specific application, consult the factory (Attn: Phil Diamond, V.P. Marketing)

CUSTOM UNITS built to your precise specifications may be provided by NATEL based on past, successfully proven designs. SEND US your complete specifications for a prompt and thorough technical analysis and quotation.

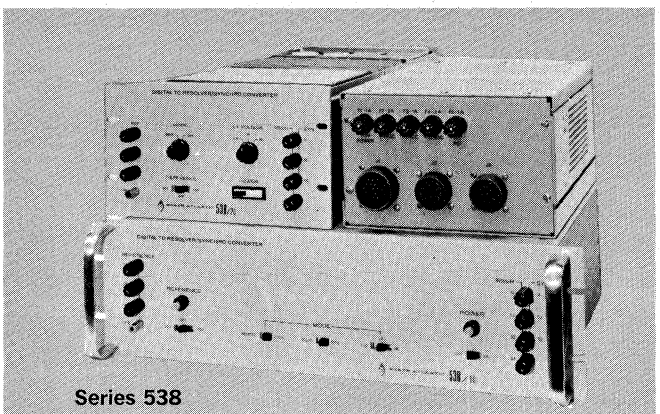
PRECISION DIGITAL-TO-RESOLVER SYNCHRO AND RESOLVER/SYNCHRO-

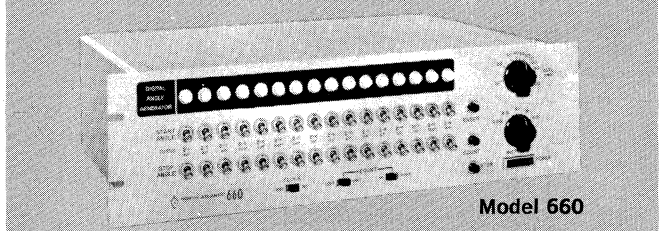
NORTH ATLANTIC *industries, inc.*

Digital To Resolver/Synchro Converters

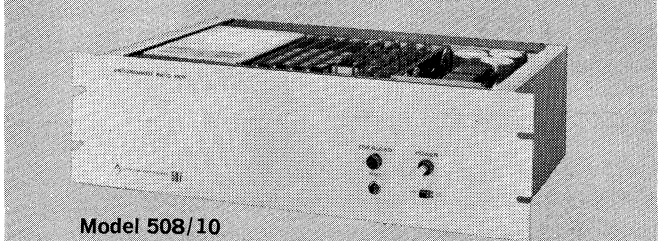
These units provide a complete high-speed interface from digital to analog systems, enabling precise simulation of resolver/synchro data. All converters feature semi-conductors, integrated circuits, and precision trigonometric transformers. Basic models use 400 Hz as the signal data frequency, with optional operation at other frequencies from 50 Hz to 10 KHz. A variety of system-oriented options are available in each model, and multi-speed or multi-channel systems can be provided.



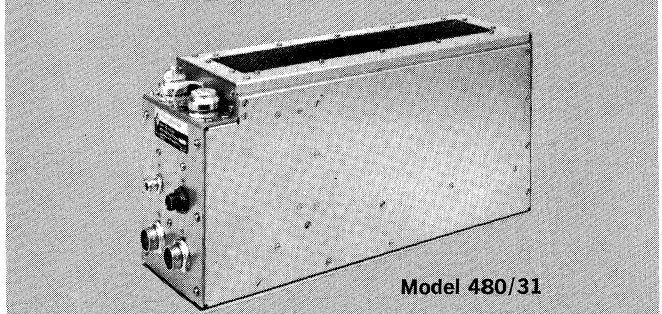
Series 538



Model 660



Model 508/10



Model 480/31

Series 538—Digital-To-Resolver/Synchro Converters

The Series 538 D/R-S Converters offer 9- to 17-bit single-speed resolution with digital input as binary angle. The input register is strobed and the digital data is then held until the next strobe. The internal logic selects the appropriate trigonometric transformer taps, thus simulating actual 4-wire resolver or 3-wire synchro data at the selected line-line voltage. Built-in protection circuits are provided for power-line voltage and frequency transients, overload and short-circuit. The Model 538/30 "shoebox" unit provides 9- to 13-bit resolution with 6-minute accuracy and the Models 538/10 (full-rack) and 538/20 (half-rack) converters provide 14- to 17-bit resolution with better than 1-minute accuracy. Options include 50 Hz to 10 KHz signal data frequencies, special input logic and multi-speed outputs. Series 536 D/R Converters and Series 537 D/S Converters are also available as single-mode units.

Model 660—Digital Angle Generator

The Model 660 Digital Angle Generator provides digital angle input data and data strobe signals to the Series 538 D/R-S Converters. Useful in semi-automatic test system applications, static data angles and angular data rates from 1 arc-minute/second to 2000°/second can be generated from an internal or an external clock. Typical optional features include 2-speed digital data output and start/stop angle.

Model 537/31—MIL-T-21200 D/S Converter

Designed and qualified to MIL-T-21200, the Model 537/31 Digital-To-Synchro Converter accepts binary inputs, provides solid-state-switched, precision trigonometric transformer conversion to 90 V and 11.8 V line-line synchro signals to an accuracy better than 50 arc-seconds with built-in short-circuit protection. Computer-related functions include "acknowledge" pulse, "busy" pulse, and 1 MHz clocked input serial data. Design MTBF of 13,000 hours.

Digital-To-AC-Converters

Model 508/10—Digital-To-AC Converter

In automatic test systems, this solid-state-switched, a-c ratiometric converter can be directly programmed from a punched card reader, a paper tape reader, or a digital computer. Featuring BCD digital data input with 10-microsecond data acceptance, the Model 508/10 400 Hz D/AC Converter has a ratio of zero to unity with 5-decade (BCD) resolution and is accurate to .005% (50 ppm). Also available is the Model 508/11, which accepts a pulse train input and provides an a-c ramp output. Higher accuracies, different resolution, and inversion mode are available as specific options.

A/D-D/A Converters

Model 480/31—A/D-D/A Converter

Designed and qualified to MIL-T-21200, the Model 480/31 A/D-D/A Converter is a state-of-art device incorporating 16 multiplexed A/D conversion channels and 11 D/A channels. The A/D Converter has bipolar ranges up to 32 vdc with measurement accuracy to 0.02% full scale. The D/A Converter provides non-inverted and inverted ratio conversion with 25 vdc output and a maximum conversion time of 600 msec, with accuracy to 0.01%. Computer-related functions include channel selection and read command. Featured are a self-test mode and module fault isolation. Design MTBF of 14,000 hours.

TO-DIGITAL COMPUTER-INTERFACE, AND ATE EQUIPMENT.

Resolver/Synchro To Digital Converters

These converters provide a complete high-speed interface from analog to digital systems through continuous conversion of analog resolver and synchro data into digital data at angular velocities up to 20,000°/sec. High-speed continuous tracking is achieved through use of a unique electronic servo technique which provides velocity constants to 200,000 sec^{-1} and eliminates any data staleness errors. These 400 Hz converters feature semiconductors, integrated circuits, and precision trigonometric transformers. A wide selection of application-oriented options including operation at other frequencies from 50 Hz to 10 KHz are available in specific models. Multi-speed and multi-channel systems are also available.

Model 545—Automatic Angle Position Indicator

This instrument is offered with .01° resolution and accuracy or with .001° resolution and 10-second accuracy for all line-to-line voltages from 11.8 to 90 V at 400 Hz. The digital angle is both displayed and available in BCD format at the rear connectors. Remote or front-panel selection of resolver or synchro input, line-line voltage range and operating mode. Operating modes selected as Track (the instrument continuously follows the input data), Update (the instrument tracks for 200 msec, then holds until receipt of another command), and Auto-Update (repetitive track/hold sequences) with a Variable Display Time of .5 to 3 seconds. Optional remote readout, analog d-c null output, data freeze command, signal frequencies 50 Hz to 4.8 KHz, multiplexed and multi-speed units.

Model 546/31—Synchro-To-Digital Converter

Designed and qualified to MIL-T-21200, this model converts 11.8 V line-line 400 Hz synchro signals to 16-bit binary angle data on 10-multiplexed channels. The accuracy is .01° with tracking speed to 20,000°/second and velocity constant of 200,000 sec^{-1} with input channels programmed by logic level address signals. System-related functions include self-test at 60° increments, and module fault isolation. Computer-related functions include "read command," 1 MHz clocked output serial data, "data ready" and "acknowledge" signals. Design MTBF of 10,000 hours.

Building Block 54

A special version of the Model 545 designed as a part of the GPATS (General Purpose Automatic Test System) system. It operates from 50 Hz to 5 KHz, includes module fault isolation, and provides digital output without display.

Angle Position Indicators

High-speed performance 400 Hz servos for field test and production test measurement of synchro and resolver transmitters. The half-rack API-8025 provides accuracy of 6 arc minutes, repeatability of 30 arc seconds, and slew speed of 25°/second with a digital readout display. Optional retransmit components, dual-mode, and two-speed operation. Also available for operational use, 2" and 3" diameter units.

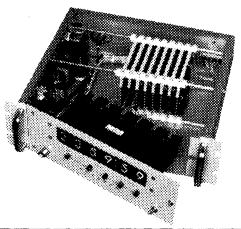
PARABAM

DIGITAL CLOCKS

SOLID STATE—ELECTROMECHANICAL

For computers, data logging, missile launch count-down display and control. Multi-channel digital time programming for control of automatic processing and radio/TV broadcasts. Variety of logic outputs compatible with most data readout devices. Single or multiple remote glow-tube or projection-type time displays.



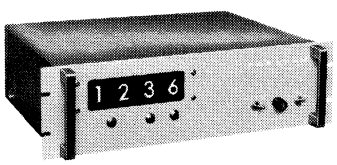
SOLID STATE CLOCKS

For countdown and/or elapsed time, time-of-day. Combined calendars provide day-of-year or month-day. Various time bases, time data output formats and displays available.

features:

- All silicon semiconductors.
- Plug-in circuit modules.
- Front panel access.
- Options: Automatic transfer to battery operation during line power failures. Strobed logic output. Special timing pulses. Sidereal time.

Write for Tech. Bulletin No. 465-22A



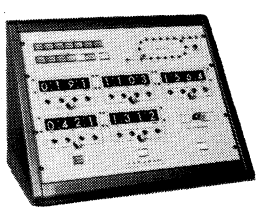
ELECTROMECHANICAL DIGITAL CLOCKS

Time resolution down to one second. Single or multiple isolated contact closure outputs in 10-line decimal, teletype code, and/or any BCD format. Wide choice of number and type of time displays.

features:

- Time Synchronized to line frequency or external pulse input.
- Countdown/elapsed time or real time.
- Outputs interface readily with digital systems.
- Special time-controlled pulse closures available.

Write for Tech. Bulletin No. 1066-27



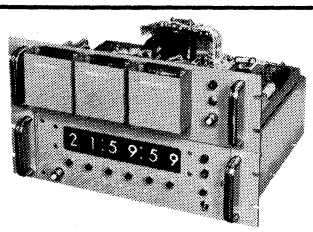
AUTOMATIC RACE TRACK TIMING SYSTEMS

Automatically measures and displays the precise quarter mile times and finish time for all types of races and for all race distances. Designed for operation by non-technical personnel.

features:

- All solid state electronics.
- For track, turf, and harness races.
- Output drives two tote board display units.
- Automatically programs photocells for selected race distances.

WRITE FOR DESCRIPTIVE LITERATURE



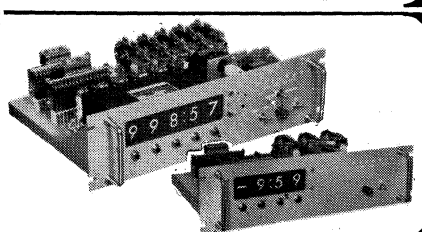
DIGITAL TIME PROGRAMMERS

Standard units accept time data inputs from solid state or electromechanical digital clocks and provide any number of precisely timed signal outputs as pre-selected by the wiring of one or more program plugs.

features:

- Programmed time interval accuracy well within the clock resolution.
- Display of output channel numbers and status available.
- Complete program changed in seconds by replacing program plugs.

Write for Tech Bulletin No. 566-24



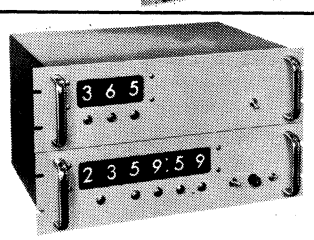
COUNT/DOWN, COUNT/UP DIGITAL CLOCKS

Used in missile launch, testing, radio-television — anywhere time is counted down, then afterward elapsed time is observed.

features:

- Available with digital logic output or for programming and recording.
- Plus/minus count in most time ranges and resolutions.
- Projection type or Nixie displays.
- Standard system operates up to 40 displays.

Write for Tech. Bulletin No. 162-16A



DIGITAL CALENDARS

Provide nonambiguous contact closures in parallel form corresponding to date in Month-Days (months from 01 to 12, days from 01 to 31) or Day-of-the-Year (from 001 to 365). Used in data logging, process control or other date of time oriented systems.

features:

- May be ordered in Month-Day or Day-of-Year Models.
- Outputs in decimal or various codes of binary coded decimal.
- Projection type or Nixie displays.
- Switch for leap year correction.

Write for Tech. Bulletin No. 1066-29

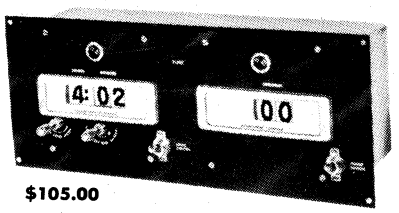
TYMETER GRADINETIC®

DIGITAL READ-OUT CLOCKS
ELAPSED TIME COMPUTERS
INTERVAL, COUNT DOWN, IMPULSE TIMERS

Featuring:
- *FRONT PANEL MOUNT*
- *DESK OR BENCH USE*
- *DIGITS RESETTABLE INDIVIDUALLY*

CSA and UL approved motor & cord



$105.00

DIGITAL CLOCK SECOND BY SECOND

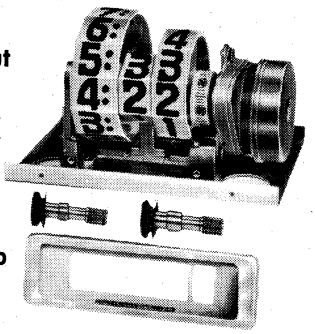
Time registered on 5 polygonal drums. One Hour drum, one 10-minute drum, one minute drum, two seconds drums. 4½"h, 12"w, 3¼"d. Wt. 6 lbs. Anodized metal dustproof case.

#110-12H ..... **12 Hour**
#110-24H ..... **24 Hour**

DIGITAL CLOCK MOVEMENT

6-Digit Read Out

3" high
5½" wide
3½" deep
Wt. 2 lbs.

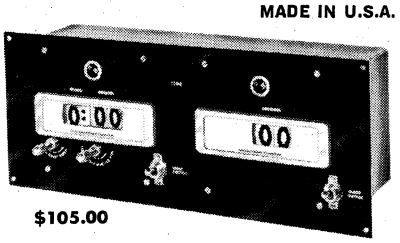


$16.50

Consists of Tymeter Digital Clock Movement, mounting bracket, window escutcheon assembly, 2 time reset assemblies

#130-12H ..... **12 Hour**
#131-24H ..... **24 Hour**

MADE IN U.S.A.



$105.00

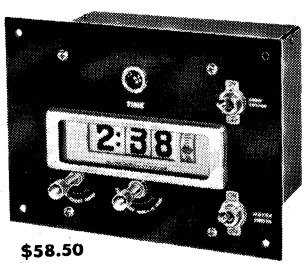
ELAPSED TIME DIGITAL COMPUTER

6 DIGIT READ OUT

Automatically calculates and registers elapsed time in hours, 10 minutes, minutes and seconds. Second by second. 4½' h, 12" w, 3½" d. Wt. 6 lbs. Stop and Hold Control. Count down and Count up.

#115

Available In:
30 Minute **12 Hour**
60 Minute **24 Hour**



$58.50

DIGITAL CLOCK

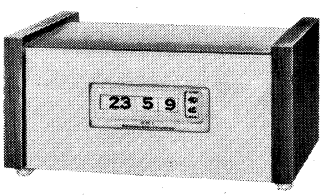
12 and 24 hour 6 digit read out . . . minutes, 10 minutes and hours. Rotating visual 1 RPM calibrated seconds drum. 4½"h, 6"w, 3¼"d. Wt. 3½ lbs. Anodized metal dustproof case.

#160-12H ..... **12 Hour**
#161-24H ..... **24 Hour**

24-HOUR DIGITAL READ OUT CLOCK

Calculates time automatically. Stainless steel case with walnut wood ends. 3⅞"h, 7¾"w, 3¾"d. Wt. 3 lbs. 110V 60 Cy. AC.

#920-24 Hour **$25.50**
#920-12 Hour **$24.50**

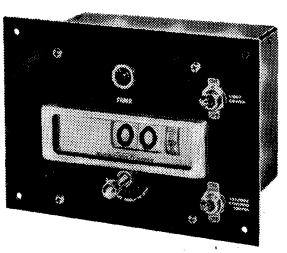


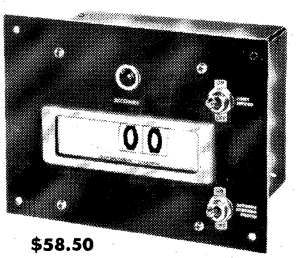
ELAPSED TIME DIGITAL COMPUTER

Stop and Hold control. Automatically computes and registers minutes, 10 minutes, hours. Rotating 1 RPM calibrated seconds wheel. Anodized metal dustproof case. 4½" h, 6" w, 3¼" d. Wt. 3½ lbs.

AVAILABLE
60 Minutes • 12 Hour • 24 hour

#162 .....**$58.50**



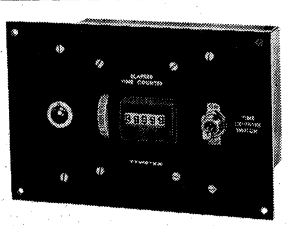


$58.50

ELAPSED TIME DIGITAL COMPUTER

Automatically calculates and registers elapsed time in seconds. Second by second 2 digit read out . . . 00-59. 4" h, 6" w, 3¼" d Wt. 3½ lbs. Anodized metal dustproof case. Stop and Hold Control. Count down and count up.

#10-60S.....**60 Seconds**



ELAPSED TIME COUNTER

Digits resettable individually. Stop and Hold Control. Time Control switch, Anodized metal dustproof case. 3½" h, 5½" w, 3¼" d. Wt. 3½ lbs.

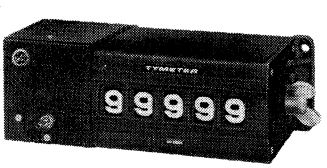
RANGES:
Hours .....99,999 hours
Hours, and tenths of hours .....9,999.9 hours
Minutes .....99,999 minutes
Minutes, and tenths of minutes .....9,999.9 minutes

#120 .....**$38.50**

#96—LARGE FIGURE COUNTER....$87.50

Digits ¾" high, 19/32" wide. Digits resettable. Stop and Hold Control. 10½" w, 3½" h, 4½" d. Wt. 5½ lbs.

RANGES:
Seconds .....99,999 seconds
Tenths of minutes 9,999.9 minutes
Minutes .....99,999 minutes
Tenths of Hours.....9,999.9
Hours .....99,999 hours

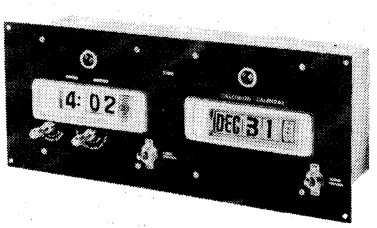


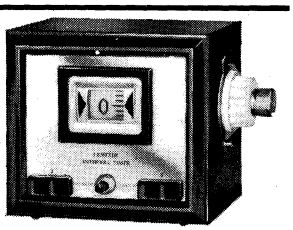
CALCHRON CALENDAR and *TYMETER DIGITAL CLOCK

Digits resettable individually. Anodized metal dustproof case, 4½" h, 12" w, 3½" d, Wt. 6 lbs.

* #125-12H — 12 Hour
* #125-24H — 24 Hour

#125 .....**$125.00**





DIGITAL TIMER
for All-Purpose Laboratory & Industrial
TEST TIMING

Adjustable reset stop to enable rapid repeat timing. Closes load circuit during OR after a preset interval. Buzzer sounds at end of interval. 120V 60 cy. AC. Ranges available: 57 seconds by seconds, 57 minutes by minutes, 11.5 hours by ¼ hours, 23 hours by ½ hours, 57 hours by hours. 5"h, 5½"w, 3½"d. Wt. 3½ lbs.

#90 .....**$25.00**

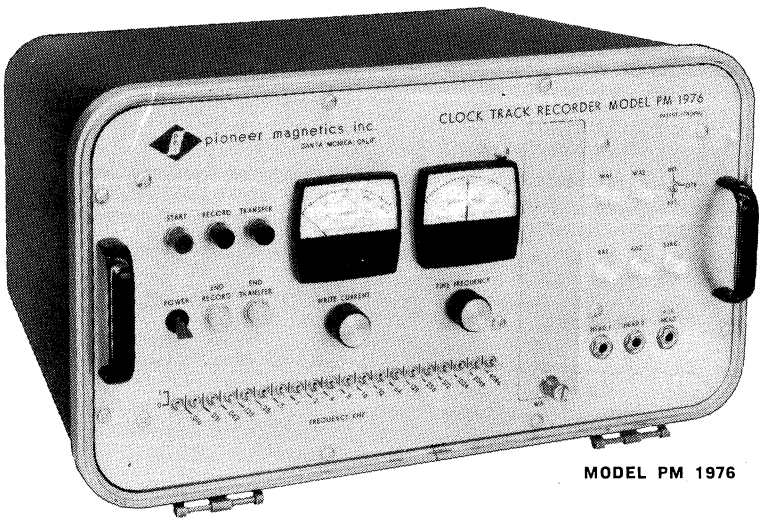
COMPUTER TEST EQUIPMENT AND POWER CONVERTERS

computer clock track recorder

A versatile, accurate instrument which places precision clock origin pulses and tracks on disc and drum computer memories.



MODEL PM 1976

FEATURES:

- Applies perfect track with **no** measurable closure error.
- Easy and quick. Save time in setup and production.
- No other equipment required.
- Automatic push-button operation.
- Portable instrument.

SPECIFICATIONS:

OUTPUT FREQUENCY: up to 5MHz.
NUMBER OF BITS: up to 524,287.
RECORDING: Ferranti or NRZ.
CLOSURE ERROR: not detectable.
JITTER: less than 10 nanoseconds, bit to bit.
DISC/DRUM SPEED: 600 rpm to 24,000 rpm.
INPUT LEVEL: down to 15MV p-p.
WRITE CURRENT: 10 to 200MA.
PROGRAMMING: front panel selection.
OPERATION: push buttons, illuminated.

APPLICATIONS:

- Computer discs and drums.
- Servo systems — Tachometers, constant speed drives.
- Laboratory — Frequency multiplexing and filtering of pulse trains.

computer power supplies

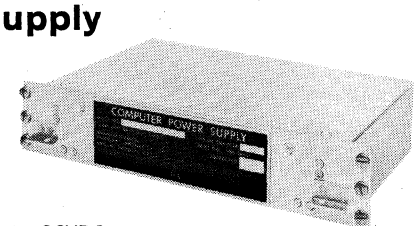
P.M.I. specializes in military and industrial power supplies for computer applications. A wide variety of inputs, AC or DC, are accommodated with standard designs. Multiple output regulators are modular and isolated. Full military specifications and quality control are provided.

FEATURES:

Minimum size and weight
Minimum cost
Maximum efficiency
Maximum reliability

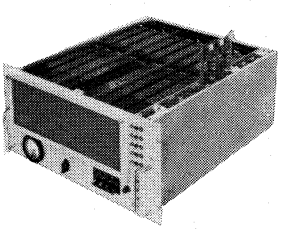
airborne computer power supply

MODEL PM 1854



INPUT: 21VDC to 36VDC.
DC OUTPUTS: 4 isolated outputs, 116 watts total.
MECHANICAL: Size: 64 cubic inches.
Weight: 3 pounds.
QUALITY: All components TX level.
APPLICABLE SPECIFICATIONS: MIL-E-5400, MIL-I-6181, MIL-STD-826, MIL-STD-810.
ENVIRONMENT: Manned aircraft, per MIL-T-5422.
Ambient Temperature: −55°C to +100°C.

9-channel computer power supply



MODEL PM 1779C

INPUT: 120VAC L-L, 3ϕ, 400Hz.
D.C. OUTPUTS: 9 isolated channels with remote sensing. 810 watts total.
QUALITY: Shipboard service.
CONSTRUCTION: Modular design for commonality of parts and rapid service.

RAYTHEON COMPUTER M-SERIES IC ANALOG & DIGITAL MODULES

M-Series Integrated Circuit Digital Modules... a module system, not just a line of circuits.

With Raytheon Computer's new M-Series Integrated Circuit Digital Modules, the digital designer has for the first time a true module system, not just a line of circuits. The modules themselves, the connectors, cases, power supplies, and power distribution scheme have been so thoroughly engineered that the designer can concentrate on his digital data problem, not the mechanical details of putting it together and making it work.

The M-Series logic system offers the user these specific advantages:

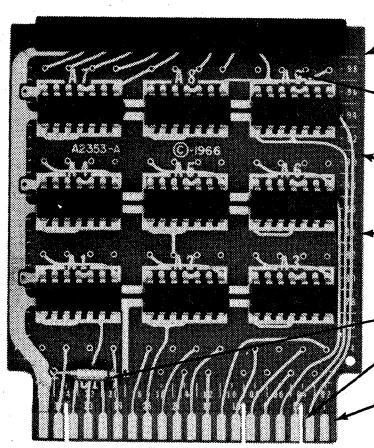
1. Complete complement of digital and analog modules, cases, power supplies and accessories. Over 80 types of cards available with DTL or TTL integrated circuits.
2. Module connectors unitized in groups of 10, 30 or 40 on aluminum plates; eliminates handling and mounting of separate connectors. Mounting plate is used as system ground plane to minimize noise.
3. Power and ground distribution in module cases simplified by use of laminated bus bars. Power wiring errors eliminated and assembly time reduced.
4. Point-to-point wiring minimizes capacitance.
5. Connector and hardware configurations designed for automatic wire wrapping—provide fast system delivery, high reliability, low cost and wiring consistency.
6. MINIVERTER, MINI-DAC, and other analog instruments.

In addition, Raytheon Computer offers complete technical documentation such as Application Notes which include useful "Hints and Kinks" for the systems designer, recommended tools and general information about the M-Series line.

In line with the M-Series system concept, Raytheon Computer offers complete backup and support in the following areas:

1. M-Series on-the-shelf stock of approximately $250,000.00.
2. Stock of wire wrap kits with all tools necessary.
3. Automatic wire wrap service available to all customers.
4. Assistance from field or factory application engineering staff.
5. Custom analog or digital modules for special requirements.

GENERAL SPECIFICATIONS *See catalog SP-230 for complete specifications.*



Compact optimum form factor (3 x 3.65 inches).

All components and connector pins identified by silk screen call-outs.

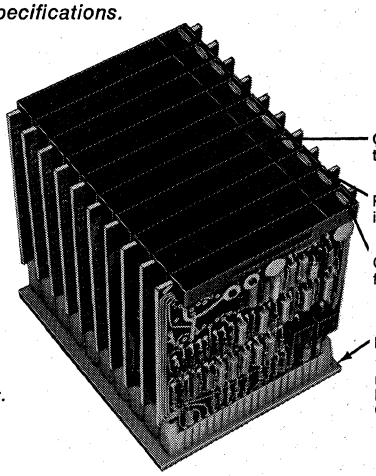
Coordinate system quickly identifies components for trouble shooting.

One-sixteenth inch thick glass epoxy, flame retardant FR 4 material exceeding MIL-P-13949.

Power supply decoupling on all modules.

Polarizing key slots prevent insertion into wrong connector.

Etched connector with 40 pins; Four reserved for power.



One ground and eight signal test points in module handle.

Plastic handle makes module insertion easy.

Color-coded module function.

MINIVERTER—
10-bit ADC, 16-channel multiplexer and sample and hold on 10-connector block. Other versions available.

ELECTRICAL AND ENVIRONMENTAL

Type of IC Logic:
DTL Dual-in-Line for medium speed applications.
TTL Dual-in-Line for high speed applications.

Input Logic Levels:
Logic "1": +2.0 to +5.0 Volts
Logic "0": 0 to +0.95 Volts

Output Logic Levels:
Logic "1": +2.5 to +5.0 Volts
Logic "0": 0 to +0.5 Volts

Noise Rejection: 1 Volt, typical

Power Supply Voltage:
+5V ±10%
−5V ±10% (used as bias for discrete component modules)

Temperature:
Operating: 0°C to +70°C
Storage: −55°C to +125°C

UNIT CIRCUIT LOADING

Input loading and drive capability for M-Series modules are specified in "unit loads" to simplify calculation of total loading on a driver circuit fanned out to several different circuit types.

A unit load is the current required to drive the input of a NAND Gate (approximately 1.3 ma.). Since NAND Gates require no input current when all inputs are at a logic "1" (+5 V), the unit load applies only to the logic "O" (Ov) condition at a gate input.

MECHANICAL

Physical Size
Width: 3.0 inches
Length: 3.65 inches (including handle)
Mounting: 0.375 inch centers

Connector: Etched-type 40 pin, gold-plated over nickel. Terminations spaced on 0.125 inch centers for insertion into Elco series 6303 Connector.

Board Material: 1/16 inch thick glass impregnated, flame retardant, blue epoxy Type FR 4 per MIL-P-13949.

Conducting Material: 2 ounce copper

Conducting Width: 0.020 inch nominal*

Conductor Spacing: 0.010 inch minimum

Test Points: 8 signal test points and 1 ground test point

*Ground and power conductors are a nominal ⅛ inch.

CONNECTORS

Mating connectors for the M-Series modules are Elco series 6303 mounted on a clear anodized aluminum plate. For easy pin identification on the reverse side, the plate is silk-screened with a unique checkerboard pattern. Connector assemblies come with 10, 20, 30, or 40 connectors each.

The Series 6303 connectors meet the applicable minimum performance requirements of MIL-C-21097. Copies of the Elco test report are available on request.

RAYTHEON COMPUTER ANALOG INSTRUMENTS

Raytheon Computer's analog and digital integrated circuit modules come in three packages to offer the systems engineer the most useful range of high performance data acquisition and conversion instruments at low cost. Typical is the MINIVERTER,™ which starts with 16 channels of multiplexing, a sample-and-hold amplifier and an analog-to-digital converter on a 10-module connector block. A/D and D/A converter resolution ranges from 10 to 12 bits binary/13 bits BCD, with speeds to 100KHz. Multiplexing, sample-and-hold and data distribution functions are available as individual modules.

1. M-Series IC Modules. You can order individual modules and put them together yourself. There are nearly 80 analog and digital modules, plus compatibly-engineered cases, hardware and accessories. All modules have important features like ground and signal test points in handles, color-coded function decal, 40-pin etched connector, etc.
2. MINIVERTER, ADC or DAC, assembled, wired, tested and mounted on 10, 30 or 40 connector block. You supply external DC power, mounting case. We call it an -04 configuration like the MINIVERTER shown here.
3. Complete analog instrument mounted in a 80 module case with options like channel selection controls, indicator lights, etc. We call this an -06 model, like the MINIVERTER system shown here.

The newest instruments available in this package are a series of high speed MINIVERTERs which combine up to 64 input channels, a sample-and hold-amplifier and either a 100KHz, 150KHz or 200KHz 12-bit analog-to-digital converter.

The Modular MULTIVERTER III®

Buy only what you need.

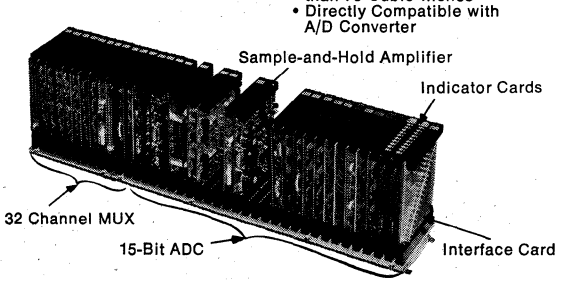
High Performance ADC
- Over 100KHz Conversion Rate
- 15-Bit Resolution
- 0.01% Accuracy

State-of-the-Art Sample-and-Hold Amplifier
- 2 Microsecond Settling Time
- 50 Nanosecond Aperture
- Unique Ground Isolation Network

Modular Construction
- Requires less than 200 Cubic Inches
- Mounts in Your Chassis or Ours
- Modular 32-Channel Multiplexer Option
- Built-in 16-Bit Indicators
- Uses M-Series Modules

Operates From DC Power Only
- Less Than 25 Watts Required
- Fast Warm-up—Less than 60 Seconds

State-of-the-Art Multiplexer Switch
- MOS Field Effect Switch
- High Speed—Less than 2 Microseconds to Switch and Settle
- 32 MUX Channels in Less than 70 Cubic Inches
- Directly Compatible with A/D Converter



RAYTHEON COMPUTER • 2700 SO. FAIRVIEW ST., SANTA ANA, CALIFORNIA 92704 (714) 546-7160 TWX 910-595-1570 RAYTHEON

RAYTHEON COMPUTER MULTIVERTER®

AN INTEGRATED CIRCUIT MULTIPLEXER, SAMPLE-AND-HOLD AMPLIFIER AND ANALOG-TO-DIGITAL CONVERTER IN A SINGLE CHASSIS.

Analog Input

Channel Capacity (16 channels/card)	96 channels w/o attenuators 48 channels w/attenuators
Crosstalk	80 db with 1K source at 400 cps①
Aperture Time	50 nanoseconds
Input Range	±10 volts full scale w/o attenuators ±100 volts full scale w/attenuators
Input Impedance (w/o attenuators)	100 meg. ohms min. for selected channel 1000 meg. ohms min. for unselected channel
(w/attenuators)	20K ohms (±0.02%) for either selected or unselected channels
Max. Source Impedance	1000 ohms for specified performance w/o attenuators
Max. Voltage Overload②	100% full scale w/o attenuators 25% of full scale w/attenuators

Performance

Throughput Rate	See ADC Table
Accuracy at DC	
Linearity	0.01 ± ½ LSB
Long Term Drift	0.01% Typical
Temp. Coefficient	10 ppm/°C max.
Crosstalk	80 db with 1K source at 400 cps①
Voltage Ref. Stability	0.001%

Typical Accuracy at 25°C will be within 0.02% (± ½ LSB) of full scale.

Digital Inputs

Logic Level (Input)	Binary "1" −6 volts to −12 volts Binary "0" 0 volts ±1 volt
Start Line (1 Line)③	Z_{in}=3K to −15 volts
Channel Address (7 Lines max)	Z_{in}=1.8K to −15 volts
Mode Selection (2 Lines)	Z_{in}=3.9K to −15 volts
Modes of Operation	Sequence, Digitize Only, Random Address, Manual

Digital Outputs

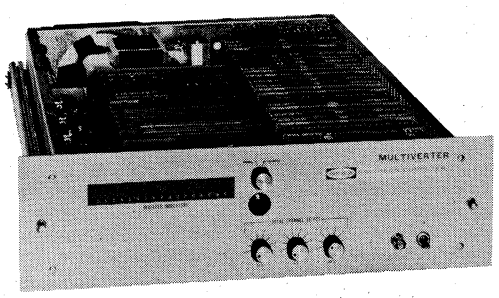
Parallel Data and "Busy"	Standard: Logic "1"	$\frac{V\ ext}{2}$
	Optional: Logic "0"	0 volts
	Logic "1"	0 volts
	Logic "0"	$\frac{V\ ext}{2}$
Frame Sync	3.9K to −15 volts	
Clock Output	Transformer coupled 8 volt pulse of 0.2 μsec. duration (Isolated Secondary) Z_o=10 ohms I_{max}=20 m.a.	
Serial Output	Same as clock output. A pulse is present every time that a Binary "zero" is generated during the conversion.	

Temperature

Temperature Range	0 to 50°C For extended Ranges See④
Warm up Time	10 min. to rated accuracy
Cooling	Internal-muffin fan
Temperature Coefficient	10 ppm/°C max.

Mechanical

Analog Inputs	Malco Connector Panel (wired for 64 channels).
Digital Inputs (mate)	Amphenol Type 17-20500-1 or Cannon Type DD-50P.
Display	Amperex Indicators for A/D Register
Size	19″ slide mounted drawer 22″ deep 5¼″ high
Weight	60 pounds (typ.)
Power	105 to 125 vac 60 to 400 cps (Fused at 3 Amp S.B.)



GENERAL NOTES ON MULTIVERTER SPECIFICATIONS

1 Crosstalk is measured as follows: A 400 cps full scale input voltage is applied through a 1000 ohm source impedance to all channels except the one being monitored. The 400 cps noise is measured on the selected channel which has 0 volts applied through a 1000 ohms source impedance.

2 No more than 2 channels can simultaneously be overloaded (by 100%) for the Multiverter to operate to rated specs.

3 The aperture time of the system is affected by the rise time of the "Start" pulse.

4 The Multiverter is capable of operating over a range of −20°C to +60°C at some reduction in performance. Contact factory for further information.

Analog-to-Digital Converters

Resolution	Model Number (Binary Instruments)	Bit Rate	Nominal A/D Conversion Rate	Nominal Multiverter **Throughput Rate

*Includes Sign **Throughput Rate for entire Multiverter when using the A/D Converter shown.

RAYTHEON COMPUTER • 2700 SO. FAIRVIEW ST., SANTA ANA, CALIFORNIA 92704 (714) 546-7160 TWX 910-595-1570 RAYTHEON

REMEX Photocell Punched Tape Readers and Spoolers

"The Standard of the Industry"

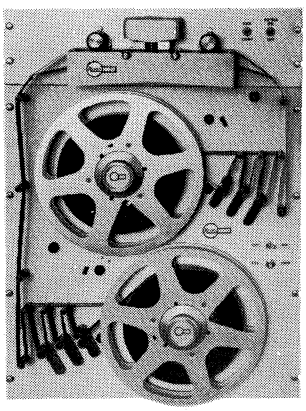
Complete range of speeds to 1000 char/sec. ■ Automatic adjustment for 5, 7, or 8-channel punched tapes ■ Complete with solid state output amplifiers and control circuits ■ Unidirectional or bidirectional ■ Rugged, precision mechanical construction ■ Regulated power supply ■ No contacts to wear out or cause errors due to bounce ■ Ultra soft take-up feature in all spoolers ■ No extra charge for rack mount units ■ Self-adjusting brakes on all reader models ■ Integrated circuit models available

Standard Readers

To **300** characters/sec. Unidirectional or bidirectional, combining ultra-high reliability with low cost. Ideal for applications such as automatic test equipment, numerical machine control, digital computer input, high speed data communications, process control, telemetry data analysis, etc.

To **1000** characters/sec. High speed, ultra-reliable reader featuring a rugged precision mechanical transport system and modular construction. Available in unidirectional and bidirectional models. Used in high performance systems where very fast reading and stopping rates are required.

Block-Stor. Expandable by two line increments up to 80 lines of storage.

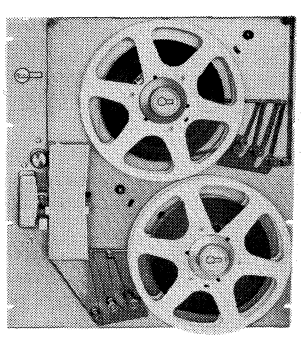


Standard Spoolers

Remex Tape Spoolers are high performance bidirectional units ideally suited to the corresponding Remex Photocell Readers. Or they can be used as modular units adaptable to the requirements of other systems. All models provide constant tape tension and self-adjusting electric brakes. The use of standard NAB reels on quick release hubs makes possible rapid and trouble-free changing of tapes. Other features include broken tape sensing and bidirectional rewind which can be controlled remotely and/or by a front panel switch. Long periods of maintenance-free service are assured by conservative engineering and the use of high quality components throughout. Available in models for 8" and 10½" diameter reels.

Combinations and Specials

In addition to the standard models of tape readers and spoolers above, available individually or in combination, units with custom packaging and circuitry are available to satisfy special requirements and suit new applications. Reader models are available with 15,000 hour lamp and fibre optics to read a wide range of tape transparencies.



New Models

Combination reader/spoolers with 7½ in. reels for speeds to 300 char/sec. and readers for speeds to 400 and 1,000 char/sec. are now available. These units feature quartz iodine lamps, fibre optics, automatic tape compensation, TTL integrated logic, pluggable options and rugged construction.

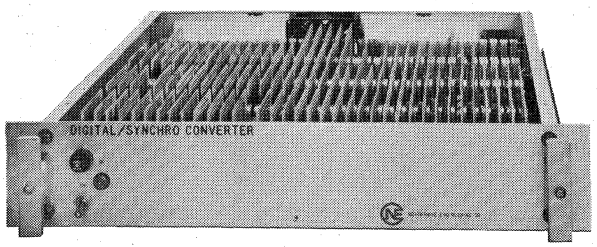
REPUBLIC CORPORATION

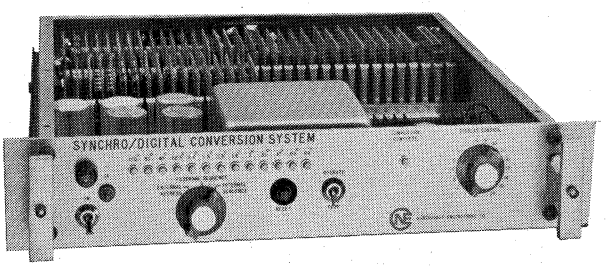
ADVANCED TECHNOLOGY SYSTEMS GROUP

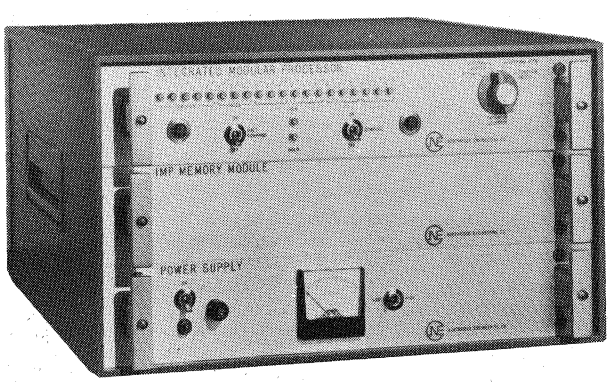
9754 DEERING AVENUE
CHATSWORTH, CALIF. 91311
(213) 341-9200



The Republic **Model 102 Digital-to-Synchro Converter** is a completely solid-state advancement over the Model 101. This unit has gained a wide ranging reputation for ruggedness and reliability in instrumentation systems. The Model 102 utilizes the latest advances in integrated circuitry completely eliminating the heavy bulky transformers of conventional D to S Converters. Resulting package size is strikingly reduced to 25 cubic inches per digital-to-synchro data channel. Speed is greatly increased to a rate in excess of 50 microseconds per conversion. As with all other Republic data instruments, the Model 102 Digital-to-Synchro Converter may be utilized with the Integrated Modular Processor (IMP) without need for added interfacing.

The companion to the Model 102 is the **Model 202 Synchro-to-Digital Converter.** This new unit eliminates the necessity for peak sampling or sample and hold techniques in conversion of the synchro type signals to 13 bit accuracy. The unit can be commanded externally or internally to sample the synchro signal at any time in the AC reference cycle. Except when the reference passes through zero, a new sample is available within 100 microseconds after a sample command. The use of completely solid-state circuitry allows for a 32 channel multiplexed converter to be packaged into one 3½" high chassis. Common mode rejection is ±50 volts. Input impedance is in excess of 100k ohms resistive line-to-line and line-to-common.



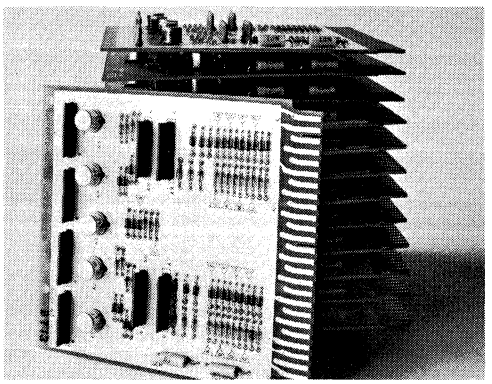


Republic's **Integrated Modular Processor (IMP)** is uniquely designed as an on-line, real-time data processor. IMP may be tailored to a wide variety of applications such as process control, radar data processing, weapon fire control, coordinate conversion, and data acquisition. In these applications IMP acts as the central computation and controlling element or as an adjunct to larger computers. Some of the IMP features include: a read only or core memory, versatile command structure, indexed and indirect addressing, relocatable programming, buffered input and output, and a wide line of peripheral equipment. The IMP is designed to interface directly with the Republic line of conversion equipment and uses the same family of logic modules—a feature that simplifies spares provisioning in complete systems.

Republic data instruments are easily integrated into complete data systems commanding the broadest capabilities. By incorporating the Integrated Modular Processor (IMP), Republic can offer a single function, any system subroutine, or complete data control. Entire closed loop systems are available to accept synchro data and convert it to digital format (either BAMS or BCD). Further, these systems can derive an action statement from the computer program and control the mechanism from which the original data were obtained. Republic has the experience, capabilities, products, and technical depth to provide an optimum system to solve your problem.

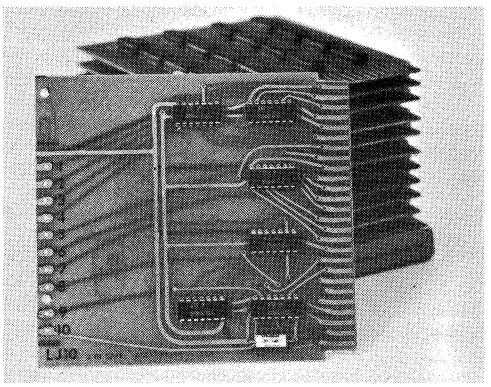
One stop source for digital systems components.

IC Logic Modules.



T SERIES: SDS T Series modules are the best logic modules available at commercial prices. They utilize integrated circuits for high-speed and economy, and discrete components to achieve superior noise rejection and high fan-out. We use them in Sigma computers. T Series modules feature:

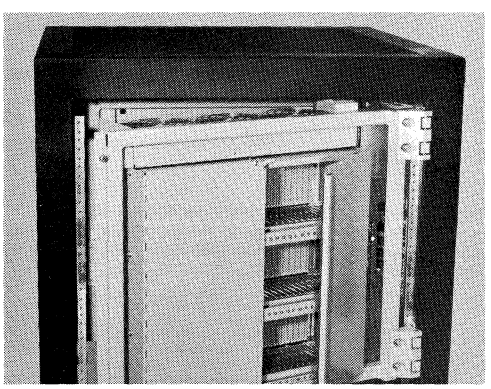
* DC to 10MHz, all modules, with plenty of margin.
* Guaranteed noise rejection 1.5 volts.
* 60ma per IC output for fan-out to 14 gates.
* Natural logic functions AND, OR, NAND, NOR, all at low cost, so you can minimize design and hardware.
* Simple wiring rules.
* Over 200 modules available.
* Design automation service is available to reduce your wire listing time.
* Wiring service is available to wire chassis from your wire list.



J SERIES: The J Series general purpose logic modules offer good performance and reliable operation at a budget price. J Series modules feature:

* DC to 5MHz operation.
* Ceramic dual inline packaged IC's for greater reliability.
* Many MSI circuits are used to reduce system cost and size.
* Ten front-edge test points for scope checks.
* Removable test lamp assembly mates with test points for convenient system troubleshooting.
* Wiring service is available to wire chassis from your wire list.
* 52 pin connector provides easy access to all circuits.
* Power and ground lines are bussed on mounting hardware to reduce wiring time.

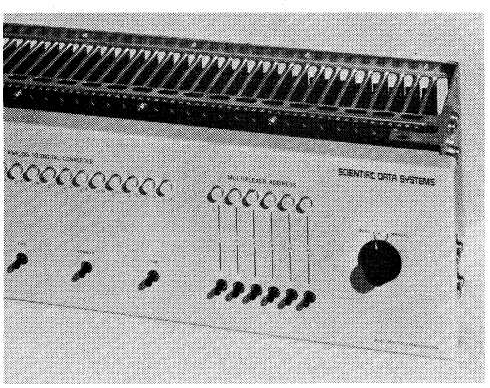
Systems Hardware.



We offer a complete line of mounting hardware for your convenience in implementing your system. Our hardware is of the same rugged construction as our own Sigma computers. All elements are mechanically compatible to simplify assembly and reduce assembly and checkout time. Here are some examples of the items we sell:

* Swing frames, for compact organization of large digital systems.
* Ribbon cable assemblies for intra-system wiring.
* Coax cable, mating connectors and cable trays to guide signals in and out of the system.
* Individual mounting cases, fixed mount or hinged.
* Power supplies for small or extremely large installations.
* System cabinets, with local power control panels, to enclose all other elements.
* Filtered blowers designed into mounting hardware for controlled air environment.

Analog/Digital Instruments.



We have a complete line of instruments to provide communication between digital equipment and a wide variety of analog devices. These include multichannel A to D and D to A converters, and single-channel digitizers.

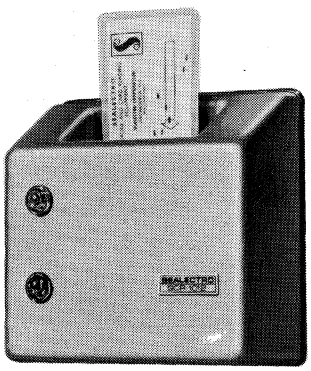
MODELS MD41 AND MD51: These are multiplexer-digitizer combinations designed for use as analog data gathering front ends for digital systems. The MD51 provides up to 64 multiplexed analog channels, a sample and hold amplifier, and a 15-bit analog to digital converter. The instrument needs only 10 microseconds to select and digitize each channel. This is equivalent to an overall throughput rate of 100KHz. The overall accuracy is ±0.01%, ±½ count, typical at constant temperature.

MODEL DA40: This is a digital-to-analog converter that controls up to 16 10-bit channels. The accuracy of each channel exceeds 0.1%. The instrument may be used with analog recording devices such as CRT displays, X-Y plotters and strip chart recorders.

SDS For further information contact local sales office or write Systems Products, Scientific Data Systems, 701 South Aviation Blvd., El Segundo, California 90245.

SEALECTRO

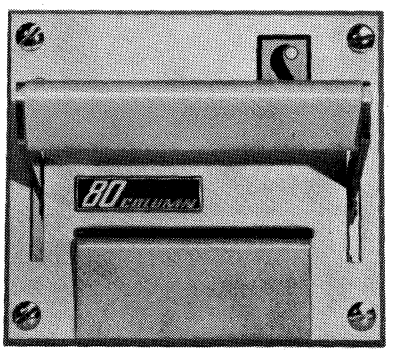
SEALECTROCARD™ CARD, BADGE AND TAB READERS



10x10-10x12 BADGE READERS

Completely automatic Badge Readers that accept standard IBM and Friden Type Badge cards in 10x10 or 10x12 formats. Ideal for personnel identification, production control and process control operations.

Go/no-go lights immediately indicate if the card is inserted correctly. No contacts actuate until the card is properly inserted. Remote solenoid-operated contacts sense hole patterns and read. Read function is automatically held until feedback from system releases contacts and card is automatically ejected. Flexible output wiring allows bussed or discrete contact interface connections.



12x80 CARD READER

The Sealectrocard card reader is designed to be completely compatible with all standard 12 x 80 TAB type punched-cards. This unit combines features which provide maximum reliability, convenience and economy in programming. The 12 x 80 Sealectrocard is ideally suited as peripheral equipment for a wide range of computers or as a programming device. Programs consisting of up to 960 bits of information can be read instantly from conventional punched-card formats. Features include:

- Remote contacts with double contact wiping surfaces.
- Positive mechanical lockout if a card is mis-orientated.
- Wide choice of terminations.
- Simple, fast operation even by unskilled personnel.

12x51 TAB READER

Accepts and reads standard 80 column TAB card, but limits read area to 51 columns, providing 612 bits of information. Ideal for data acquisition in production control and other terminal operations of data processing systems not requiring full 960 point readout.

Completely foolproof. Correct orientation and positioning of card electrically interlocks operating handle eliminating faulty readouts. Card is inserted in insertion slot, handle pulled down to read position, and unit is in operation.

Utilizes same electrical contact assembly as 12 x 80 Reader. Can be bussed vertically or horizontally. It may be used with completely discrete circuitry for each of the 612 points.

TAURUS

World Leaders in Card Readers

FEATURING HIGH RELIABILITY

A Complete Line of Punched Card Readers for Static and Serial Programming

APPLICATIONS

MILITARY USES: Ground checkout equipment, programming, testing, component testing, simulators, etc.

COMMERCIAL USES: Batching of concrete, food, chemicals, etc.; automatic crane operation, automated manufacturing processes, data processing, process control, etc.

STANDARD SPECIFICATIONS

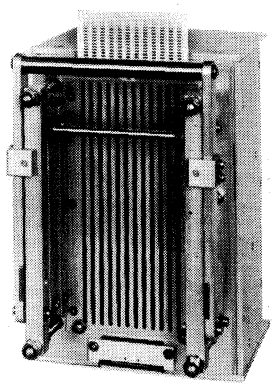
Cards—IBM, Rem. Rand or others.

No. of Switches—10 to 960—(Form A, B or C).

Electrical—Dry Circuit to 3 AMPS.

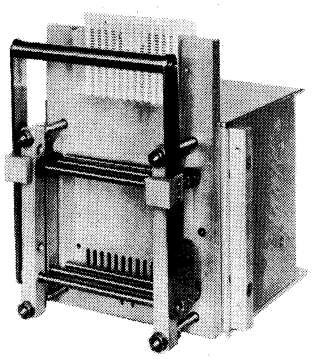
M-3
FULL IBM CARD STATIC READER

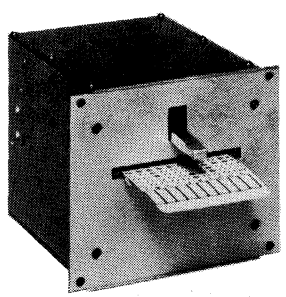
Reads up to 80 columns, or 960 switches, (complete IBM card). Most compact switching array available. Reads indirectly for maximum reliability. After insertion, punched hole has a closed switch, no hole an open switch. Switch reliability 100,000 cycles. Mechanical reliability 500,000 cycles.



JM-3
STATIC READER FOR ONE HALF OF AN IBM CARD

Reads up to 40 columns, or 480 switches, of an IBM card. After insertion, punched hole has a closed switch, no hole an open switch. Switch reliability 100,000 cycles. Mechanical reliability 500,000 cycles.



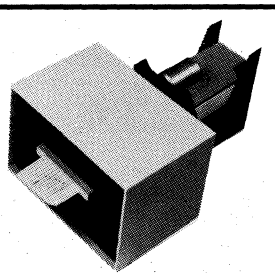


S SERIES
S-60, S-120, S-180

For simple functions. Practical. Economical. Reads an entire card or part of one. Choice of 60, 120, or 180 replaceable switches. Each switch can be removed or replaced separately. Cards can be hand punched.

MODEL 600
SERIAL READER

Relatively Slow But Inexpensive. Feed and Read . . . Less than $1,000.



Reads standard 80-column, 12-row cards, serially, column by column, 10 columns per second or less. Alpha-numeric or other symbols accepted. For on line computer, remote transmission, interfaced with other machines, numerical control, card duplication or correction. Sizes 6¼″ High x 9¾″ Wide x 6½″ Deep. Automatic card feed available for sequential feeding of up to 200 cards.

Also Teflon Terminals and Printed Circuit Board Guides

CUSTOM BUILT UNITS ARE OUR SPECIALTY. We will fill your requirements in spacing, switch action, number of switches and any other special needs, and will determine the most economical size and type for your operations. **Send for 1969 Catalog.**

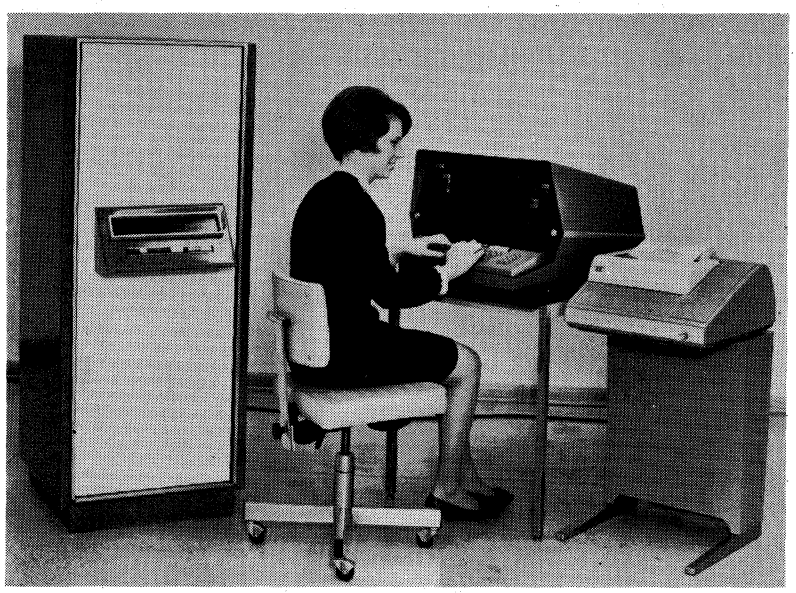
YOUR SINGLE SOURCE FOR
SYSTEMS...ASSEMBLIES...COMPONENTS



Complete data terminal system...display panel assembly...readout, indicator or switch component: They're all available from TEC...designed to fit your exact man-machine interface needs. Information display and control is TEC's only business and this single source capability allows TEC to meet your requirements most efficiently by integrating several product types into one display/control assembly. Complete engineering design, fabrication, assembly and quality control provides the capacity to produce orders of any complexity and volume.

Computer Peripheral Display Systems

Utilizing the various display and control systems and assemblies shown on these pages, TEC provides communication terminal systems for remote data display and data entry. TEC's Series 500 family of DATA-SCREEN terminals, controllers and related communication oriented display equipment provides versatile information display and control. These third generation terminal systems are unmatched in performance, reliability and design and are competitively priced.

Series 500 DATA-SCREEN™ Terminals

Displaying up to 1000 bright, easily readable stroke written alphanumeric characters, these CRT terminals include I/O logic, character generator, refresh core memory and separate keyboard. Page size CRT screen measures 8¾" x 6¾" and is combined with fixed message display areas. Editing module options provide a wide range of computer controllable functions and permit fast, accurate message composition by relatively inexperienced operators. Series 500 terminals offer versatile interface capability with most computer systems or they can be connected directly to data modems. Model 510 DATA-SCREEN Controller offers control logic and multiplexing features for up to 32 terminals to provide economical multi-station CRT display systems. TEC's family of CRT systems allows either stand-alone or multi-station terminal operation.

DATA-SCREEN Programmable Controller System

Offers new dimensions in peripheral processing and data communications capability. Data concentration, code conversion and data preprocessing are a few of the functions that can be performed with this system. The Model 520 has 16 high speed I/O channels, fully buffered operation, with one microsecond cycle time, core memory expandable to 16K words of 18 bits each. The I/O unit interfaces with CRT displays, line printers, card handling equipment, teletype terminals and other communications oriented peripheral equipment.

The Model 520 has a variety of communication interface options which include direct computer connection at rates up to 285KHz; asynchronous and synchronous serial data transmission rates from 300 to 4800 bits per second. Interface adapter is IBM compatible and other computer system interfaces are available on request.

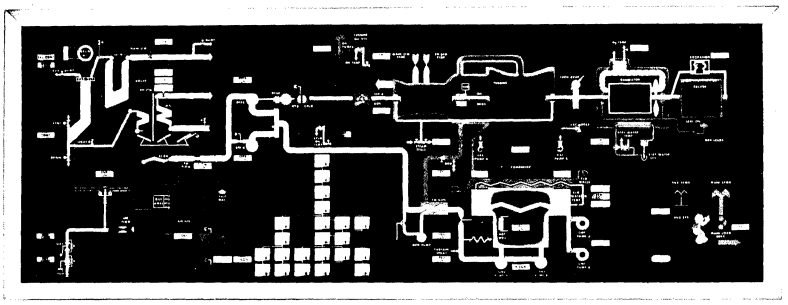
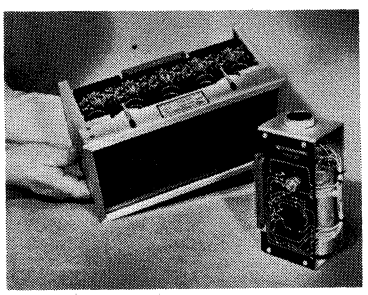
INFORMATION DISPLAY/CONTROL

DATA-PANEL® Display System

Conveys messages and symbols brilliantly and colorfully in a single viewing plane of any size. Only vital illuminated messages are seen. Permanently visible legends, lines and graphic symbols can be provided. Display costs are reduced because DATA-PANEL Display Systems are provided as complete, pre-wired assemblies, with lamp control and interface logic if desired, ready to mount and connect. Flexible displays may combine graphic, annunciator and readout displays in a single integrated assembly that is self-supporting when mounted in a panel cutout. Interface adaptability requires less computer or controlling logic in your system—cuts cabling costs too.



Large mimic/annunciator panel reports status of power generator system for Louisiana Power and Light Company.

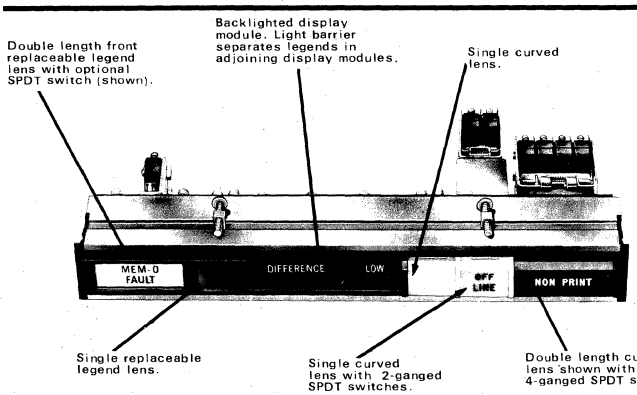


Solid State DATA-MONITOR Annunciator System

Provides reliable, compact, high density alarm displays at lower cost per point than similar competitive devices by integrating solid state annunciator logic into DATA-PANEL Display Systems. Flashing alarm indication is combined with audible alarm. Operator response to the problem turns off the audible alarm, but the indicator remains on steadily until the off-normal condition is corrected. Memory logic insures indication of passing alarms.

Electronic Keyboard System

Features a solid state, bounce eliminating interlock encoder actuated by TEC-LITE Keyboard Switches. Pulse and momentary action switches duplicate feel and travel of electric typewriter keys. Elimination of mechanical linkages insures greater reliability. TEC Electronic Keyboard Systems serve as input terminals for EDP and industrial control system and accomodate any code up to eight levels. Keyboards are custom built to meet specific key arrangements, enclosure colors and electrical connections.



DATA-LINE Display System

Modular in-line design permits intermixing of message display, neon or incandescent indicator/switch functions. Function options may be arranged in any sequence on .700" centers in an extruded aluminum frame. The frame, available in lengths to nearly four feet, forms the front bezel and provides panel mounting hardware. All lamps are replaceable. From every aspect, mechanical or electrical, TEC-LITE DATA-LINE Display System is as versatile as your requirements. Price of DATA-LINE Display's switch indicator function compares favorably with other multi-pole lighted pushbutton switches.

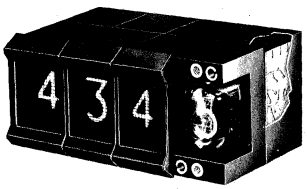
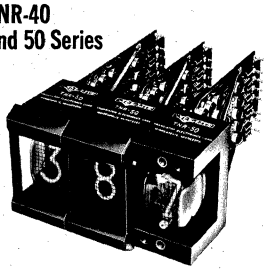
DIGITAL AND ALPHA READOUTS

TNR-10 and 30 Series



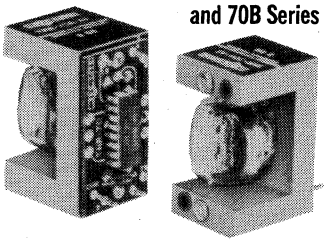
NIXIE tube with .610" high characters. Mounts on 1" centers. Military quality has dust cover and metal case transistors.

TNR-40 and 50 Series



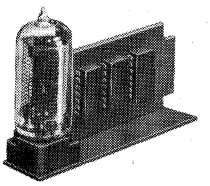
Rugged NIXIE tube in lower cost commercial quality package offers same functions as TNR-10 and 30 Series.

TNR-70A and 70B Series



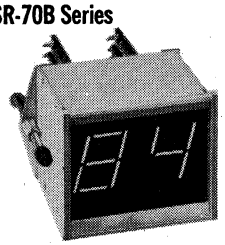
I-C logic provides NIXIE tube decoder/driver function plus buffer memory and decade counter options. Compact, highly reliable.

TNR-71A and 71B Series



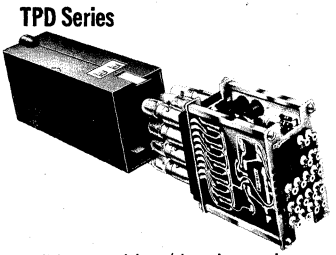
Functions same as TNR-70A and 70B Series but uses side viewing display tube for lower cost.

TSR-70B Series



I-C logic drives bright incandescent lamps of segmented readout. Also offers buffer memory and decade counter options.

TPD Series



Solid state driver/decoder package controls 6, 12 or 28 VDC incandescent lamps of IEE Series 10 and 120H projection readouts.

TEC offers the most complete line of readouts available from a single source: NIXIE® tube, segmented, projection, electro luminescent and is presently developing flap, dot matrix, disc and solid state (L.E.D.) type readouts. All models are designed to operate from decimal or 4-wire or 8-wire B.C.D. inputs and are controlled by low level outputs of discrete or RTL, DTL and TTL I-C logic modules. Readouts can be combined with TEC's DATA-PANEL® Display Systems to provide an integrated, ready-to-mount display.

NIXIE® Burroughs Corp.

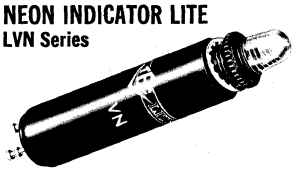
TRANSISTOR CONTROLLED INDICATORS

TRANSISTORIZED MINI-LITE INDICATOR
MTL Series

Long life, rugged neon lamp controlled by signals as low as 1.5V. Flat top or spherical lens shape offered.

TBL Series adds isolated momentary switch with SPST-NO-DB, SPST-NC-DB or SPDT-DB options.

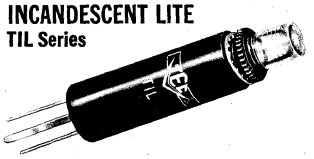
LOW VOLTAGE NEON INDICATOR LITE
LVN Series



Operates from supply as low as 2 VDC—internally generates high voltage AC to fire neon lamp. Can be controlled from signals as small as 2 volts.

LVB Series adds same switch-indicator function as TBL and TIB Series.

TRANSISTOR CONTROLLED INCANDESCENT LITE
TIL Series



Replaceable incandescent lamp controlled by signals as small as .3ma. Thirteen lens colors available.

TIB Series adds isolated momentary contact SPST-NO-DB, SPST-NC-DB or SPDT-DB switch function.

SUBMINIATURE TRANSISTOR CONTROLLED INDICATOR
STL Series

ACTUAL SIZE

Subminiature (.360" diameter x .600" long body) Transistor Controlled neon or incandescent lamp offers same functions as MTL or TIL Series, but in compact package.

TEC-LITE Indicators use self-contained transistorized circuitry to control incandescent and neon lamps from low level outputs of discrete and RTL, DTL and TTL I-C logic modules. Many models offer integral isolated switches actuated by the lens. Incandescent lamps are replaceable by unscrewing the lens, long life neon lamps are permanently wired. A variety of lens colors and styles are offered as well as taper pin receptacle, Wire-Wrap, turret lug or solder terminals. TEC's cataloged indicators can be custom designed to meet specific needs. Over 6000 special designs—electrical and mechanical —on file.

SOLID STATE MEMO-LITE® INDICATOR
TML-10 Series

MEMO-LITE® with replaceable lamp offers memory function—turns on lamp with 2μsec., .5ma pulse—remains on when signal is removed. Lamp is turned off by interrupting supply or by resetting. Switch option also available.

TRANSISTOR CONTROLLED L.E.D.
Solid State Indicator
MTLED Series

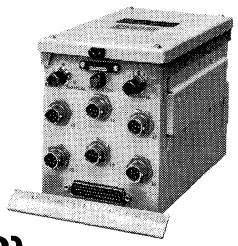
Integral, solid state logic controls gallium arsenide phosphide diode light source which offers almost infinite life and reliability, even under extremely adverse environmental conditions.

MEMO-LITE® TRANSISTOR ELECTRONICS CORPORATION

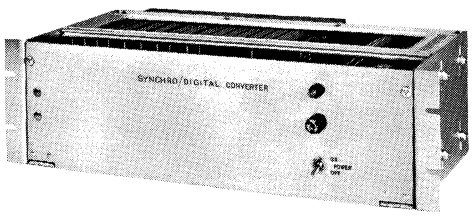
SYNCHRO/RESOLVER–DIGITAL CONVERTERS

ALL ELECTRONIC—*INTEGRATED CIRCUIT CONSTRUCTION*

AIRBORNE (Series SD 1000)



GROUND (Series SD 2000)



- Angular slew rates are unlimited
- Tolerates wide variations in signal voltage, frequency and waveform with full accuracy
- Simpler circuit techniques offer smaller size and weight, greater reliability, lower power consumption
- Multiple Synchro Inputs: 1-16 or more
- High Encoding Rates: 800 per second
- Single Speed System Accuracy: ±6′ over temperature range
- Binary Output Code: to 13 bits representing shaft angle
- Computer Compatible: Digital addressing and complete interface signals

OPTIONAL FEATURES

- Temperature Range 0°C to +71°C or −54°C to +71°C
- Serial and/or parallel outputs
- Binary address or discrete channel selection
- Simultaneous Sampling and/or Higher encoding Rates
- Isolation Transformers on signal inputs
- Power Supplies for 28v DC

CUSTOM FEATURES

- Digital Data Processors for dual speed synchros and binary — BCD conversion/scaling
- Digital — Synchro conversion with multiple synchro outputs
- A/D and Multiplexer for AC-DC Analog Inputs
- Power supplies for 400 Hz

ANALOG-DIGITAL CONVERTERS & MULTIPLEXERS

Digital Converters

Transmagnetics' Digital to SYNCHRO/RESOLVER and SYNCHRO/RESOLVER TO DIGITAL Converters find wide application in missile and aircraft navigation, control, fire control and guidance systems, in data processing, surface and subsurface craft, and in ground support, checkout and simulation equipment.

Multichannel, dual speed and angle indicator readouts are available.

Series 1602 SYNCHRO/RESOLVER TO DIGITAL

Model No.	Input	Freq. Hz	Signal Level	Reference
1602-26C	Synchro	400	11.8 L.L.	26V
1602-115C	Synchro	400	90 L.L.	115V
1602-60M	Synchro	60	90 L.L.	115V
1602-50M	Synchro	50	90 L.L.	115V
1602R-26C	Resolver	400	11.8 L.L.	26V

Other Specifications

SIZE: 4½ x 12 p.c. card. DIGITAL OUTPUT: 12 bit TTL levels. ACCURACY: 6 minutes. OPERATING TEMPERATURE: 0 to 70°C For −55 to +85°C replace "C" by "M" in Model No.

BCD Models:

3 Digit TTL Levels Out: Insert 3B after 1602 in Model Number.
4 Digit TTL Levels Out: Insert 4B after 1602 in Model Number.

Series 1616 ANGLE POSITION INDICATOR

Description:

These devices furnish 3 or 4 digit "NIXIE" Readout of synchro or resolver inputs.

Ordering information:

Replace 1602 by 1616 in description of converters above.

Series 1613 DIGITAL TO SYNCHRO/RESOLVER

Model No.	Output	Freq. Hz	Signal Level	Reference
1613-10C	Synchro	400	11.8 L.L.	26V
1613-90C	Synchro	400	90 V L.L.	115V
1613-60C	Synchro	60	90 V L.L.	115V
1613R-10C	Resolver	400	15 V	26V

Other Specifications

DIGITAL INPUT: 12 bit TTL levels. SIZE: 4½ x 12 p.c. card. ACCURACY: 6 minutes. OPERATING TEMPERATURE: 0 to 70°C For −55 to +85°C replace "C" by "M" in Model No.

Synchro models listed will drive torque receivers control or differential transformers. All models are short-circuit proof.

Multipliers

Transconductance, quarter-square and pulse modulation type multipliers, Transmagnetics has them all in economy and computer grade, bandwidths from DC to 10 Megahertz, military operating temperature range to −55 to +85°C.

TRANSCONDUCTANCE MULTIPLIERS DC TO 10,000 KHZ MULTIPLIERS

The following transconductance DC four quadrant multipliers permit selection of the bandwidth required at lowest cost. Gain varies smoothly, without breakpoints, a desirable feature in PPI and other visual displays.

Freq. Resp. Full Output (KHz)	Model	Size - Inches	Transfer Function
40	375	.65 x 1.5 x 1.5	XY/10
300	382	.75 x 1.7 x 1.7	XY/10
1000	395CP5	.78 x 3.19 x 3.44	XY/10
4000 (3DB)	384CP5	.78 x 3.19 x 3.44	XY/100
10,000 (3DB	385	.78 x 3.19 x 3.44	XY/10

SPECIFICATIONS

INPUTS: −10 to +10V
OPERATING TEMPERATURE: 0 to 70°C
SUPPLY: + and − 15V DC
All units are available for −55 to +85°C operation

Multipliers — Pulse Modulation — Computer Grade*

Pulse modulation multipliers are accurate, stable and repeatable. They represent the best buy in servo and trigonometric computing requiring only limited bandwidth.

Multipliers — Quarter Square — Computer Grade**

Quarter square multipliers with diode-shaping networks are the most repeatable and stable wide-band multipliers.

Model		350RP2*	350MP4*	380MP4**	380CP5**
3 DB BW		100 Hz	100 Hz		
Size		.78 x 2.53 x 3.22	.58 x 2.03 x 2.28	.58 x 2.03 x 2.28	.78 x 3.19 x 3.44
Operating Temperature		−25 to +85°C	−55 to +85°C	−55 to +85°C	0 to 70°C
Input Impedance		100K, 50K	100K, 50K	10K ohms min.	10K ohms min.

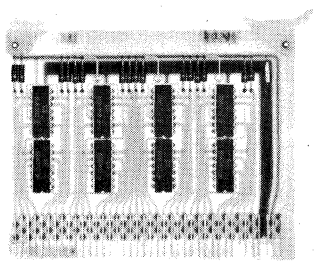
Integrated Circuit Modules, Micro VersaLOGIC



Micro VersaLOGIC is a complete new line of 5 M.C. general purpose integrated circuit modules designed to provide the systems engineer with all the necessary building blocks for an integrated circuit digital system. Micro VersaLOGIC incorporates many of the features of the proven VersaLOGIC line, such as NAND, NOR logic with wired OR capability at the collector. Over twenty types of uVL modules are available including universal flip-flops, delay multi-vibrators, clock drivers, efficient 2, 3, and 4 input expandable gates, and pre-connected arrays such as dual binary counters, dual decade counters and dual shift registers. Interfacing modules for PNP to NPN conversion and power driving are also available.

GENERAL uVL I.C. MODULE SPECIFICATIONS

Logic Circuitry.....DTL Type
Logic Form .....NAND, NOR with wired OR at the collector
Frequency.....DC to 5 mc
Power Supply .....+5.0v + 10%

Input Logic:
True.....+2.5v to 5.5v
False.....−0.5v to +0.5v
Noise Rejection.....1.2v typical

Output Logic:
True.....+5v nominal
False.....+0.25v nominal
Fan Out.....Up to 20 unit loads
Unit Load.....1.6 ma, maximum

Temperature:
Operating.....0°C to +70°C
Storage.....−40°C to +125°C
Dimensions.....4.3 in. by 3.4 in.
Connector.....40-pin, ELCO Type 7009
Terminals.....Taper pin or wire-wrap

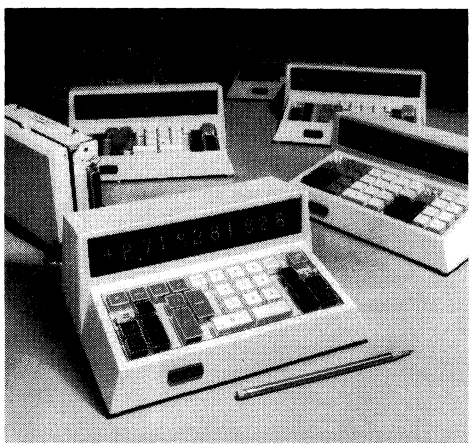
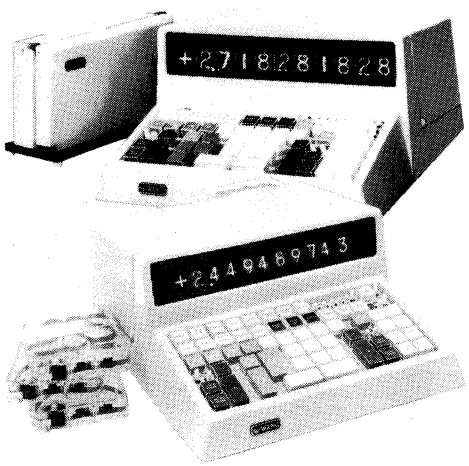
WANG ELECTRONIC CALCULATORS

...when you can't afford to wait



200/300 Series Electronic Calculators

Two unique and versatile families of calculators for all types of personal problem-solving from basic arithmetic computations to complex equations and programmed calculations. Simply choose the model that best suits your needs, whether it's figuring monthly mortgage payments, or rocket engine thrust coefficient. The 200 Series provides time-sharing economy for general business and statistical applications in four distinctly different models. You can choose from ten models in the 300 series: the 300 for high speed addition, subtraction, multiplication, division and reciprocals; the 310 for instantaneous $\sqrt{x}$ and x^2; the 320 for logarithmic and exponential operations; the 360 with four extra storage registers; the 362 with up to 26 storage registers; and a choice of six more keyboards for trig functions by single keystrokes. CP-1 and CP-2 Card Programmers plug into any of the above models and read 80-step program cards to automate repetitive calculator operations. Up to four keyboards can operate simultaneously from a briefcase-size electronic package.



370/380 Series Programmable Calculating Systems

With these compact, desk-top keyboards, smaller than a portable typewriter, you can have at your fingertips immediate answers to many complex calculations at less cost than with full-scale computers. Both the 370 and the 380 have the same simplicity of operation of basic 300 Series calculators. Data storage capacity is significantly increased, with random access from the keyboard or under program control. The 370 utilizes 80-step prescored tab cards for program control, with programs as long as 480 steps. Model 380 programs are "learned" directly from the keyboard, which features plug-in magnetic tape cartridges of 40 to 640 step capacity. Both systems will branch, loop, perform subroutines, make decisions and manipulate arrays. The ability to add other input, output, or storage devices or on-line electronic input increases versatility and avoids fixed-system obsolescence. The most comprehensive program library available is furnished free with each system.

MODEL 700 — The Ultimate Programmable Calculator

Exclusive integrated circuit design concentrates maximum power, sophistication and convenience in a fully self-contained, calculator. The 700 stores programs on tape cassettes for up to 960 core-stored program steps. It has 120 data registers, each of which can add, subtract, multiply and divide. Additional features include: dual Nixie-type display, special keys for trigonometric functions, commands for loops, branches and subroutines as well as basic arithmetic and exponential keys. Execution speeds are the fastest of any electronic calculator anywhere.

(ADC) Bantam Jack Panels

Bantam Jack Panels are designed to satisfy the increasing demand for more compact patchfields in modern electronic and communication equipment. Bantam Jack Panels, with miniaturized jacks, provide twice the number of jacks in a standard size panel. They require only ½ the rack space previously used by conventional panels. The new panel assemblies weigh 65% less when compared to an assembly using an equivalent number of jacks on a conventional jack panel. ■ Bantam Jack Panels are compact, lightweight, and yet provide the same dependable service as the long established telephone types. This new design offers 96 jacks (48 pairs) in a 1¾ inch x 19 inch standard sized panel. The jacks on this panel are spaced to prevent the cross patching of adjacent circuits when using double plugs.

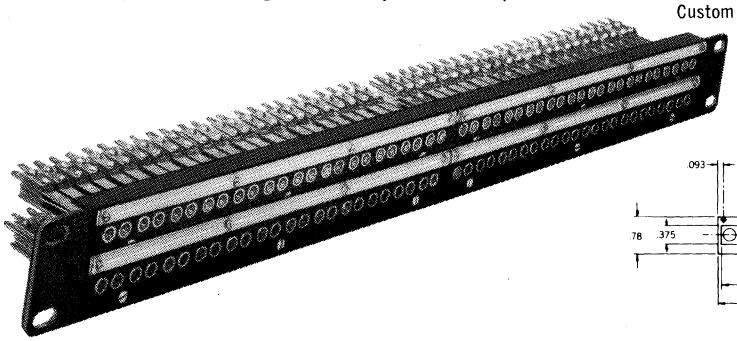
specifications

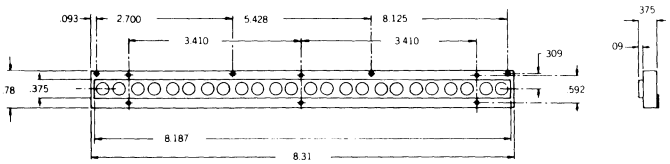
1. **Panel:** Aluminum alloy, extruded. Finished black anodized per Mil-A-8625A. Overall dimensions 1¾"x19"—Standard EIA mounting centers.
2. **Jack Mounting:** Four moulded plastic inserts, each provides for 24 jacks. Pairs of jacks on 5/16 inch centers. Double-row panel provides 96 jacks total. Blank inserts can be furnished where only single row of jacks is required.
3. **Designation Strip:** Extruded clear plastic.
4. Panel assemblies are available with a wide variety of two and three-conductor jacks. See listing of Bantam jacks for complete details.

PJ-731 Double row panel, assembly less jacks, holds 96 jacks.
PJ-737 Double row panel, with 48 pair (96 total) PJ-818 jacks.
PJ-739 Double row panel, with 48 pair (96 total) PJ-839 jacks.
PJ-724 Panel inserts, less jacks, 24 holes.
PJ-700 Panel inserts, blank (same as PJ-724 without holes).
PJ-736* Double row panel, with 104 PJ-818 jacks.
PJ-738* Double row panel, with 104 PJ-839 jacks.

*Panels with 104 jacks (26 per insert, jacks all on 5/16 inch centers) are available on special order.

Custom panel assemblies with up to 104 jacks are available on special order.

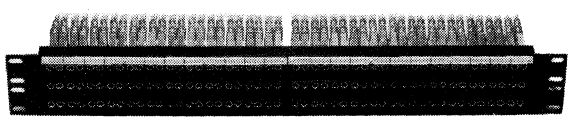




PJ-724 PANEL INSERT

Bantam Triple Row Jack Panel

Bantam Triple Row Jack Panels provides 144 jacks in a 2⅝ inch x 19 inch size panel. The specification and construction of this panel is the same as Bantam Double Row Panels except width of panel is one and one-half the standard panel size. Mounting centers conform to standard EIA rack spacing. Three rows of jacks with 48 jacks in each row. These three rows are particularly desirable for use in 2 wire and 4 wire VF Circuit applications where space can be saved by having three verticle jacks appear as a jack set. When needed number plates or labels to show row functions can be furnished on special order.



"BANTAM TRIPLE ROW JACK PANEL — 2⅝" WIDE"

BANTAM TRIPLE ROW JACK PANEL

PJ-732 Triple Row Panel Assembly, less jacks, holds 144 jacks
PJ-733 Triple Row Panel, with 144 PJ-818 Jacks
PJ-734 Triple Row Panel, with 144 PJ-839 Jacks
PJ-735 Triple Row Panel, with 96 PJ-839 Jacks (top and middle row) 48 PJ-838 Jacks (bottom row).

Bantam 2 + 1 Jack Panels

Bantam 2 + 1 Jack Panels are the newest development in the ADC line of Bantam components which offer the maximum in patching density. These unique three row panels feature three miniature jacks on a single frame, which effectively requires ⅓ less space than regular Bantam jacks. The Bantam 2+1 panels include 48 of these three conductor jacks, in a standard size 1¾ inch wide by 19 inch long panel. These panels were especially designed to provide vertically positioned jack sets such as the "Line", "Equipment" and "Monitor" jacks in a Voice Frequency Circuit. The Bantam 2 + 1 Jacks provided in these panels are available with solder type terminals and with wire wrap terminals. When required number plates or labels for identifying row functions can be provided on special order.

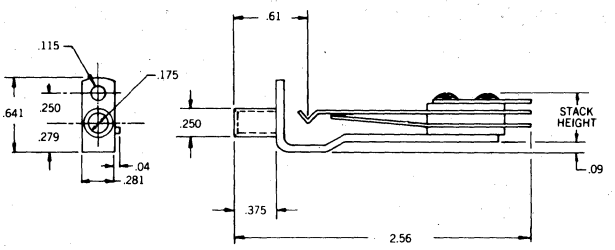
(ADC) Bantam Jacks

Bantam Jacks will meet the electrical, mechanical and environmental requirements of the military specification for long frame telephone jacks. Although reduced in size these jacks will provide the same reliable service equal to that expected from regular size telephone jacks. These jacks are available in a variety of two and three conductor types, with isolated circuit contacts as well as normalling contacts.



2 CONDUCTOR JACK

3 CONDUCTOR JACK

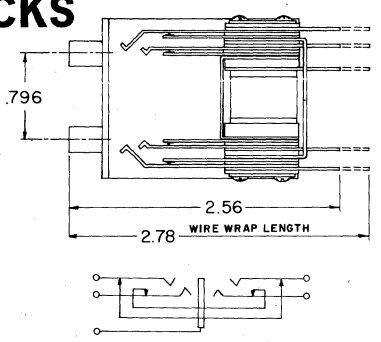
specifications

Frame: Steel, Cadmium plate with chromate conversion coating to withstand 50 hours of salt spray.
Springs: Nickel silver.
Contacts: W. E. #1 gold alloy, cross-bar contacts are welded to springs.
Insulation: Spacers, Phenolic Type PBE-P per MIL-P-3115B.
Bushing: Brass, silver soldered to frame. Finish same as frame.

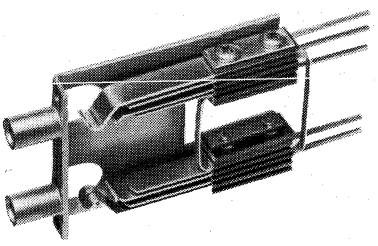
All of the above jacks are available on special order with Palladium cross-bar contacts.
If gold plating is required for all surfaces, jacks should be ordered as the PJ number with a "G" suffix. ADC uses .00005 gold per MIL-G-45204, TYPE II. The solder lugs are not tinned for gold plated jacks. Any requirements other than those described require special notation.

Bantam Twin Jacks

Bantam Twin Jacks are the miniature equivalent of the ADC PJ-482 or the WE 482A. These three conductor type jacks have normal contacts on both the tip and ring springs strapped, thereby reducing and simplifying wiring. The Bantam Twin Jacks are designed with sleeves on .796 inch centers and are made to mount in the ADC PJ-731 Double Row Panels and the PJ-732 Triple Row Panels. Bantam Twin Jacks are available with solder terminals and wire wrap terminals.



SCHEMATIC

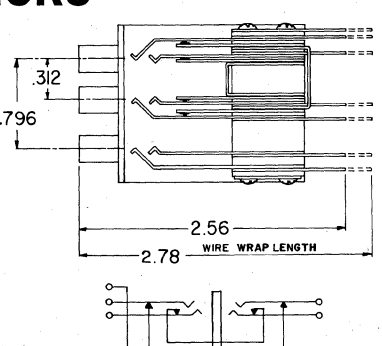


PJ-882 Bantam Twin Jack — Solder Terminals

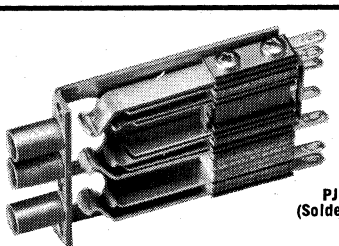
PJ-882W Bantam Twin Jack — Wire Wrap Terminals

Bantam 2 + 1 Jacks

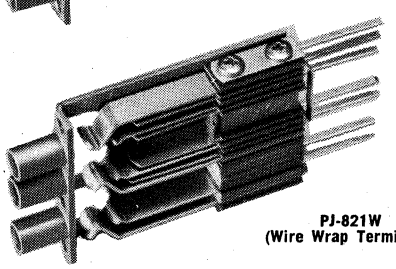
Bantam 2 + 1 Jacks offer almost unbelievable space saving advantages . . . Savings even greater than regular Bantam jacks. Bantam 2 + 1 Jacks literally permits tripling of the patching density of a 1¾ inch wide panel. This unique design features three jacks on a single frame. The jacks are three conductor types. Two of the jacks have normal contacts on both tip and ring springs. These normal contacts are strapped to simplify wiring. Ideally suited to VF Circuit applications where two of the jacks would function as "Line" and "Equipment" jacks and the third as a "Monitor" jack. Up to 48 Bantam 2 + 1 Jacks can be mounted on a 1¾ inch wide by 19 inch long panel. Bantam 2 + 1 Jacks are available with solder type terminals and with wire wrap terminals. These very remarkable miniature jacks are specifically designed to mount in the Bantam 2 + 1 Panel PJ-721.



SCHEMATIC



PJ-821 Jack (Solder Terminals)

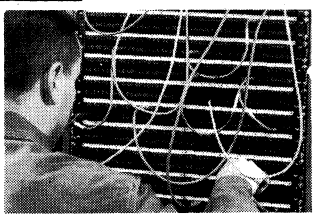


PJ-821W (Wire Wrap Terminals)

(ADC) Bantam Patch Cords

Bantam Patch Cords are plastic jacketed, shielded cords complete with molded-on plugs. The plugs are made with molded insulation between conductors. Bantam Patch Cords are available with single and double two and three conductor plugs. A cord strain relief feature is included in the plug construction.

Bantam plugs may be gold plated on special order per MIL-G-45204, Type II, .00005 inches thick.



specifications

Cord: Plastic jacketed, stranded copper conductors, braided shield. Jacket color — gray.

Plugs: Conductor parts are brass, finished to 32 microinch finish maximum.

Plug Insulation: Molded polystyrene.

Internal Connections: Soldered.

Plug Shell: Plastic, black, rigid thermoplastic.

NOTE 1: Length is measured from the rear of the plug shell to rear of plug shell on opposite end.

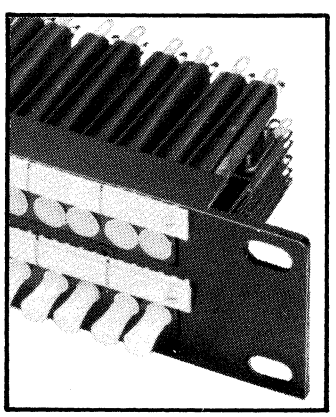
Plug Insulation: Molded polystyrene.

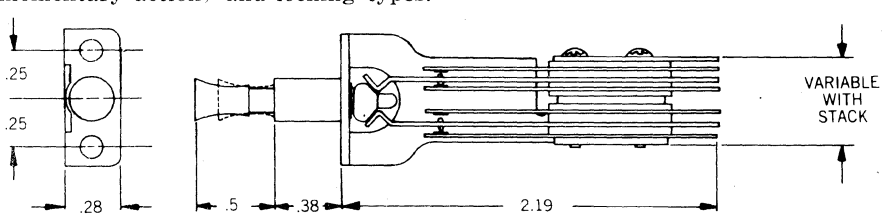
Internal Connections: Soldered.

Plug Shell: Plastic, gray, flexible thermoplastic.

Bantam Switches

Bantam Switches are specifically designed to be mounted in ADC Bantam panels. These switches may be mounted interchangably with Bantam jacks and Bantam lites. Unique from the standpoint of size, these switches are constructed of the same basic materials as used in Bantam jacks and will provide long life and dependable service. A variety of contact forms are available in both non-locking (momentary action) and locking types.





specifications

Plunger: White Nylon (color coded plungers may be obtained on special order.)

Frame: Steel, finished cadmium-chromate per Mil-F-14072 #M262, Type II.

Springs: Nickel-Silver.

Contacts: WE #1 Gold Alloy.

Insulators: Phenolic type PBE-P per Mil-P-3115B.

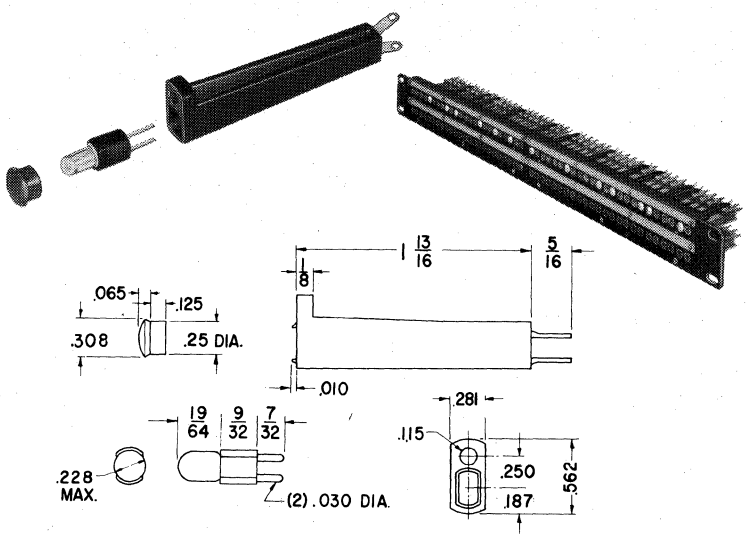
(ADC) Bantam Lites

Bantam Lites are miniature equivalents of the commonly used "telephone type" lamp sockets. ■ These half size lamp sockets feature miniature lamps and lamp caps which are removable from the front of the equipment panel. ■ Bantam Lites provide enough brilliance to be easily distinguished across a well-lighted room. ■ Bantam lamp caps are plastic and are readily visible from wide angles when illuminated. ■ There are no lens holders used on Bantam lamp caps to obscure the light when viewed from the side. ■ These lites have universal application but have been manufactured to fit Bantam Jack Panels and are interchangeable with Bantam Jacks. ■ Bantam Lites are designed for use in military and commercial telecommunication applications.



specifications

Lamp Socket: Made to mount in Bantam Jack Panels and are interchangeable with Bantam Jacks. Molded high heat resistant plastic — Diallyl-Phthalate (DAP). Conductor springs are die formed of nickel silver. Solder lug terminals are tin dipped.

Lamps: 24V miniature lamp draws 50 mils.* 1,000 hour minimum life rating. Base of molded plastic. Terminal pins, nickel silver.

Lamp Caps: Molded of translucent plastic in standard colors — red, green, white and amber.

*6V and 12V lamps are available on special order.
NOTE: Lamp sockets, lamps and lamp caps are to be specified and ordered separately.

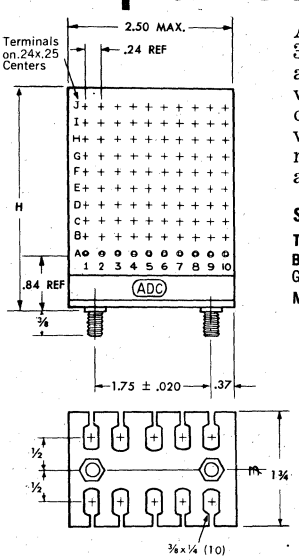
"Wrapid" Terminal Blocks FOR WRAPPED WIRE CONNECTIONS



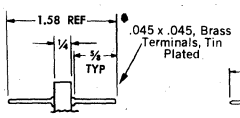


Fig. 1

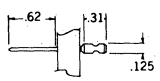

Fig. 2

ADC's Wrapid Terminal Blocks provide for up to 100 connections in a space of 2½" wide by 3⅜" high. ADC offers a variety of Wrapid Terminal Blocks designed for specific wiring applications. The Wrapid Terminal Blocks can be used for wrapped solderless connections, wrapped and soldered connections, or in applications requiring wrap to solder or solderless connectors. Wrapped wire terminations can be accomplished with any commercially available wrapping tool. Behind the development of these terminal blocks is 30 years of experience in meeting rigid commercial and military specifications on a wide variety of devices. This is your assurance of top performance and long dependable service life.

specifications

Terminals: Brass, Electro-Tin Plated.

Block and Fanning Strip: PJ-600 Series — Asbestos filled Polypropylene, molded — Blue. PJ-620 and 640 Series — Glass-filled NYLON (high temperature). Color — Natural (White). Heat Distortion — 442°F with 264 P.S.I.

Mounting Studs: (2) 8-32 Steel, Cadmium-Chromate Plating per MIL-F-14072 No. M262 II.

(ADC) Jack Panels

ADC offers the most complete assortment of jack panels available today. ADC panels are used in television and broadcasting stations, recording studios, industrial paging systems, and communication equipment of all kinds where there is a need to efficiently switch and distribute audio signals. Molded of solid phenolic, reinforced with steel to provide maximum rigidity and strength. Jacks are spaced to permit use of any standard double plug with 5/8" spacing. Mounting brackets and designation strips* furnished with each panel. All panels designed to fit standard 19" relay rack. Consult ADC for your standard and special jack panel requirements.

*The jack panels as illustrated are equipped with ADC standard designation strips as shown. PJ-30, PJ-35, PJ-36 and PJ-37 type panels can be supplied with the reinforcement strips drilled and tapped to accommodate the Western Electric equivalent designation strips (PJ-899A, PJ-899B, PJ-903A and PJ-903B). The suffix "A" added to the part number denotes panels which are modified to accommodate these alternate type designation strips. Designation strips are to be ordered separately.

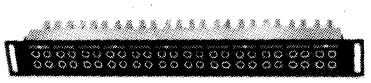
specifications

Panel: Molded, thermoset plastic per Mil-M-14F, Type CFG, black.

Mounting Brackets: PJ-31 and PJ-33: Die cast zinc, finished black lacquer.
PJ-30, PJ-35, PJ-36, PJ-37: Steel, finished cadmium + chromate per Mil-F-14072 #M262, Type II.

Reinforcing Strips: PJ-31 and PJ-33: Steel, finished nickel plated.
PJ-30, PJ-35, PJ-36, PJ-37: Steel, finished cadmium + chromate per Mil-F-14072 #M262, Type II.

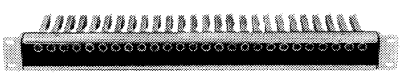
PJ-30
Double Panel. Holds 52 jacks — requires 1¾" panel space. Double designation strip. Brackets for flush rack mounting. All jack mounting holes on 5/8" centers.



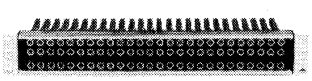
PJ-31
Double Panel. Holds 48 jacks. Holes are spaced to prevent patching adjacent circuits. Requires 2⅛" panel space.

PJ-33
Single Panel. Holds 24 jacks. Holes are spaced to prevent patching adjacent circuits. Requires 1¾" panel space.

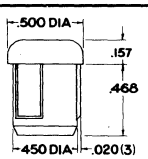
PJ-35 Same as PJ-30, except has 7" standoff mounting brackets.



PJ-36
Single Panel. Holds 26 jacks — requires 1¾" panel space. Brackets for flush rack mounting. All jack mounting holes on 5/8" centers.



PJ-37
Triple - Row Panel. Holds 78 jacks. Requires 2⅝" panel space (1½" standard rack spaces). Provided with brackets for flush rack mounting and PJ-901 designation strips top and bottom.



HOLE PLUG
Molded of black polyethylene plastic. Fits all ADC standard jack panels. Made to plug unused jack mounting holes in jack panels. **PJ-29**

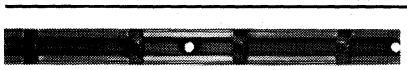
Designation Strips

PJ-890 — Aluminum, black anodized strip with 12 transparent windows and a white card, perforated for easy typing, provided. Intended mounting is by #4 x ¼ flat head screws. Arranged to accommodate a card for each pair of jacks or lamps on .625 centers. Use with WE-185 Panel.

PJ-897 — Aluminum, black anodized strip with one transparent window and a white card provided. Intended mounting is by #4 flat head screws. Arranged to provide a continuous card. May be used as alternate on PJ-31 and PJ-33 Panels.



PJ-898 — Aluminum, black anodized strip with 12 transparent windows and a white card, perforated for easy typing, provided. Intended mounting is by #4 flat head screws. Arranged to accommodate a card for each pair of jacks or lamps on .625 centered pairs x .75 between adjacent pairs. Used on PJ-31 and PJ-33 Panels.

PJ-899A (WE-99A)* — Satin nickel plated strip 15/64" wide, with 13 transparent windows and a white card, perforated for easy typing, provided. Intended mounting by 2-56 flat head screws, special head available on request. Arranged to provide a card for each pair of jacks on .625 centers. Used on PJ-30A (WE-230A), PJ-36A (WE-230B) and PJ-37A Panels, will not overlap adjacent units.

PJ-899B (WE-99B)* — Same general description as PJ-899A except 15/32" wide and will overlap adjacent units by 15/64".

PJ-900A (WE-100A)* — Satin nickel plated strip 15/64" wide with 16 transparent windows and a white card, perforated for easy typing, provided. Intended mounting by 2-56 flat head screws, special head, available on for each pair of jacks on .625 centers. Used on 23" long Panels, WE-231A.

PJ-900B (WE-100B)* — Same general description as PJ-900A except 15/32" wide and will overlap adjacent units by 15/64".

PJ-903A (WE-103)* — Satin nickel plated strip 15/64" wide with 3 transparent windows and a continuous white card. Intended mounting by 2-56 flat head screws, a special head, available on request. Used on PJ-30A (WE-230A), PJ-36A (WE-230B) and PJ-37A Panels. Will not overlap adjacent units.

PJ-903B (WE-103B)* — Same general description as PJ-903A except 15/32" wide and will overlap adjacent units by 15/64".

PJ-901 — Cadmium-chromated strip with one continuous window and 2-part card, perforated for typing ease. Spot welded to reinforcing strip. Used on PJ-30, PJ-35, PJ-36 and PJ-37.

(ADC) Jacks

TELEPHONE TYPE

ADC is recognized as a leading supplier of long frame, telephone type jacks. As evidence of their outstanding quality, ADC jacks are used by the country's foremost manufacturers of communication equipment. The unique, ADC one-piece frame is strong, dimensionally stable and readily interchangeable both mechanically and electrically with commonly used jacks. Plating withstands 50-hour salt spray tests. Coin silver contacts are welded to nickel silver springs. Lugs are hot tin dipped. Insulation is high grade phenolic.

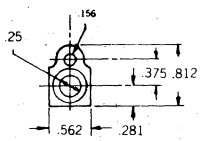
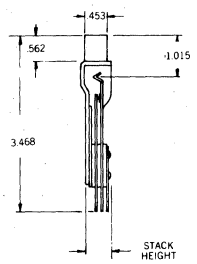
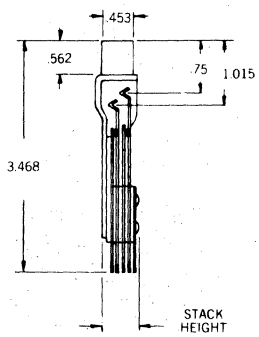
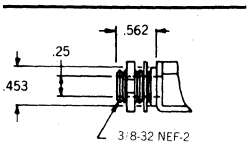
TWO CONDUCTOR





THREE CONDUCTOR





THREADED SLEEVE AVAILABLE ON SPECIAL ORDER

SPECIFICATIONS:

Frame: Steel, plated to withstand 50 hours salt spray per Mil-STD-202, Method.
Sleeve: Brass, nickle plated.
Springs: Nickle silver with tinned lugs.
Insulators: Phenolic, per Mil-P-3115 B type.

MILITARY JACKS

Designed to meet the rugged, exacting requirements of military applications. These ADC jacks are made in accordance with Mil-J-641B specifications. Highest quality materials and closely held tolerances on dimensions conform with military specifications.

Schematic Diagram	MIL Jacks	Frame Style	Stack Height (Inches)	Schematic Diagram	MIL Jacks	Frame Style	Stack Height (Inches)

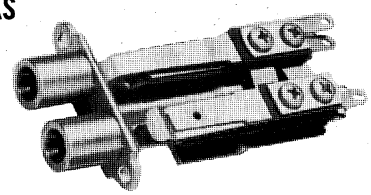
*For use with PJ-309 or other similar type plugs having .207" diameter sleeves.

**Caution — Because of Stack Height these "A" frame jacks cannot be installed on 5/8" centers. "C" Frame version if not listed can be furnished on special order.

TWIN JACKS



ADC Twin Jacks are essentially two jacks with a common mounting frame. Jack sleeves are on 5/8" centers for vertical mounting in standard jack panels. Normal springs are cross-connected or strapped. Jack sleeves are brass, nickel plated. Die formed springs are nickel silver. Frame and hardware are steel, cadmium-chromate plated to withstand 50 hours salt spray.

Part No.	WE Equivalent	No. Conductors	Use With Plug

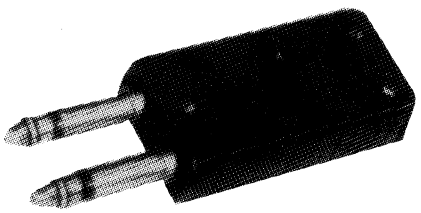
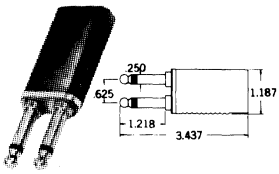
	PJ-240W	C
	PJ-241W	A
	PJ-242W	C
	PJ-339W	A

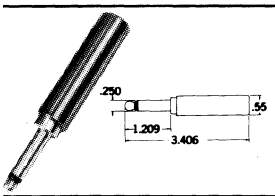
ADC Plugs



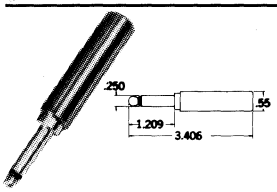
TWO CONDUCTOR



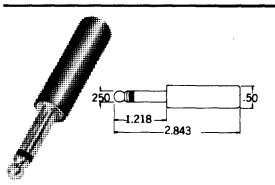
PJ-1 — Equivalent WE-241. Heavy duty die cast frame. Black phenolic shell. Has self-aligning plug sleeves on 5/8" centers for use with all standard jack panels. Two tip conductors, plus sleeve connection common to both sleeves.



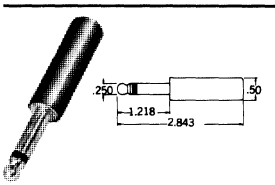
PJ-047R — Equivalent WE-347. Designed for use with tip and sleeve jacks. Molded insulation, red plastic handle, design and construction in accordance with MIL-P-642B specifications.



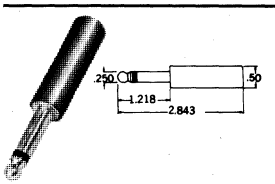
PJ-047B — Same as above except black plastic handle.



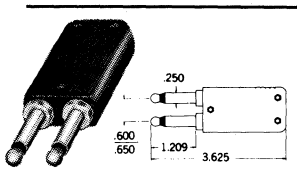
PJ-055B — Formerly ADC PJ-5, fits 1/4" phone jacks. Black plastic shell. Screw terminals, designed and manufactured in accordance with MIL-P-642B.



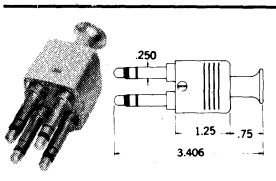
PJ-055M — Same as above except has metal handle, brass, nickel plated.



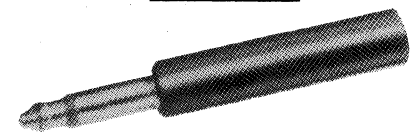
PJ-055R — Same as above except has red plastic handle.



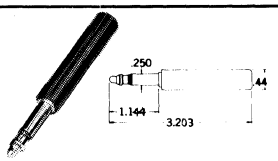
PJ-327 — Equivalent WE-327. Twin plug provides two electrically independent 2 conductor plugs in a black phenolic shell which is notched to indicate polarity. Self-aligning plug sleeves are on 5/8" centers. Designed and constructed in accordance with specification MIL-P-642B.



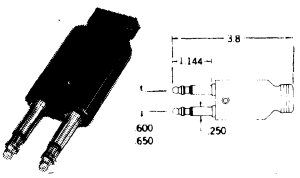
D7200 — Equivalent WE-315B. Four sleeves, self-aligning plug. Molded insulation. Brass shell notched for polarity is nickel plated and connected to plug sleeves to provide shielding for tip conductors. For use with four PJ-318 double jacks mounted on 5/8" centers. Five conductors total.



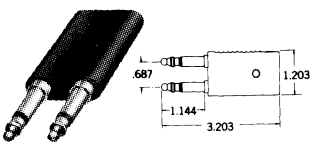
THREE CONDUCTOR



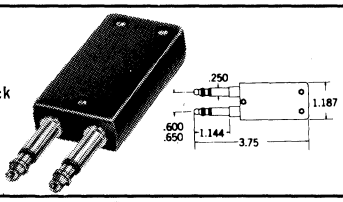
PJ-2 — Equivalent WE-291A. Designed for use with 1/4" diameter tip, ring and sleeve jacks. Especially designed cone-shaped tip to prevent momentary shorting of tip and ring conductors when used with ADC PJ-339, WE-239A or similar three circuit jacks.



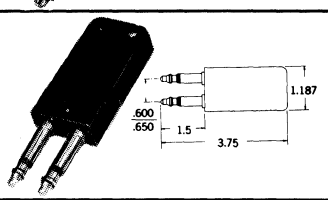
PJ-4 — Looping plug, dual three conductor type. Same conductor configuration as PJ-051 except has conductors wired internally, tip to tip, ring to ring and sleeve to sleeve. Black plastic shell.



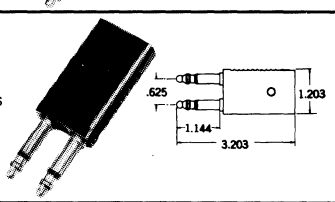
PJ-6 — Equivalent WE-213. Designed for applications requiring two separate 3 conductor circuits. Popularly used with operator's intercom/monitor headsets. Black shell notched for polarity identification. Self-aligning plug on 1 1/16" centers. (**Note:** Not intended for use with standard jack panels where jacks are mounted on 5/8" centers.)



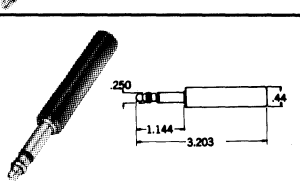
PJ-7 — Equivalent WE-425. Twin type plug with tip, ring and sleeve conductors on 5/8" centers for use with all standard jack panels. Designed to mate with three conductor jacks having 1/4" diameter sleeves. Molded insulation. Black phenolic shell is notched to indicate polarity.



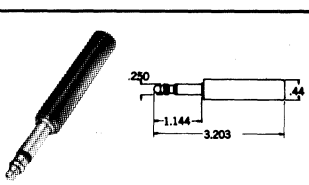
PJ-8 — Dual three conductor type with same conductor configuration as PJ-2, designed for non-shorting of tip and ring circuits when used with PJ-339, WE-239A or similar jacks. Black plastic handle notched to indicate polarity.



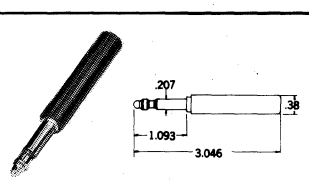
PJ-9 — Equivalent WE-338. Designed for applications requiring two separate 3 conductor circuits. Will mate with three-conductor jacks having 1/4" diameter sleeves. Molded insulation, black plastic handle notched to indicate polarity. Self-aligning plug sleeves on 5/8" centers. Has two separate cord entry holes and requires "Y" type cord or two separate cords.



PJ-051R — Equivalent WE-310. Formerly ADC PJ-3. Designed for use with 1/4" tip, ring and sleeve jacks. Molded insulation, red plastic shell, three conductor. Is in accordance with MIL-P-642B.

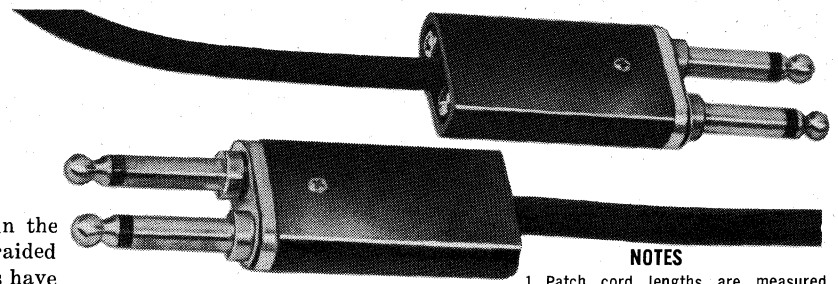


PJ-051B — Same as above except black plastic handle.



PJ-309 — Equivalent WE-309. Three conductor type. Has .207 diameter sleeve (small diameter). Intended for use with ADC PJ-246, PJ-249 and similar three circuit jacks which have .210 I.D. sleeves. Molded insulation — red plastic handle. Designed and constructed per MIL-P-642B.

ADC Patch Cords



ADC Patch Cords have become standards in the communications industry. The heavy Nylon braided jacket excels in abrasion resistance. All cords have been designed to give the ultimate combination of durability, flexibility and reliability. ADC has numerous combinations of special cord assemblies using virtually every plug combination required. You are invited to submit your requests or requirements for quotations.

PATCH CORD LENGTH	TOLERANCE
6 inch	+ .375" —.00"
1 foot	+ .75 " —.00"
2 feet	+1.125" —.00"
3 feet	+1.375" —.00"
4 feet	+1.625" —.00"
5 feet	+2.0 " —.00"
6 feet	+2.25 " —.00"
10 feet	+2.625" —.00"

NOTES

1. Patch cord lengths are measured from backs of plug sheet.
2. When outer jacket colors other than noted are required add suffix:
   S — For Slate G — For Green
   R — For Red B — For Black
3. All cords and cord assemblies will withstand 500 V, 60 Hz PBT between all conductor. Cordage is designed to have minimum leakage resistance of 50 Megohms with 100 volts applied.

2 CONDUCTOR SHIELDED, CORD ASSEMBLIES

Length	Cord w/ PJ-1 Plugs	Cord w/ PJ-055B Plugs	Replacement Cords Only
6 inch	PJ-10½	PJ-50½	PJ-20½

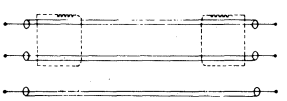
These cords provide two tinsel wire conductors plus a braided shield. Overall jacket is braided nylon. Black nylon is standard with slate colored jacket also stocked. Green and red are available on special order. See Note 2.

2 CONDUCTOR UNSHIELDED, CORD ASSEMBLIES

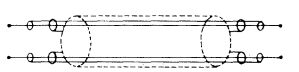
Patch Cords Length	Cord w/ PJ-327 Plugs	Cord w/ PJ-047R Plugs
1 foot	PJ-181	PJ-471
2 feet	PJ-182	PJ-472
3 feet	PJ-183	PJ-473
4 feet	PJ-184	PJ-474
5 feet	PJ-185	PJ-475
6 feet	PJ-186	PJ-476



The PJ-180 and PJ-470 series cords offer tinsel wire conductors, thermo plastic insulated. Standard color for PJ-180 series patch cords is slate. The standard color for the PJ-470 series cords is red. Other colors are available on special order, see Note 2.

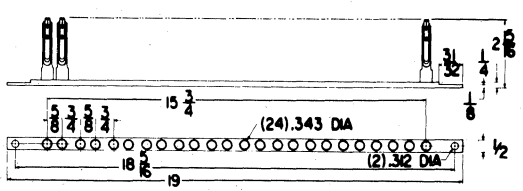
3 CONDUCTOR SHIELDED, CORD ASSEMBLIES

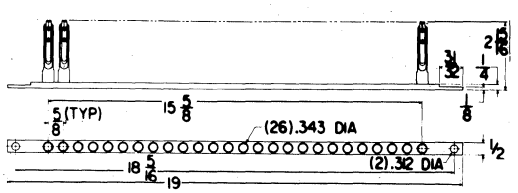
Length	Cord w/ PJ-7 Plugs	Cord w/ PJ-8 Plugs
1 foot	PJ-171	PJ-91
2 feet	PJ-172	PJ-92
3 feet	PJ-173	PJ-93
4 feet	PJ-174	PJ-94
5 feet	PJ-175	PJ-95
6 feet	PJ-176	PJ-96



The PJ-90 and PJ-170 series cords provide four tinsel wire conductors, plus a shield common to both sleeves on the plugs. Standard color for these cords is black. They are also available in slate, green or red on special order. See Note 2.

Lamp Strips (For Use with Standard Broadcast Jack Panels)

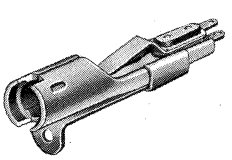




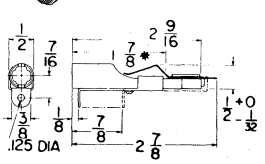
Designed to mount in standard 19" rack. These ½" wide lamp strips have individual lamp on ⅝" centers corresponding with the spacing on all broadcast jack panels. Same high quality materials and construction as used on switchboard lamp strip.

Type	No. Lamps	Use with Jack Panel
PJ-158	24	PJ-31 and PJ-33
PJ-159	26	PJ-30, PJ-35 and PJ-36

Lamp Sockets

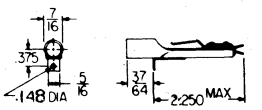


PJ-150—This new type lamp socket has the unique feature of an adjustable mounting tab which allows it to be used as a replacement for any standard lamp socket with a ⅛" diameter sleeve on panels from ⅛" to ⅞" thick. Designed to accommodate standard switchboard lamps such as WE #2 or equivalents supplied by General Electric or Sylvania. The PJ-150 lamp socket is interchangeable with WE Nos. 49 and 50.

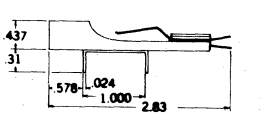


* LAMP INSERTION DEPTH

PJ-160—This lamp socket is dimensionally the same as the PJ-150 except without the adjustable mounting tab feature. Designed with a fixed ¼" wide mounting lug. This socket is used on ⅞" thick panels. Interchangeable with WE #49A. Use lamps and lamp caps as recommended for PJ-150.

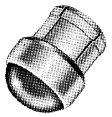


PJ-157 (Fits standard panels.) Designed to be used with any standard single or double row jack panel. Has fixed mounting tab for ⅝" thick panels. Interchangeable with WE #47A. Will accommodate standard switchboard lamps such as WE #2 or equivalent supplied by General Electric or Sylvania. Uses PJ-154, PJ-155, and PJ-156 lamp caps.



PJ-147—Designed for printed circuit board mounting, ¼" long mounting tabs and spring terminals are tinned for easy soldering. Will accommodate standard switchboard lamps such as WE-2 or equivalent supplied by General Electric or Sylvania. Uses PJ-154, PJ-155 and PJ-156 lamp caps.

ADC Lamp Caps



PJ-151, 152, 153—These series of lamp caps are made for use with ADC PJ-150 lamp sockets. Cap diameter 13/32". Shank diameter .343". Fits 11/32" hole. Interchangeable with standard lamp caps, such as Stromberg Carlson #31 and WE #2.

PJ-154, 155, 156—These lamp caps are for use with PJ-157 lamp sockets and PJ-148 and PJ-149 lamp strips. Cap diameter 3/4". Shank diameter .338". Fits 11/32" hole. Interchangeable with standard lamp caps, such as Stromberg Carlson #30.

PJ-151	White	Glossy
PJ-152	Red	Frosted
PJ-153	Green	Frosted
PJ-154	White	Glossy
PJ-155	Red	Frosted
PJ-156	Green	Frosted

Lamp Strips

SWITCHBOARD TYPE LAMP STRIPS

Available with 10 or 20 lamps per strip. Mounting provisions same as corresponding jack strips. Die formed lamp socket, welded construction. Mounting strip of alloyed steel with black satin vinyl finish. Nickel silver springs. Formed fiber sleeve insulates lamp from socket. Insulation of high grade phenolic. Lugs hot tin dipped. Sockets accommodate standard switchboard lamps, such as WE #2 or equivalents supplied by General Electric or Sylvania. Interchangeable with Stromberg Carlson type #121.

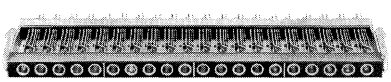
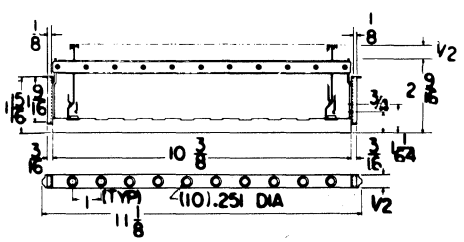
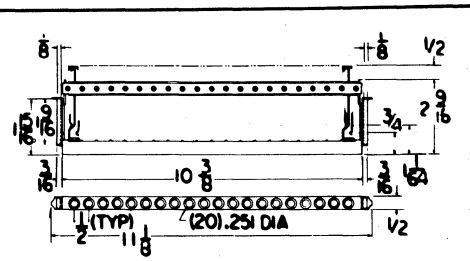
These jack strips with 10 or 20 jacks per strip provide circuits most commonly used in telephone switchboard applications. Jack mounting strips are molded black phenolic. Brass sleeves with bright dip finish can be removed individually for replacement. Contacts are coin silver, welded to nickel silver springs. Lugs are hot tin dipped. Insulation of high grade phenolic. Die formed mounting brackets designed to permit use of standard jack fasteners. Interchangeable with popular Stromberg Carlson types #99 and #100.

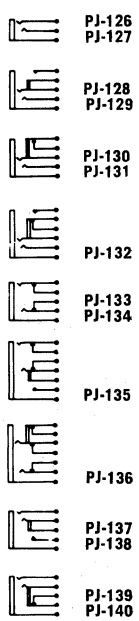


PJ-126
PJ-139



PJ-127
PJ-140





The ADC Jack and Lamp Strips shown here are designed with mounting brackets commonly used in telephone switchboards but can be supplied with other type mounting brackets to fit a variety of other applications. Ideally adaptable to rack mounting, these strips require much less space than broadcast type panels. Consult ADC for an alternate bracket to suit your needs.

ADC Coaxial Patch Panels

Modern day telemetry systems demand reliable performance of high frequency patching systems ■ COAX patch panels and accessories have been designed to insure the most dependable communication links available today ■ Mil Spec gold plating on all contact surfaces, precision tolerances and the finest available materials are standard on all units ■ The COAX label on jack panels and accessories is your assurance of the finest craftsmanship in the industry.

COAX PANEL SPECIFICATIONS

PANEL: Aluminum, 3/16 inches thick. Mounting centers to correspond with standard 19" rack mounting.

INSULATED PANELS: Sub-panel made of phenolic type PBG per Mil-P-3115B.

INSULATOR RING: Teflon (insulates sleeve of jack from aluminum panels — used on insulated panel assemblies only).

FINISH: Light Grey Enamel Color 111, Mil-E-15090. (Other finishes are available on special order.)

These components were designed for patching (transferring or switching) high frequency signals. Generally these higher frequencies fall into an LF range (30-300KHz), MF range (300-3000KHz), HF range (3-30MHz), VHF range (30-300 MHz), and UHF range (300-3000MHz). ■ This new spectrum for higher frequency patching has found its principal application in the microwave, video, telemetry and data transmitting fields. ■ ADC coaxial components are available as catalog items from stock. Special requirements for engineered prototypes can be filled through the ADC engineering department. ■ All components are manufactured of the highest quality materials and built to pass stringent environmental requirements.

(ADC) Coaxial Single Jacks

COAX jacks are available in both Western Electric compatible (CJ-1000 series) and RCA compatible (CJ-1100 series) types. These jacks are designed to be mechanically and electrically interchangeable with all commonly used coaxial jacks ■ Phosphor bronze spring fingers are preformed to provide large wiping and contact surfaces ■ The WE compatible jacks are made with a .090 inch diameter center conductor pin and the RCA compatible jacks are made with a .078 inch diameter center conductor pin ■ Both these types are made for 50 and 75 ohm systems applications.

SPECIFICATIONS

Jack Sleeve and Frame: Brass.

Center Conductor: Beryllium copper, condition HT (Gold plating*).

Outer Conductor Contacts: Phosphor bronze, spring tempered (Gold plating*).

Conductor Surfaces: Gold plating*.

Insulation: Polytetrafluorethylene.

Shield Termination: Brass (Gold plating*). A sleeve is furnished for use when a crimp on solderless connection for the shield is desired.

*MIL-G-45204 Type II

COAX JACK ADC/WESTERN ELEC.

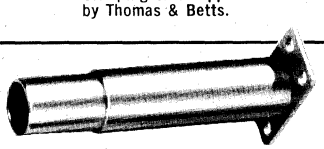
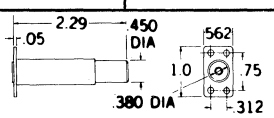
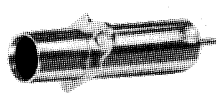
CJ-1017	CJ-1117	WE-724 or Belden-8281	75 ohms	WT-415



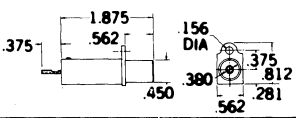
CJ-1008 CJ-1108



This jack is not intended for coaxial terminating. The jack is arranged to solder to the center conductor similar to the CJ-1000 series. No disassembly is necessary to make connections. Similar to WE-498A jack.

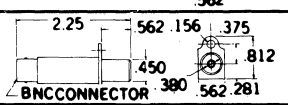


CJ-1010 CJ-1110



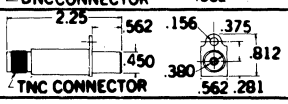
Singly mounted with the center conductor projecting beyond the body. The center conductor has a .062 hole x .34 deep and a .05 hole in the frame for solder connections. No disassembly is necessary to make connections. Similar to WE-470B jack.

CJ-1011 CJ-1111

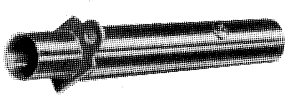


Short body, singly mounted jack with a BNC connector on the rear.

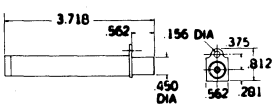
CJ-1012 CJ-1112



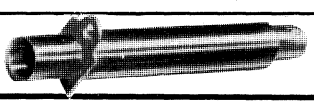
Short body, singly mounted jack with a TNC connector on the rear.



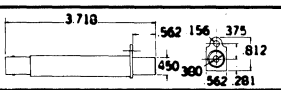
CJ-1013



Single terminating jack with a .156 I.D. cable entrance and shield crimping sleeve provided for solderless connection. Terminating resistor is 75 ohms ± 1%, ¼ watt. The resistor is removed from the circuit when a plug is inserted into the jack.

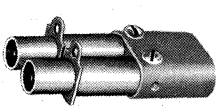


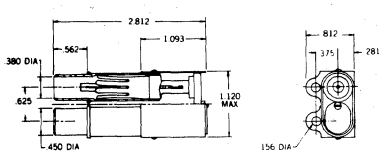
CJ-1015



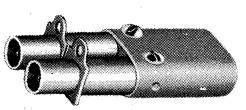
Single terminating jack with a BNC connector on the rear. Same function and usage as CJ-1013.

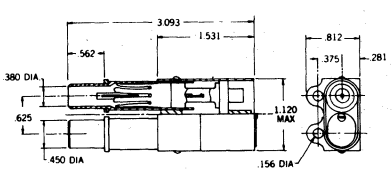
Coaxial Dual Jacks



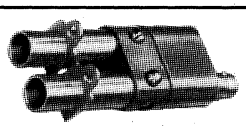


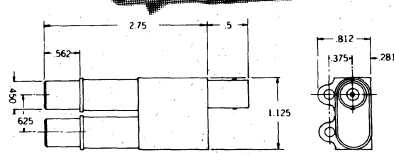
CJ-1005 — Dual Jack with two cable entrance holes (.312 dia.) permitting wiring to one or both of the center conductors. Accessibility is gained by removal of die cast zinc shell. This dual jack may be mounted on ⅝" horizontal centers with mounting lugs side by side or the mounting lugs may be rotated back to back for vertical mounting.



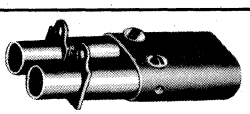


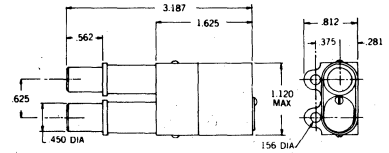
CJ-1009 — Dual jack with two cable entrances provided with crimping sleeves for solderless shield termination. Accessibility to solder center conductor is gained by removing rear half of zinc shell. Mounting lugs may be rotated similar to CJ-1005.





CJ-1014 — Dual paralleling jack with internal connections to facilitate one side to be used as a monitoring point. A BNC connector provides cable attachment to the rear. This jack is intended to be used at frequencies up to 400 MHz.





CJ-1016 — Dual paralleling jack designed to allow connections from WE-754E or equivalent, twin lead, shielded cable. Access is gained by removing rear metallic cover.

Coaxial Plugs

COAX plugs are compatible with both Western Electric and RCA types. Single plugs, termination plugs (with built-in resistor and capacitor), looping plugs and looping plugs with pin jacks for monitoring are available. COAX single plugs are made with standard wrench fittings for easy assembly and include a unique cable strain relief clamp. All COAX plugs are manufactured to precision tolerances of ±.002 to assure perfect fit with mating jacks. Chamfered edges on all plugs assure easy insertion.

COAXIAL PLUG SPECIFICATIONS
Outer Conductor: Brass
Finish (Conductor Surfaces): Gold Plating*
Center Conductor — Brass: Gold Plating*
Insulation: Polytetraflorethylene
Handle:
Single and Termination Plugs — Brass Nickel Plated
Looping Plugs — High Impact Resistant Plastic (Implex) Black
Dummy Plugs — Brass — Black Nickel

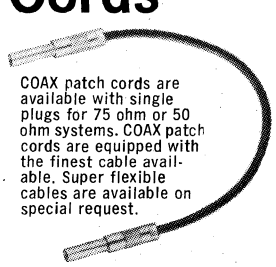
CP-1042 **CP-1142**	 Looping plug with conductors on ⅝" centers. Internal shield connections feature crimped type solderless connections. The handle is of a high impact black plastic.	Looping	CP-1042 (WE-372A)[3]	CP-1142[3]		
CP-1043 **CP-1143**	 Looping plug with monitor points for the center and outer conductors on the rear of the handle.	Looping with Pin Jacks[1]	CP-1043	CP-1143[3]		
CP-1047 **CP-1147**	 Terminating plug containing a 75 ohm ±1%, ½ watt resistor between outer and center conductor. This plug also features a monitor pin bypassing the resistor to the center conductor.	Termination with Pin Jack	CP-1047	CP-1147		
CP-1049	 Dummy plug with a black nickel plug shell for immediate identification. The plug has the outer conductor only.	Dummy[2]	CP-1049 (WE-339A)	CP-1149		

[1]Same as CP-1042 with pin jacks.
[2]Same as single plug, except without center conductor or insulator.
[3]Both 50 and 75 ohm looping plugs are available. 75 ohm plug to be supplied unless order specifies 50 ohm version.

Coaxial Patch Cords

At ADC, workmanship is considered a very important factor since it contributes much to electrical performance of coaxial patching devices. For example, utmost care is taken when attaching the cables to the jacks and plugs since this has an effect on the electrical characteristics. The braided shield of the cable is positioned so as to be evenly distributed around the entire circumference of the shield termination on the jack or plug. The shield termination could be soldered but since heat tends to distort the dielectric in the cable, the use of a crimped on solderless connection for the shield conductor is recommended.



COAX patch cords are available with single plugs for 75 ohm or 50 ohm systems. COAX patch cords are equipped with the finest cable available. Super flexible cables are available on special request.

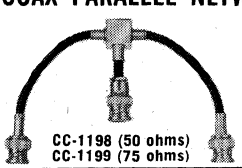
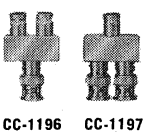
COAX PARALLEL NETWORKS



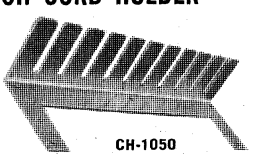
CC-1198 (50 ohms)
CC-1199 (75 ohms)



CC-1196 CC-1197

ADC Parallel Networks are designed for use with CJ-1011 and CJ-1111 or other similar jacks which are terminated in BNC connectors. These networks are used for dividing or paralleling circuits. The CC-1197 network is designed for use between adjacent jacks on ⅝ inch centers.

PATCH CORD HOLDER



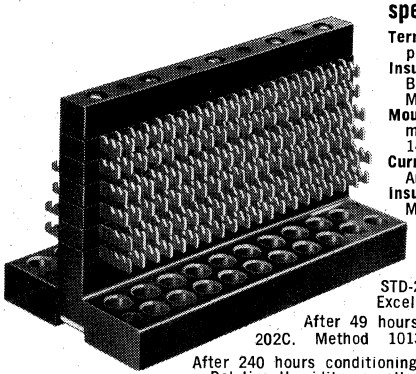
CH-1050

This convenient cord holder will hold up to 50 cords and is designed for wall or rack mounting. Will accommodate patch cords with cable diameters up to .300 inches and plug handles with a minimum diameter of .320 inches The CH-1050 is steel, finished with nickel plating.

Molded Terminal Blocks

20 pin

Known for their ruggedness, ADC "Christmas Tree" Terminal Blocks have become standards in the Broadcast and Telecommunications Industries. The ADC 20-Pin Terminal Blocks are molded of durable, black, thermo-set plastic per Military specifications MIL-F-14F. Terminals are brass with a tin alloy plating for lasting solderability (see specifications below for details on solderability). The PJ-101 series blocks have terminals graduated in length for ease of wiring. The Figure 2 solderless terminals as furnished on the PJ-161 series blocks are designed to accommodate AMP No. 60197-1 Connectors as supplied by American Pamcor, Inc. or may be used as regular solder terminals. All Terminal Blocks are numbered along the top row for easy terminal identification.



specifications

Terminals: Brass, Tin alloy plated.
Insulating Strips and Base: Black Thermoset plastic per MIL-M-14F, Type CFG.
Mounting Strip: Steel, Cadmium-Chromate per MIL-F-14072, #M262, Type II.
Current Carrying Capacity: 5 Amperes.
Insulation Resistance: 1000 Megohms Min.
Dielectric Strength: 2500 V RMS 60 Hz. between terminals.
Solderability: Per MIL-STD-202C, Method 203A Initial: Excellent (over 95% coverage). After 49 hours salt spray per MIL-STD-202C. Method 1013: good (90% coverage). After 240 hours conditioning at +150 F and 95-98%. Relative Humidity: excellent. After 90 day storage at room temperature: excellent.

PJ-112		12	240	5.593

This series of 20-Pin Terminal Blocks is identical to those illustrated above except for mounting details. The PJ-661 and PJ-664 series blocks are specifically intended to be mounted on distribution frames. Mounting brackets are provided for either vertical or horizontal mountings. Add "V" suffix for vertical mounting bracket or "H" suffix for Horizontal bracket. All hardware necessary to mount the blocks and bracket to the main frame are furnished. (Brackets and hardware are packed separately with the terminal blocks.) Both brackets and associated hardware are steel with cadmium-chromate finish per Mil-F-14072, #M262, Type II.

26 pin

The entire block, fanning strip and separator strips, is molded of durable thermoset plastic per MIL-M-14F specifications. Although primarily used as a "Line Terminal Block" in Central Office applications, these blocks are adaptable to many uses in the broadcast and telecommunications field. The PJ-660 series blocks are supplied with conventional solder terminals (see details regarding solderability). The PJ-665 series provides solderless terminals designed to accommodate AMP 60197-1 connectors (supplied by American Pamcor, Inc.) or may be used as conventional solder terminals if desired.

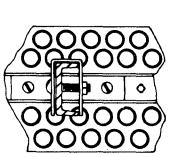
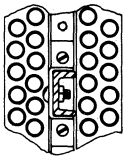
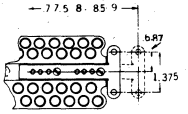
Unless otherwise specified the PJ-660 and PJ-665 Terminal Blocks will be supplied with the mounting strips as shown in the detailed drawings above. Mounting brackets, either horizontal type or vertical type, should be specified separately. All hardware necessary to mount the blocks and brackets to the main frame are furnished. The brackets and hardware are packed separately and included with the Terminal Blocks. Both brackets and associated hardware are steel with cadmium-chromate finish per Mil-F-14072, #M262, Type II.



PJ-660H Horizontal Mounting



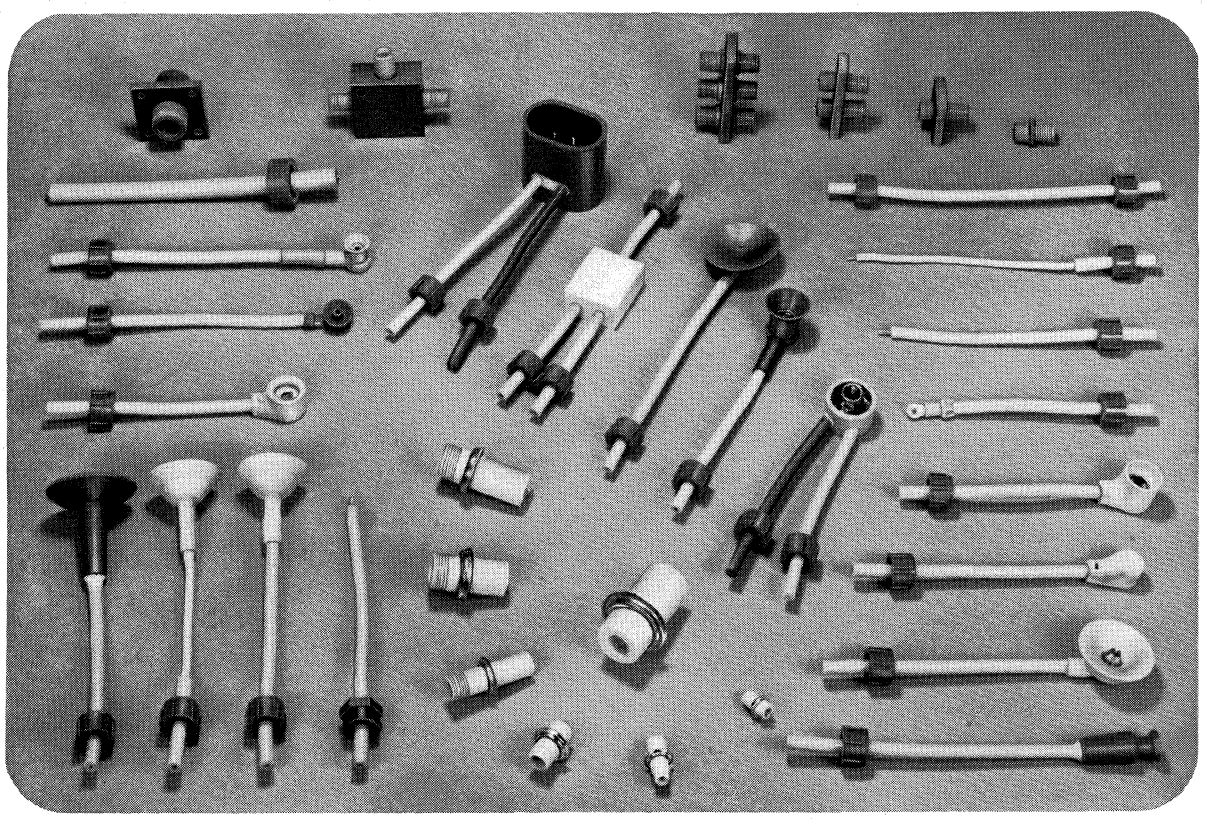
PJ-660V Vertical Mounting



PJ-660-A Adjustable Mounting Brackets

Intended for use with PJ-660 and PJ-665 terminal blocks, these adjustable mounting brackets allow for variable mounting centers of 7", 7½", 8", 8½" and 9". These mounting brackets are to be ordered separately. Both brackets and associated hardware are steel with cadmium-chromate finish per Mil-F-14072, #M262, Type II.

HIGH VOLTAGE LEAD ASSEMBLIES AND RECEPTACLES



The CAPITRON Division of AMP Incorporated is the leading manufacturer of high voltage, high altitude, high temperature lead assemblies and receptacles. Custom pre-engineered LGH*high voltage connector products incorporate the advantages of miniaturization and lightweight, and are ideal where reliability and peak performance are essential to the application. They are the result of continuing research and development activities in the connection of high voltage power supplies, modulators, pulse forming networks, high voltage transformers, magnetrons, klystrons, traveling wave tubes, and cathode ray tubes.

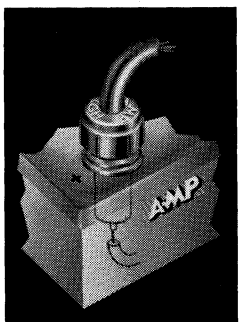
GENERAL FEATURES OF LGH COMPONENTS

- Lightweight, space saving, safe
- Wide temperature range: −55° C to +125° C (−67° F to +257° F)*
- Voltage ratings: to 50,000 volts DC†
- Easy to install—no tools needed
- Insulation: extruded silicone rubber
- Receptacles: ceramic or glass epoxy
- Quick disconnect
- High dielectric and mechanical strength
- Hermetically sealed and corona-resistant
- High altitude operation: up to 70,000 ft. without derating
- Meet applicable mil. specs. for shock and vibration resistance
- RFI shielding optional

*Higher temperature components up to +200°C (+392°F) on request

†Special designs to 200,000 volts DC on request

NOTE: See other CAPITRON High Voltage products under Catalog Sections 2100 and 4000.



Sizes and Ratings Available

TYPE	DC VOLTAGE Rating**	CURRENT RATING**
LGH ½	6,000	10 amps DC
LGH ½ L	12,000	10 amps DC
LGH 1	12,000	10 amps DC
LGH 1 L	25,000	10 amps DC
LGH 2	25,000	10 amps DC
LGH 3	35,000	10 amps DC
LGH 4	50,000	10 amps DC

**Peak AC and peak pulse voltage ratings will be somewhat less than DC ratings. Current rating is limited to 7.5 amps AC rms, 60 cycles.

Write on your letterhead for our LGH products catalog.

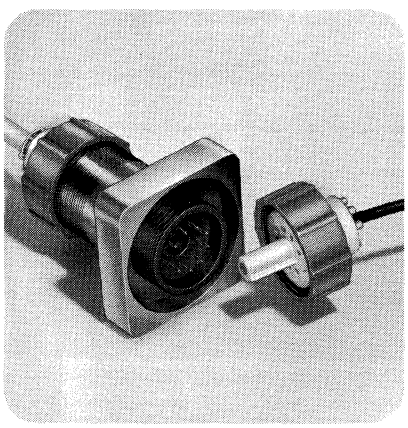
AMP INCORPORATED

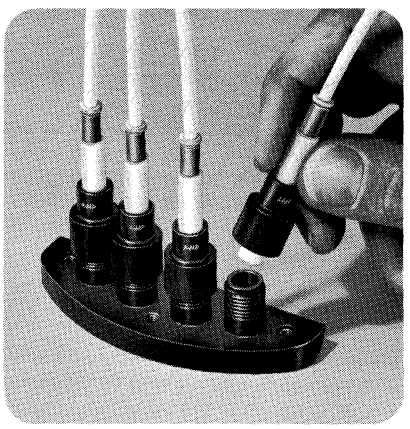
HERMETIC CONNECTORS UP TO 150,000 VOLTS D.C.

WJH* Connectors eliminate glass or ceramic insulators

10 PIN CONNECTOR

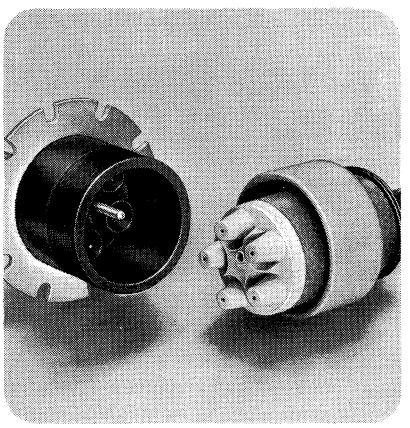


25,000 Volts D.C. center conductor and 9 low voltage pins



15,000 Volts D.C. Bulkhead Connector

5 PIN CONNECTOR



40,000 Volts D.C. Solder or "O" Ring Mounting

Features:

- Safe—no exposed high voltage parts
- Space saving—maximum performance from the minimum size and weight
- Color coded for easy identification
- Fast connect and disconnect
- Wide temperature range (–55°C to +125°C)
- Positive mating of lead into receptacle
- R F I shielding—optional
- Fungus, moisture, oil, and chemical resistant
- High altitude operation—up to 80,000 feet without voltage derating
- Excellent mechanical strength—resistant to vibration and shock
- High dielectric strength
- Preassembled—no tools required
- High reliability—operates under extreme environmental conditions
- Versatile—top access, splice, or bulkhead application
- Corona resistant—virtually unaffected by ozone or corona
- Radiation resistant
- Lead wire remains flexible from –62°C to +250°C
- Meets applicable military specifications
- Quick, easy installation

Suitable for:

- Industrial & Military Applications
- Power Supplies
- Radar
- Avionic Electronics
- CRT's
- Medical Electronics
- Laser
- Copying Machines
- Instrumentation
- Pulse Applications
- Oceanography

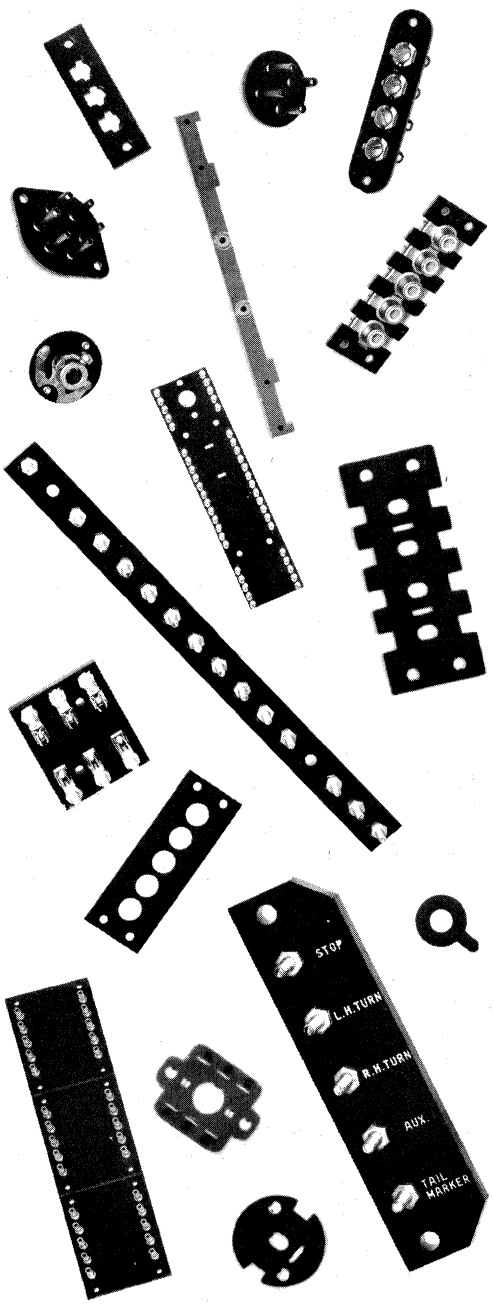
ACCURATE
ELECTRONICS CORPORATION



PRECISION ELECTRONIC and ELECTROMECHANICAL COMPONENTS

In addition to the many hundreds of types of standard components available from stock tools, Accurate Electronics is prepared to manufacture terminal boards, plugs, sockets, connectors or other electromechanical components to your own specifications.

Accurate also manufactures precision stamped metal components of brass, phospher, bronze, beryllium copper, steel, etc. Many metal components are available from stock dies.

In addition, Accurate fabricates all types of laminated plastic materials into precision insulating components.

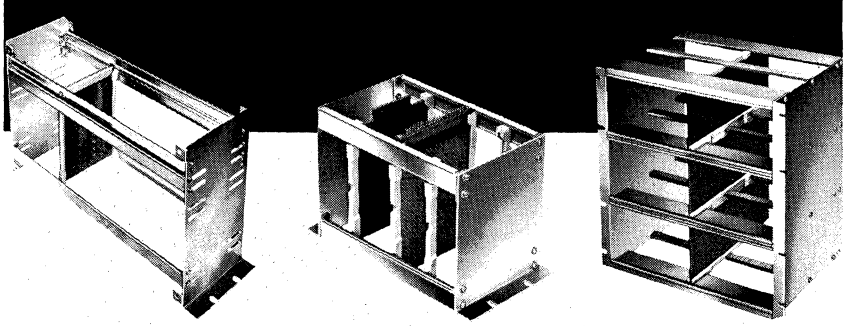
Looking for better p.c. board packaging?

Here it is!...



VERSA-RAK

Order this one when p.c. board size has not been finalized or varies from application to application. Choice of two sizes of side plates and p.c. board holders permits mounting up to 33 boards from 2" to 6¼" wide and from 4" to 9" long. Spacing is ½" on centers or any ⅛" increment over ½". Numbered "V" slots for accurate alignment. Very versatile, rapid assembly.

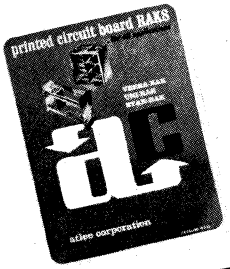
UNI-RAK

Same board spacing as Versa-Rak . . . but YOU specify overall size to meet mounting needs (i.e. number of boards, board width, length). P.c. board holders available with and without connector mounting feet. Connectors can be mounted at flange end or opposite to flange end of Rak. Rapid assembly. Numbered "V" slots for accurate alignment. Center support rail for long boards.

STACK-RAK

Available in single, dual and multiple stack units to mount large numbers of boards in limited space. You specify overall dimensions for number and size of boards to be mounted. Each stack can mount different size boards. Board spacing is .4" on centers or any .1" increment over .4". Connectors can be mounted at either end of Rak. Rapid assembly . . . extra rugged construction.

from atlee of course



SEND FOR NEW FREE CATALOG of Printed Circuit Board RAKS. This is really a working tool for the packaging engineer. Contains detail drawings of all parts of all three Rak configurations. Also complete assembly views and all necessary instructions for computing Rak dimensions for any number and size of boards. See for yourself how Atlee can simplify your packaging problems.

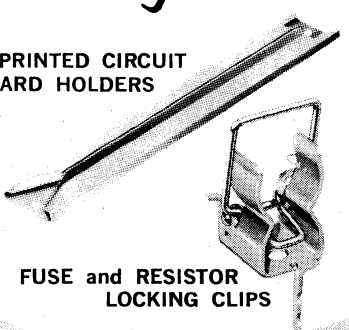
PRINTED CIRCUIT BOARD HOLDERS



FUSE and RESISTOR LOCKING CLIPS

Shown here are just a few of the many quality holders we turn out by the thousands every day . . . holders for components, transistors, crystals, diodes, lead wires, fuses, resistors, printed circuit boards, heat dissipating tube shields and liners, etc. With all these at your fingertips, chances are a standard Atlee holder will solve your holding problems. If not, we can make any special holder you can dream up.

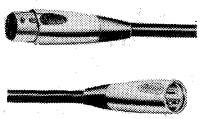
Microphone Connectors

Qwik Connectors

QWIKS provide fastest connect/disconnect of any microphone connectors—and are the most attractive. Premium material and streamlined design give QWIKS eye-appeal as well as superior efficiency. Dielectric is AMPHENOL I-501 Blue, diallyl phthalate, contacts are gold-plated, shells are finished in satin nickel.



Description	3 Contacts	4 Contacts

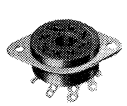
Compact MIP

1⅛" mounting hole. Two .136" screw holes on 1-5/16" centers. 8 contacts only.

88-8	Octal, Black Phenolic
88-8T	Octal Mica Filled Phenolic
88-8TM	Octal Mica Filled Phenolic with silver plated contacts and stainless steel mounting plate
88-8X	Loctal. Black Phenolic



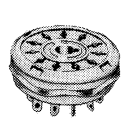
Saddle Sockets

8 contact octal with 4 ground lugs.

168-001	Wrap around contacts
168-015	Tuning fork contacts

Steatite Magnal Socket

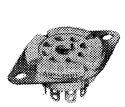
49-SS11L	11 contacts for TV or CRT. Retainer ring mounted in 1⅝" chassis hole. 1⅛" pin circle



Transmitting Tube Socket

Steatite, with mounting plate.

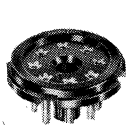
148-101	4 contacts, two small, two large



Tube and Relay Bases

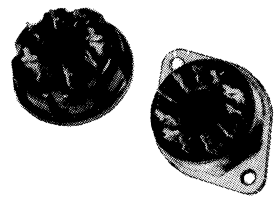
Black Phenolic.

50-801	Octal	.687 Pin Circle
50-820	11 contact	.750 Pin Circle



Printed Circuit Sockets

Standard socket series 77MIP and 78S of eight or more contacts for mounting directly to printed circuit boards. Contact tails are ⅛" long and mount through 1/16" diameter holes.

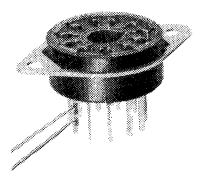


To Order:

Add suffix -WO125 to part number, i.e. 77MIP(X)-WO125 or 78S(X)-WO125.

Wire Wrap Sockets

Standard socket series 77MIP and 78S of eight contacts or more have ½" long contact tails for wire wrap termination.



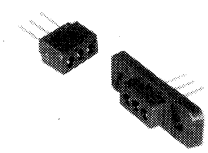
To Order:

Add suffix -WO500 to part number, i.e. 77MIP(X)-WO500 or 78S(X)-WO500.

SCR Sockets

Three contact receptacle designed to accept General Electric Company's C106 SCR (Silicone controlled rectifier). Nickel silver contacts. Black nylon insulator. Voltage rating: 500 volts RMS. Current rating: 5 amps. Contact spacing: .200" centers. Mating engagement depth: .160" min. Contact length: Approximately .323" x .020" square. Contact tails designed for wire wrap or printed circuit board mounting.

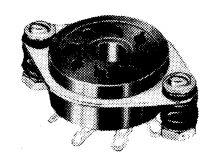
77-115	Press fit style without flange. To fit rectangular panel or chassis cut dimensions .340" x .164", .330" x .161".
77-116	Mounting flange style. Molded mounting flange has two .125" diameter mounting holes on .625" centers. Assembly fits rectangular panel or chassis cut-out .325" x .200".



Floating MIP Sockets

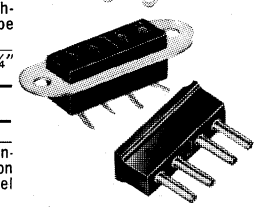
For vibration-free operation.

77-MIP-8FK	Octal. Complete with 4 rubber grommets, 2 mounting screws, nuts and washers
77-3K	Kit for making any "MIP" into floating socket. 4 grommets, 2 mounting screws, nuts and washers. MIP screw holes must be enlarged to ¼" diameter
77-MIP-8F	Same as 77-MIP-8, but with ¼" mounting holes



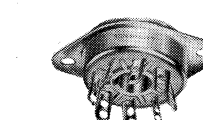
Rectangular Connector

70-26	4 contact cable plug
77-26	4 contact receptacle, molded-in-plate, two 5/32" screw holes on 1⅜" centers. 5/16" x 1 1/16" panel cutout



MIP, Cloverleaf Contacts

59-103	Octal. Same dimensions as standard MIP, stainless steel mounting plate, cloverleaf contacts hot tinned dipped



Grid Cap

63-1	For tube grid caps, ¼" to ⅜" diameter

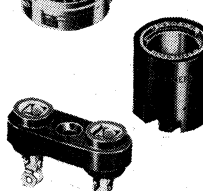
Duodecal Socket

59-402	For CRT with maximum of 12 contacts equally spaced on 1.063" pin circle

Lamp Socket

For medium base pre-focused lamps. 1000 watts, 110/250 volts, UL approved.

98-8	Phenolic, to 450°F.
98-1	Steatite, to 1800°F.



Crystal Holder Sockets

Two contacts, ¾" centers for ⅛" prongs.

33-2	Black Phenolic
33-2T	Mica Filled Phenolic

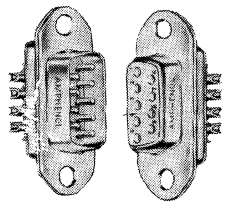
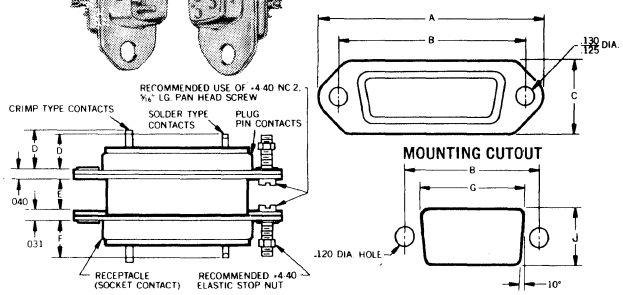
MinRac 17 Connectors 17 Series



MINIATURE RACK AND PANEL POKE-HOME CONTACTS CHOICE OF DIELECTRICS— DIALLYL PHTHALATE, ZYTEL, OR GLASS HERMETIC



A complete line of versatile lightweight rack and panel miniature connectors with 9 to 50 contacts. Trapezoidal shell polarizes the connector and insures proper mating with existing trapezoidal connectors. Poke-Home contacts permit soldering or crimping away from the connector (where there is room to work) and allows contacts to be recircuited at any time. Contacts are gold over silver plate and are rated 5 amperes.

NUMBER OF CONTACTS

Replace XX with 09, 15, 25, 37 or 50 to indicate the number of contacts.

Hermetically Sealed Plugs

Contacts are fused within a single piece glass preform. Identoseal contact marking. Leakage rate is less than 0.1 micron cubic foot of helium per hour with one atmosphere differential. Tin over cadmium plated shell. Available in all pin contact configurations.
Flattened and Pierced Contacts 17-52XX0-3
Solder Cup Contacts 17-52XX0-4

Cable Application Accessories

Cable Clamps—For use with plugs and receptacles in cable-to-panel and cable-to-cable applications. Eliminates strain on wire terminations.
Locking Devices—Eliminates possibility of accidental disconnection. Spring latch is a swivel spring that is used with the cable clamps above. Screw latch is used with or without a cable clamp in a semi-permanent termination.

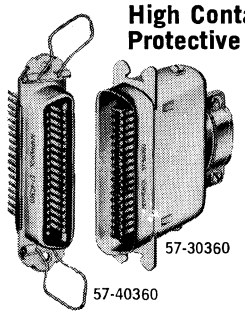
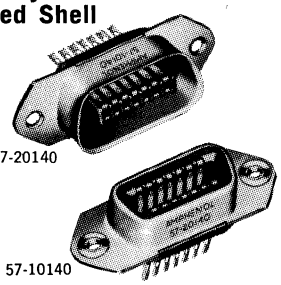
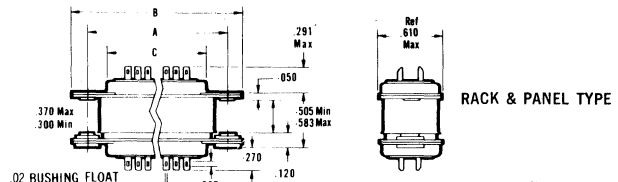
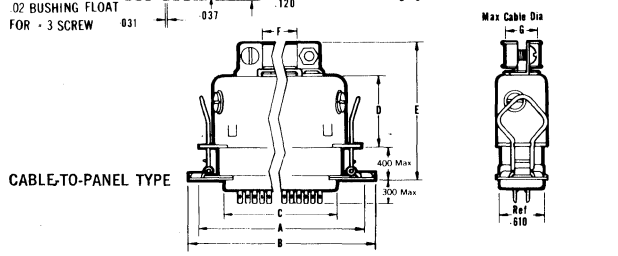
Micro Ribbon Connectors 57 Series

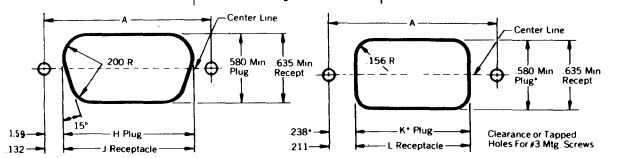
High Contact Density—14 to 50 Contacts Protective Polarized Shell











CUTOUT—BOTTOM MOUNTING for rack and panel type only

CUTOUT—TOP MOUNTING for both types

All of the advantages of ribbon contacts apply to Micro Ribbon Connectors. This includes the self-cleaning, self-wiping action of the contacts and extremely low insertion and withdrawal forces. Dielectric is improved diallyl phthalate with high impact strength and low moisture absorbency characteristics. Trapezoidal shells provide polarization. and are made of zinc plated brass with a clear chromate conversion seal. Small size makes the Amphenol Micro Ribbon Connector ideal for high density miniature modules as well as rack and panel applications. Connectors may be top or bottom mounted. Rated 700V DC at sea level; 200V DC at 70,000 feet.
Rack and Panel and Module Applications. Receptacle mounting plate includes float bushings to allow a float of .020 in each direction. This facilitates blind mating and minimizes the need for critical mounting dimensions.
Cable-To-Panel Applications. Panel receptacles are equipped with sturdy spring latches which are guided and retained by cutouts in the plug's flanges. Receptacle must be top mounted.

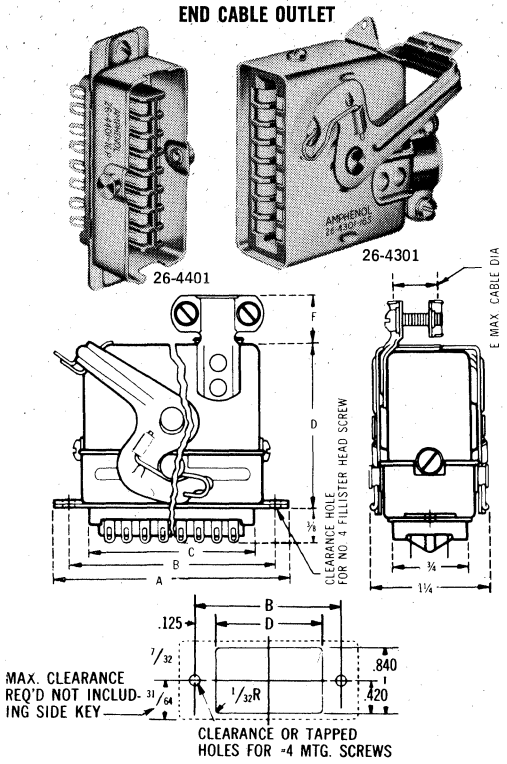
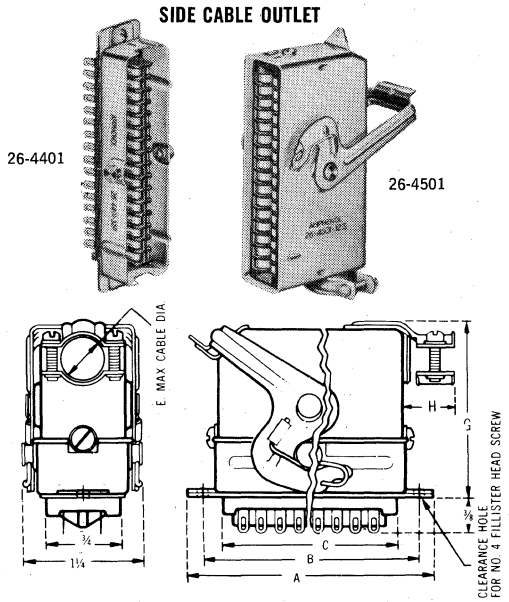
Cable to Panel Blue Ribbon Connectors - 26 Series

END CABLE OUTLET



SIDE CABLE OUTLET



- Low Withdrawal Force
- Low Insertion Force
- Secure Spring Latch
- Alternate Positions
- Provision for Safety Wiring

Cable-to-Panel Blue Ribbon Connectors include a straight plug, right angle plug, and panel receptacle. The plug is equipped with a spring tension swivel latch to insure mating, even in vibration applications. Provision for safety wiring provides additional reliability.

The nickel plated brass shells are notched to provide keying for alternate positions. The large number of alternate positions available is effectively doubled since the plug and receptacles are available with either a male or a female insert. Add P to the catalog number for a male insert; S for a female insert.

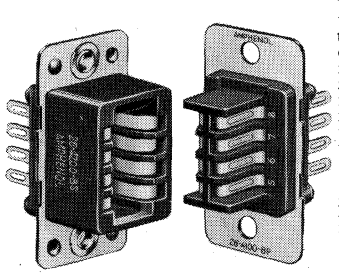
Blue Ribbon 26 Series
Barrier Polarization



This is the most popular of all Blue Ribbon Connector Series. Tapered design of plug body provides pre-alignment of mating contacts. Dielectric barriers between contacts vary in thickness by minute dimensions to provide polarization. Float bushings allow a float of up to .02 in each direction, facilitating the blind mating common in rack and panel applications. Requires simple rectangular panel cutout.

The eight contact size is also available with a molded key and keyway for polarization. Catalog numbers, 26-182 plug and 26-183 receptacle.

Rated 5 amperes, 800V DC at sea level; 300V DC at 70,000 feet.

Pin Polarization

Sturdy guide pins pre-align connectors before contact engagement Pins are of dissimilar size to avoid reverse mating. Float bushings on receptacle allow a float in all directions of .02" to minimize the need for close mounting dimensions and to assist in blind matings. Rated 5 amperes, 750V DC at sea level; 300V DC at 60,000 feet.

Rectangular, Miniature Rack and Panel Connectors - 126 Series (CONTINUED)

Heavy duty, reliable, time proven connectors. Dielectric is of melamine. Contacts are gold over silver plated. Voltage rating of types A and B is 700V RMS between contacts and 600V RMS between contacts and ground with a current rating of 17 amperes. Voltage rating of types C and D is 600V RMS with a current rating of 7½ amperes.

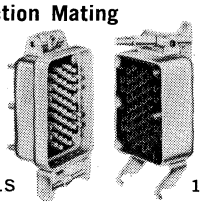
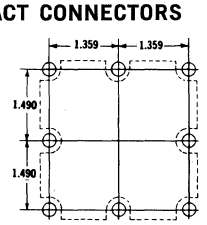
115 Series 50 & 100 CONTACT CONNECTORS

Hinge Action Mating



115-31S



115-30P

Amphenol 115 Series connectors accommodate 50 or 100 No. 16 wires and are nominally rated at 750 volts RMS 60CPS at sea level

The vise action of the screw lock provides the leverage for easy attaching and disengaging of the plug. The two-piece inserts have molded-in numbers to facilitate wiring and checking of circuits. Contacts and inserts are so designed that when assembled the contacts are free floating for alignment in mating but cannot rotate.

Amphenol 115 Series connectors are available in a choice of three types of contacts — crimped-on, extended solder cup or a special socket type for use with taper pin terminals for making solderless connections. When using the crimp-on contacts, note the correct location to make the crimp so that the blade or tines of the contacts will not be distorted. Thomas and Betts tool No. WT-111 M is recommended for crimping the crimp contact. The crimp type can also be used as a buried solder type.

The approximate dimensions of the shells exclusive of attaching mechanisms is 3½" high, 3½" wide and 1 11/32" deep for the 100 contact connectors and 2 31/32" high, 2¼" wide and 1 11/32" deep for the 50 contact connectors. Receptacle Mounting — the 8-32 assembly screws are located as shown. Panel must be cut out for wire lead-in at the back of the receptacle (indicated approximately by dotted lines).

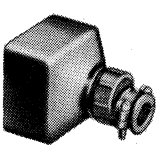
CABLE CLAMP

The 115-949 Cable Clamp fits the 115-30 and 115-31, P & S, as listed in the first column of the table above. The 115-1391 Cable Clamp fits 115-114 and 115-115, P & S. Housing is aluminum with an AN-type clamp. They mount to the back of the connector by means of six screws.



AMPHENOL CONNECTORS

AMPHENOL
THE BUNKER-RAMO CORPORATION

Prin-Cir Plugs - 133 Series

PRIN-CIR PLUGS flush mount directly to printed circuit boards and eliminate any possibility of wear on board circuitry. Used where frequent mating and disengagement is necessary, or where an unusually low milivolt drop is required. Ideal mating solution for boards of non-standard thickness. Gold over copper plated contacts are on .156 centers and mate with 143 Series PRIN-CIR RECEPTACLES.

The PRIN-CIR PLUG, when used with the 143 Series PRIN-CIR RECEPTACLE, is polarized by removing a contact. Contact removal and the marking of the connector is performed by your AiD, or at the Ampenhol factory.

Prin-Cir Receptacle - 143 Series

TUNING FORK CONTACT CANNOT BE OVERSTRESSED .156 CONTACT CENTERS

MATES WITH .054 - .070 PC BOARDS OR 133 SERIES PRIN-CIR PLUGS

Tuning fork contact design assures uniform and firm contact action, even with PC boards at extremes of thicknesses.

Gold plated over copper, tuning fork contacts glide over the delicate foil surface of the printed circuitry.

For boards of non-standard thickness, or where frequency of insertion and withdrawal will exceed 500 cycles, it is recommended that the 143 Series PRIN-CIR RECEPTACLE be used with the 133 Series PRIN-CIR PLUG. Contacts are on .156" centers. All sizes are available with a choice of contact tails.

Printed Circuit Receptacles - 225 Series

BLUE RIBBON PRINTED CIRCUIT CONNECTORS DESIGNED TO MIL-C-21097B
LOW MILLIVOLT DROP • NEGLIGIBLE PC CIRCUITRY WEAR

Amphenol gold-plated RIBBON contacts — with their smooth glide mating action — incur practically no wear on fragile printed circuitry. Ribbon contacts are bifurcated (slit), to guarantee at least two points of electrical contact, even with an irregular shaped printed circuit board. The double spring tension of the ribbon contact, and large mating surface, provides consistent low contact resistance, with corresponding low millivolt drop.

.156" CENTERS

Bifurcated ribbon contacts are on .156" centers and will accept PC boards of .054" to .071" thickness.

DIALLYL PHTHALATE

One piece, flame resistant, glass filled diallyl phthalate. Chamfered throat opening assists in guiding PC boards to a perfect engagement.

MIL-C-21097B

Amphenol Blue Ribbon PC Connectors represent the most comprehensive connector line designed in accordance to MIL-C-21097B.

POLARIZATION

Molded keying slots between contact accept polarizing key without loss of contact positioning. One nylon key is supplied with each commercial connector.

CONTACT ROWS

Blue Ribbon PC Connectors are available with two rows of separate independent contacts, or one row of contacts with back-up springs provided for proper mating tension. The 43 position size connector is therefore available with either 43 or 86 contacts. Double sided contacts with single tails are also available in 6 through 36 sizes.

TERMINATION

A wide variety of contact tails permit Blue Ribbon Printed Circuit Connectors to be terminated by soldering, or by crimping, of either Poke-Home or taper pin contacts.

SPECIFICATIONS

Operating voltage: 600 VAC (RMS) at sea level — 150 VAC (RMS) at 70,000 feet
Current rating: 5 amperes continuous
Test Voltage Between Adjacent Contacts: 1800 VAC (RMS) at sea level — 450 VAC (RMS) at 70,000 feet
Insulation Resistance: 5,000 megohms minimum

Contact Resistance
- Crimp and taper pin terminated — 35 millivolts max. at rated current
- Solder terminated — 25 millivolts max. at rated current

Contact Retention
- Solder terminated — 15 pounds axial load min.
- Crimp terminated — 10 pounds axial load min.
- Taper pin — 15 pounds axial load min.

Dielectric material: Glass fiber reinforced diallyl phthalate — Type SGDF per MIL-M-14
Contact material: Beryllium copper, or phosphor bronze (see below)
Contact plating — .00003" min. gold over copper, or .00005" min. gold over copper.

Number of Contact Positions	A	B	C	D	E	F	G
6	1.832	1.532	1.100	1.220	.780	.343	1.844

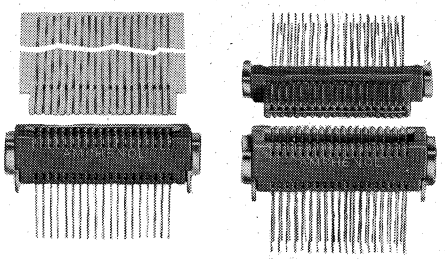
Micro Min Connectors - 74 Series

.050" CONTACT CENTERS



19 Contacts Single Side | 38 Contacts Double Side

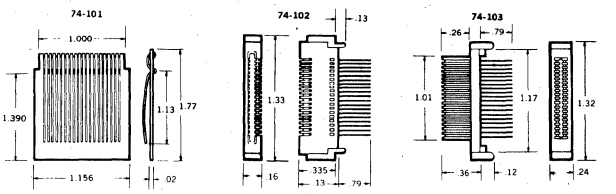
Two mating pairs, 19 and 38 contact, for contrasting applications. Both are only 1 5/16" long, and utilize 500 ma contacts on .050" centers.

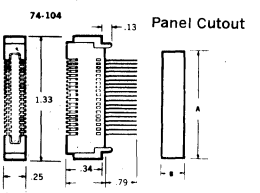
19 Contact — For miniature component board or P.C. board applications. The plug body serves as a component mounting board; usable space for mounting components is 1" x 1¼". The .020" thick glass filled resin board is easily drilled, cut, and is sufficiently sturdy to handle several components on both sides of the board. Contact tails are 1⅛" long and may be terminated directly to components.

Printed Circuit Board Applications

The 74-101 plug may be mounted to any printed circuit board by the use of epoxy or screws.

38 Contact — Two rows of 19 contacts each on .050" centers provide unusually high contact density for modular or rack and panel applications.





Panel Cutout

Description	A	B
19 Contact		
74-101 Component Board	—	—
74-102 Receptacle	1.187	.166
38 Contact		
74-103 Plug	1.325	.194
74-104 Receptacle	1.187	.254

Micro-Mod Connectors - 96 Series

Only ⅜" square (.380), the Micro-Mod is ideally suited to cordwood, stick, and even plainer circuitry for termination of up to 12 conductors. Green dielectric is glass filled diallyl phthalate. Mount with epoxy or hot bonding process. Catalog number 96-2 may be mounted with a No. 2-56 screw. Available in two distinctive styles.

POLARIZED STYLE — Keyed post provides positive contact alignment and connector polarization. Mated connectors are less than ¾" high.

COMPACT (No Contacts) STYLE — Actually no contacts on the receptacle. By using the conductors of the circuit (size 28), which easily snap into the receptacle — the usual conductor to contact soldering is eliminated. Mated pair is only .167" in height, making it ideal for plainer modules.

Specifications

Current Rating — 0.5 amp.
Contact Resistance — 0.015 ohm
Contact Spacing — .075" on centers
Contact Material — .010" gold plated copper alloy wire
Dielectric Material — Glass-filled diallyl phthalate Type GDI-30 per MIL-M-19833

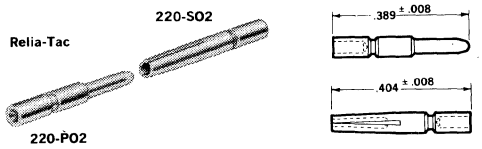
Micro-Miniature Poke-Home Contacts



RELIA-TAC CONTACTS

These rugged, tried and proven contacts fit all 220, 221, 222, and 223 series Micro-Miniature connectors. They may also be used for module headers, motherboard assemblies, and microelectronic interconnections.

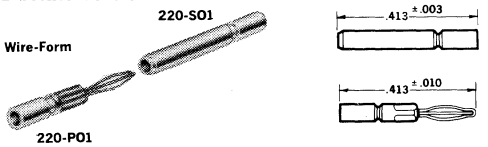
Relia-Tac contacts are usually crimp terminated, but are available for welded, solder, and wire-wrap termination.

Specifications

Current Rating — 3 amps
Resistance — .0060 ohm maximum constant to 1,000 cycles of insertion and withdrawal.
Wire Range — Solid: 22, 24, 26 and 28 gauge.
Stranded: 24, 26 and 28 gauge.
Contact Finish — Gold-over-nickel plate on copper-alloy bodies.

Ordering Information

(Minimum order quantity is 100 pieces.)
220-P02 Pin Contact
220-S02 Socket Contact



WIRE FORM CONTACTS

The unique 4-member spring design of the pin exerts self-equalizing force on 4 separate contact areas of the socket wall, reducing contact resistance and raising reliability to a very high level.

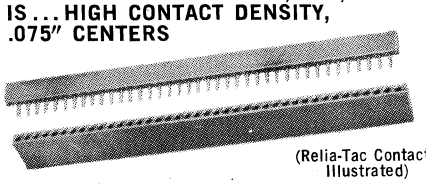
Wire Form contacts fit all 220, 221 and 223 series Micro-Miniature connectors. They are usually crimp terminated but are available also for welded, solder and wire-wrap termination. Eyelet type female contacts are available for specialized interboard connection and for potted component use.

Specifications

Current Rating — 3 amps.
Contact Resistance — .0050 to .0060 ohm constant to 1000 cycles of insertion and withdrawal.
Temperature Rise — 9° to 12°F at 3 amps.
Less than 1°F at 1 amp.

Strip Connectors - 221 Series

ADAPTABLE TO ANY SHAPE: STACK, CUT, CUT AND STACK, USE AS IS... HIGH CONTACT DENSITY, .100" or .075" CENTERS



(Relia-Tac Contacts Illustrated)

AMPHENOL Strip Connectors are highly reliable, low cost micro-miniatures with great application versatility. They are furnished in 4" and 6" lengths, but you can cut and stack them to whatever configuration you need to satisfy your various application requirements.

If you want, AMPHENOL can do it all for you promptly and economically — cut the connectors to the length you want, make mounting holes, cut leads to length, and crimp, weld, or solder them to the contacts.

Strip connectors use Poke-Home contacts and perform superbly. Where keying is desired, guide pins are inserted in two or more plug strip contact holes.

Because Strip connectors are injection molded, special configurations can be produced quickly and inexpensively.

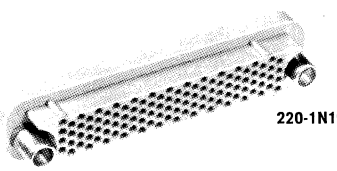
GUIDE PINS

These Poke-Home guide pins are for polarizing, keying, or connector alignment. They supplement the keyed slots and can be used in conjunction with either Relia-Tac or Wire Form contacts. They are inserted in plug inserts.

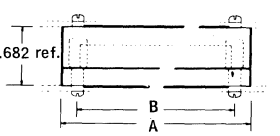
Micro-Rac - 220 Series

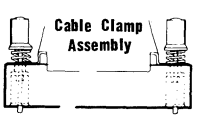
RACK AND PANEL APPLICATIONS: 52 AND 104 CONTACTS FLOAT MOUNTED: LOW COST HIGH CONTACT DENSITY

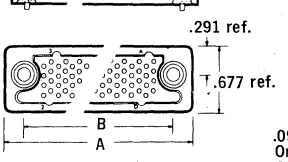


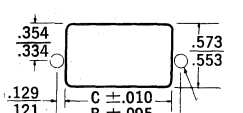
Mono-block construction. Contact identification numbers are molded in. Polarization is achieved by a trapazoidal mating area and keying with the use of guide pins or keying by molded-in slot-and-key arrangements.

Cable clamp assemblies are available for both sizes. Special size connectors can be supplied if needed. Environmental resistance can be added by potting the leads with an approved potting compound and sealing the connector faces with a molded neoprene gasket.









.094 Dia. (2 Holes) for Float Mounting Only. .172 Dia. (2 Holes) for Mountings Other Than Float.

.156″ on Center	7.5	5.0	400 V RMS	2500 V RMS
.200″ on Center	7.5	4.5	500 V RMS	4500 V RMS

Specifications

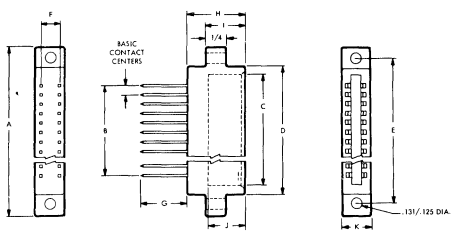
Block Material: Medium impact, electrical grade phenolic.

Contact Material: Grade A Phosphor Bronze with 50 micro-inches minimum thickness of gold on contacting surfaces.

Keying: Available on .200, .156 and .150 centers. On .125 and .100 centers key replaces one pair of contacts.

Tail length: Sufficient for three wire wraps plus space for bussing or PC board next to block. (See dimension G.)

Dimensions (Inches)



High Performance at Reasonable Cost

These high-performance edgeboard connectors provide dual readout of double-sided printed circuit boards. The pre-loaded cantilever type contacts are assembled into the dielectric with precise spacing to permit automatic solderless wrap termination. The phosphor bronze contacts have a minimum of 50 micro-inches of gold at the contacting surface. This results in extremely low contact resistance and permits over 500 insertion and withdrawal cycles without loss of continuity or significant increase in resistance.

An Extensive Line

- 15 to 43 positions providing up to 86 contacts
- Choice of .100″, .125″, .150″, .156″ or .200″ spacing
- Choice of tail sizes: .025″ sq., .035″ sq., or .035″ x .050″.

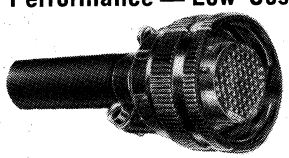
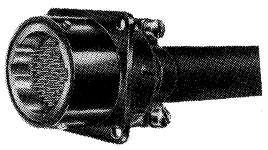
Ultra-Mite Connectors - 224 Series

Potted Connectors Provide MIL-C-26482 Performance — Low Cost





Amphenol 224 Series Ultra-Mite High-Density Miniature circular connectors are designed for all applications which require high performance and high density contact spacings — without a price premium. Potted connectors provide MIL-C-26482 performance at a quantity price of under $13.00 per pair.

- **Lowest cost** complete High-Density Miniature connector family available.
- High performance-potted constructions meet and exceed MIL-C-26482.
- Completely subminiaturized connectors with high contact density — 61 contacts in a size 18 shell.
- Size 22 Poke-Home contacts — Ultra-Tac hooded female contacts resist test prod damage.
- Full connector line — 2 connector classes "N" and "P" with 2 contact classes: Relia-Tac and Ultra-Tac.
- Constructions — Straight Plug, Square Flange, Single Hole Mounting and Cable Receptacles.
- Lightweight — about 25% that of standard connectors with the same number of contacts.
- All Class "P" receptacles have dynamic O-Ring shell seal.
- Bayonet-lock — 3 pin spring loaded coupling ring for quick disconnect.
- Crimp contact terminations.
- 5 key polarization.
- Cable clamps for strain relief.
- Connector identification molded in front and back.
- Natural recess in rear of connector for potting.

CONNECTOR CLASSES

Two 224 Series Ultra-Mite classes are available

"N" Non-Environmental

"P" Potted to meet and exceed the performance requirements of MIL-C-26482.

CONTACT CLASSES

Two contact classes are available:

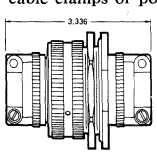
Relia-Tac Crimp Poke-Home pin and socket contacts with slit, preset tines on female members.

Ultra-Tac Crimp Poke-Home pin and socket contacts with female members hooded to resist test prod damage.

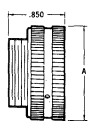
SHELL STYLES AND DIMENSIONS

CONNECTORS

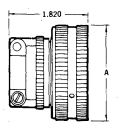
Ultra-Mite connector classes "N", "P" are available in four shell styles — Straight Plug, Square Flange Receptacle, Single Hole Mounting Receptacle, and Cable-to-Cable Receptacle. The standard Ultra-Mite coupling is bayonet lock for quick disconnect. All plugs have threaded back ends to accept cable clamps or potting forms.



Class "N" Mated



Standard Bayonet Plug



Plug with Cable Clamp

CONTACT SPECIFICATIONS

Contact Rating—5 Amps

Resistance—.0060 Ohm maximum constant to 500 cycles of insertion and withdrawal.

Wire Range—Relia-Tac: 24, 26, 28. Ultra-Tac: 22, 24, 26.

Contact Finish—Gold-over-nickel on copper-alloy bodies.

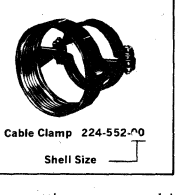
ARRANGEMENTS

INSERTS AVAILABLE (Showing front face of plug insert)

Shell Size	10	12	14	18
Size 22 contacts rated 5 amperes for wire sizes 22-24-26-28 solid and 24-26-28 stranded	7 contacts 10-7	19 contacts 12-19	31 contacts 14-31	61 contacts 18-61

HARDWARE ACCESSORIES — CABLE CLAMPS

Cable clamps support conductors extending from plugs and receptacles and prevent twisting or pulling of the contact terminations. To order cable clamps, specify the part number of the cable clamp which corresponds to the connector shell size. For example, the correct cable clamp for a 224-16N18-61S02 plug is 224-552-18.



POTTING

On "P" connectors, to seal the back of the connectors, potting compound is injected into the back of the shell and allowed to cure. It forms a chemical bond to the inner and outer walls of the connector, to the back of the insert, around the contact terminations and well out along the leads.

Not only is a back shell eliminated, but also the cable clamp. The contact terminations are completely and individually protected by the resilient mass which surrounds them and resists transmittal of vibration to the terminations. The potted assembly is moistureproof and resistant to contaminants.

ORDERING INFORMATION

CONNECTOR PART NUMBER

The Ultra-Mite part numbering system has been set up to provide a complete and exact description of the connector assemblies. To order the 224 Series Ultra-Mite connectors you want, put together the part numbers as illustrated in the following example. All connector part numbers are without cable clamps and potting forms. Order hardware accessories separately.

Plug connectors accept socket contacts only. Receptacle connectors accept pin contacts only. Relia-Tac and Ultra-Tac contacts are not intermateable.

224-16N18-61S02(100)

MinniE - 67 Series

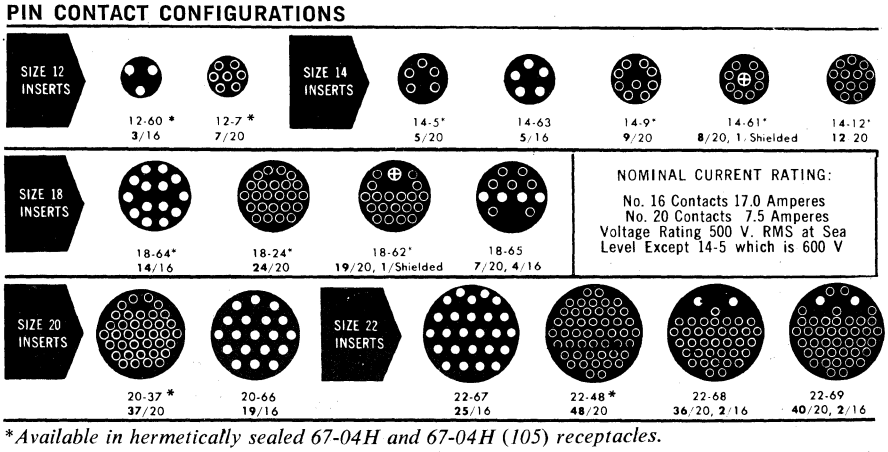
MINIATURE CONNECTORS

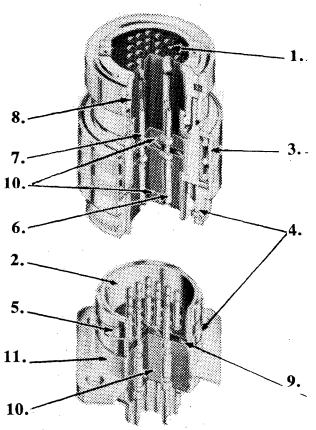
67 Series connectors are quick-disconnect, multi-contact, miniature bayonet lock types. Connectors are available as Plugs, Cable and Panel Receptacles and Single Hole Mounting Receptacles in five constructions, five shell sizes and 17 insert arrangements.

The first miniature connectors to fully meet the "E" requirements of MIL-C-5015C, the current specification governing A-N (now MS) type connectors.

Shell type numbers correspond to the "MS" nomenclature. Insert sizes and contact arrangements are shown below. "P" or "S" in insert style identify pin or socket contacts. Available in alternate insert positions "W" and "X".

PIN CONTACT CONFIGURATIONS





**Available in hermetically sealed 67-04H and 67-04H (105) receptacles.*

FEATURES (Numbers refer to illustration above, right)

1. Environmentally sealed with unitized back end grommet or with provision for potting. Either grommet seal or potted seal meets moisture resistance requirement of MIL--5015 specification.
2. Shells are polarized for easy mating alignment. Sizes 12, 14 & 18 have a single polarizing key. Sizes 20 & 22 have five polarizing keys for precision alignment of the many contacts.
3. Spring-loaded coupling ring provides a positive locking action in the bayonet slot, and a constant compensating force which eliminates the effects of a resilient face seal compression set.
4. Stainless steel bayonet slots and pins. The three pin bayonet coupling minimizes the rocking action of the mated plug and receptacle.
5. Flattened incline angle of bayonet slots reduces mating force requirement.
6. Hooded contacts resist test prod damage as defined in Paragraph 4.5.14 of Amphenol Specification 340-43-2108.
7. Contact plating is gold over silver.
8. Unitized grommet seal; clamp and grommet form a single unit for ease of assembly and maintenance.
9. Face seal gasket with individual barriers to isolate each contact.
10. Hard insert dielectric (plus resilient face seal) positively retains contacts with no possibility of contacts being pushed out of the insert.
11. A visual full engagement indicator is included in the design to insure the user that he has fully engaged the connectors. The indicator is an orange line around the receptacle shell.

- Insulation resistance of "E" type following altitude-moisture resistance test is a minimum 1000 megohms. MIL-C-5015 minimum following type "E" test is 100 megohms.
- When using mated sealed connectors, no derating for altitude is necessary at 70,000 feet.
- Test voltage 1,500 volts RMS 70,000 feet on sealed connectors.
- Vibration per Method 204 of MIL-Std-202A. 10 to 2,000 cps at 20 g's.
- Temperature cycling range per MIL-C-5015, Paragraph 4.5.3 increased to 257°F. maximum and —67°F. minimum.
- Receptacle fully meets Environmental requirements of MIL-C-5015.

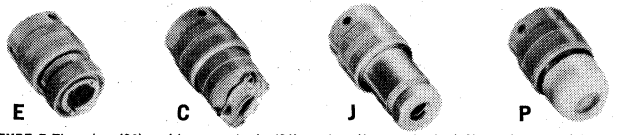
AMPHENOL POWER CONNECTORS

AMPHENOL
THE BUNKER-RAMO CORPORATION

MinniE - 67 Series (CONTINUED)

DIALLYL PHTHALATE DIELECTRIC

Available in five shell styles and five rear end constructions in a total of 17 insert configurations with from 3 to 48 contacts.



TYPE E The plug (06), cable receptacle (01), and wall receptacle (00) employ a unitized grommet for individual wire seal providing complete connector environmental characteristics.
The panel receptacle (02) and round flange receptacle (03) utilize a compression o-ring seal to provide environmental capability.

TYPE C The rear end of the Type C **MinniE** Connectors are equipped with vise action two screw strain relief. Recommended for wire bundles in non-environmental applications.

TYPE J Compression gland provides strain relief for jacketed cables. Weatherproof.

TYPE P Includes potting mold.

TYPE H Hermetically sealed. Single glass preform for ultimate in sealing.

GLASS DIELECTRIC

Hermetically sealed, available in two receptacle styles in ten insert configurations, with up to 48 contacts.

PLUGS ◄——► RECEPTACLES

DIELECTRIC MATERIAL

MS Connectors are available with hard or resilient dielectric. Resilient dielectric is MIL-R-3065 neoprene rubber.

All hard dielectric inserts are molded of AMPHENOL Blue (diallyl phthalate,) famous for its dimensional stability, high insulation resistance, and high arc resistance.

SHELLS

MS shells are made of cadmium plated aluminum with an olive drab chromate conversion. The surface of the shell is conductive.

COUPLING RINGS

Machined from solid aluminum bar stock for greater strength.

CONTACTS

Non-rotating heavily silver plated contacts with pre-tinned solder pockets. Closed entry socket contacts prevent damage by oversize test prods.

With the exception of sizes 10SL and 12SL, all MS Connectors are available with either pin or socket contacts. Since socket contacts are insulated by the surrounding dielectric, they are normally used on the hot side of the line.

ORDERING INFORMATION

Select the specific contact configuration required from pages 856 and 857 and the appropriate shell style from the shells illustrated above.

Complete insert specifications, including voltage and current ratings, are shown on pages 857 and 858.

After the proper shell and insert have been selected, check their availability in the availability chart below, and then combine the shell and insert numbers into one catalog number; for example, a 22-21P insert and MS3106A shell should be ordered as an MS3106A-22-21P.

ALTERNATE POSITIONS

To avoid cross mating when two or more identical connectors are used, most MS Connectors are available with alternate positions, W, X, Y or Z. Positioned connectors are identical to non-positioned connectors except that the inserts within the connectors have been rotated a specific number of degrees. Alternate position availability and the degree of insert rotation are shown on the insert specifications chart, pages 859 and 860.

HERMETICALLY SEALED RECEPTACLES

For the finest in glass hermetically sealed receptacles, the 172 Series described on page 856 will mate with standard MS plugs.

MS CONNECTOR AVAILABILITY

The following indicates the availability of each connector style by size. For example, the MS3107A is available in a size 28, but not in a size 32.

EXPLANATION OF PART NUMBER

MS .....Indicates military standard. Replaces former designation on "AN". The number 97 is used with MS type connectors incorporating modifications not written into the military specifications.

3102.....Shell style or shape.

A.....Shell construction. A or B refers to rear end construction, solid or split back shell. C, E, and R refer to insert capability: C — pressurized, E and R, resilient dielectric, see page 8.

20.....Size refers to diameter of receptacle's threads in 10th of an inch. The letter S (sizes Ss, 10S, 12S) indicates a shortened design. The letters SL (sizes 10SL, 12SL) indicate a spun-in insert.

7.....Completes insert identification.

P.....P for pin contacts, S for socket contacts.

X.....Alternate positions.

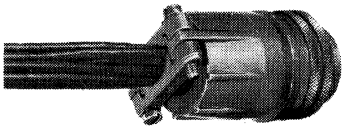
AMPHENOL CONNECTORS

AMPHENOL
THE BUNKER-RAMO CORPORATION

MS-E Connectors 69 Series



RESILIENT DIELECTRIC • ENVIRONMENTAL • NEW SELF-CENTERING CLAMP • NEW LOW COMPETITIVE PRICING • MORE THAN 1200 CONNECTORS • EASY DELIVERY

MS-E — New self-centering cable clamp provides still additional mechanical reliability above and beyond the mechanical strain relief provided by the neoprene grommet which securely gaskets each individual conductor.

Amphenol MS-E connectors are custom assembled to your order.

Environmental — Amphenol MS-E connectors meet all of the MS-E specifications of Mil-C-5015. In accordance with Mil-C-5015, Amphenol MS-E connectors must surpass stringent environmental tests including a twenty day temperature mated connector cycling test, under full load conditions, in a sealed high humidity chamber which, as the temperature is cycled above boiling and below freezing, will produce layers of moisture and frost. Before, during, and after the test, the insulation resistance between each contact and the connector shell must exceed 100 megohms.

Other stringent requirements include tests for thermal shock, air leakage, vibration, physical shock, durability, corrosion, and fluid immersion.

Construction — Shells are aluminum, cadmium plated with an olive drab chromate conversion seal. Coupling rings are machined from solid aluminum bar stock for maximum strength.

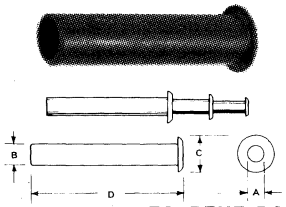
Non-rotating contacts are silver plated with completely tinned solder cups for ease in soldering. Female contacts are shrouded for additional damage protection.

Resilient dielectric is of Mil-R-3065 Polychloroprene rubber.

Availability — Insert configurations are identical to hard dielectric MS connectors.

All available inserts may be used with shell style illustrated above. Pin or socket contacts are available with the above shell style except in size 10SL, which is available only as a female plug and male receptacle.

For MS-E & Poke "R" Connectors



Neoprene boot gives a complete waterproof, oil proof and dust proof cable clamp for the new MS-E connector. Telescoping of boots reduces the clamp diameter for positive grip and strain relief.

For example, to use a cable with a 0.6 OD with an MS 3106E-20-18S (Size 20) plug, use boot No. AN-3420-12. To use the same connector with a 0.5 OD cable, use boot Nos. AN3420-12 and AN3420-10.

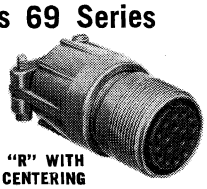
MS-R & Poke "R" Connectors 69 Series

MS3106R AND 69-6R



POKE "R" WITH SELF CENTERING CABLE CLAMP

MS-R — Resilient dielectric of Mil-R-3065 Polychloroprene rubber. All except MS 3102R receptacle have an individual wire grommet seal for complete environmental performance. O ring seal in MS 3106 plug provides additional environmental capability. The added features offered in the new MS-E wire risers, pressurized up to 1 atmosphere, 1200 styles.

POKE "R" — Similar to MS-R connectors, plus:

1. POKE-HOME Crimp Type Contacts — Crimp contacts provide a swift means of reliably terminating conductors without the inherent reliability problem of cold solder joints.
   The POKE-HOME feature permits the contact to be crimped away from the connector where there is room to work. POKE-HOME contacts are easily inserted and removed so that the connector can be recircuited or completely rewired at any time.
2. Altitude Immersion — Poke "R" Connectors must pass all of the stringent tests prescribed for the MS-R, plus an altitude immersion test as follows: Connectors entirely immersed in water are altitude cycled to 70,000 feet for 30 minutes. After cycling, and while still in water, connectors maintain a minimum insulation resistance of 100 megohms.
3. Gold over silver plated contact eliminate all possibility of contact tarnish.

The neoprene grommet provides complete sealing of each individual conductor. When all contacts are not used, a plastic sealing plug is inserted within the contact cavity of the grommet to preserve all environmental capabilities. A small quantity of sealing plugs for unused contact holes is supplied with Poke "R" connectors.

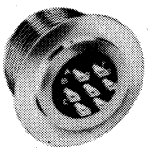
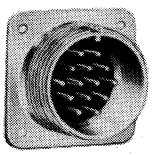
MS Type Hermetic Seal Receptacles - 172 Series

MATE WITH MS PLUGS — SINGLE GLASS CONSTRUCTION
IDENTOSEAL CONTACT IDENTIFICATION
THREE BODY STYLES — ULTIMATE IN SEALING



Shell Style 2
Round Flange



Shell Style 3
Square Flange

Shell Style 6
Flange-Less

CONTACTS

Type 2

The 172 Series is a complete line of hermetically sealed receptacles which mate with MS/AN plug connectors. Three shell styles and 32 insert configurations are available from your local AID. By utilizing a single fused glass insulator for the entire connector, the fusing surface between the glass and the steel shell is considerably less than in other types of construction, making the leakage rate minimal. Amphenol's exclusive Identoseal contact marking, white on dark brown, is the clearest in the hermetic field. The numbers are as impervious as glass to solvents and acids.
To avoid mismating, most 172 Series receptacles are available with alternate positions.

Specifications: Suitable for continuous operation at −200°F through +350°F. Voltage ratings, salt spray, shock, vibration resistance and mating dimension specifications conform to or exceed MIL-C-5015. Leakage rate is less than 0.1 micron cubic foot of helium per hour with one atmosphere differential.

Contacts: Type 2— Flattened and Pierced. Pin contacts only, socket contacts are not available.

Submersible Connectors G S E - 89 Series

1 TO 52 CONTACTS — USES MS INSERTS

89-528-1S (09)
Cable Receptacle, Anodized Finish

89-6232-12P
Open Wiring Receptacle, O.D. Cad.-plate Finish

89-128-16S (13)
Plug, Anodized Finish

Amphenol 89 series connectors are designed for stringent field service. Rugged and completely waterproof, these connectors provide efficient and dependable service even when entirely submerged in mud, ice, water or mire. They are used extensively in missile ground system and support equipment, radar antenna installations, oil well and digging equipment, and other hard-service applications.

Weather-proofing at the cable end is accomplished by an internal rubber gasket in the cable clamp which expands as the gland nut is tightened.

To facilitate handling in rough weather, the coupling rings are extra long and heavily grooved.

Connectors may be ordered with either clear anodized or olive drab cadmium-plate finish. Shells and cable clamps are machined from aluminum bar stock. Contacts are silver-plated. Insert material and contact arrangements are standard MS-type to MIL-C-5015.

**For 7MM High Tension Cable. 20 Amps. Max.*
■Limiting operating voltage at 50,000 feet altitude are approximately 25% of the sea level values.
*†VOLTAGE BREAKDOWNS: 15,000 V. RMS between "A" and nearest Contacts; 9,000 V. RMS between High Voltage Contacts; 5,000 V. RMS to ground; 5,000 V. RMS between small Contacts. * 5,000 V. to ground. • Insert 20-11 contains 13 size No. 16 contacts, 10 of which have size No. 20 solder cups.*

CAPS - 97 Series

Two types of protective caps are available for use with MS Connectors:

CAP & CHAIN — For use when MS Connectors are not in use. The 9760 is made of aluminum with an olive drab chromate conversion seal and is available for either receptacles or plugs. To order the cap less chain, add the suffix G to the catalog number.

DISPOSABLE DUST CAPS — Expendable polyethylene dust caps provide added protection to precision built MS Connectors during storage or shipment or completed apparatus.

AUTOMATIC ORDERING — A disposable cap may be ordered with any MS Connector by adding the suffix (288) to the catalog number of the connector.

Thermocouples - 97 Series FOR MS CONNECTORS

Designed to provide a disconnect in thermocouple circuits without the introduction of dissimilar metals.

There are six insert configurations listed on page 19 as thermocouples. Each of these utilizes an equal number of iron and constantan contacts. However, any MS Connector with size 16 contacts may be ordered with any of the below listed contacts. For ease in wiring, each thermocouple contact is color coded on the solder cup end of the contact.

Contacts	Description	Color Code
Alumel	94% Nickel, 2.5% Manganese, 2% Aluminum, 1% Silicone, .5% Iron	Orange
Constantan	45% to 60% Copper, 40% to 55% Nickel, 0 to 1.4% Manganese, .1% Iron	Red
Copper	87.5% to 90% Copper, 1.8% to 2.2% Lead, .1% Iron, .5% Nickel, .5% Normal Impurities and balance Zinc	Yellow
Iron	84.4% Iron, 2% Sulphur, .4% Silicone, 2% Carbon, 3.6% Managenese, .6% Phosphor, .1% Copper, .9% Tin	White
Chromel	90% Nickel, 10% Chromium	Green

MS Fittings CABLE CLAMPS, ADAPTERS (Cont.)

AN3057 Cable Clamp — Standard cable clamp, threads onto all MS Connectors with threaded back shell. Provides reliable sturdy support. Illustration does not shown one rubber and two fiber washers which seats clamp to connector.

AUTOMATIC ORDERING — By adding deviation number (559) to the MS catalog number, the correct AN3057 cable clamp will be shipped with the MS Connector.

Basic 9767-X — Identical to AN3057 cable clamp, but the rubber washer and one of the two fiber washers are replaced with a rubber boot. Recommended for applications in which cable is subject to considerable flexing.

9767-X-X Weatherproof Cable Clamp — Same as BASIC 9767-X above with addition of AN3055 reducing adapter. The inside of the AN3055 is tapered to the same dimensions of the front end of the rubber boot — thus providing a weatherproof seal.

AN3055 Reducing Adapter — Permits smaller cable clamps to be used with MS Connectors.

AN3420 Bushing — Rubber bushing designed specifically for MS3057A Cable Clamp. Protects wire bundle and unjacketed cable from possible damage by cable clamp. Can also be used for a reducing bushing.

MS3057A Cable Clamp — For rubber covered cable or wires protected by tubing. Both clamping halves float so cable is always centered, affording maximum strain relief. With unjacketed cable or wire bundles without tubing, use corresponding AN3420 Bushing.

MS Deviations

COMMON MS DEVIATIONS

MS Connectors are available with minor deviations from standard. Deviations are ordered by adding the deviation suffix to the MS part number. Deviation numbers always appear in parenthesis.

(288) Includes 97-121 dust cap for mating end.

(417) Plugs only, type W washer cemented.

(426) Minimum of .00002" gold over .0002/.0003" silver on contacts. Use 97 prefix instead of MS.

(432) No. 16 contact. For use with AMP No. 53 taper pin. Use 97 prefix instead of MS.

(559) AN3057 cable clamp included with connector.

(639) Cadmium plate finish with clear chromate conversion seal. Use 97 prefix instead of MS.

(866) Contacts with minimum of .00002 gold over .0002/.0003" silver with tinned solder cups.

..... Coax contacts for use with RG58 or RG55 cable may be substituted for size 0 contacts. Order 3-116 male or 31-117 female 50 ohm impedance coax insulated contacts.

MS Potting

MS Connectors for potting are available in all connector styles except the MS3102. The back shell of the connector is removed and replaced with a potting mold retainer ring No. 9755-270-XX. (XX indicates connector size.) This describes the basic (438) construction. Other variations are listed on page 25.

ORDERING INFORMATION

Since the solid or split back shell is removed from the connector shell prior to potting, the A and the B is dropped from the part number of an MS potted connector.

For example: 97-3106-18-11P (596)
or 97-3101-14S-4P (438)

Since the potting construction does not fall under Miltary Specifications unless so indicated under the special marking column, the prefix 97 is used.

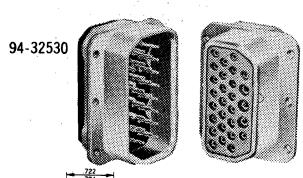
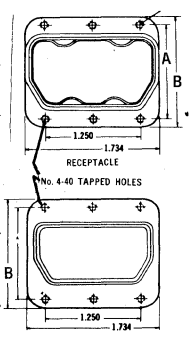
POKE-HOME CONTACTS—CRIMP or SOLDER CONTACTS—RUGGED, RELIABLE - 94 SERIES

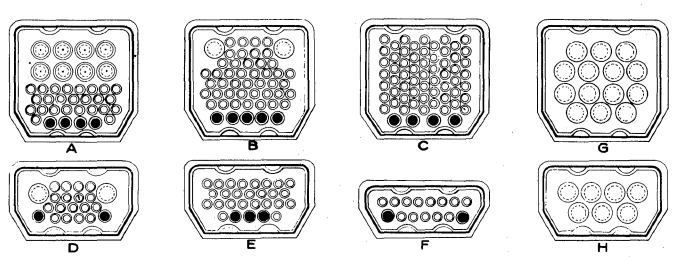
Poke-Home contacts permit the termination to be made away from the connector. No tool is required.

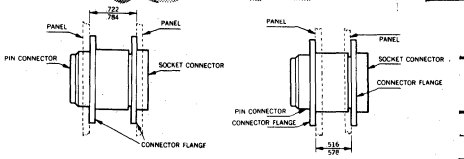
Coax contacts are designed for cables of the approximate size of RG-58/U or RG-180/U, and are terminated by soldering. Size 16 and 20 contacts are available for either crimping or soldering. Contacts are gold over silver plated. All socket contacts are hooded.

The dielectric material is Amphenol Blue — diallyl phthalate.









TOOLS

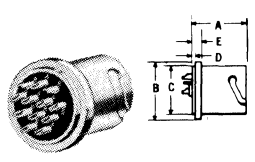
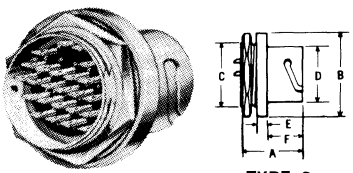
Miniature AN - 182 Series

Hermetically Sealed Receptacles. Mates With 165 Series



TYPE 1



TYPE 2

Available in two shell styles; solder flange Type 1, and threaded back shell with hex nut Type 2; and two types of contacts; flattened and pierced and solder cup.

Available in all 165 Series contact insert configurations.

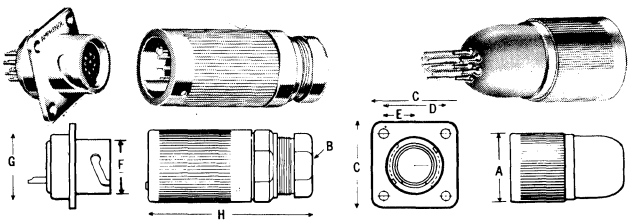
Miniature AN - 165 Series

Weather Proof, Bayonet Coupling, Internal Clamping, Pressure Proof, Lightweight, Inexpensive



The 165 Series is the first of the miniature quality connectors. Only ⅓ the size and weight of standard MS Connectors, it is a bayonet type available in eight insert configurations and five shell styles; "large" and "small" sizes.

Water proof and pressure proof, the 165 Series meet the same exacting government specified salt-spray tests by many hours. The socket contacts connectors feature a sandwich construction with the insert spun into the cartridge sealed and tested at the factory for any possible leakage. O-ring seals are used in both the plug and receptacle.

All connectors are available in W and X alternate positions.

Plugs and cable receptacles are available with a built-in compression type clamp or with potting mold.

Shells are made of aluminum. Plugs have a grey anodized finish. Receptacles, for ease of mating, are chrome plated.

HERMETICALLY SEALED RECEPTACLES

The ultimate in sealing, the 182 Series receptacle mates with 165 Series plugs.

Available with either bayonet and threaded coupling, in three shell styles and 29 insert configurations with 3 to 55 contacts. Crimp type contacts conform to MIL-C-26636 and are available in sizes 12, 16, 20, No. 1 and No. 2 shielded.

PERFORMANCE

MIL-C-26500 connectors perfom with utmost reliability at extremely high altitudes and in widely varying temperature extremes.

- Connectors are not affected by continuous exposure to 200°C (392°F) temperature for 1000 hours, while simultaneously conducting current through all contacts with an interior temperature of 238°C (460°F).
  Connectors withstand thermal shock cycling from −55°C (−67°F) to +260°C (500°F).
- Mated connectors support 1500 volts RMS from sea level to 350,000 feet.
- Even after insertion and removal of contacts, mated connectors are altitude-moisture resistant. After 3 immersion-altitude cycles, connectors have a minimum insulation resistance of 5000 megohms.
- Environmental and electrical integrity is maintained during and after vibration, 0 to 2000 CPS, 15 G's during exposure to 200°C (392°F) and −55°C (−67°F).
- Insulation resistance at 260°C (500°F) for 30 minutes is 2000 megohms minimum.
- Moisture resistant maintaining minimum insulation resistance of 1000 megohms.

DESIGN FEATURES

To achieve these outstanding performance parameters, MIL-C-26500 connectors utilize newly-developed materials and incorporate highly advanced design techniques.

- MIL-C-26636 (USAF) crimp Poke Home Contacts
- Amphenol-developed reversion-resistant silicone rubber inserts.
- Spiral marked inserts, front and rear to simplify contact insertion.
- Impact extruded aluminum shells.
- Metal-to-metal bottoming of mated shells.
- Stress-limited resilient displacement of inserts.
- Face seal, insert rim seal and shell peripheral seal ("O" Ring).
- Integral insert and grommet construction.
- Anti-deflection disk.
- Grommet triple sealing risers for wire.
- Visual full engagement indicators.

CATALOG NUMBERING

The Amphenol 48 Series may be ordered by either an Amphenol Catalog Number or the corresponding military number. Since the Amphenol number is less complex, many manufacturers prefer its use.

Shell Style	Contacts	BAYONET COUPLING	
		Amphenol 48 Series No.	Military MS2426 Number
Plug	Pin	48-16RXX-XXP	MS24266RXXBXXP

	Socket	48-03RXX-XXS	MS24265RXXTXXS

ORDERING INFORMATION

Select shell style and proper insert configuration. Substitute the insert configuration number for XX-XX in the above. For example, a plug with bayonet coupling, containing 55 No. 20 socket contacts should be ordered by Amphenol No. 48-16R22-55S; or by Military No. MS24266R22B55S.

ALTERNATE POSITIONS

Precision alignment of mating contacts is achieved with the use of five keys and keyways which form an integral part of the shells of the 48 Series connectors. Alternate positions 6 through 10 are available for all 48 Series connectors. Alternate positions are obtained by using shells in which different positions have been assigned to all five keys and keyways. To order alternate positions add suffix 6, 7, 8, 9, or 10 to Amphenol or Military number. For example, 48-16R22-55S6 mates with 48-10R22-55P6.

DEVIATIONS

(100) Modified For Potting (105) Less Contacts
(102) Less Cable Clamp (106) Less Cable Clamp & Contacts
(100), (102), (105) and (106) suffix's are to be added to Amphenol number only. To order by Military number MIL-C-26500 connector less cable clamp, add suffix "X" to Military number. No other Military deviations have been assigned.

ULTRAMATE

Designed in accordance to MIL-C-38300. Similar to MIL-C-26500 connectors, except that all socket contact inserts are equipped with a hard face seal. Contacts are identical to standard 48 Series Connectors. Tools are the same except for removal of contacts; use removal tool No. 294-203 for size 20 contacts and 294-180 for size 16 contacts. To order, use Amphenol 48 Series catalog numbers with the letter "R" replaced by the letter "C". Available in bayonet or threaded coupling in the following socket inserts: 10-5, 12-12, 14-7, 14-15, 16-24, 18-31, 20-41, 22-19, 22-55, 24-61.

CONTACTS AND SEALING PLUGS

When 48 Series connectors are ordered with contacts the contact package contains the necessary number of contacts to fill the insert plus 2 spares or 3 contacts minimum, whichever is greater. A quantity of sealing plugs are also included in the contact package equal in quantity to 15% of the total number of contacts or a minimum of 3. When ordering contacts and sealing plugs separately, the part numbers are as follows:

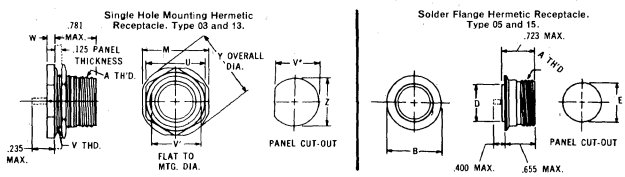
HERMETICALLY SEALED RECEPTACLES To MIL-C-26500 (USAF)



The Amphenol 48 Series is available with a solder-flange or hex-nut single hole mounting hermetically sealed receptacle with either threaded or bayonet coupling.

Leakage rate is less than 0.1 micron cubic foot of helium per hour with one atmosphere differential. Additional sealing is provided by a shell peripheral "O" Ring and a chemically bonded insert face seal of high temperature silicone rubber. Contact spiral marking is marked on the face seal and by means of Amphenol's exclusive Identoseal marking, on the glass dielectric as well. Shells are non-magnetic stainless steel and are available in two shell styles, solder flange and hex nut single hole mounting. Contacts are rhodium plated, flattened and pierced. If solder cups are required, add the suffix (108) to the catalog number.

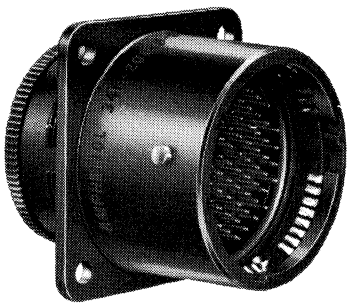
Astro/348™

High Density Miniature Connectors

THE NEW MIL-C-81511 CONNECTOR LINE



Astro/348 connectors meet all the requirements of MIL-C-81511, the definitive new military specification for high density miniature connectors. They offer .085" contact spacing for #23-22 contacts, full performance under extreme environmental conditions, a new, removable, crimp contact system, grounded shells and many other design benefits.

.085" Contact Spacing — High density configurations save space without sacrificing performance. With Astro/348 connectors you can use smaller shells, for example, a size 16 shell (instead of the usual size 22) for 55 contacts.

Locked-In Removable Contacts — Contact retention disc, actuated by rear locking nut, holds the contacts as tightly as molded-in construction. A twist of the nut makes them readily removable for wiring changes or servicing. They can then be easily reinserted and securely locked again by a twist of the nut.

Grounded Shells — Spring fingers inside the receptacle make contact with the mating plug and ground both shells before the contacts engage. As the connectors are unmated, the spring fingers keep the shells grounded until after the contacts disengage.

Contact Protection — Recessed pin contacts in receptacles, plus closed entry socket inserts and hooded contacts make them scoop proof and prevent damage to contacts under poor mating conditions.

DESIGN FEATURES

- Molded One-Piece Contact Retention Disc
- Captivated Rear-Locking Risers
- Individual Contact Risers
- Anti-Scoop Recessed Pin Contacts
- Closed Entry Socket Insert and Contacts
- Captivated Triple Bayonet Coupling System
- 5-Key Polarization
- Interfacial Mating Seal
- Dynamic "O" Ring Peripheral Shell Seal
- Monoblock Construction — Inserts Bonded to Shells
- Self-Sealing Rear Grommets
- Visual Mating Indicator
- Shell to Shell Grounding Fingers
- Contacts conform to MIL-C-23216
- Four-indent crimp form with MS3198-1 type tool
- Contacts accept sizes #22, #24, #26 and #28 solid or stranded wires
- Front release, rear serviceable contact system
- Contact retention in serviceable position: 3 pounds minimum
- Contact retention in locked condition: 10 pounds minimum after 10 cycles of maintenance aging
- Dielectric separation: Contact to contact minimum wall section 0.021 inches
- Minimum creepage in unmated condition: 0.063 inches
- Wire sealing range: 0.030 inches diameter minimum to 0.054 inches diameter maximum over insulation
- Five alternate positions for connector polarity are provided by rearranging secondary shell key and keyways. Master key remains in normal position

5 ALTERNATE SHELL POSITIONS

AMPHENOL RF COAXIAL CONNECTORS

AMPHENOL
THE BUNKER-RAMO CORPORATION

BNC & TNC

CHARACTERISTICS (Typical)

ELECTRICAL	
impedance	unimproved BNC: non-constant; all others: 50 ohms
frequency range	0-10 GHz
voltage rating	500 volts peak
dielectric withstanding voltage	1500 volts rms
SWR	improved: 1.3; MIL-Crimps: 1.2 (solder), 1.3 per spec
Other	contact resistance: 2.1 mv; RF leakage: −55 db; insertion loss: .04 db; insulation resistance: 5000 megohms
ENVIRONMENTAL	
thermal limits	Teflon insulators: −67° to 390°F (−55° to 199°C); Rexolite insulators: −67° to 185°F (−55° to 85°C)
weatherproof	standards with clamp gaskets; MIL-Crimps with heat-shrink tubing
hermetic seals	pass helium leak test of 2×10^{-8} cc/sec.
shock	MIL-Std-202 method 202
vibration	MIL-Std-202 method 204 (test cond. D)
moisture resistance	MIL-Std-202 method 106
corrosion	MIL-Std-202 method 101 (test cond. B)
temperature cycling	MIL-Std-202 method 102 (test cond. D)
altitude	MIL-Std-202 method 105 (test cond. C)
MECHANICAL	
mating	BNC: 2-stud bayonet lock; TNC: 7/16-28 thread cplg.
cable affixment (braid or jacket)	standards: screw-thread nut and braid clamp; MIL-crimps: hex braid crimp
cable affixment (center conductor) captivated contact	MIL-Crimps: 4 indent crimp or solder; others: solder only all MIL-Crimps; others: where specified
cable retention	standards: 20 to 50 lbs; crimps: 80 to 100 lbs.
MATERIAL	
contacts (center)	male: brass; female: beryllium copper or phopshor bronze (all MIL-Crimps)
contacts (outer)	MIL-Crimps: phosphor bronze; others: brass or beryllium copper where specified
other metal parts plating	brass center contacts, MIL-Crimps: .0001″ gold over .0001″ copper; all others: .0002″ silver
insulators	Teflon (all crimps); Rexolite; glass-Teflon (hermetically sealed)
clamp gaskets heat-shrink tubing crimp ferrule	synthetic rubber; silicone rubber MIL-Crimps: Thermofit plastic copper

MILITARY SPECIFICATIONS

SUBMINAX® Series 27

CHARACTERISTICS (Typical)

ELECTRICAL	
impedance	50 ohm, 75 ohm
frequency range	0-10 GHz
voltage rating	500 volts peak
dielectric withstanding voltage	1,500 volts rms
SWR (50 ohm)	1.2 (0-4 GHz) 1.5 (4-10 GHz) 1.3 (UG's) (0-6 GHz) 1.5 (UG's) (6-10 GHz)
other	multivolt drop 6 MV. insulation resistance 1,000 megohms
ENVIRONMETAL	
thermal limits	−67° to 390°F (−55° to 199°C)
weatherproof	all 27 series are non-weatherproof, radial crimp have plastic boot or optional heat shrink tubing.
hermetic seals	pass helium leakage test of 2 x 10-8 cc/sec
thermal shock	Mil. Std. 202 Method 107
shock	Mil. Std. 202 Method 202
vibration	Mil. Std. 202 Method 204 (test cond. D)
moisture resistance	Mil. Std. 202 Method 106A
corrosion	Mil. Std. 202 Method 101 (test cond. B)
MECHANICAL	
contacts	radial crimp, not captivated; quick crimp, full captivated; field serviceable, semi-captivated
mating	push-on (snap-on) and screw-on, (50 ohm have 10-32 threaded coupling; 75 ohms, 3/16-32).
cable affixment	radial crimp: Quick-Crimp (hex crimp); field serviceable clamp mechanism
braid/jacket	
cable affixment-center conductor	solder only
coupling nut	recommended torque (hex nuts); 50 inch-ounces. Axial pull-off force: withstand up to 50 lbs.
MATERIAL	
contacts	male and outer (push-on): brass female: beryllium copper
other metal parts	brass
plating (all metal parts)	.000050 gold over copper, (UG's .0001" gold over copper)
insulators	Teflon, Kel-F-Teflon, glass Teflon (hermetically sealed)

MILITARY SPECIFICATIONS
UG items fully comply with MIL-C-22557A

SERIES N

CHARACTERISTICS (Typical)

ELECTRICAL	
impedance	as noted, 50 or 70 ohms
frequency range	0-10 GHz
voltage rating	1,500 volts peak (1,000 v ■)
dielectric withstanding voltage	3,500 volts rms (2,500 and 1500 vrms at 50 MHz■)
SWR	MIL-Crimp/MIL-Clamp: 1-15 (solder) 1.35 per spec; others: 1.25
other	contact resistance 1.0 mv, RF leakage −90 db, insertion loss .15 db, insulation resistance 5,000 megohms
ENVIRNMENTAL	
thermal limits	Teflon: −67°F to 390°F (−55° to 199°C) Rexolite: −67°F to 185°F (−55° to 85°C)
weatherproof	all Series N with gaskets are weatherproof
hermetic seals	pass Helium leak test of 2 x 10^{-8} cc/sec
pressurized	compression seal
shock	MIL-Std. 202 method 202
vibration	MIL-Std. 202 method 204 (test cond. B)
moisture resistance	MIL-Std. 202 method 106
corrosion	MIL-Std. 202 method 101 (test cond. B)
temperature	MIL-Std. 202 method 102 (test cond. C)
altitude	MIL-Std. 202 method 105 (test cond. C)

AMPHENOL RF COAXIAL CONNECTORS

AMPHENOL
THE BUNKER-RAMO CORPORATION

SERIES N (Cont'd.)

MECHANICAL

mating	5/8-24 threaded coupling
cable affixment (braid/jacket)	MIL-Crimp: hex crimp; all others: screw-thread nut and braid clamp
cable affixment (center conductor)	MIL-Crimp/MIL-Clamp: 4 indent crimp, hex crimp or solder. All others: solder
captivated contact	all MIL-Crimp/MIL-Clamp Others, where specified
cable retention	MIL-Crimp/MIL-Clamp 90-120 lbs. (70 lb. per MIL-Spec). All others 30-70 lbs.

MATERIAL

contacts	Male:brass; Female: MIL-Crimp/MIL-Clamp-Phosphor Bronze, all others-Beryllium Copper; Outer: MIL-Crimp/MIL-Clamp. Improved Phosphor Bronze, all others: brass or phosphor bronze.
other metal parts	brass
plating	center contacts, MIL-Crimp/MIL-Clamp: .0001" gold over .0001" copper. all other: .0002" silver
insulators	Teflon (all MIL-Crimp/MIL-Clamp) Rexolite, glass-Teflon (herm. seal)
weatherproof gaskets	silicone rubber (all MIL-Clamp)
crimp ferrule	synthetic rubber copper

MILITARY SPECIFICATIONS
MIL-Crimp/MIL-Clamp MIL-C-39012;
Standards: MIL-C-71B

■ Per MIL-C-39012 Spec. (applies to MIL-Crimp/MIL-Clamp connectors).

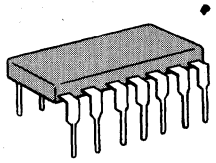
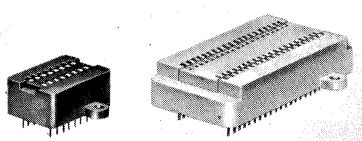
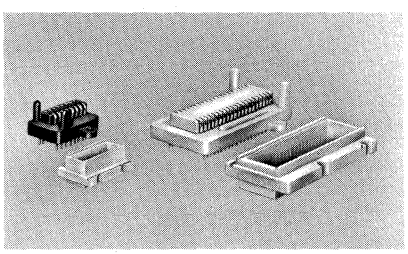
SOCKET SOLUTIONS ...PLUS!

BARNES has the largest selection of sockets for I.C., MSI, LSI and Transistors in the industry... PLUS the world's most complete line of carriers / contactors and breadboards!

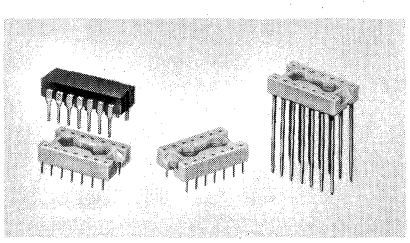




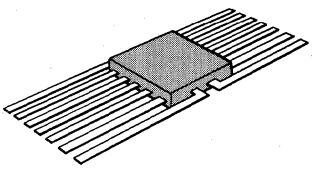
DIP SOCKETS...
For testing, aging, burn-in and breadboarding. Features easy loading, long, reliable life with no lead deformation.

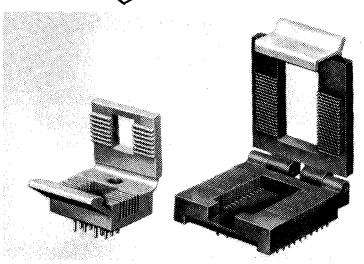


DIP CARRIERS/CONTACTORS...
For device protection during shipment, testing and manual or automatic handling. Provides uniform geometry and polarization protection for all package sizes and types.

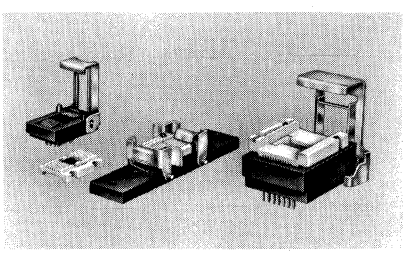


DIP PRODUCTION SOCKETS...
For high density production mounting of I.C.'s. Features low body profile, available in wire-wrap or solder tab terminals, temperatures to 150°C.

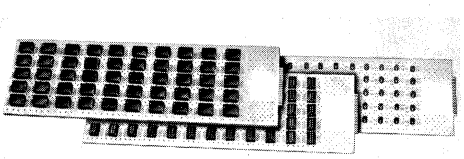




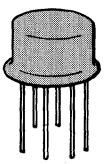
FLAT PACK SOCKETS...
For testing, aging, burn-in, breadboarding and production mounting. Features fast, one-hand loading and unloading, and positive lead separation with no deformation.

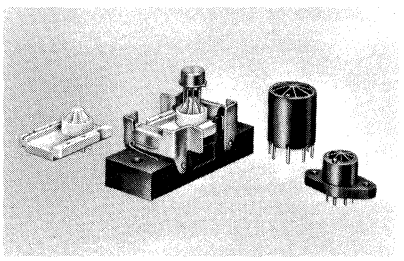


FLAT PACK CARRIERS/CONTACTORS...
For device protection during shipment, testing and manual or automatic handling. Provides uniform geometry and polarization protection for all package sizes and types.

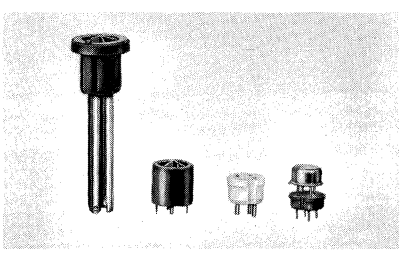


BREADBOARDS...
For high temperature circuit design, environmental testing, aging and burn-in for Dual-in-Line, Flat Pack and TO style I.C. packages. Available with 5 to 75 device positions per board with card receptacle edge connector.





TO SOCKETS, CARRIERS/CONTACTORS...
For testing, aging, burn-in and breadboarding ... and for device protection during shipment, testing and handling for all sizes and pin configurations.



TRANSISTOR SOCKETS...
For testing, aging, burn-in, breadboarding and production mounting. Features easy insertion, excellent electrical characteristics and low profile for high density production mounting, as well as wide temperature range capability.

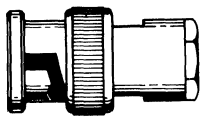
For more information about socket solutions plus the world's most complete line of carriers, contactors and breadboards, write for a comprehensive BARNES catalog.

barnes CORPORATION

LANSDOWNE, PA. 19050 ■ 215/MA 2-1525
TWX: 510/669-9977

BARNES' complete line also includes Spring Sockets, Op-Amp Sockets, Modular Test Sockets, Relay Sockets, TH-037 Test Handler Series, Universal Mating Connector System

Broadest line of RF CONNECTORS on the market



BNC Square Cut: 60 second cable assembly; weatherproof; small and lightweight with quick disconnect bayonet-lock coupling. BNC uses small cables, operates to peak load of 500 volts. Manufactured in accordance with MIL-C-3608A.

Cable	RG55B, 223	RG58	RG59, 62, 71	RG122	RG174
Plug	30220-9	30220-2	30220-4	30220-11	30220-13

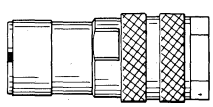
Cable Jack	3874-1	3906-1	3902-1	—
S.H.Mt.Jack	3945-1	—	3974-1	3973-1



ADM: Miniature coaxial cable connectors featuring small bayonet-locking, superior cable gripping mechanism; waterproof construction and easy assembly with only 3 basic parts. Intermateable with DM Series; multiple polarization available. Fully tested to MIL-C-25516—B and C. Floating ground, ungrounded and unshielded versions available.

	Cable	Pol. E	Pol. F	Pol. J	Pol. K

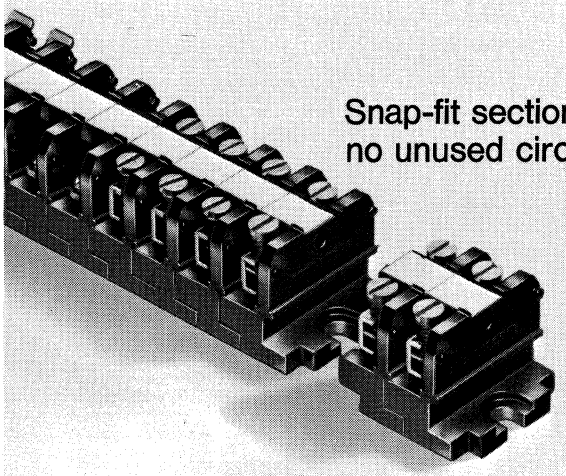
Part numbers shown above (partial listing only) are suitable for most connector applications. All are available for fast delivery from Bendix stock. Bendix provides *one source* for all your RF connector requirements, including custom engineering and special finishes. Call or write for complete Catalog: Microwave Devices Division, The Bendix Corporation, Hurricane Road, Franklin, Indiana 46131. Phone (317) 736-6136.

Bendix Electronics

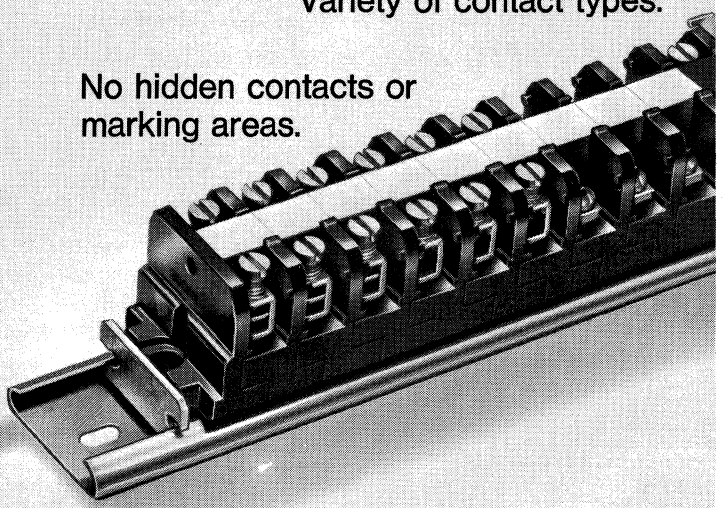
4 most sought-after terminal block features:



Snap-fit sections...
no unused circuits.

Variety of contact types.

No hidden contacts or
marking areas.



Direct or Channel
mounting.

Only BUCHANAN has them all!

Only Buchanan gives you the 4 most sought-after features in its terminal blocks—features that put more profit in your designs.

Assembly is fast because blocks are packaged in preassembled snap-fit sections. Clearly visible marking areas and contacts make wiring and marking fast and simple. Four different contact types meet the requirements of any application. You even have a choice of flat base or dovetail base. Bonus: New Buchanan® nylon blocks are designed to allow more circuits per foot than comparable competitive blocks.

To get all the profit-building facts, write today for catalog G-107: 1065 Floral Avenue, Union, New Jersey 07083 • (201) 289-8200 Telex 13-8214

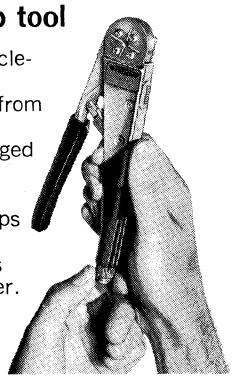
BUCHANAN®

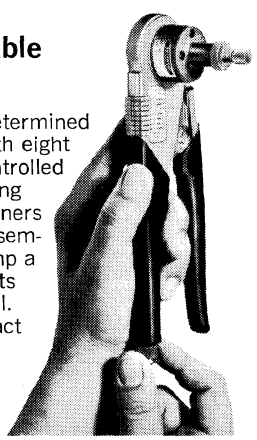
Headquarters for universal crimping tools

Infinitely adjustable microcrimp tool



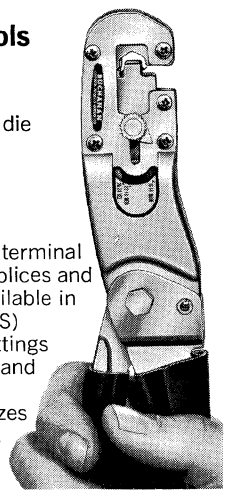
Eight indent cycle-controlled tool crimps depths from .025" to .075". Settings pin gaged to within .001". Direct-reading indicator. Crimps most pin and socket contacts #12 and smaller. Adaptable to accommodate MS turret head assemblies. Can be operator adjusted or preset and locked by toolroom or quality control personnel. Miniature tool available for contacts #20 and smaller to crimp depth values varying from .015" through .043". Meets performance requirements of MIL-T-22520.

Step adjustable crimp tool



Dial seven pre-determined crimp depths with eight indent, cycle-controlled tool. Direct reading indicator. Positioners in turret head assemblies let you crimp a variety of contacts with just one tool. Crimps MS contact sizes 12, 16, 20 and 22 to wire sizes #12 thru #26 AWG with or without turret head assemblies. Can be operator adjusted or preset and locked. Accommodates all MS turret head assemblies as shown on MS3191. Miniature tool available for contacts #20 and smaller to crimp depth values varying from .015" thru .043". MS3191-4 (MIL-T-22520 Class I).

"C" Frame Tools



Lighter, easier to operate, compact yet strong. In-line die system; cycle controlled.

CT tools

Crimp MS 25036 terminal lugs, MS 25181 splices and other fittings. Available in standard size (CTS) cat #11545 for fittings 12-10 thru 26-24 and miniature (CTM) cat #11707 for sizes 16-14 thru 26-24. Dial-for-size selector knob.

MIL-T-22910 Class I MS 90413 (AS)

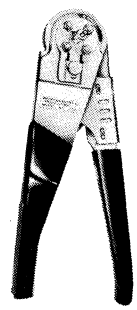
CH tools

Hex dies for use on various series of RF connectors and shielded terminating ferrules. Available standard size (CHS) and miniature (CHM).

CD tools

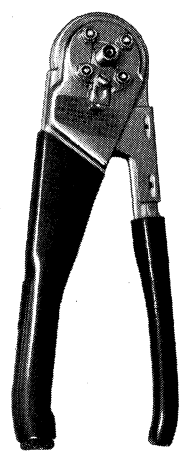
These have special dies for special custom applications. Available in standard size (CDS) and miniature size (CDM).

Miniature positioner controlled



Inexpensive positioners program cycle-controlled tool for crimp depth, rachet release and crimp location. Crimps most contacts #20 and smaller. Ideal for confined areas. 6¾" long; 10 ounces.

Standard size positioner controlled

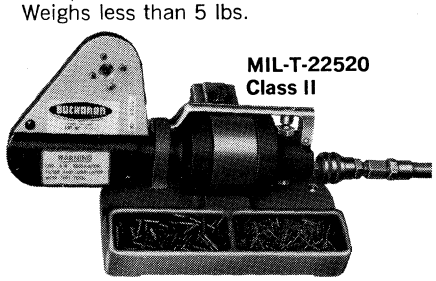


This MIL standard 4-indent, cycle-controlled tool crimps most proprietary and mil spec contacts #12 thru #22. Uses inexpensive positioners to control crimp depth, rachet release and crimp location.

MIL-T-22520 Class I

Manual Feed Tool

For moderate volume production. Pneumatic; cycle-controlled; portable or bench mounted with foot pedal. Crimps contacts #8 thru #22. Weighs less than 5 lbs.



MIL-T-22520 Class II

Automatic Feed Tool

For high-volume production. Four-indent tool automatically feeds contacts from disposable carriers (protects contacts from damage). Crimps as fast as operator inserts wires. Crimp depth automatically controlled. Bench unit holds 2,000 or more contacts. For portable application, carriers in self-positioning, "see-thru" magazines hold up to 102 contacts. Crimps contacts #12 thru #22.

MIL-T-22520 Class II

BURNDY PRINTED CIRCUIT CONNECTORS

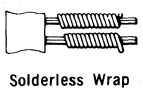
Printed circuit boards are the most common and convenient way of assembling electronic components into systems. Printed circuit connectors are used to (1) interconnect various boards; (2) bring power, signal, and ground leads to the boards; and (3) permit ready replacement of a faulty board. The two connection methods used for printed circuit boards are contact spring to board (card receptacle) and pin to board (pin and socket).

Design: Card Receptacle Method

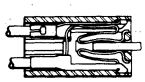
Burndy **EDGE-ON®** connectors (card receptacles) contain spring members which contact "lands" on the inserted board. These spring members may have pin or tab terminations for solder-dipping to "mother" boards; solder cups or solder eyes for soldering to individual wires; square or rectangular pins for solderless wrapping, or may accept crimped, removable contacts (**HYFEN®** principle).

Solder terminations provide the lowest cost connectors. Soldering individual wires to these terminations, however, is time consuming, requires considerable operator skill, and runs the risk of soldering across contacts on close centers. Solderless wrapping is economical, reliable, and can be programmed; it is especially useful in back-plane wiring. With crimp-removable contacts, solder is unnecessary and burnt wire insulation is avoided. Tooling has been designed for the contact, thereby ensuring a highly reliable termination. Changes and corrections can be made with ease. These contacts have no external spring members but snap into a block and make contact with a spring which is an integral part of the connector.

Card receptacle connectors use either accordion-type springs, wire-formed springs, or cantilever springs for low-cost reliable connections.



Solderless Wrap



Edge-On

Accordion Spring

Cantilever Spring

Design: Pin and Socket Method

In two-piece connectors (pin and socket), a plug is generally solder-dipped to the board. The plug will have pin or blade contacts which engage appropriate contacts in the receptacle. These contacts may have terminations of the solder-dip, solderless-wrap, or crimp-removable type. Solder-dip is a fast economical method of making multiple connections; however, it requires considerable operator skill. Crimped, removable terminations are of the machined cylindrical type and are suitable for stranded as well as solid wires. In addition to ease of circuit change, they provide rugged wiring arrays capable of withstanding high shock and vibration.

Tooling

A variety of installation tooling is available to the user to suit his particular manufacturing application. Burndy has designed specific tools for its **HYFEN** contacts including hand, pneumatic, or hydraulic-powered tools that accomplish a perfect crimp irrespective of the operator's skill. Refer to Installation Tooling section for description of specific tool or tools desired. Burndy sales engineers may be consulted concerning the optimum installation technique for a particular application.

For more detailed information refer to Burndy catalog PC (Printed Circuit Connectors). **BURNDY, NORWALK, CONN.**

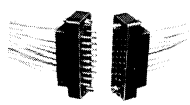
RACK AND PANEL CONNECTORS

BURNDY

Burndy's rack and panel connectors utilize various terminating techniques: solder, tapered pin receptacle, **HYFEN** crimped connection. Burndy's **HYFEN** connectors permit contact installation at any point in the assembly procedure. Because of the crimp, snap-lock feature, the connector block can be premounted, thereby permitting complete panel construction prior to wiring. In addition, circuit changes and replacement of individual contacts are quickly and easily accomplished.

Crimp

Snap-Lock

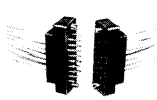


Connect

Design

The basic rack and panel connector consists of mating plug and receptacle blocks molded of a high-strength dielectric material. These connectors are designed so that each contact has a small degree of lateral freedom (float), to permit gang mating with reasonable engaging force, and a very limited degree of angular freedom to prevent mismatching of contacts. The blocks accept contacts that are made of a high-conductivity copper alloy. The copper contacts generally are gold-plated; they have varying underplates dependent upon the requirements of the application. Hardware is corrosion resistant.

ME heavy duty connector



MS miniature rectangular connector

DTD heavy duty connector

Most sockets are equipped with a beryllium copper contact spring which supplies high-contact pressure to ensure low-resistance contact between the pin and socket. In addition, beryllium copper locking springs are provided on both the pin and socket to retain the contacts within the connector.

Each connector family is provided with a variety of external hardware, including cable clamps, hoods and mating devices.

Burndy rack and panel connectors are designed and tested in accordance with applicable military specifications.

Tooling

The Burndy tooling family, which provides full-cycling control, ensures a reliable connection independent of the operator's skill and, therefore, at low cost. In addition, a Burndy extraction tool extracts the contacts quickly and easily. Refer to Installation Tooling section for a detailed description of the various Burndy tools. Burndy's experienced sales engineers may be consulted concerning the optimum installation technique for a particular application.

For more detailed information refer to the following Burndy catalogs: HMT63 (Plug-in HYFEN Sockets); MS67-1 (Miniature Rectangular HYFEN Connectors).

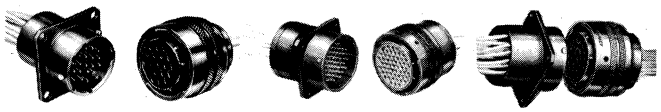
BURNDY

BANTAM CONNECTORS

Burndy's **BANTAM™** connectors conform to the requirements of MIL-C-26482 and are available in either solder or smooth (crimp) types. The connectors have a positive bayonet coupling lock which can be quickly connected and disconnected. They are vibration resistant and moisture proof within the required temperature range of −67° to +257°F. **BANTAM** connectors mate with, or replace, all connectors which conform to **MIL-C-26482.**



HYFEN BANTAM **Smooth BANTAM** **Solder BANTAM**

Polarization

Different polarizations are available in **BANTAM** connectors. These prevent mismatching when similar plugs and receptacles are used. Connectors can be ordered polarized in accordance with applicable military standards.

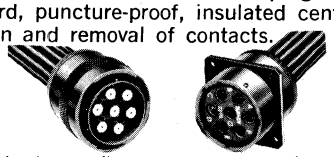
Design and Materials

Solder BANTAM Connectors — Pin contacts and closed-entry, probe-proof socket contacts are machined from a high-conductivity copper alloy and are plated with heavy gold over silver. The shells are a high-strength aluminum alloy and are plated with cadmium, olive-drab chromate, or other finishes as desired. The solder wells are designed so that insertion of the wire and completion of the termination can be accomplished with speed and accuracy.

Smooth BANTAM Connectors — Both pin and socket contacts are machined from a high-conductivity copper alloy and are plated with heavy gold over silver. The socket contact has a closed-entry design with an internal beryllium-copper contact spring to guarantee constant electrical contact pressure. The shell material and finishes are the same as on solder **BANTAM** connectors. Pin and socket contacts are crimped to the wires by any of several hand or power tools, including **MS3191.** Pins and sockets are installed with or can be removed by any insertion and extraction tools which meet the requirements of **MS24256.**

Smooth BANTAM Coaxial Contacts — These contacts will accept a variety of cables and are available in certain insert arrangements. They meet or exceed the environmental requirements of **MIL-C-26482.**

HYFEN BANTAM Connectors — Both plug and receptacle contain a hard, puncture-proof, insulated center that facilitates insertion and removal of contacts.



The pin contacts and closed-entry socket contacts are machined from a high-conductivity copper alloy that is plated with gold over silver. A locking spring is designed on each individual contact rather than in the connector itself. The shell material and finish are the same as on the solder and smooth **BANTAM** connectors.

HYFEN BANTAM Coaxial Connectors — These connectors accept a variety of miniature coaxial contacts as well as #16 or #12 standard wire contacts. (Refer to Coaxial and Shielded Cable Connectors).

Tooling

A variety of installation tooling is available to the user to suit his particular manufacturing application. Hand, pneumatic, or hydraulic-powered tools accomplish a perfect contact crimp irrespective of the operator's skill. The Burndy M10S-1 is a manually-operated, four-indent tool that exceeds the requirements of **MIL-T-22520A** and **MS3191.** Refer to Installation Tooling section for description of the tool or tools desired. Burndy's experienced sales engineers may be consulted concerning the optimum installation technique for a particular application.

For more detailed information refer to Burndy catalogs BSB67 (Solder BANTAM Connectors) and SCB67 (Smooth BANTAM Connectors).

BURNDY, NORWALK, CONN.

COAXIAL AND SHIELDED CABLE CONNECTORS

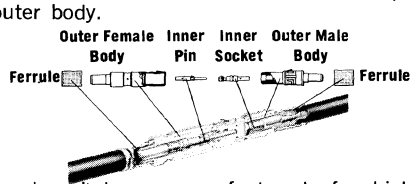
BURNDY

Burndy's **HYFEN** line of coaxial connectors combines the reliability of crimping with the versatility of removable contacts. **HYFEN** connectors enable a user to make installations at the most convenient point in his production cycle. The snap-lock feature permits quick circuit changes and replacement of individual contacts.

Design

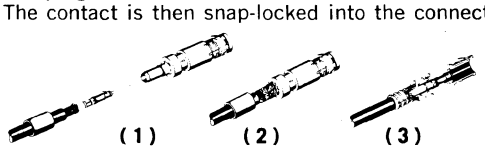
To eliminate the possibility of mismating, multiple contact connectors are aligned or polarized by the shell or guide pins before contact engagement. One-piece shell and one-piece insert design reduces the possibility of lost parts or moisture entrapment.

Contacts for coaxial or shielded cable consist of three components: an inner contact, an outer body, and a ferrule. Inner pin contacts are assembled within outer female bodies; inner socket contacts, within outer male bodies. An insulating bushing selected for its low dielectric constant is part of the outer body.



Pins and sockets are manufactured of a high-conductivity copper alloy and are gold-plated to resist corrosion and provide low-contact resistance.

Coaxial cable is terminated by (1) crimping the inner contact to the inner conductor; (2) snapping the inner contact into the outer coaxial contact body; (3) slipping a ferrule over the exposed braid and crimping it on the rear of the outer contact body. The contact is then snap-locked into the connector.



TRIM TRIO

In the **TRIM TRIO,** Burndy offers a unique approach in contact design. Any of the trio of subminiature coax, machined, and formed contacts can be combined at will and as desired in the insulating blocks. The MS-M connector series and the PD57 connector are designed specifically for the trio and will accept any combination of #16 standard and subminiature coaxial contacts. The MB152 and **HYFEN AQUALOK®** connectors will also accept members of **TRIM TRIO.**

Tooling

Burndy provides hand, pneumatic, or hydraulic-powered tools to crimp coaxial and shielded cable contacts. These full-cycling tools provide a reliable connection independent of the operator's skill. Refer to Installation Tooling section for a description of the specific tool or tools desired. Burndy's experienced sales engineers may be consulted concerning the optimum installation technique for a particular application.

BURNDY

TERMINAL BLOCKS

Burndy offers industry a useful line of terminal blocks for electrical connection applications in a variety of environments. Included in the line are **MINILOK®**, **MODULOK®**, **SEALOK™**, and **YHLZ** terminal blocks. (Refer to accompanying table.)

Design

The **MINILOK** terminal block, as its name implies, is a lightweight, miniature block that terminates #24-#18 wire and miniature coaxial cable. It is one-fifth the weight and occupies one-fourth the space required for a standard terminal block but is capable of terminating the same number of wires. Wires can be fed into **MINILOK** bodies through both side and top.

The **MODULOK** block terminates standard wire sizes #22-#8 and standard coaxial cable. The blocks, which are offered in two or four horizontal tiers, can be snapped together and mounted in tracks up to 32 inches in length.

SEALOK is an environmentally sealed modular interconnection system for shipboard, aircraft, aerospace and many industrial-commercial applications where protection against environment is required. The system functions over a wide range of temperature, vibration and shock without variations in contact resistance; it protects electrical junctions from humidity and corrosive attack, and it is readily installed and serviced by tools common in industry. The **SEALOK** modules are available in a wide variety of bussing arrangements and wire sizes.

The **YHLZ** is a lightweight, nonsealed modular terminal block for the distribution of electrical and electronic circuits. High-contact spring forces make this module suitable for both dry circuits and heavy-power circuits. It is available with 2-common, 4-common and 8-common bussing. Track

Terminal Block	Wire Type	Feed	Wire Size
MINILOK Type A-MM  A2DMM-1	std.	top/side	#24 - #18
	min. coax.	side	Most miniature coaxial cable
MODULOK Type A-M  MX-M	std.	side	#22 - #8
	std. coax.	side	Most miniature coaxial cable
SEALOK  Type TBS	std.	top	#24 - #12
YHLZ	std.	top	#24 - #16

for both the **SEALOK** and **YHLZ** systems can be ordered in lengths to provide for the number of modules in your assembly. The modules are held in the track with end clamps and can be easily removed or added.

Tooling

Burndy's terminal blocks can be installed with a variety of installation tooling. Contacts can be crimped with hand, pneumatic, or hydraulic-powered tools depending upon the needs of the application. Refer to Installation Tooling section for a detailed description of the various Burndy tools.

For more detailed information refer to Burndy catalogs MMC (Terminal Blocks) and TBS68 (SEALOK) or your local Burndy representative (YHLZ).

COAXIAL AND SHIELDED CABLE TERMINATIONS

Burndy's one-piece **UNIRING®** ferrule and two-piece **HYRING®** ferrules are fast, reliable compression methods for terminating, grounding, or tapping coaxial or shielded cable. The reliability of these compact, crimped ferrules makes slow, unsure solder connections a thing of the past.

Design

HYRING ferrules consist of a hard brass inner ferrule and a slightly shorter and softer outer ferrule. When circumferentially crimped, these ferrules supply even pressure on all sections of the braid and tap wires and provide maximum protection of the cable. **UNIRING** one-piece construction combines the inner and outer ferrules in one unit; **UNIRING** ferrules are available insulated or uninsulated.

Since no heat is needed for a crimped termination, there is no danger of damage to the immediate or adjacent cables. Tin-plating eliminates any corrosion. **HYRING** and **UNIRING** ferrules are color-coded for easy size selection.

Tooling

Hand, pneumatic, or hydraulic-powered tooling with controlled depth-of-indent ensures optimum termination even by unskilled personnel. Refer to Installation Tooling section for a detailed description of the various Burndy tools. Burndy's sales engineers may be consulted concerning the optimum installation techniques for a particular application.

TYPE		Insulation	I.D. Range Inner	I.D. Range Outer
	**UNIRING** Type **YEC**	Insulated	.058 to .210	—
	UNIRING Type **YNC**	Uninsulated	.058 to .210	—

	**HYRING** Types **YIC & YOC**	Uninsulated	.046 to 1.602	.101 to 1.875
	**HYRING** (large), Types **YIK & YOK**	Uninsulated	.430 to 2.905	.590 to 3.170

Military Specifications

The superiority of crimping for grounding, tapping, or terminating coaxial or shielded cable is recognized by the military and is referred to in **MIL-E-16400** and **MIL-I-983. HYRING** terminations for frequencies to 100 megacycles conform to Signal Corps, Bureau of Ships, and U. S. Air Force requirements and are in accordance with Military Specifications. **UNIRING** terminations also meet applicable military requirements.

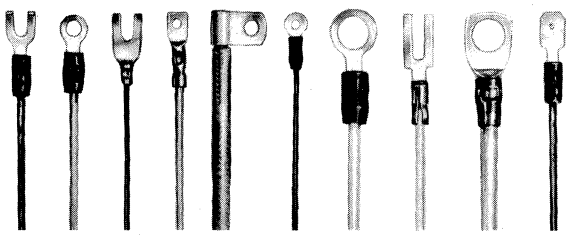
For more detailed information refer to Burndy catalogs YEC-66-4 (UNIRING-HYRING) and YK67 (Large HYRING).

BURNDY, NORWALK, CONN.

BURNDY

HYDENT TERMINALS AND SPLICES

Millions of miles of wire have depended upon Burndy's **HYDENT®** terminals and splices for reliable assemblies. These terminals and splices are available in a wide selection of types and sizes and are crimped with Burndy installation tools of proven convenience and reliability. They meet all applicable military and industry specifications.



Design

HYDENT terminals are available insulated or uninsulated; with or without insulation grips; with ring, forked or rectangular tongue; with straight, right-angle, or flag tongue. Splices are available either separable or permanent, insulated or uninsulated and provide joints that are better electrically than the wire itself. Both terminals and splices are made of electrolytic copper and are tin-plated to resist corrosion. Insulating sleeves are permanently locked in position. **HYDENT** terminals can be purchased loose-piece or in strip form for high-volume use.

Tooling

With Burndy tools, a completed connection has a neat, smooth appearance with no sharp edges, corners, or flash. Burndy has a complete line of hand and power tools to meet the needs of both occasional and high-volume users. Trained **HYTOOL®** specialists are available for operator instruction and tool repair. Refer to Installation Tooling section for a complete description of the Burndy tools available.

For more detailed information refer to Burndy catalogs HY59 and BA67-1.

PLATE MODULE CONNECTORS

The Burndy modular connector system is designed for use with automatic solderless-wrap equipment. This connector system is composed of an .080″ thick aluminum plate, of any length and width up to a maximum of 22″ x 42″. Modules are pre-assembled in customer-specified patterns to provide card receptacles of any length that the plate can accommodate for cards with pad spacing of .1Q0″ and .062″ nominal thickness. The other side of the plate contains a field of solderless-wrap posts on a .100″ x .200″ grid.

For more detailed information refer to Burndy.

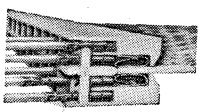
Let Cinch solve your interconnection problems

PC BOARD CONNECTORS

"Twin-Con"*

High reliability connectors. Meet MIL-C-21097 and combine the reliability of permanently assembled bifurcated contacts with the convenience and versatility of snap-in, crimp-on connectors. 8, 15, 22 and 43 position units available.

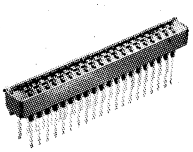
**Patent Pending.* CATALOG C-24.



.025 & .045 "Square Tail"

Wire wrap terminations available with selective gold plating on contact areas to substantially reduce cost. Contacts combine thin resilient flexing member with straight, rigid square tail. .025" on .125 centers and .045" on standard .156" centers. Wide range of types available.

**Patent Pending.* CATALOG C-24.

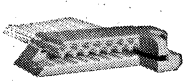


Hermaphroditic Types*

A broad line of .045" square tail, standard wire wrap, crimp-on, snap-in, taper pin and solder termination devices (interchangeable with ELCO's products sold under ELCO's trademark "VARICON"). 17 to 41 contacts

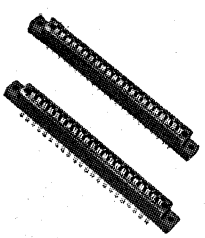
**Manufactured under license agreement with Elco Corporation.*

CATALOGS PBM-3, PBM-22 & PBM-47



Bifurcated Types*

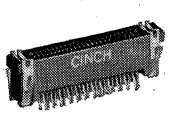
Designed especially for severe environmental conditions. Bifurcation provides two wiping contact surfaces, assuring positive contact even when board irregularities exist. Meet applicable requirements of MIL-C-21097A. 6-25 double contact positions on .156" centers. **Patent pending.* CATALOG C-24.



"Tykon" Subminiature*

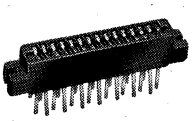
For double-sided .062" printed circuit boards. Ribbon type, flexing action contacts, spaced on .050" centers assure maximum contact. Ideal for memory planes and plug-in modules. 6 to 25 double-contact positions. Largest

**Patent pending.* CATALOG CM-24



Low Cost Cantilever Type

Unique pre-loaded cantilever contact construction combines minimum insertion force with maximum contact pressure. Simple mechanical design, plus adaptability to selective gold plating and high volume assembly techniques provide high quality connector at low cost. Currently available in 15 position size. Other sizes on .156" centers under development. CATALOG C-24.

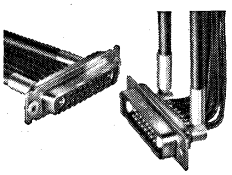


RACK AND PANEL CONNECTORS

"D-Subminiature" Series*

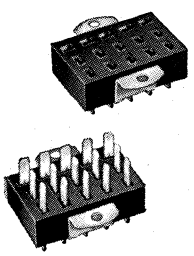
High contact density, high reliability units, available in a wide range of models, Mark I, Mark II, Mark III "Royal D" and Standard "D" as well as aerospace types can be supplied. 9,15,25,37 and 50 contact sizes, with solder pot, crimp type, snap-in or crimp type near-release contacts. Probe-proof, closed entry socket contacts on some models. Coaxial and/or high voltage contacts combinations provided on some series. Full line of hardware and accessories. Generally meet requirements of MIL-C-24308 Catalog CM-46.

**Manufactured under license agreement with ITT Cannon Electric Company.*



"Jones" Type

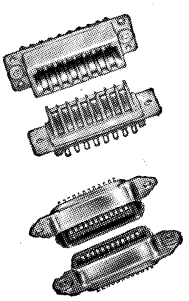
The most complete line of industry standard multi-contact units. Seven series covering 7.5, 10, 15 and 25 amps. 800-3000 V RMS, with 2 to 12 contacts. 7.5 amp. 1500 V series available to 33 contacts. Wide range of cap and cover variations. CATALOG CC-1



BLUE Ribbon* AND Micro RIBBON*

Industry standard types available in 8, 16, 24 and 32 contact sizes in the larger units (largest overall length of approximately 4 inches for 32 contacts). Micro Ribbon type available with 14, 24, 36 and 50 contacts (largest overall length approximately 2.7 inches for 36 contacts). Micro Ribbon also available with clamps and cable caps for cable-to-chassis and cable-to-cable applications. CATALOG CM-36

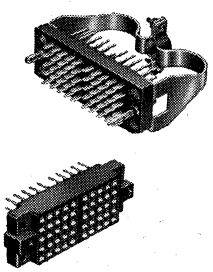
**Registered trademarks of Amphenol Corporation.*



"Gold Button"*

A gold button is welded in place, covering only the actual contact area of the female receptacle. Provides high dependability where frequent insertion and withdrawal are involved at no increase in cost over standard connectors. Available in 50 and 72 contact sizes for cable-to-chassis and cable-to-cable applications. Largest overall length for 72 contact size is approximately 3.70 inches. CATALOG PBM-73.

**Manufactured under license agreement with Western Electric Co.*



Cinch helps you...

with a broad line of interconnection devices . . . with extensive experience in special tooling for volume production . . . with large production facilities that ensure the availability of the product you need at competitive prices.

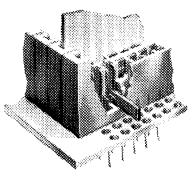
INTERCONNECTION SYSTEMS

Back Plane Assembly

Punched aluminum plate concept incorporates many innovations that reduce high labor content of conventional back plane systems and simultaneously provides increased design flexibility and more precise contact of terminal tip location.

The plane can be bussed from the board side or the terminal side. Individual contacts, including bussing contacts, can be replaced easily. Common voltage input can be provided to any position on the plane. Terminal tips are held to ± .010″ radius tolerance.

Assemblies with 24,640 contacts on .125″ centers are now being produced. CATALOG C-112.

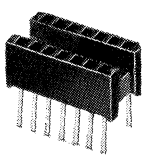


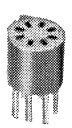
DIP and TO-5 Case IC Sockets

These devices combine low contact resistance and high contact force with exceptional environmental stability.

The DIP sockets are available for 14, 16, and 24 pin DIP's with standard 0.100″ spacing between pins. They will accept either round or flat leads and are available with diallyl phthalate or GP phenolic insulators and gold or electro-tin plated beryllium copper leads.

6, 8, and 10 pin TD-5 case sockets are supplied with deallyl phthalate and gold plated leads only. CATALOG C-113.

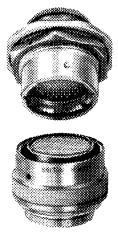




CYLINDRICAL CONNECTORS

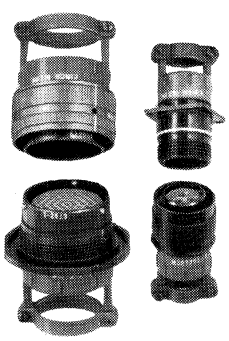
*MIL-C-81511—Astro/348**

These subminiature connectors have .085″ contact centers with dielectric separation of .021″. A one-piece retention system eliminates metal construction. Features include scoop-proof mating, grounding prior to electrical contact, removable crimp contacts and exceptional environmental stability. Five shell sizes; 8, 10, 14, 16 and 18 for 4, 12, 37, 55, and 85 contacts respectively are available in five receptacle styles with standardized accessories. CINCH-NULINE CATALOG CN-5



*MIL-C-26500 and MIL-C-38300—Omega**

A complete line of miniature connectors for any required shell style, contact size and insert configuration, including G-Type conductive shells of chrome plated aluminum. They operate continuously at 200°C and take short exposures to 800°C and are extremely resistant to shock, vibration, corrosion and small particles. The Omega series are generally available on short delivery cycles in large quantities. Small quantities can be obtained from authorized Cinch-NuLine distributors.
CINCH-NULINE CATALOG CN-3A



**Manufactured under license agreement with Amphenol Corporation.*

FOR IMMEDIATE DELIVERY **Many of the Cinch products described here are stocked for off-the-shelf delivery through a nationwide network of Cinch Distributors.**

37 GREAT JONES ST., NEW YORK, N. Y. 10012 • (212) 777-6571 • TWX: 710-581-4930

CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

For many years the electronic industry has relied on the wide range of products, engineering services and consistent production quality of Connector Corporation.

A limited cross section of Connector Corporation's line is illustrated. Your specific requirement can be exactly met and mass produced with good delivery. Many items can be supplied with leads attached and color coded, offering production savings for your assembly. Special items can be designed or developed at relatively low cost. Just let us know what you need.

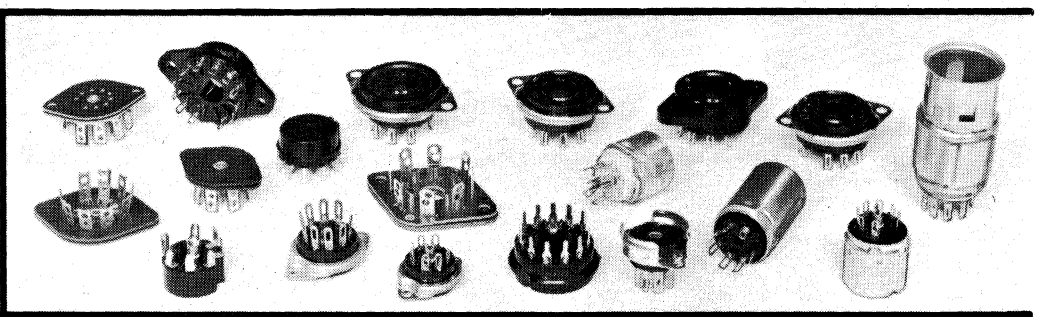
Products are available in a wide range of insulations and contact materials:

Insulations include: general purpose or mica-filled low loss Phenolic, glass filled alkyd, polypropolene, ceramic,etc., in molded versions. Laminated types include XP, XXP, XXXP Phenolics, X2B Hard Rubber, Glass Epoxy, Glass alkyd.

Contacts and Platings include: High tensile brass, phosphor bronze or beryllium copper with cadmium, electro tin, silver, hot tin dipped, silver-gold flash, gold plating, etc.

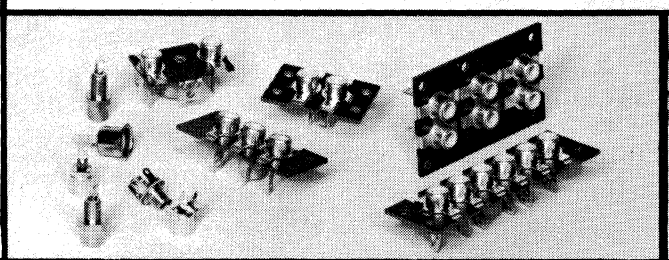
TUBE SOCKETS

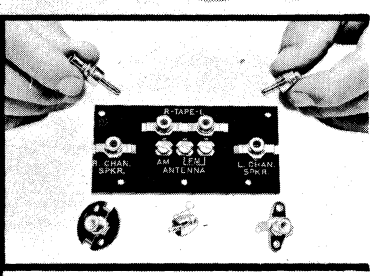
Most standard and many special molded & ceramic configurations available as well as laminated socket types. Fixed or collapsible types of shielding are available.



MULTI PURPOSE PHONO CONNECTORS

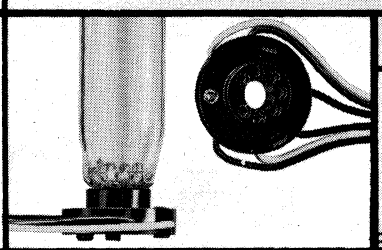
Sockets available in multiples up to 12 per section. Broad line of individual male and female types in a variety of mountings. Highly reliable for dependable repeated use.

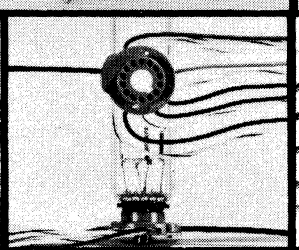


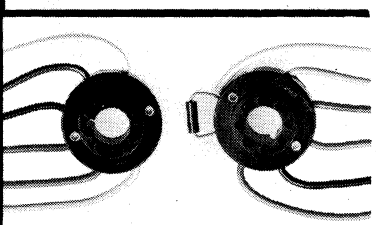


KINESCOPE SOCKET ASSEMBLIES

Include: Miniature Di Heptal Socket for 90° color tubes, 110° Eightar CRT sockets, miniature types for JEDEC E7-91, B7-247 basing (HEPTAL). Many special configurations and types may be furnished in quantity lots.

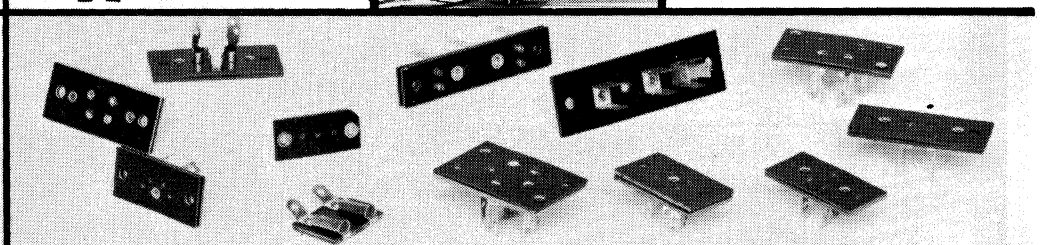






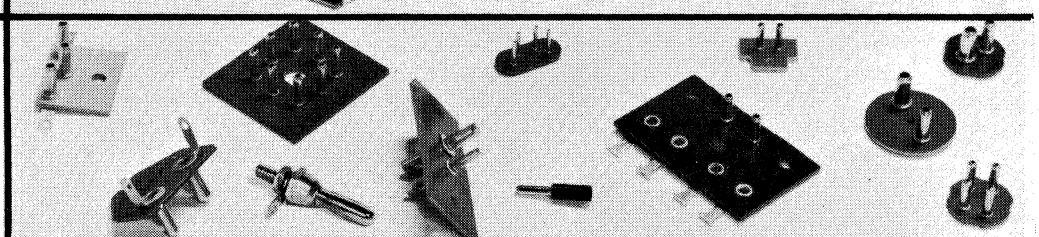
RECEPTACLES

Numerous varieties. Available in molded or laminated construction. Reliable contacts offer positive electrical and mechanical mating.



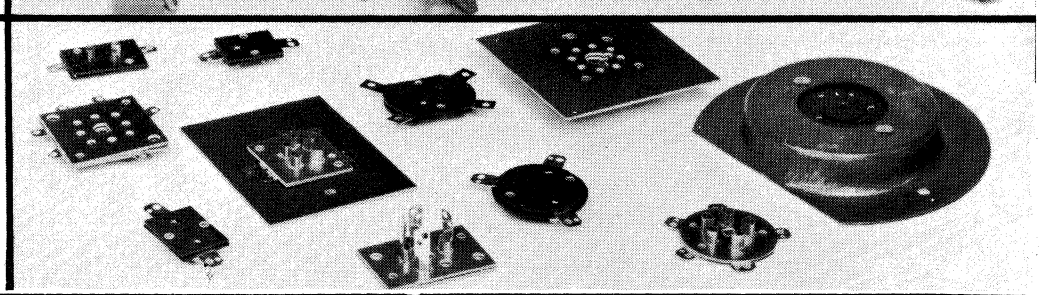
PLUGS

Numerous types available, with molded or laminated phenolic insulations. Leads may be supplied to specification.



BATTERY SOCKETS

Complete line for commercial & military batteries. Custom designed to your requirements.



CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

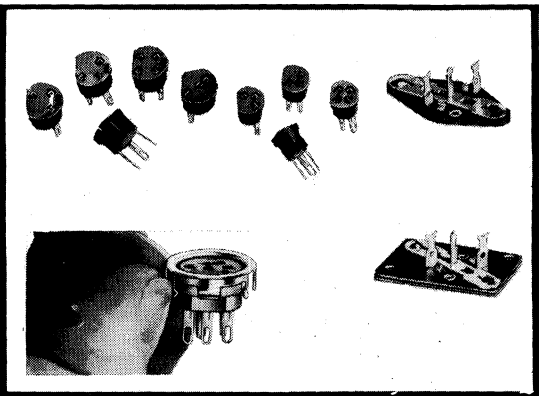
TRANSISTOR AND NUVISTOR SOCKETS

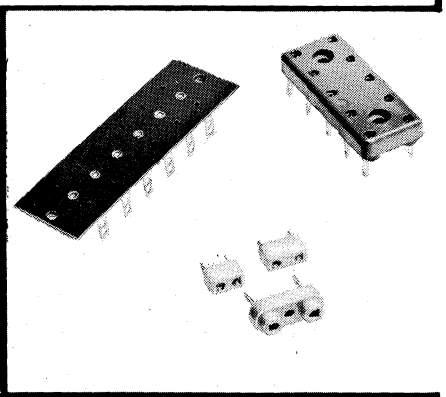
Available to mate with 3-pin, in-line transistors, and also with 3 and 4-pin transistors of any configuration on .200 or .100 dia. pin circle.

Miniature positive contact MIL quality nuvistor sockets for high quality military and commercial equipment.

CRYSTAL SOCKETS

Accommodate single & multiple crystals. Include both p.c. and conventional solder lug versions for crystals with .486, .273 and .192 pin centers and with .050 or .040 pin diameters. Also available to MIL Specs.



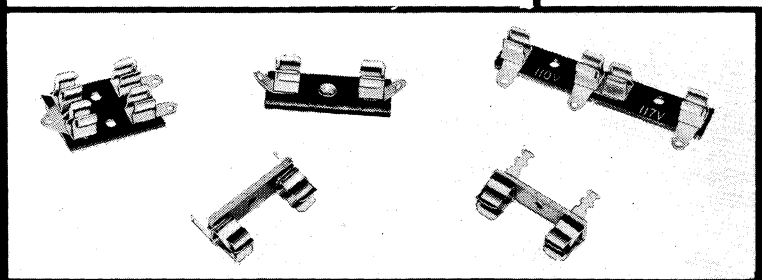


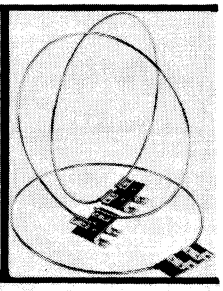
FUSE HOLDERS

Positive grip open type. Features: easy solderability, and versatility of construction which permit multiples or variations to your spec at reasonable cost.

UHF TV ANTENNAE

Attaches easily. Can be rotated in many different planes for optimum performance. Long life, trouble-free operation.



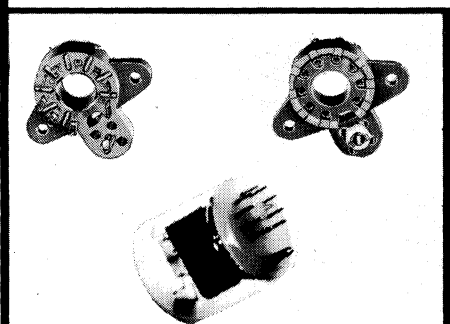


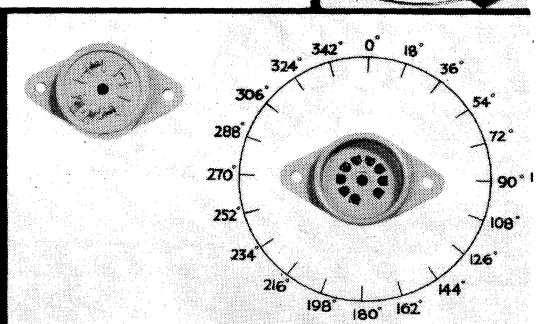
TRANSMITTER TUBE SOCKETS

Low loss at very high frequencies available. Vented to provide maximum cooling of tube base and anode contact area by convection. Voltage breakdown characteristics are enhanced by appropriate barriers between contact positions where indicated.

HIGH VOLTAGE TUBE SOCKETS

Designed for application with use of appropriate insulating materials and spacings.



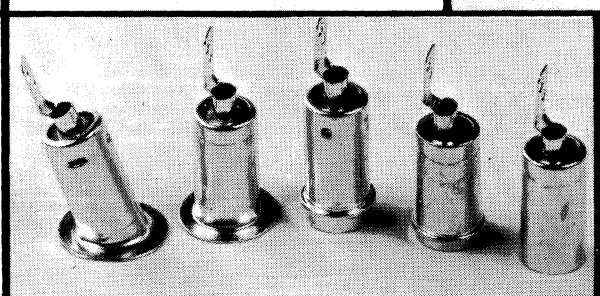


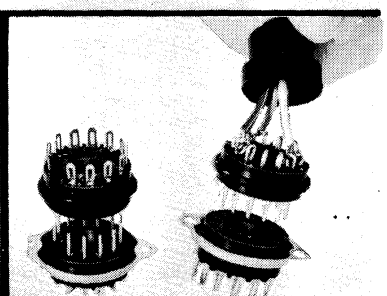
RF COAXIAL ANTENNA CONNECTORS

For auto receivers & similar applications. Rugged construction. Excellent contact resistance and retention.

MULTI-PIN MALE/FEMALE CONNECTORS

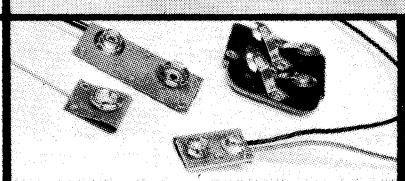
Provide quick reliable connect and disconnect for cable assemblies. Insert and extract easily, yet have reliable contact retention and resistance.

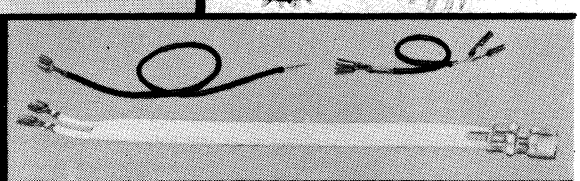




BATTERY CONNECTORS AND WIRE ASSEMBLIES

Snap-on and positive contact types available with wired leads if desired. Wire assemblies furnished to your specifications as to type of wire, length and termination attachments.

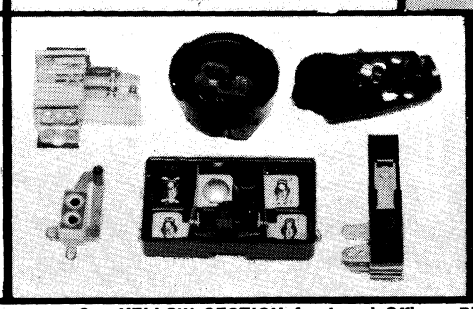


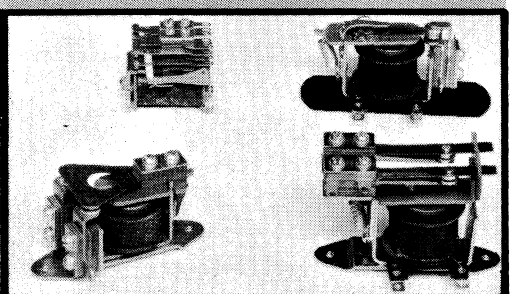


SEALECTRIC

SEALECTRIC SWITCHES AND RELAYS

For standard & special applications, send us your requirements.



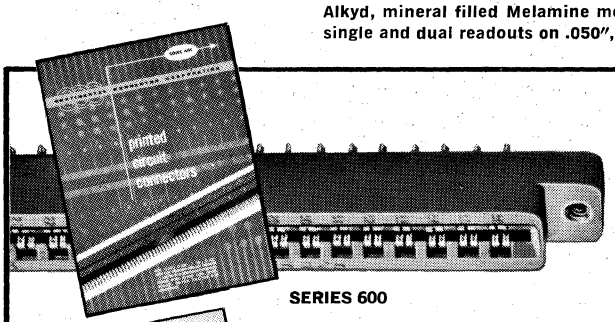


Precision Electronic Connectors

PRINTED CIRCUIT CONNECTORS*

Provide positive, space-saving connections between printed circuitry and conventional wiring through PC boards, tape cables or "plug" mounted subassemblies. Feature Continental's patented "Bellowform" contacts; glass-filled Diallyl Phthalate, Plaskon Alkyd, mineral filled Melamine moldings. Receptacles accommodate 1/32", 3/64", 1/16", 3/32" or 1/8" board thickness, single and dual readouts on .050", .075", .100", .125", .150", .156" and .200" centers.

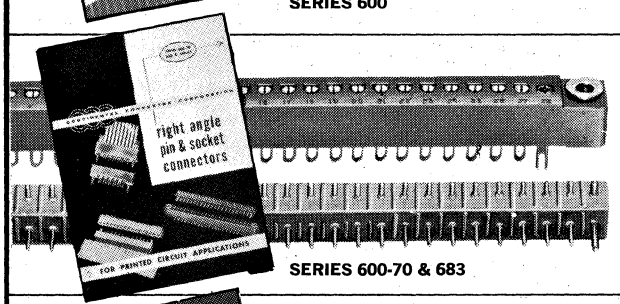
*Patent No. 2,875,425



SERIES 600

PC BOARD RECEPTACLE

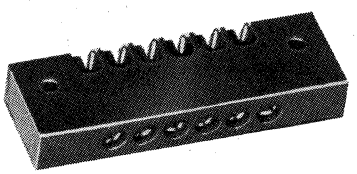
Receptacle type printed circuit connectors for 1/32", 3/64", 1/16", 3/32" and 1/8" printed circuit boards. Available in wide range of sizes, single and dual readout contact construction... up to 210 terminals.



SERIES 600-70 & 683

PC RIGHT ANGLE PIN AND SOCKET

Provide additional flexibility in printed circuit system design. Mating parts have set of solder cups on socket and set of right angle pins on plug which mounts and dip solders to the printed circuit board. Wide variety of configurations, contact sizes, moldings and mounting styles are available.



SERIES 672

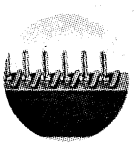
PC TEST POINT

Provide conveniently located test points to check printed circuitry. Available with 4, 5, 6, 8, 10, 11, 20, 21, 28, 30, 42 and 63 contacts which grip and hold securely a standard .080" test probe. Connectors have recessed and floating pin terminals mounted at right angle to the test socket. Pins dip solder to printed circuit board.

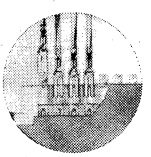
MOST PC CONNECTORS AVAILABLE IN THESE WIRING STYLES

Wire-Wrapped

Eyelet Lug



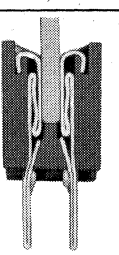
Dip Solder

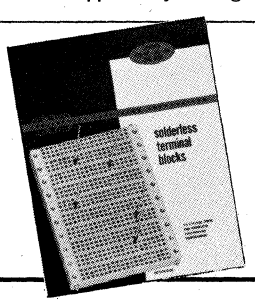


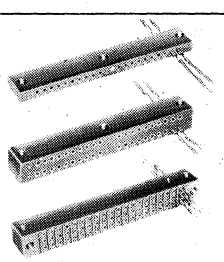
Taper Tab

EXCLUSIVE PATENTED "BELLOWFORM" CONTACT

Coil spring action grip clasps printed circuit board firmly over 100% of the contact area. Contact permits use of undersized or oversized board tolerances while maintaining low contact resistance. It "rides" with the printed circuit board under extreme vibration conditions or misalignment.







TERMINAL BLOCKS

SERIES 145-58, 145-50 AND 145-48. Precision reamed, solderless taper pin receptacles in single, dual and triple row construction, molded-in for highest durability. Available in any combination of feedthru individual or shorting terminals. Internal bus between any combination of terminals eliminates external wiring. Mounting holes for stacking, right angle and perpendicular mounting. Molding is glass filled Dially Phthalate (MIL-M-19833, Type GDI-30).

complete catalog data on request

CONTINENTAL

CONTINENTAL CONNECTOR CORPORATION • 34-63 56th STREET

for Commercial & Military Applications

PLUG & SOCKET CONNECTORS for every requirement.

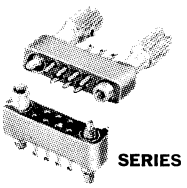
A complete line of high-reliability connectors for computer, missile, aircraft, communications and other critical applications. In addition to standard specifications, these connectors can be supplied with such optional accessories as aluminum hoods, protective shells, polarizing screwlocks*, and solder filled contacts. Various molding compounds are also available.

*Patent No. 2,746,022

MICRO-MINIATURE

5 TO 104 CONTACTS. Ruggedized to withstand shock and vibration extremes. Meet MIL-C-8384 specs. Available with guide pins and sockets, polarizing screwlocks, cable brackets, hoods and glass filled Diallyl Phthalate molding.

Breakdown Voltage (sea level), 2000V. RMS • Current Rating, 3A • Min. Creepage Bet. Contacts, .070″ • Min. Air Space Bet. Contacts, .040″ • Contacts, center-to-center 3/32″ • Pin Diameter, .030″ • Solder Cup, #22 AWG wire.

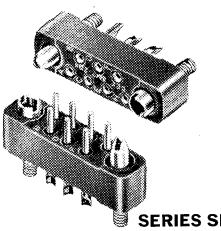


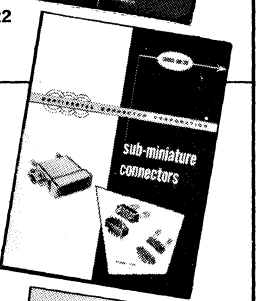
SERIES MM22

SUBMINIATURE

5 TO 104 CONTACTS. Meet or exceed applicable paragraphs of MIL-C-5015 and MIL-C-8384. Optional features include guide pins and sockets, polarizing screwlocks, protective shells and aluminum hoods. Glass-filled Diallyl Phthalate molding.

Breakdown Voltage (sea level), 2000V. RMS • Current, 5A. Cont., 7.5A max. • Min. Creepage Bet. Contacts, .078″ • Min. Air Space Bet. Contacts, .045″ • Contacts, center-to-center, 1/8″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.



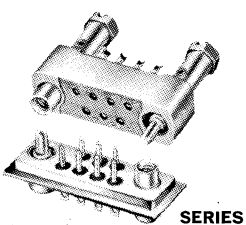


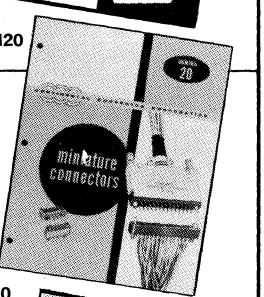
SERIES SM20

MINIATURE

4 TO 104 CONTACTS. A larger size, also available with guide pins and sockets, polarizing screwlocks, aluminum hoods, protective shells, and various molding compounds. Can be supplied with similar specifications in hexagonal types with 1, 4, 5, 7, 9 and 10 contacts.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 5A. cont., 7.5A. max. • Min. Creepage Bet. Contacts, 1/8″ • Min. Air Space Bet. Contacts, .070″ • Contacts, center-to-center, .150″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.



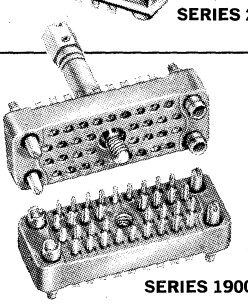


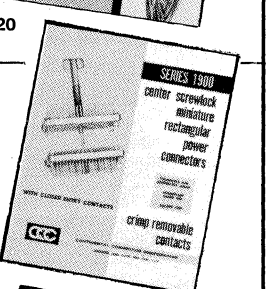
SERIES 20

CENTER SCREWLOCK

34, 50, 78, 104, 152 CONTACTS. Double lead thread action screwlock, stainless steel side channels and closed entry contacts for maximum reliability. 152 removable contacts Series 2500152 and 10-contact and 22-contact types, for #20 AWG wire also available.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 10A. cont., 13A. max. • Pin Diameter, .062″ • Min. Creepage Bet. Contacts, .110″ • Min. Air Space Bet. Contacts, .050″ • Contacts, center-to-center, .150″ • Solder Cup (also solderless-wrap and taper pin), #16 AWG wire.

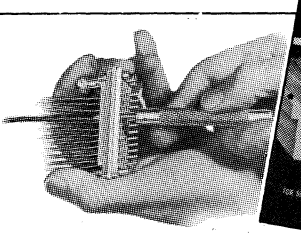




SERIES 1900

REMOVABLE CONTACTS

Miniature rectangular rack and panel connectors with removable crimp termination contacts. Available with 7, 9, 14, 18, 20, 26, 34, 50, 66, 75, and 104 contacts. For solderless wiring. Insertion, removal and crimping tools available. Conform to MIL-C-22857 specifications. Also in Microminiature Sizes: 50, 100, 200 Contacts. Series 25MM.



SERIES 25

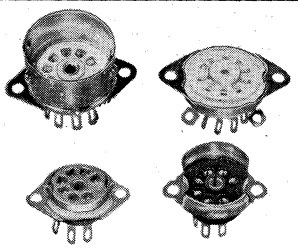
CONNECTORS

WOODSIDE, NEW YORK 11377 • PHONE SALES: (212) 899-4422

Eby™ SOCKETS, BINDING POSTS

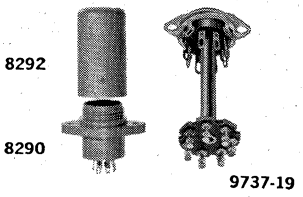
and related products . . .

SOCKETS



7 and 9-Pin Miniature Sockets. To MIL-S-12883A or commercial requirements. Contacts: brass, phosphor-bronze or beryllium-copper, with various finishes. Mica-filled or general purpose phenolic, ceramic or teflon bodies. Top mount, bottom mount, split-saddle or shield base versions. 4 ground lugs available in bottom mount version. Various mounting centers.

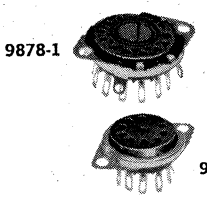
SOCKETS



High Voltage Socket, #8290. Prevents arcing at high temperatures and altitudes. Rated at 2000 volts DC, between contacts and threaded mounting insert at 40,000 ft. Mica-filled phenolic. Beryllium-copper contacts. Mica-filled shields, $1\frac{31}{32}$" high, #8292; $1\frac{9}{32}$" high, #8291.

Turret Socket, 7-Pin, #9737-19, 9-Pin, #9737-21. Variety of socket combinations available.

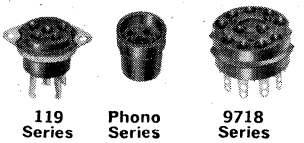
SOCKETS



Compactron Socket, #9878-1. Accommodates any Compactron tube. Top or bottom mount saddle. 4 ground lugs on bottom mount optional. $1\frac{5}{16}$" centers. Mica-filled or general purpose phenolic.

10-Pin Socket, #9713-282. Accepts new 10-Pin tube. Top or bottom mount. 4 ground lugs on bottom mount optional. Mica-filled or general purpose phenolic.

SOCKETS



119 Connector. 1 to 5 contacts. $\frac{7}{8}$" mounting centers.

Phono-Plug. Compact, self-enclosed. 2 to 4 contacts. $\frac{3}{4}$" max. dia. Contact is attached to wire, pushed into cavity and automatically locked.

9718 Series. Up to 12 contacts. $1\frac{5}{16}$" mounting centers. Many combinations available without tooling.

(Mating plugs available for all models)

UNIVERSAL BINDING POSTS

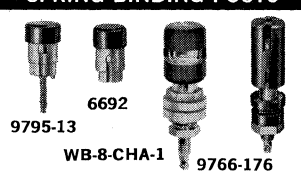
Multi-type. Accepts banana plug. "D" insulators for keyed mounting. Non-removable tops. Red or black phenolic.

#9738-19 — Rated 30 amps at 1000V. Nickel-plated brass.

#9766-150-1 — Miniature. Extends only $\frac{51}{64}$" from panel when closed. Max. dia., $\frac{17}{32}$". Gold flash on nickel-plated brass.

Twin Assemblies, #7186. Boss insulates posts from panel. $\frac{7}{8}$" mounting centers. 6-32 molded-in stud. $\frac{1}{2}$" dia. non-removable tops. Brass and phenolic.

SPRING BINDING POSTS



Quick connections. D-shaped hole for uniform tension across wire. Accepts phono-tip. Threaded stem and dowel optional. Nickel-plated brass. Red or black phenolic caps.

#9795-13 — with stem and dowel.

#6692 — without stem or dowel.

#WB-8-CHA-1 — To Signal Corps spec. U 106/U. Watertight. Can also be produced to MIL-P55149/8.

#9766-176 — Miniature, watertight. Meets MIL-P-55149/7A spec. Max. dia. 0.40". High impact strength nylon plastic body.

TUBE SHIELDS

JAN Shield. Nickel-plated brass shield with securing spring. To JAN-S28A. "J" slot locks on shield base socket. Also in cadmium-plated steel. Snap-on shield for split-saddle socket available.

JAN TS NO.	EBY NO.	HEAT SHIELD NO.
102U01	9700-14	9700-60
102U02	9701-20	9701-59
102U03	9702-11	9702-53
103U01	9703-14	9703-54
103U02	9704-14	9704-58
103U03	9710-10	9710-34

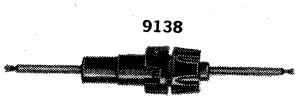
TRANSISTOR SOCKETS

Designed for JEDEC series transistors. One-piece integral saddle design. Speedy assembly with rivets or #2 screws. Contacts are silver-plated beryllium copper with gold flash. Mica-filled phenolic sockets meet MIL-M-14 MFE specs.

POWER TRANSISTOR SOCKET

For to -3 power transistors. Special design permits **complete** electrical isolation of base connection. 1-piece molded construction of high impact Bakelite.

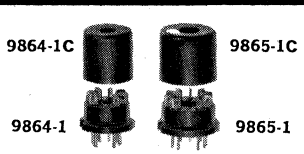
FUSE HOLDER



Heavy-duty Holder. Housing, #9138. Cap, #9137. Solder or crimp-type contacts. General purpose phenolic.

Springs according to type of fuse. Assembled or unassembled. Can also be supplied in thermoplastic nylon.

ADAPTORS



Converts any 7 or 9-Pin miniature socket into a connector. Brass cadmium contacts, mica-filled or general purpose phenolic.

7-Pin Socket, #9864-1
Cap, #9864-1C

9-Pin-Socket, #9865-1
Cap, #9865-1C

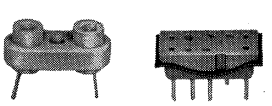
TIP JACKS

Metal Jack, #9768-17. Phosphor-bronze contacts. Nylon insulator in wide range of colors.

Molded Jack, #7115. Red or black general purpose.

Metal Jack, #9768-13. Brass body. Phosphor-bronze contacts. Cap in red or black phenolic. Locking nut and insulation washer available.

SOCKETS



Crystal Socket (TS0205C01), #9748-1. Glazed Steatite per JAN-1-10. Meets MIL-S-12883A. Contacts: phosphor-bronze or beryllium copper, silver-plated. Also available in black general purpose and mica-filled low loss.

8-Pin Subminiature Relay Socket, #9866-12.

EARNED LEADERSHIP IN THE ELECTRONICS INDUSTRY THROUGH RELIABLE, QUALITY PRODUCTS

RELY ON THE RELIABLES BY RELYING ON . . . ELCO™ CORPORATION
Main Plant and Offices: Willow Grove, Pa. 19090 • 215-659-7000; TWX 510-665-5573

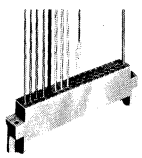
PRINTED CIRCUIT CARD CONNECTORS

Elco is the largest manufacturer of connectors for printed circuit cards. This fact enables us to offer the most versatile line on the market. We manufacture two basic types of connectors for printed circuit cards; the card-edge type of receptacle which mates directly with the printed circuit pad and the plug and receptacle combination. These two basic types are subdivided into many sizes and shapes too numerous to elaborate on within this representative product line brochure. However, through the use of photographs and brief descriptions below, we hope you will get a general idea of our immense product line.

FOR COMPLETE DATA, REQUEST OUR PRINTED CIRCUIT CONNECTOR CATALOG — PC967

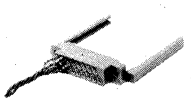
PLUG AND RECEPTACLE TYPES

Our plug and receptacle type utilizes the VARICON™ contact which is a hermaphroditic fork contact and is the prime reason for our leadership in the printed circuit connector field. We feel (and presumably others must be agreeing) that the VARICON™ method provides the most reliable pluggable connection. It excels in all of the prime considerations: contact resistance, ability to withstand excessive shock, is gas tight, and it isn't necessary to place critical tolerances on the p.c. card thickness.



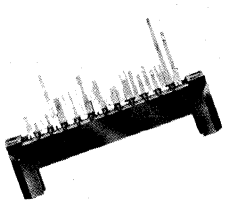
WIRE CRIMP RECEPTACLES

Through the use of hand pliers or high speed machines, wire is crimped to the contact which can then be inserted, by hand, into the insulators. Options include these types: with or without card guides, for p.c. circuit pads on .100″ or .200″ centers, for 1/16″ or 3/32″ thick p.c. card and numerous standard sizes.



SERIES #53 TAPER PIN RECEPTACLE

Each contact within the receptacle accepts two Series #53 taper pin tipped wires. There are various sizes available with or without card guides. P.C. card must be 1/16″ thick with circuit pads on .100″ centers.



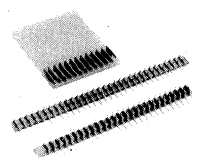
OTHER WIRE TERMINATIONS:

- WIRE WRAPPING POSTS
- SOLDER POSTS
- THREE WIRE SOLDER POST
- .078″ TAPER TAB
- .110″ MALE TAB
- WIRE HOLE
- SLOTTED POST FOR BUS

All of the above wire terminations are available in a versatile line of p.c. card receptacles. There are types with or without card guide; for .100″, .156″ or .200″ grid p.c. cards; for 1/16″ or 3/32″ thick p.c. cards and numerous standard sizes.

PLUGS

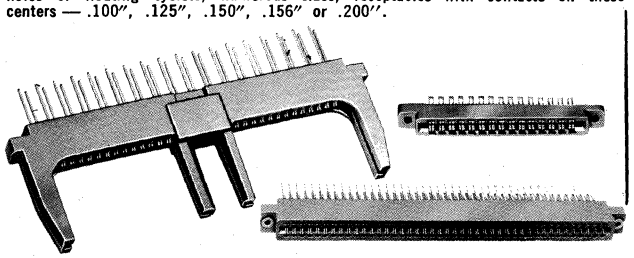
Two general types of plugs are available for the above receptacles. One type is where the contacts are fastened directly to the p.c. card. The contacts require no insulator and are supplied imbedded in plastic strips to facilitate handling and mounting. All equipment required to fasten the contacts and to remove the plastic strip is available from Elco.



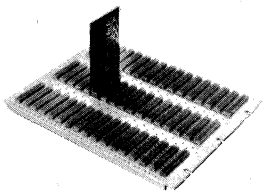
The second type of plug is a one piece molding with contacts bonded in place. The plug is fastened to the edge of the p.c. card. The options are: plugs for p.c. pads on .100″, .156″ or .200″ centers; plugs for 1/16″ or 3/32″ thick p.c. cards; plugs with or without guide pins; and plugs with or without end mounting holes.

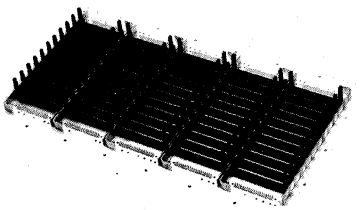
DIRECT CARD EDGE RECEPTACLES

A card edge type of receptacle mates directly with the p.c. card eliminating the need for a plug. Here again we can offer a wide variety of terminations including wire wrapping posts, wire hole, .078″ taper tab and solder post. Other options include: receptacles with or without card guides; receptacles with mounting holes or floating eyelets; numerous sizes; receptacles with contacts on these centers — .100″, .125″, .150″, .156″ or .200″.



METAL PLATE CONNECTION SYSTEMS





An outgrowth of the general p.c. card connector line is the metal plate interconnecting systems used in today's calculating equipment. A metal plate connection system consists of a sub-assembly of contacts housed within individual insulators which are interference fit into an aluminum plate. The birth of this line is due to the flexibility in arrangement, number and location of connector modules. Also, the size and shape of the plate can be varied to suit individual requirements; the plate can be terminated as a unit (using hand tools or programmed automatic equipment), completely checked out and then installed into the equipment. Elco has a wide selection of standard parts which we can custom assemble to your particular needs.

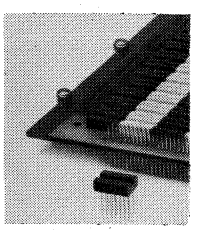
FOR COMPLETE DATA, REQUEST VARIPLATE CATALOG MP967

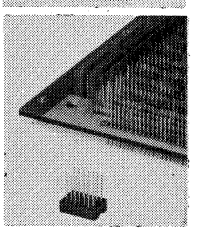
MICROELECTRONIC CONNECTORS

We manufacture a complete line of connectors suited for densely packaged microcircuits and we also have our own packaging systems.

DUAL IN-LINE PACKAGE (DIP) RECEPTACLES

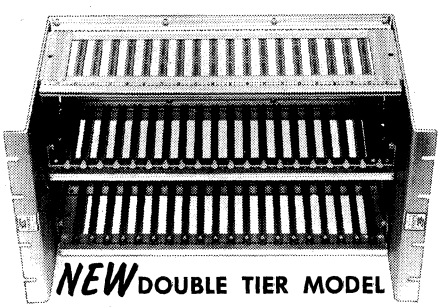
SERIES 8358 offers low profile, high density, low price, reliability, immediate delivery. Wire wrap/printed circuit contacts provide positive wiping action and redundant contact points with DIP leads for greater reliability and low resistance. Chamfered hole edges on the insulator facilitate DIP insertion; and the holes' closed entry configuration prevent contact damage. Receptacles are available individually for printed circuit card applications, or factory installed on plates whose size and shape you determine. Plates can also be equipped with wire wrap grounding terminals located under the receptacles. Offers universal application for all currently available 14 lead DIP's with flat or round leads in standard DIP grid. Wrappable or solderable. For small runs or large. Off-the-shelf delivery from our Distributors or factory.





FOR COMPLETE DATA, REQUEST ENGINEERING FLYER 61

PRINTED CIRCUIT CARD ENCLOSURES



Two models are available; a single tier model and a double tier model. Each model is made in 16 standard sizes, making it possible to package all average size p.c. cards. A maximum density of 41 p.c. cards on .400″ centers is possible within each tier. Other features include snap-in card guides and hinged front panels. Our p.c. card enclosures are made of heavy duty aluminum with a clear chromate finish. A gold chromate or clear anodize finish per MIL Spec. can be supplied.

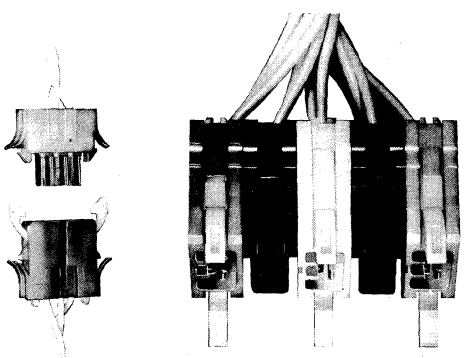
APPLIANCE CONNECTORS U.L. & C.S.A. APPROVED

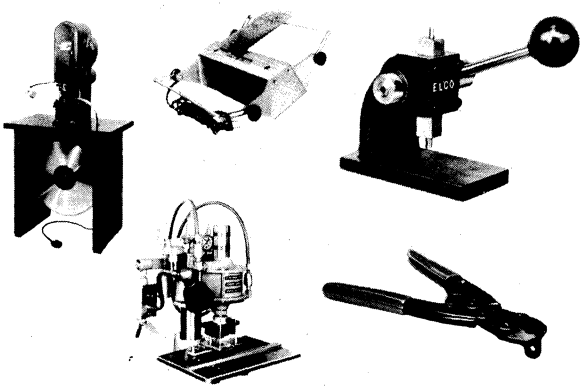


The APCON™ is a three contact connector designed for appliance type equipment having internal power connection requirements.

Features:
- Crimp and insert contacts.
- Will mount in panels without the need for hardware.
- Dove tail configuration on insulators permits modular buildup.
- Insulator's configuration eliminates the possibility of mis-mating.

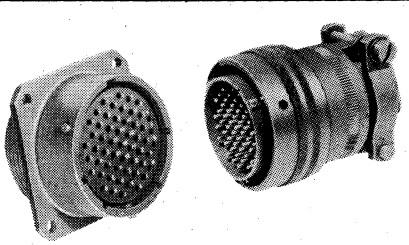
FOR COMPLETE DATA, REQUEST CATALOG RP167

INSTALLATION EQUIPMENT



We can supply all of the necessary equipment to install our connectors; from small bench stakers to large production staking machines; from the hand crimping pliers to crimping machines; contact inserters and extractors. Specially designed equipment for each product.

ELCO Cylindrical Connectors



Now Available with Crimp Terminations

Precision cylindrical connectors for anyone who designs, specifies or purchases for the government or equally rigid commercial manufacturing. This line covers the entire spectrum of audio and power connectors, from 4 to 30 contacts, and includes connectors conforming to MIL-C-26482 and MIL-C-26500.

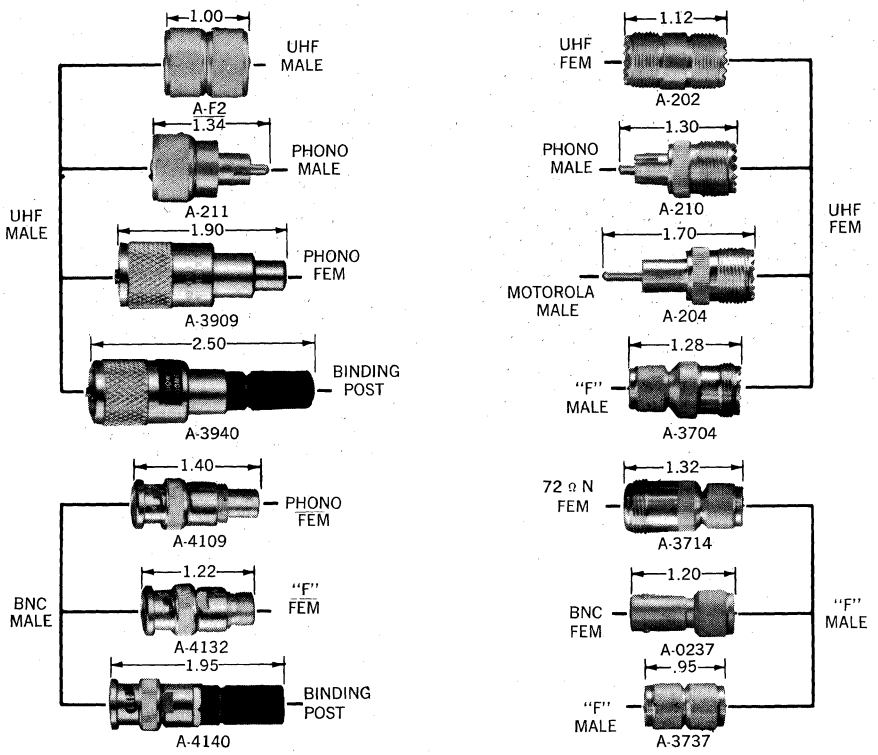
RF ADAPTERS

Listed at right is a selection of unusual coaxial adapters that are frequently required in test setups. It includes phono type connectors, Motorola antenna connectors, CATV Type "F" connectors, etc. to standard UG and UHF type connectors. Also included is a listing of specialized receptacles, many of which are used on Dow-key coaxial switches.

ADAPTERS



RF CONNECTORS

NOTES:

(1) Mounts through a 5/8 hole, 1/8 max. panel thickness.

(2) Mounts into a 5/8-24 tapped hole or through a 5/8 hole, 1/8 max. panel thickness.

(3) Standard 1" square flange with four 4-40 tapped holes, polypropylene insulation.

(4) Mounts into a 7/16-28 tapped hole or through a 7/16 hole with a 1/16 max. panel thickness.

(5) Mounts into a 7/16-28 tapped hole or through a 7/16 hole with a 1/16 max. panel thickness, and has clamp parts for RG-58/U or equivalent cables. It has a rigid solder terminal for fastening the cable center conductor to other components.

(6) Similar to C-60P except Teflon insulation and better impedance match.

(7) Mounts through a 3/8 hole, 1/8 max. panel thickness.

NURL-LOC DESIGN – TERMINALS AND TEST JACKS

Electronic Molding offers the largest variety of molded insulated terminals and test jacks available anywhere. The metal inserts are molded into high-temperature Diallyl Phthalate, (500°F) forming a strong integral unit that will not crack while soldering. The metal to metal Nurl-Loc press-in feature (shown left) assures highest radial and axial pullout resistance of any terminal of this type. Ten colors are available, in a wide range of types for various applications, many designed to meet military specifications, plus mounting tools.

GC ELECTROCRAFT COMPONENTS

QUALITY PRODUCTS

Designed, Engineered and Manufactured by our company with over 30 years of experience in the Electronics Industry, our Electrocraft Components meet the most exacting standards. Government approved quality control and inspection assure matching of the most rigid specifications.

RESEARCH and DEVELOPMENT

Our complete facilities and highly trained and skilled personnel enable us to develop and manufacture the ultimate in precision component parts. Our staff and equipment allows us to produce specifically designed or specially modified products. New products are developed and introduced regularly.

GOVERNMENT SPECIFICATIONS and FEDERAL STOCK NOS.

Quality and reliability of GC Electrocraft Products has given us the opportunity to serve the US Government. We regularly supply hundreds of items to Federal Stock Numbers. Scientific engineering allows us to meet the most exacting specifications regardless of material used, tolerances to be met, finish or plating to be applied.

MANUFACTURING FACILITIES

Three plants with over 400,000 square feet of floor space, the latest in manufacturing machinery, skillful and highly trained personnel with years of experience provide for you the finest in manufacturing capability. The combination of these features plus our abilities to save production and delivery time, yet provide economy, makes GC Electronics an industry leader.

EXACT SPECIFICATIONS

NEARLY ALL ELECTROCRAFT COMPONENTS ARE MANUFACTURED TO GOVERNMENT MATERIAL PRODUCT SPECIFICATIONS.

Each and every item produced by GC Electrocraft must meet every criterion that results in a product manufactured exactly to specification. Quality control and inspection assure that you can depend on your Electrocraft components.

PRODUCT DIVERSIFICATION

In keeping with our physical size, our product line, too, is large and manifold. Over 10,000 electronic products are manufactured in our plant facilities. Electronic chemicals, hardware, tools, service aids, test equipment, antennas, phono drives, chassis punches, and audio accessories are only a few of the products numbered in our product line.

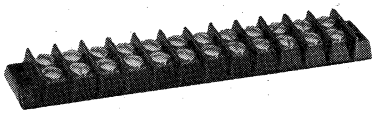
TERMINAL BOARDS

CR151 TYPE D ONE-PIECE BOARDS

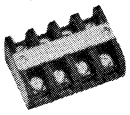


Eight terminal types.
Three board width — 7/8 in., 1 1/8 in., 1 5/16 in.

Boards rated 15, 20, and 30 amperes with breakdown voltages of 3600, 4800, and 7500 volts, respectively.
15-amp boards available in increments of 1 through 36 points; 20-amp boards in 1 through 30 points; 30-amp boards in 1-24 points.
Terminals on 15-amp boards accept through size #14 wire; 20-amp boards through size #12 wire; 30-amp boards through size #10 wire.
Choice of marked or unmarked boards or six types of marking strips.

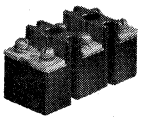
Write for Bulletin GEA-7317

CR151 TYPE B ONE-PIECE BOARDS



Rated 30-amperes, 600-volts for control circuits.
Available with 4-, 6-, and 12-points.
Screw, captive saddle-clamp, or screw terminals on one side, clamp terminals on the other.
Terminals accept wires through size #10.
Write-on marking strips, 15/32-in. wide, provided with boards.

CR2960 ONE-PIECE BOARDS



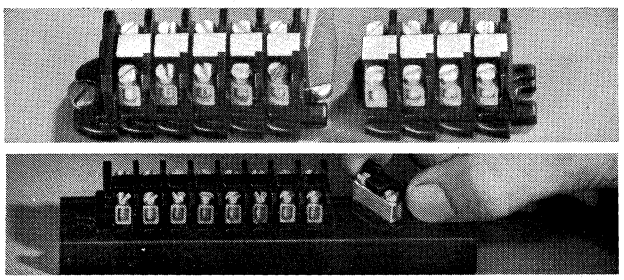
Control circuit boards rated 20-amperes at 600-volts; available with 4- and 6-points.

Power circuit boards rated 50-, 100-, and 150-amperes at 600-volts; available with 3 points per board.

All types have screw terminals.

Terminals accept wires through #8.

CR151 TYPE C SECTIONAL BOARDS

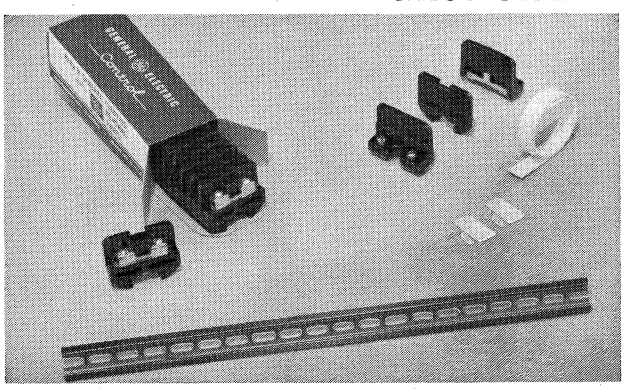


Can be mounted directly on panel (top) or in a channel (bottom) which is then mounted on panel.

Small CR151 Type C terminal boards provide two-way mounting and assembly flexibility. When the board has been assembled, you can mount it directly on a panel or you can assemble blocks in molded channels on applications where maximum flexibility is required. Blocks can be added after initial installation to meet increased requirements in control circuits.

These terminal boards can be ordered in three ways: 1) as individual blocks, 2) as factory-assembled blocks without channel, 3) as factory-assembled blocks in mounting channel based on specification.
Complete line of components for customer assembly.
Choice of three 25-amp terminal types and two 50-amp terminal types.
Both boards meet IEEE switchgear standards for 750 volts.
Screw terminals accept 5/16 in. ring or spade connectors, #22 - #12 wire.
25-amp box terminals accept #18 - #8 wire; 50-amp box terminals accept #10 - #4 wire.
25-amp box clamp terminals accept #22 - #10 wire; 50-amp clamp box terminals #14 - #4 wire.
Interlocking construction . . . blocks slide together.
25-amp blocks are 1 in. high, 1 1/8 in. wide; 50-amp blocks are 1 7/16 in. high, 1 1/2 in. wide.
Easy addition of blocks provides expansion flexibility.
Panel or channel mounting.
Factory-assembled forms for direct mounting in 2 through 12 point sections for 25-amp forms and 2 through 6 for 50-amp forms; for channel mounting, 2 through 99 points.
Choice of painted surface or separate marking strip.

CR151 TYPE A SECTIONAL BOARDS

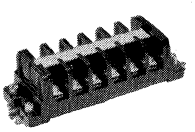


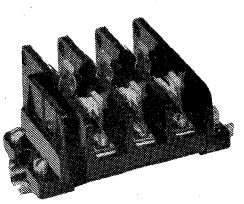
Components for customer assembly

From three basic components, you can build custom boards to meet most terminal board requirements:
- Mounting track — in lengths from 3 1/2 to 48 inches.
- Terminal blocks — ten types are available.
- Mounting assembly kit — contains two end blocks, one standard size barrier, two nylon guide inserts, and one 16-inch marking strip.

Additional blocks or blocks with different terminals can be added to existing boards.
Ten types of terminal blocks available.
Blocks rated 25-, 50-, 125-amperes.
30-amp fuse blocks, 15-amp isolating switch blocks offered.
25-amp forms accept #16 through #10 wire; 50-amp forms accept #14 through #4 wire; 125-amp forms accept #14 through #0 wire.
Adaptor kit available for installing overload relays.
Fanning strip accessory holds wires for fast, easy connection.
Marking strip can be marked with pencil or ink; can be cut to any length required.

Factory-assembled boards

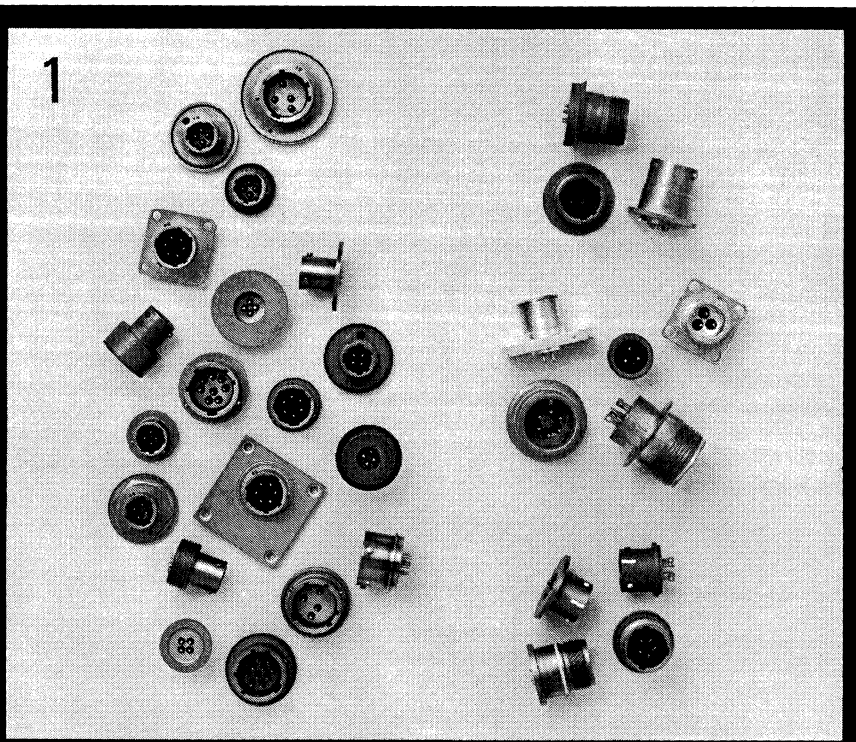




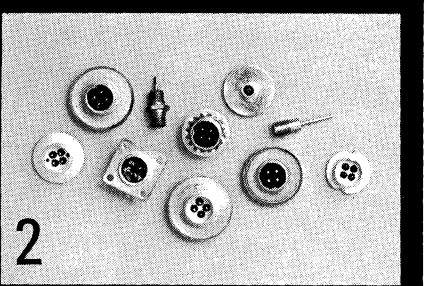
74 standard factory-assembled boards with two through 36 points are available to meet most applications. All terminals on any one board are of the same type, and all boards are complete with marking strip ready for panel mounting.

For complete information contact nearest GE Sales Office listed on inside front cover, or write to General Electric Co., Section 998-50, Schenectady, N. Y. 12305.

GENERAL ELECTRIC



Glass to Metal Hermetically Sealed Connectors Headers and Feed-Thru terminals



The Glass Technology division of GULTON INDUSTRIES offers a broad line of connectors, headers and feed-thru terminals for both commercial and aerospace applications. Geared for specials as well as standards, basic designs are available with stainless or cold rolled steel shells; weld, solder, box or flange mount styles; or in custom configurations to meet individual requirements.

Typical Specifications:

Leak rate: 1.2×10^{-10}cc Helium/sec.
Vibration: 0-2,000 cps @ 100 g's rms
Operating range: −420°F to +600°F
Pressure range: to 40,000 psi
Insulation resistance: 1×10^{12} ohms @ 300°F

1. Hermetically sealed NAS and MIL type connectors
2. Sub-miniature hermetically sealed connectors
3. Low silhouette and double-start threaded hermetically sealed connectors
4. Hermetically sealed headers
5. Single and multi-pin feed-thru terminals

The thinking man's filter.

We make filter pin connectors in both rectangular and circular subminiatures. Nobody else does it our way. Nobody else guarantees a 100,000 to 1 reduction of RF energy. Think about that.

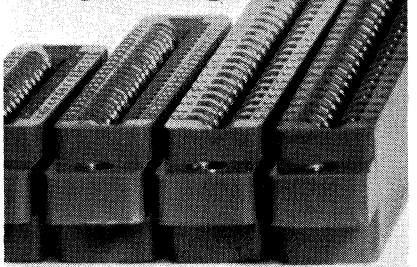
HUGHES
HUGHES AIRCRAFT COMPANY
CONNECTING DEVICES

We're getting to be known as rounders.

We invented the BULLS-EYE Connector and created a reputation as circular subminiature specialists. Goes to show you what a little concentration can do. (Like 102 contacts in a #18 shell.)

HUGHES
HUGHES AIRCRAFT COMPANY
CONNECTING DEVICES

We've got your number.



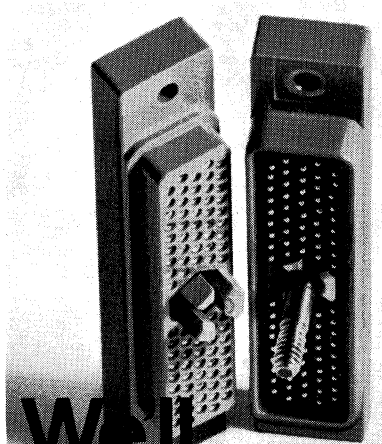
Show us a spec, and we'll show you miniature and subminiature printed circuit connectors in 10 sizes with 10 to 96 contacts. We're good at the numbers game.

HUGHES
HUGHES AIRCRAFT COMPANY
CONNECTING DEVICES

We bend over backwards.

Contour Cable™ happened here first. Flexible etched flat cable. Flexible flat continuous cable. Custom cable/harness assemblies. Flexibility is a thing with us.

HUGHES
HUGHES AIRCRAFT COMPANY
CONNECTING DEVICES



We'll save your space.

The way we make subminiatures, they're more subminiature. More fully packed. Same contact size and spacing, only we get 110 contacts to the inch. Socket to 'em!

HUGHES
HUGHES AIRCRAFT COMPANY
CONNECTING DEVICES

The do-it-yourself connector kit.

With our Universal Connectors, you decide what goes where. The crimp removable contacts are interchangeable in either body. The big difference at Hughes is the positive way they get together. The PolarHex way.

CONNECTING DEVICES

ITT Cannon Connector Guide

This Guide is designed to help you select the proper connector series and the appropriate catalog from which to specify your connector. Below is a suggested method of selection:

INSTRUCTIONS

1. Determine your basic application requirement:
   (a) Rectangular Rack/Panel
   (b) Circular
   (c) Microminiature
   (d) Special Application Connectors

   Go to one of these four headings in the chart. Below each heading are several blocks listing the various connector series. (If a MIL Spec connector is required, turn to the back side of this Guide for the applicable catalog.)
2. Determine the required number of circuits, wire or contact size, and contact termination (solder, crimp, welded, etc.). Check these requirements with the data on the right side (dark shaded area) of each block.
3. Next, select the desired connector size, shell style or coupling method, on the left side (light shaded area) of each block.
4. Check the legend at the bottom of chart to see if environmental (symbols □ or ■) or hermetic (symbol •) requirements are satisfied.
5. Refer to the proper catalog for detailed product data and ordering information.

NOTE: For information on connectors not included in the chart, consult factory.

NAS1599

This industry (National Aerospace Standards) specification covers threaded and bayonet coupling type, miniature circular connectors. These high performance, environment-resistant connectors use crimp removable contacts inserted, released and extracted from the termination side. Threaded connectors (KV) mate with MIL-C-26500 types; bayonet connectors (PV) mate with MIL-C-26482 types. Both connectors use NAS1600 contacts and closed-entry socket insulators.

See KV/PV Catalog

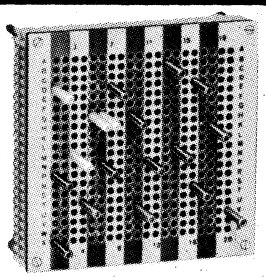
3208 HUMBOLDT ST., LOS ANGELES, CALIF. 90031
A DIVISION OF INTERNATIONAL TELEPHONE AND TELEGRAPH CORPORATION
CANNON® PLUGS

Program Boards • Data Modules • Custom Panels

MATRIX BOARDS

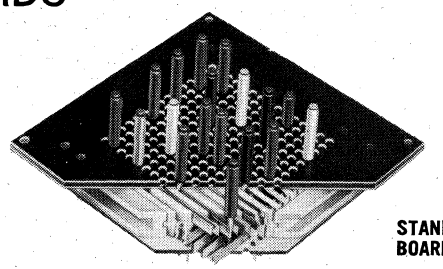


MINIATURE BOARD

Pin Spacing: .125" Nominal
Standard Configuration: 20 x 20

Accessories:
- Diode plugs
- Shorting pins
- Colored pins and plugs

Optional Features:
- Special marking and sizes
- Thumbwheel switches
- Data modules



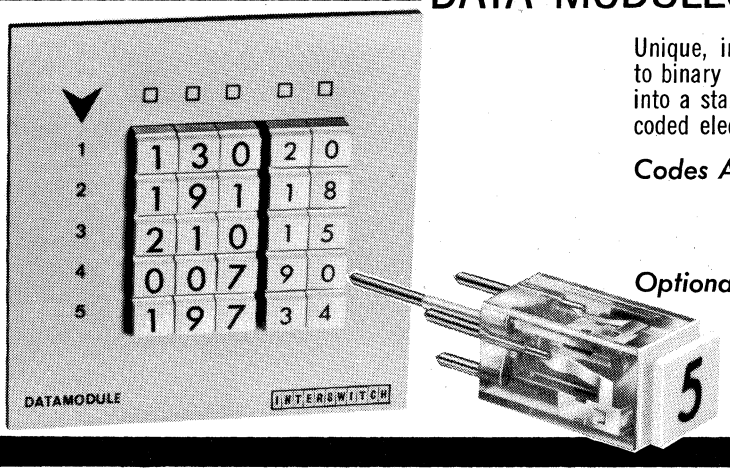
STANDARD BOARD

Pin Spacing: .250" Nominal
Standard Configuration: 10 x 10

Accessories:
- Diode pins • Dummy plugs
- Shorting pins • Lighted plugs
- Colored pins and plugs

Optional Features:
- Special marking and sizes
- Thumbwheel switches

DATA MODULES

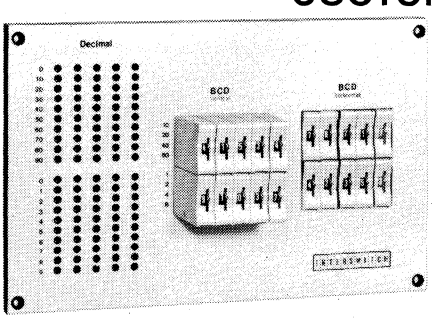


Unique, inexpensive programming plugs allow decimal to binary coding by simple insertion of the number keys into a standard base switch body which delivers binary coded electrical outputs.

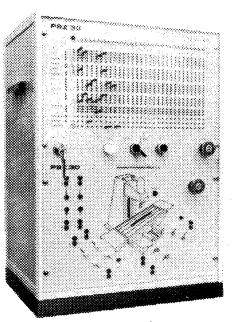
Codes Available:
- 1-2-4-8 (BCD)
- Excess Three
- 1-2-4-2 Aiken

Optional Features:
- Colored keys and characters
- Horizontal or vertical reading characters
- Modules adaptable for printed circuit boards or INTERSWITCH miniature matrix boards

CUSTOM PANELS



Combination matrix board and thumbwheel switch programming board.



Machine tool programming panel.

Custom Boards: INTERSWITCH can provide complete programming panels consisting of plug-in matrix boards in combination with data modules, thumbwheel switches, and miniature lamps completely imprinted to meet your specific requirements. Matrix boards integrated into the panel itself provide a smooth and neat appearance by eliminating mechanical attachment of the matrix board to the panel.

INTERSWITCH

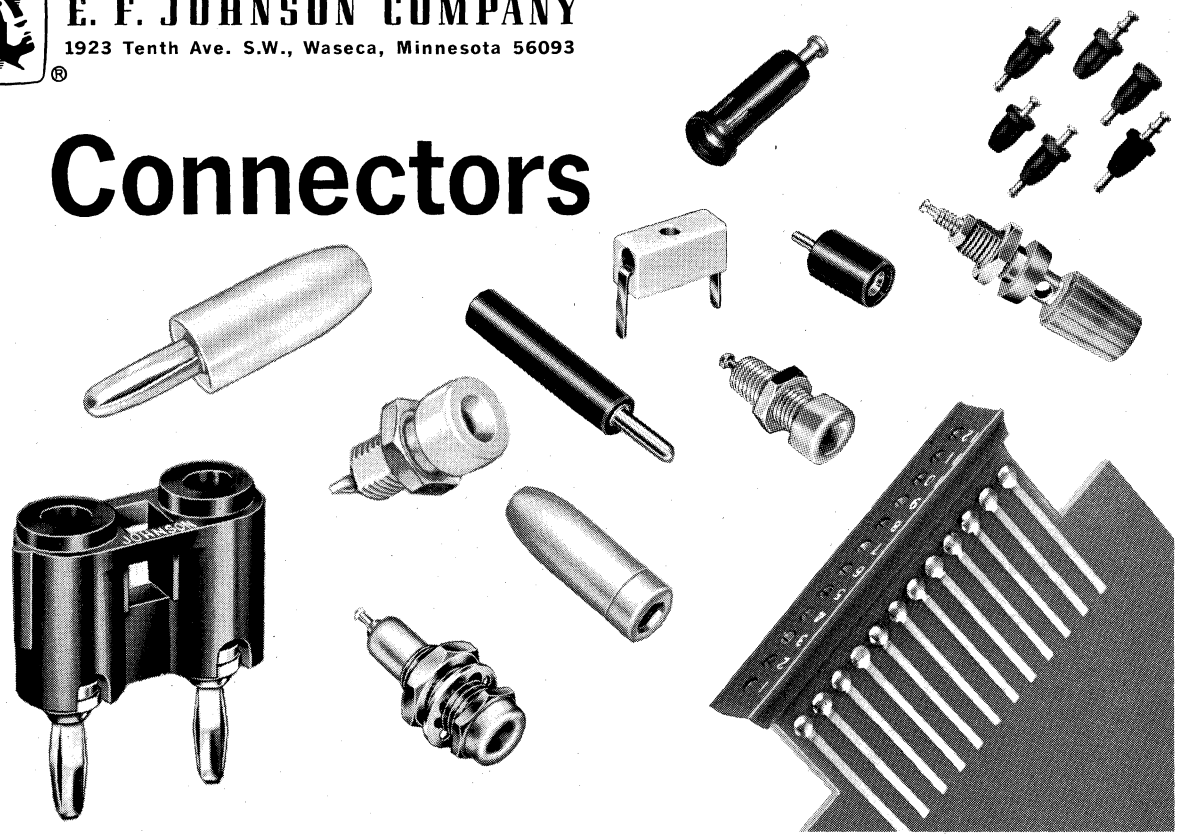
E. F. JOHNSON COMPANY
1923 Tenth Ave. S.W., Waseca, Minnesota 56093

Connectors



Sub-miniature, standard types

Whatever the choice . . . sub-miniature connectors for printed circuit use—or Johnson's patented "Six-Way" Binding Posts . . . time and time again design and development engineers specify Johnson connectors!

A complete line of polyamide insulated connectors are readily available to meet most military and commercial applications—included are: sub-miniatures for printed circuit applications; insulated solderless tip and banana plugs; tip and banana jacks; tip jack and sleeve assemblies; metal-clad and "rapid-mount" tip jacks; dual banana plugs and "6-way" binding posts. Available in 6 colors for coded applications, designed to operate throughout an extremely wide temperature range and under conditions of high relative humidity—voltage breakdowns available up to 11,000 volts on some types! For detailed information on the complete Johnson connector line and other Johnsor electronic components—write today for our newest components catalog!

SUB-MINIATURE INSULATED CONNECTORS—Designed for printed circuit applications! Extremely compact, body is tough low-loss polyamide—resists extremes of shock, vibration, temperature and moisture. Operating voltages to 1500 volts RMS . . . 5 amperes current carrying capacity . . . contact resistance; less than 2 milliohms. Capacitance between two adjacent jacks: less than one pf. at 1 MC. 10 colors available. **Horizontal Jack**—Unique design accepts .080" diameter tip plug in either end or from top or bottom. **Vertical Jack**—Mounts through single .052" hole, requires minimum mounting area. **Sub-Miniature Tip Plug**—For use with miniature jack, .080" dia. with machined brass tip and solder lead connection. **"RIB-LOC" Terminal Design**—Single or double turret stand-offs and feed-thrus, tip jacks and tip plugs. Mount securely in .136" hole. MIL-P-20693 insulation. **New RIB-LOC tip jack**—Press-in installation. Accepts .080" tip plug in recessed, closed-entry type contact. Rated 10 amps with 8000 VDC breakdown. **Test-Point Strip/Handle**—Rapid-mounting polyamide body contains 12 test points each rated at 5 amps., maximum current capacity. Operating voltage 1500 volts RMS at seal level, 350 volts RMS at 50,000 feet. Contact resistance less than 2 milliohms.

STANDARD INSULATED CONNECTORS—A complete line of connectors molded of tough, low-loss, shock-proof polyamide in 10 colors meeting Fed. Std. 595—won't chip or crack with the hardest usage. **Tip, Banana and Dual Banana Plugs**—Metal parts nickel-plated—solderless connection up to 16 gauge wire. Current rating: 10 and 15 amps., respectively. **Tip and Banana Jacks**—molded bodies, current rating: 10 and 15 amps., respectively. Available in six types: **Standard Tip Jack**—Recessed cadmium-plated formed contact. Voltage breakdown: 9,000 volts DC; **Deluxe Tip Jack**—Recessed silver-plated machined contact. Voltage breakdown: 11,000 volts DC; **Rapid-Mount Tip Jack**—Low cost fast mounting. "Speed clip" snaps into hole, then jack is inserted. Voltage breakdown: 7,000 volts DC; **Standard Metal-clad Jack**—Nickel-plated jacket, formed silver-plated contact. Voltage breakdown: 7,000 volts DC; **Metal-Clad Tip Jack, Military**—Nickel-plated jacket, machined gold-plated beryllium copper contact. Voltage breakdown: 8,000 volts DC; **Banana Jack**—Recessed cadmium-plated insert for .175" plugs. Voltage breakdown: 12,500 volts DC. **Jack and Sleeve**—Ideal for patch cords, or insulated rear connection of panel-mounted tip jack. **Binding Posts**—Versatile "6-way" usage. Silver-plated shank, self-captivated thumb nut. Voltage breakdown: 7,000 volts DC. Current ratings: 15 and 40 amps., respectively.

KINGS

K-GRIP JR.™ CONNECTORS

Almost 50% smaller, 50% lighter, K-Grip Jr. is the design answer to better RF connectors. A three-piece configuration, it is a crimp-type version of Kings standard RF connector reduced to its simplest form.

FEATURES:

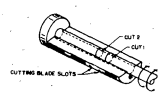
- Superior Strength . . . pull-out resistance unequalled by any other crimp-type connector in the industry.
- Uniform, Rapid Handling . . . connector-to-cable attachment reduced to a minimum — with exacting uniformity from unit to unit.
- Foolproof Assembly . . . Snug-fit design requires no highly skilled personnel.
- Broad Application Capability — Available in all standard connector types for RG-174 through RG-214.

Kings K-Grip Jr. Connectors are available in two tarnish-resistant finishes — a TR-4™, used over silver plating; or the TR-5™, a more durable, brilliant alloy finish.

CABLE RETENTION METHOD

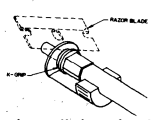
The K-Grip Jr. cabling procedure is as follows — After the braid has been trimmed, the K-Grip is inserted between the dielectric and braid. The K-Grip sleeve is slid over the braid and crimped in place. K-Grip, thus eliminates the time consuming braid combing operation and results in a stronger connection.
For precise easy cable trimming, the use of Kings jacket and dielectric trim jigs is recommended.

JACKET TRIM—JIG (KTJ) CP-200A & CP-400 (Patent Pending)



Used for making cuts 1 and 2 in the cabling procedure.

DIELECTRIC TRIM—JIG (KTD) CP-200A (Patent Pending)



Used for trimming dielectric in the cabling procedure.

HAND CRIMP TOOL . . . KTH-1000

With removable dies — accommodates all die sizes.

Crimping of contacts and K-Grip Jr.™ may be easily and reliably accomplished by the use of Kings special crimping tools.

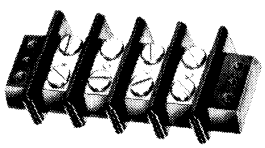
Kulka TERMINAL BOARDS

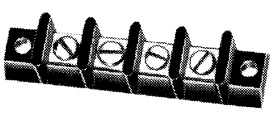
STANDARD

410, 600, 600A, 601, 602 Series. Current range 5 thru 30 Amps; Voltage Range 1000 thru; 600 RMS; Wire sizes 20-14 Ga.; 1 thru 26 Terminals.



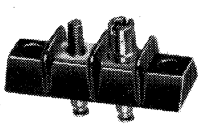
HEAVY DUTY

603, 604, 605 Series, Current range 50 thru 90 Amps, Voltage 1700 thru 2100 RMS; Wire Sizes #6 to 2 ga.; 1 thru 12 terminals.



SINGLE ROW

599, 699, 812 Series. Current range 15 thru 30 Amps; Voltage range 1100 thru 1600 RMS; Wire sizes: #22 to #12 ga.; 1 thru 23 terminals.

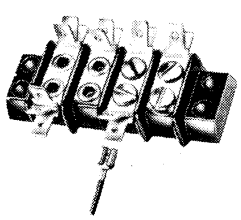


STUD and TURRET

For greater wiring convenience. Choice of terminals:

- Regular Screw Type
- Solder Turret • Feedthru
- Threaded Stud, etc.

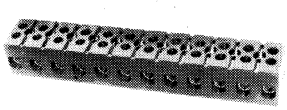
Also, choice of finishes: electro-tinned, silver-plated, even gold over silver. Our design facilities are available for your special requirements.



"KLIPTITE"

For fast connect and disconnect. Available on Kulka's full line of terminal boards.

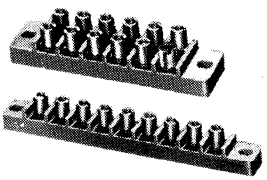
- Just clip on wire terminal fast for tight connection.
- Up to 6 connections per stage.
- Vari-angled tabs.
- Available rivetted to terminal hardware or with screw assembly.



PRESSURE CONTACT

9-85 SERIES

Ideal for power equipment. One-piece molded plastic for industrial or military use. Extra-safe, completely enclosed. 2 to 12 terminals. Rated at 85 Amps, 8000 Volts.

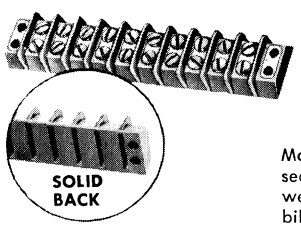


MILITARY BOARDS

Per MIL-T-16784B

Designed by the Bureau of Ships according to MIL-T-16784B, superseding MIL-T-16784A (Ships). They are made to BUSHIPS 9000-S6505-73214 drawings, with the latest revisions, and BUORD S64101.

MOLDED MATERIAL: MAI-60, in accordance with MIL-M-14F.



MILITARY BOARDS

SOLID BACK

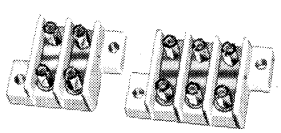
MADE to MEET or EXCEED

MIL-T-55164

Molded-in Terminals. Equal molded sections. Kulka improved design, for weight saving, greater strength, flexibility. All sizes available, classes 37TB thru 42TB.

CLOSED BACK TERMINAL BOARDS

670, 670A, 671, 672 Series. Current range 15 to 30 Amps, Voltage range 2500 to 3300 Volts RMS. Wire sizes #22 thru #12 ga.; 1 thru 30 terminals.

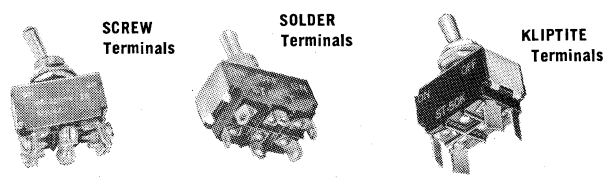


HIGH HEAT

1215 SERIES

For temperatures up to 850°. Made in two and three terminal units with incremental configuration. Stainless steel stud type terminals.

TOGGLE SWITCHES



Made to Military Specifications: JAN-S-23, MIL-S-21195, MIL-S-6745 and MIL-S-3950B. Available in SPST, SPDT, DPST and DPDT types. DA and AC up to 1600 cps. Your choice of terminals: Screw, solder or tab.

Also, MINIATURE, SUBMINIATURE, TAPER PIN, PRINTED CIRCUIT, WIRE-WRAP, SCREW CLAMP TERMINAL BOARDS AND ACCESSORIES. Available in a variety of Military and Commercial Grade materials.

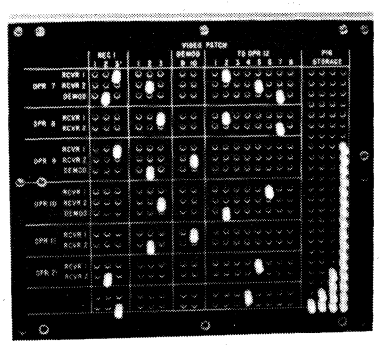
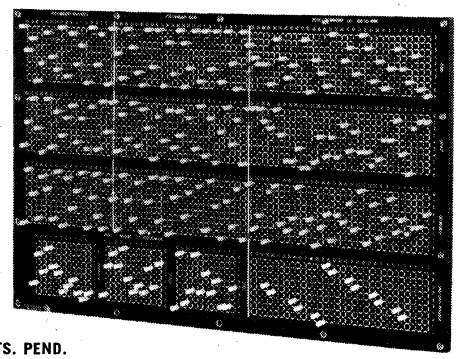
MATRIX PROGRAM BOARDS





U.S. & FOREIGN PATS. PEND.

CO-ORD Matrix Program Boards are composed of 2 to 6 decks of contacts that are bussed in parallel rows on .250 centers. The contact rows of one deck are usually oriented perpendicular to the rows of adjacent deck(s) so as to obtain switching crosspoints. Electrical connections of the bussed contact rows are effected by inserting shorting pins at the desired crosspoints; "CO-AX", phone plug type pins are available for networks which require component insertion (Diodes, resistors, etc.). Single board matricies of up to 11,000 crosspoints are available in standard or special arrangements. Bussed and isolated contacts can be had alone or in combination. Panels may be screened, engraved, or fitted with pre-punched templates for rapid program changing.

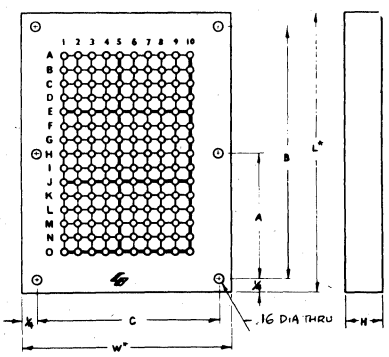
FEATURES

- Closed entry contacts
- High mechanical environment capacity for MIL applications
- Low interlead capacitance (cross-talk) for high frequency applications
- Attractive and uncluttered panel
- Compact package
- Standard sizes available off the shelf
- Permits insertion of components into network without soldering
- Wide variety of switching combinations available using standard hardware

APPLICATIONS

Computer memories
Cordless patch panels
Function generators (Analog/Digital)
Power distributors
Thermocouple signal selectors
Circuit/Component test programmers
Lighting systems (Special effects)
Variable sequence selectors
Variable diode matrices
Code generators
Traffic control panels
Decade switches
Vending machine control
Numeric controlled machinery
Data channeling & logging
Communications distributors

STANDARD MATRIX BOARDS — SERIES 63014



SPECIFICATIONS

1-Contact Resistance
a Total Pin Resistance: .004 OHM MAX.
b Volume Resistivity of Strip: .003 OHM/IN

2-Breakdown Voltage: 1000 VRMS MIN.

3-Current Capacity: 5 AMPS Continuous

4-Materials
a Plastic Parts: Black Phenolic XXX
b Flexible Contacts: Heat Treated Beryl. Copper
c Terminals: Brass
d Finishes: Gold, Silver or Nickel

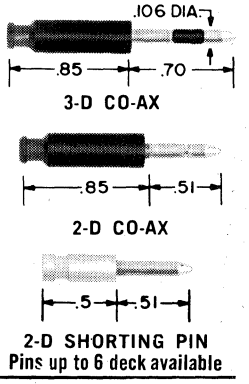
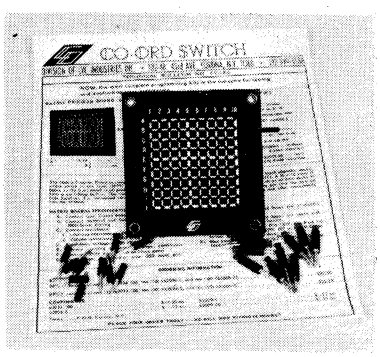
PROGRAM PINS



Pins up to 6 deck available

PROGRAM BOARD KITS



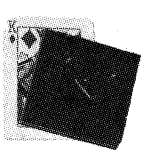
KIT BPS-1 consists of a 10 x 10 matrix board similar to #63014-1, above, 10 shorting pins and 10 "CO-AX" diode pins with 1N270's installed $27.00

KIT BPS-2 is the same as BPS-1 but without diodes $22.25

10 x 10 matrix board .....$17.00 ea.
Shorting pin ..... .12 ea.
Diode pin w/1N270 ..... .99 ea.
Diode pin w/o diode ..... .51 ea.

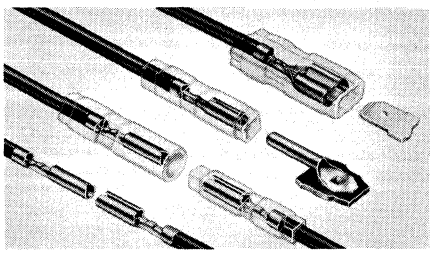
AVAILABLE FROM STOCK

1/10 INCH CENTERLINE MATRIX



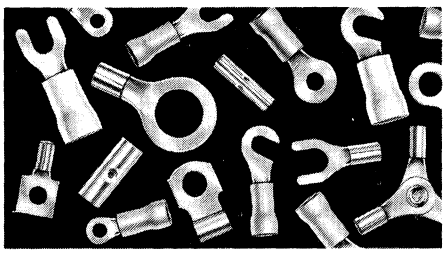
Offers a ½ reduction in both size and weight over standard matrices and can be made to meet any customer specifications. Ideal where space is critical.

ELECTRONIC TERMINALS AND CONNECTORS

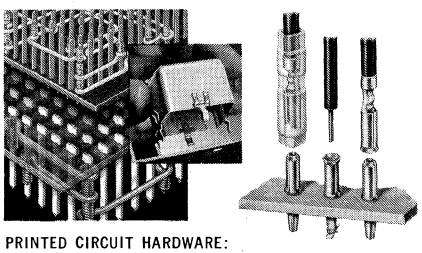


QUICK-CONNECT RECEPTACLES:
A large family of female receptacles for quick-connect male terminals supplied in chain style for automatic crimping. These terminals are available for round, square or rectangular male pins or blades. Terminals crimp to wires from 27-AWG to 16-AWG. REQUEST BULLETIN NO. 611.

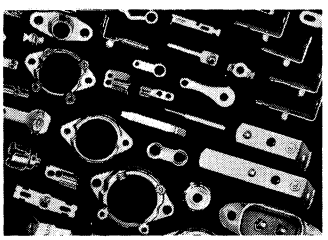
- **Terminals produced by high-speed production equipment insure highest quality at lowest prices.**
- **Chain style terminals may be applied by Malcomatic Machines for lowest possible assembly costs.**
- **Precision tooling and rigid quality control assure products that meet or exceed industry specifications—consistently.**
- **Most complete line of circuit hardware and small stampings available for Radio-TV, Electrical and Electronic, Communications, Automotive and Aviation Industries.**
- **Prompt delivery on over 2,000 different parts.**
- **Full staff of Malco engineers to solve customer application and design problems.**



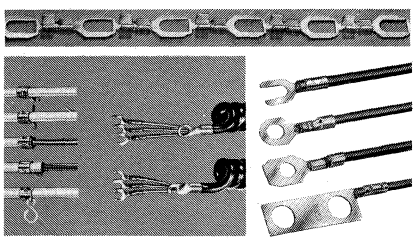
SOLDERLESS TERMINALS:
Broad range of sizes and types. Available insulated (straight or flared entry) or non-insulated. Made of pure soft copper with special internally serrated barrels for maximum crimp reliability. Full range from AWG 22 to AWG 10. REQUEST BULLETIN NO. 617.



PRINTED CIRCUIT HARDWARE:
Feed-Thru Terminals in chain style for automatic insertion in P. C. Cards. Available in a full range of sizes in "Wrap-A-Wire" or round pin styles. Interlock pin, "Wrap-A-Wire" and quick-connect tab lugs for edge-board or terminal strip applications. Spring clips for shielding cans. REQUEST BULLETIN No. 691.

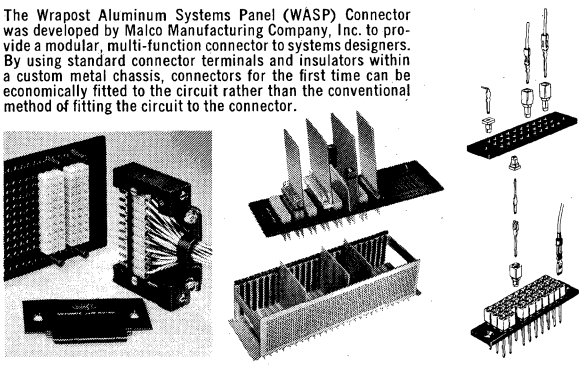


ELECTRONIC HARDWARE:
Socket and connector hardware, soldering and non-soldering terminals, quick-connect lugs. Phono plug and receptacle hardware, P. C. brackets and binding posts. REQUEST BULLETIN NO. 10.

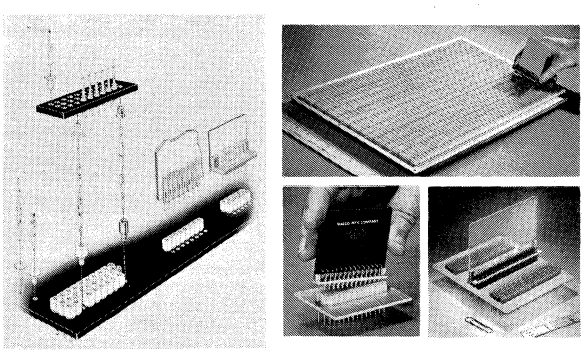


RING AND SPADE TERMINALS:
In chain style, applied by Malcomatic equipment. Available in a variety of sizes and types: hook, ring, spade, flag, either wire/insulation crimp or insulation-pierce crimp. Also, cord clamps for strain relief applications. REQUEST BULLETIN NO. 605.

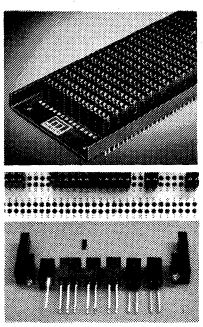
The Wrapost Aluminum Systems Panel (WASP) Connector was developed by Malco Manufacturing Company, Inc. to provide a modular, multi-function connector to systems designers. By using standard connector terminals and insulators within a custom metal chassis, connectors for the first time can be economically fitted to the circuit rather than the conventional method of fitting the circuit to the connector.

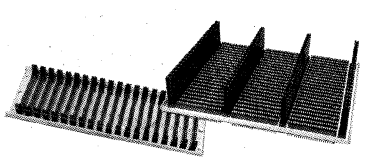


WASP—The "Wasp" Connector is a heavy duty blade/fork combination with .045" square wrap tails for automatic machine terminations. This line features the broadest range of connector terminal variations in the industry. Available in .125" thick aluminum plates up to 24"x 24" with terminals on .200" square or offset patterns. REQUEST BULLETIN NO. 631.

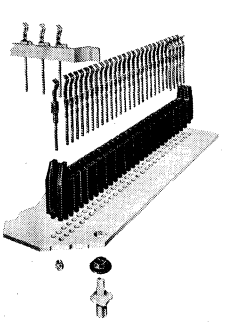


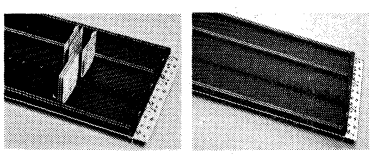
MINI-WASP—This line is a miniature version of the "Wasp" Connector. It is available in .080" aluminum plates on .100", .125" or .150" square or offset patterns. Terminals are high-reliability blade/fork type with .025" square wrap tails. The "Mini-Wasp" Connector Line features ground connectors as well as insulated connectors in the same manner as the "Wasp" line. Thus, the aluminum plate becomes a complete ground plane. REQUEST BULLETIN NO. 647.





CARDEC 200—The Cardec 200 Card Edge Plate Connector System is designed for direct entry P. C. card applications. The Cardec 200 version accepts 1/16" printed circuit cards with contacts on .200" centers with .045" square wrap tails. This connector system features the ground plane concept and modular construction of the "Wasp" Connector line while affording the economy of edge connector systems. REQUEST BULLETIN NO. 681.





CARDEC 125—Cardec 125 is a modular card edge connector system with contacts on .125" centers for maximum packaging density (.047" cards on solid .250" centers). In addition to the features of Cardec 200, this system offers printed circuit card voltage bus hardware for low resistance voltage distribution. As with all the Malco Plate Connector lines, Cardec 125 is supplied in your configuration completely assembled and ready for automatic wire-wrapping right out of the package. REQUEST BULLETIN NO. 681.

MALCO PRECISION ELECTRONIC TERMINALS AND CONNECTORS

MAC
O.E.M. DIVISION

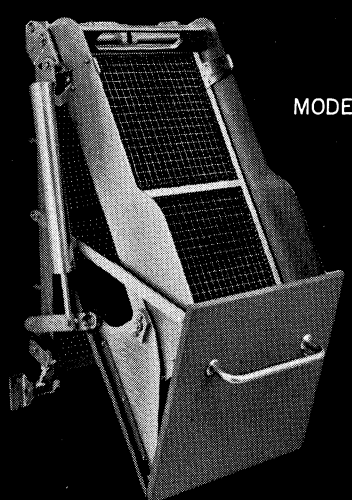
PLUGBOARD PROGRAMMING SYSTEMS

In addition to the specification detail which is included in our catalogs, you need only two pieces of information about MAC:

1. Our design engineers can suggest solutions to unique or unusual problems — solutions which are often variations on other solutions they've reached before.
2. We maintain a considerable inventory of our catalogued components, so most orders are shipped "off-the-shelf."

SERIES 157
PLUGBOARD PROGRAMMING SYSTEMS

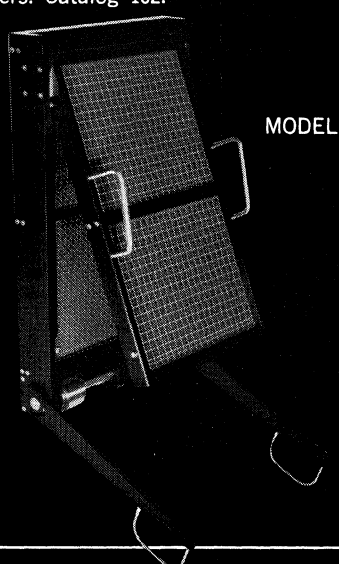
Reliable, economical program control. Taper pin terminations to external equipment. Removable plugboards patched with manual or fixed (semi-permanent) plugwires. 200 to 5120 gold or nickel plated contact positions mounted in phenolic or diallyl phthalate insulation. Catalog 101.



MODEL 908

SERIES 140
PLUGBOARD PROGRAMMING SYSTEMS

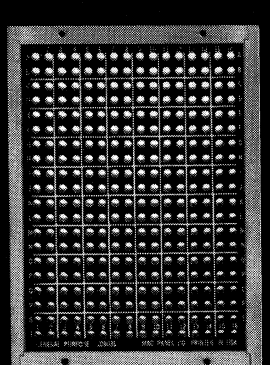
Extremely strong and compact removable plugboard programming systems. Termination choice of taper pin, Tab-D-Tent, or wrap terminals. Manual and fixed plugwires are available. 240 to 5120 gold or nickel plated contact positions mounted in phenolic or diallyl phthalate insulation on 0.250 x 0.250″ centers. Catalog 102.



MODEL 939

FIXED PLUGBOARD SYSTEMS

Used where program change requirements do not dictate the use of removable plugboard systems. 200 to 1280 contact positions with options as above. Catalog 101.



MODEL 803

All necessary plugwires, hardware, accessories and tooling are available for MAC Programming systems.

See your MAC representative or write for catalog data and specifications.

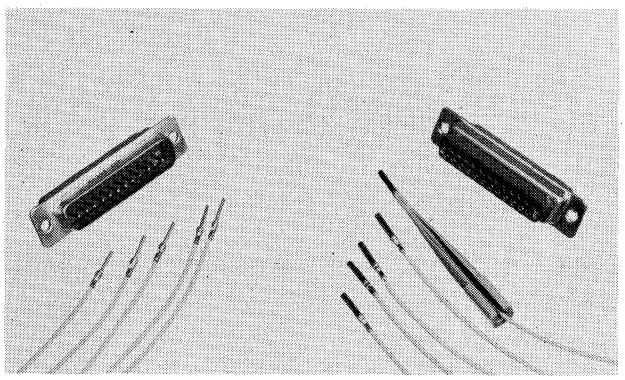
MATRIX D SUB-MINIATURE RACK & PANEL CONNECTORS TO MIL-C-24308



Matrix MD series general purpose connectors are used in applications where small size, light weight and reliability are demanded. They feature size 20 crimp contacts* that are inserted from the rear, released from the rear, and removed from the rear. They meet the specifications of MIL-C-24308.

The gold-plated Matrix MD contacts may be crimped to wire sizes 20, 22 or 24 with standard MS tools, and are quickly and easily inserted into correct position. They are held in position by high strength self-locking retainers, and are simply released from the rear with a non-conductive plastic tool which cannot damage the contact retainer.

The insulators in the Matrix MD series are of glass filled diallyl phthalate for highest mechanical and electrical strength. The socket contact apertures are chamfered at the interface to provide fail safe lead-in of pin contacts. Circuit identification is clearly printed in white on the face and rear of each dark green insulator. The yellow chromate finished cadmium plated steel shells incorporate mounting ears, and provide keystone polarization for each of the models.

**Matrix MD 308 crimp contacts conform to the dimensional and materials requirements of MS 18281, and may be used with other* MIL-C-24308 connectors. These contacts may be purchased separately from Matrix Science in production quantities.*

FEATURES OF THE MD 308

1. Crimp or Solder Contacts
2. Standard or Float Mounts
3. The Most Superior Solder Socket Design Available
4. Non-Magnetic Shells
5. Intermateable and Intermountable With Existing D Subminiature Connectors Per MIL-C-24308
6. Shell Sizes Of 9, 15, 25, 37, 50
7. Instant Delivery
8. A Nationwide Stocking Distributor Program

PERFORMANCE SPECIFICATIONS:

VOLTAGE RATING
Sea Level: 1,000 VAC
At 70,000 Feet: 325 VAC

CURRENT RATING
Size 20 contacts: 7.5 amperes, max.

CONTACT RETENTION STRENGTH
Contact will not pull out upon application of 10 pounds force in the direction of mating forces.

CONTACT DURABILITY
No mechanical or electrical defects harmful to the operation of the connector after 500 cycles of engagement and disengagement, per MIL-C-24308, Para. 3.5.10.

CONTACT ENGAGEMENT & SEPARATION FORCE
Minimum: .50 ounces (with minimum dia. pin)
Maximum: 12.0 ounces (with minimum dia. pin)

OPERATING TEMPERATURE RANGE
—67°F to 257°F

VIBRATION RESISTANCE
No interruption of electrical continuity longer than 1 microsecond. Per MIL-STD 202, method 204, condition D.

PHYSICAL SHOCK RESISTANCE
No damage or interruption of electrical conductivity longer than 1 microsecond. Per MIL-STD 202, method 213, condition G.

Matrix part number: 6500-017-20

MINI-MATE SUBMINIATURE ELECTRICAL CONNECTORS

MINI-MATE ASSEMBLY TOOLS
Contact insertion tool, model 90-0001-022
Contact removal tool, model 90-0002-022

FEATURES:

- ☐ Shortest and lightest subminiature connector available in today's market.
- ☐ Up to 85, low millivolt drop, removable crimp contacts on .080" centers in ⅓ the space and with ¼ the weight of miniature types.
- ☐ Simple, reliable assembly
  - Rear insertion of contacts
  - Front release
  - Rear removal
- ☐ Positive lock bayonet coupling.
- ☐ Low Engagement force.
- ☐ Electrical contact after only .020" penetration.
- ☐ Probe proof closed entry sockets.
- ☐ High performance silicone grommets and interfacial seals for environmental immunity.
- ☐ 5 key polarization.
- ☐ Hard chrome or black anodize finish.
- ☐ Uses standard crimp tool (MS-3191).
- ☐ Meets or exceeds applicable sections of MIL-C-26482, MIL-C-81511, MIL-C-38999 and NAS-1599.
- ☐ Receptacles available with glass dielectrics for hermetically sealed applications.

MATRIX TERMINAL JUNCTION SYSTEMS DESIGNED TO MIL-T-81714

THE MATRIX MODULE

The Matrix Module is the basis of a new generation of interconnection system components introduced by Matrix Science Corporation in 1963. The device is the key element in a method of interconnecting an unlimited number of wires. The basic unit of a now large group of connection devices using the same concept is the MATRIX TERMINAL BLOCK. The Terminal Block was the first of these modular devices and its fundamental concepts have been used in most products now available. It is a female contact socket housed in a plastic body which incorporates a self locking retainer to hold the male member solidly in place. This device features "closed entry."

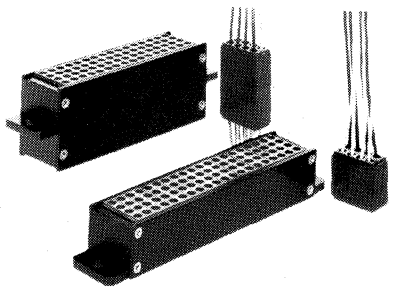
When the male contact is pushed into position with a non-conductive tool, this action produces the vitally important wiping action between male and female socket contact surfaces which improves connection integrity.

A further step to protect the environmental immunity of the connection is afforded by the addition of resilient sealing glands around all wire entries. This is an optional part of most Matrix Modules.

The first Terminal Block had eight female contacts which were all connected to a common bus plate. Split-bus units followed to provide a variety of common connection patterns within a single block.

A logical progression of product development provided means by which the Terminal Blocks became modules of multi-unit assemblies. Any number may be combined to provide connection and interconnection for an unlimited number of wires.

The apparent advantages of the Terminal Block method of making connections are in weight and space savings, plus connections that are inherently more reliable than open connections tied to terminal strips and similar devices. The most important improvement, though, is a marked increase in design and application flexibility early users found in their change to this simplified interconnection method. Because the wire termination employed requires tooling and procedures identical to those for connector pins and sockets, and because the termination can be attached to a broad range of wire sizes, the Matrix Module has been found to provide a fully compatible interconnection system.



GENERAL DESCRIPTION
TERMINAL BLOCKS, FEEDTHRU BLOCKS AND PROGRAMMING BLOCKS

Terminal Blocks — Matrix Terminal Blocks are used for general purpose interconnection and bussing. They are available in four sizes, the larger of which accommodates AWG 12 thru AWG 14 wires, and smaller sizes with which wires AWG 16 thru 26 may be used. Aluminum rails and end brackets with alpha coding for each connection point are used to mount the blocks and form multi-block assemblies.

Feedthru Blocks — Matrix Feedthru Blocks are for general purpose interconnection and bussing in applications where circuit wiring must be connected to two sides of a panel, bulkhead or patchboard. The same crimp-type male contacts used for wire termination and connection to Terminal Blocks are used for Feedthru Blocks as well as the Programming Blocks shown below. Aluminum rails and end brackets with alpha coding are used for mounting these modules, and for forming multi-block assemblies.

Programming Blocks — Matrix Programming Blocks are feedthru blocks whose connection points on one end do not include the self-locking retainers used in the other blocks. Male contacts may be plugged-in and removed from these points without tools while connections at opposing points on the blocks remain locked in place. These blocks are used in patch-boarding and similar applications (MTB Series only).

mueller clips

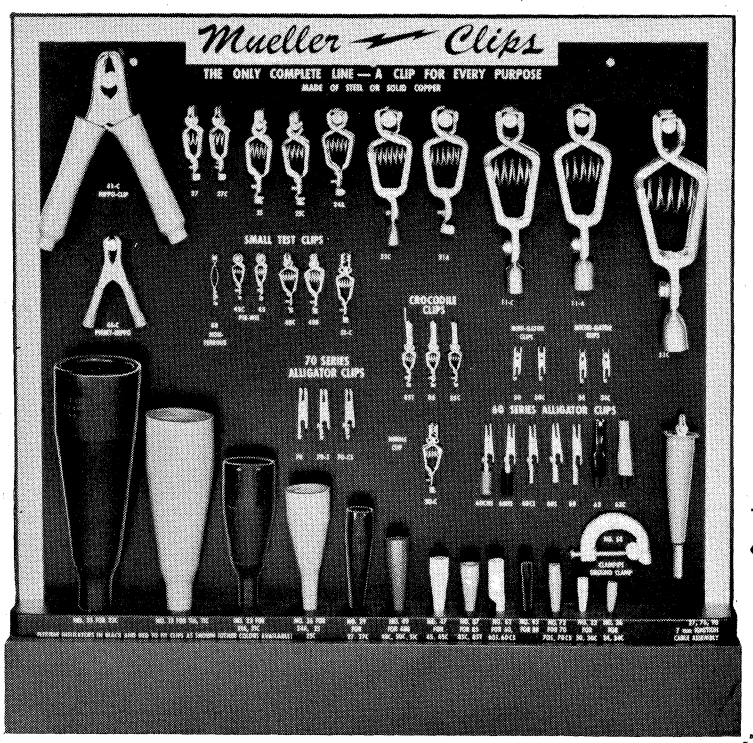
THE WORLD'S LARGEST AND ONLY COMPLETE LINE

MANUFACTURED FOR GENERAL SALE SINCE 1908

• AVAILABLE AT JOBBERS EVERYWHERE •

"WE BEGIN WHERE THE WIRE ENDS"

(For detailed information, refer to the Mueller Clip pages in the "Radio Electronic Master.")



IN UNIVERSAL USE FOR ALL KINDS OF QUICK, TEMPORARY ELECTRICAL CONNECTIONS. PLATED STEEL AND SOLID COPPER. INSULATORS IN STANDARD RED AND BLACK, AND IN SPECIAL COLORS — WHITE, BLUE, YELLOW AND GREEN.

"Mini-gator" and "Micro-gator" clips to fit the smallest crevices in tightly compacted equipment. Separate insulators for skin-tight, complete insulation.

Alligator Clips, including completely insulated model.

Crocodile Clips. (Nesting teeth.)

"Pee Wee" Clips, including completely non-ferrous type.

General purpose test clips with meshing teeth.

Needle Clips — Twin Clip — Geophone Clips.

Clips for Battery Booster Cables and Chargers.

Heavy duty Test and Battery Clips.

Large welding ground clamps.

Appliance ground clamps.

Separate flexible insulators.

NO. 123 DISPLAY-SELECTOR BOARD, a permanent, gloss-finish board of our entire line. Shipped complete, set up, with items in place over their printed code numbers. We absorb much of the cost, charging only $10.00 net postpaid in order to provide a unit which solves all quick-testing and clip-terminal problems for engineering and design departments, manufacturers and laboratories. Order direct from factory.

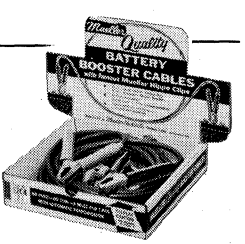
QUALITY BATTERY BOOSTER CABLES . . .



Heavy duty design for the commercial or industrial user who knows what he wants. Finely stranded pure copper cable with rubber insulation for maximum flexibility in coldest weather. 6 ga. 259 strands #30 wire, 4 ga. 413 strands #30. Mueller Hippo-Clips strongly clinched to cable and soldered for maximum current flow. Three models: 8' and 12' 6 ga. 100 amp.; 12' 4 ga. 200 amp.

Our Reader Service Department will answer your technical questions, and will honor your request for the latest catalog of our complete line.

FREE SAMPLE CLIPS AVAILABLE

Factory will supply free sample clips for your inspection. Refer to complete listing in "Radio Electronic Master."

Telephone: PRospect 1-5225 (Area Code 216)

That's right. It's a commercial connector.
Our Molex Standard. Millions are finding their way into some of the most exciting circuitry man can imagine. For that's our business: creating connectors that simplify wiring. Speed production. Assembly. Installation. Servicing.
For the men who are looking for new ideas and ways to cut costs.
In the area of one circuit to sixty connections or more, Molex has the product. And the design and engineering capabilities to solve the most complex wiring and production problems . . . fast! We'd like to talk to you about it.
If you would like a free sample of our Molex connector, please write or phone (312) 969-4550. You can make connections at . . .
molex

MOLEX PRODUCTS COMPANY
Downers Grove, Illinois 60615

They're new, Molex edge connectors.
For printed circuit boards. Terminals crimped
to wires automatically. We have straight-in and
right-angle types. With and without mounting ears.
It's another giant step by Molex in helping create
high-speed, low-cost devices that simplify circuitry.
Reliable? You bet. The connector has bifurcated
terminals that provide solid contacts. Yet you can
slip the connector on and off many times without
damaging printed circuits. And it's not
a preloaded unit. Carries only contacts
required. From nine to twenty-two.
If you want to save assembly time, steps and money,
take a close look at this new Molex edge connector.
For free samples, write or you can make connections
by calling (312) 969-4550.

We call it INCONECT®. Our new Molex modular system that provides five ways of interconnecting electrical-electronic printed circuit assemblies: Two ways to connect circuit boards to chassis, three ways to interconnect printed circuit boards. It's a giant step forward in helping speed production and assembly techniques in the area of printed circuits. Unique flexibility enables you to tailor connector components to your specific product needs. Easily. Simplifies assembly, testing, servicing and model change requirements. It's another example of the Molex creative approach to circuitry problems. One that demonstrates just how reliable and economical printed circuit connections can really be. But see for yourself. Write for details. Or you can make connections by calling (312) 969-4550.

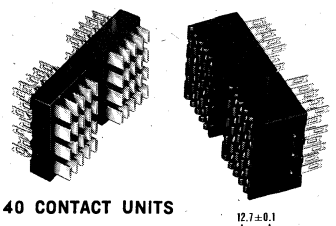
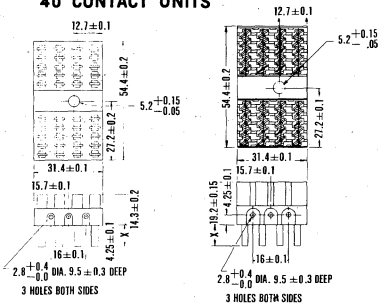
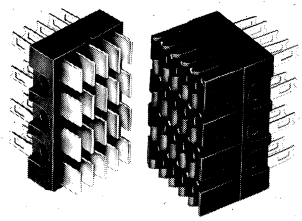
CONNECTORS — MULTI-CONTACT—MULTI-PURPOSE

BASIC CONNECTORS—MODULE UNITS

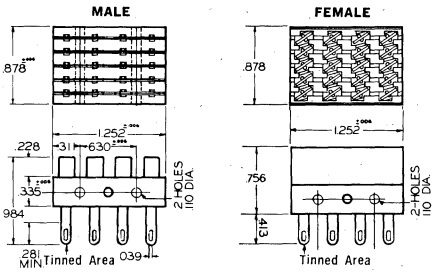


40 CONTACT UNITS





20 CONTACT UNITS



SPECIFICATIONS

Ambient Temperature Range — −55°C to +85°C.

Insulation Resistance — Greater than 5 x 10^5 megohms at 500 V.D.C. conductor to frame and between conductors with a 35% relative humidity at 25°C.

Dielectric Strength — Measured between conducting parts and frame, breakdown voltage is in excess of 2000 volts R.M.S. when measured for one minute at sea level.

Contact Resistance — Measured between soldering points, average resistance is 14 milliohms (silver) 7 milliohms (gold), measured with an open circuit voltage of .100 volts and a short circuit current of .100 Amperes D.C.

Contact Rating — Measured on a single contact basis with contact in rest position, the current rating is three (3) amperes. When several adjacent contacts are required to carry the same maximum load, current rating should be reduced to two amperes (2) per contact. Maximum permissible circuit breaking current on each contact is 500 millamperes at 48 V.D.C.

Mechanical Life — Standard connector unit withstands 4000 plug-in operations with negligible mechanical wear.

Finish — On all metal parts, where practical zinc plate, chromate to MIL-F-14072 is used, to ensure maximum resistance to corrosion.

Size — See specifications on next page. Weight 1 lb. (100 pin connector, plug and receptacle).

Capacitance — Measured between contacts and frame, 3.2 PF average at 1 kilocycle.

Contact Pressure — 250 grams (average).

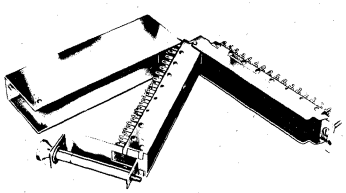
Initial Engagement Force — 70 grams per individual contact (approx.).

Retention Force — 50 grams per individual contact measured by straight pull test.

Terminals — Available with solder to taper tab terminals in mill-tinned Nickel Silver or Gold Plated Nickel Silver.

TYPE D & E CONNECTORS

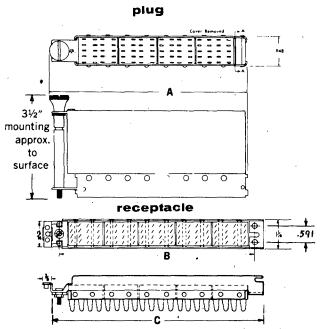
These compact and highly efficient plug and receptacle type connectors are designed for electronic applications of cable-to-fixture to provide maximum connection concentration in minimum space. They are available in 40, 60, 80 and 100 contact assemblies with either solder or taper tab terminals. A permanent cable clamp is adjustable to accommodate varied cable sizes.



TYPE D CONNECTORS

This connector features a handy locking bolt for securing the plug to the receptacle and a removable cover with captive screw for rapid wiring or inspection.

dimensions type D



CONNECTOR	DIM A	DIM B	DIM C

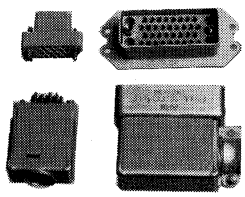
A subsidiary of United Utilities, Incorporated

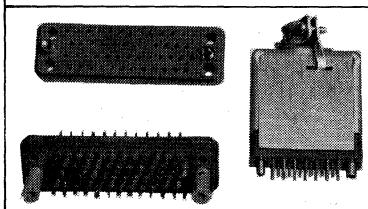
RACK and PANEL CONNECTORS

For QUICK REACTION to your connector needs, come to POSITRONIC INDUSTRIES. Military and Industrial quality Rack and Panel connectors readily available as standard catalog products. Any catalog listed connector may be promptly modified for our customer's special applications. Most cataloged connectors shipped within 10 days. Special connectors will be designed and shipped 21 to 90 days after design approval.



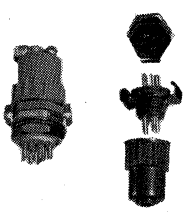
RECTANGULAR REMOVABLE CONTACTS

Mil-C-22857, 14, 18, 20, 26, 34, 50, 66, 75 and 104 contacts. Crimp and solder contacts for #16 through #24 AWG wire. Hoods, shells, guide pins, sockets and polarizing jackscrews available. DAP molded connector bodies.



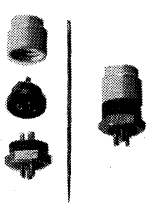
MINIATURE RECTANGULAR

Mil-C-8384, 7 to 50 contacts. Guide pilots, sockets, hoods, shells, and screw locks standard accessories. Solder pot #20 AWG wire contacts. MME and DAP moldings.



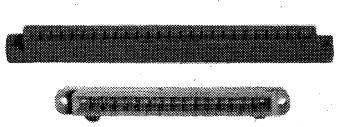
MINIATURE HEXAGONAL

Mil-C-8384, 4 to 9 solder pot contacts #20 AWG wire. Threaded bodies 3/8-24, 1/2-20 in MME and DAP. Mounting accessories and hoods available.



SUBMINIATURE HEXAGONAL

2 and 3 solder pot contacts #24 AWG wire. 1/4-20 threaded body in MME and DAP. Hood and mounting accessories available. 5/16 Hex dia. length mated connectors including hood 5/8 max.



PRINTED WIRING & TEST POINT

6, 8, 10, 12, 15, 18, 22, 25 contacts, tuning fork, .156 and .150 spacing. 1/16 thick boards. MME and DAP bodies.

Free 32 page Handbook of Standard Connectors containing complete electrical and physical data of our connectors is available upon request.

POMONA ELECTRONICS

¾" SPACED MOLDED BANANA PLUGS

Pomona Banana Plug and stack-up accessories are of the highest quality — tough thermoplastic — molded directly on to the metal body of plugs and connectors for maximum strength, moisture resistance and insulative properties:

General Specifications listed below apply to items using banana plugs in this catalog.

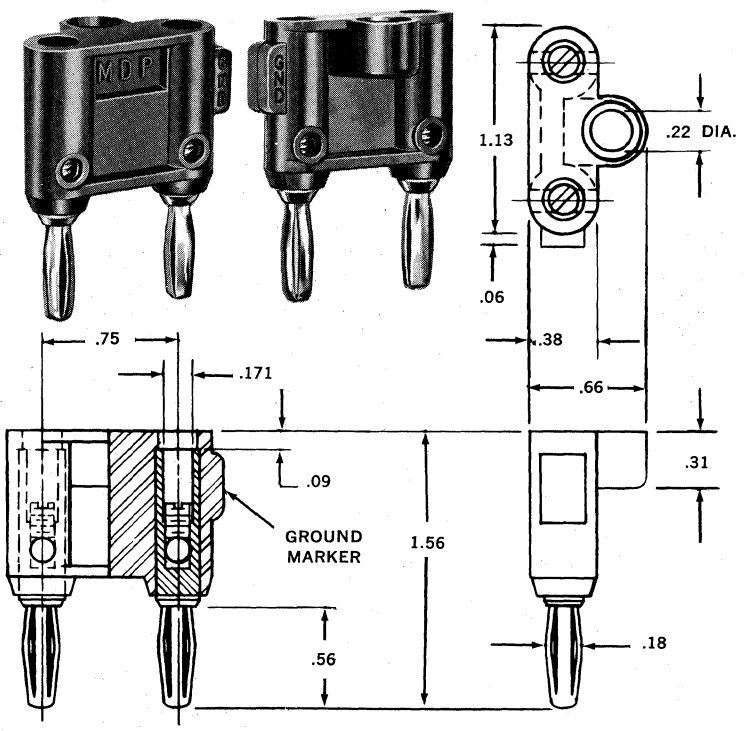
FEATURES . . .

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- STACK-UP feature allows an unlimited number of connections at the same electrical point.

SPECIFICATIONS . . .

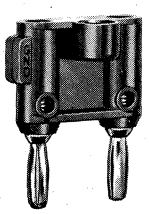
- Fits standard 0.166 dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, Brass per QQ-B-626. Comp. 22.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.

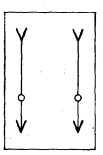
ACTUAL SIZE



RATINGS	Models: MDP; MDP-ST; 1330; 1330-ST; 2970
■ Capacity :	0.8 pf to 10 MC
■ Current :	15 Amps. Cont., 30 Amps. Int.
■ Voltage :	5000 W.V. D.C.
■ Temperature :	—25°C to +85°C, operating temp.

DOUBLE BANANA PLUG



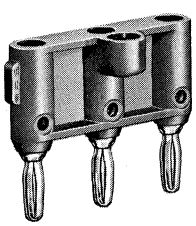


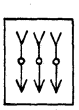
Double banana plug on ¾" centers; set screws secure leads; simplifies cable construction or component mounting; banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL MDP (Specify Color) QUANTITY DISC. CODE **A** **NET .75**

TRIPLE BANANA PLUG



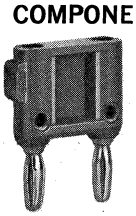


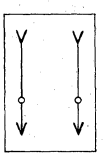
Triple banana plug on ¾" centers; set screws secure leads. Ideal for balanced line 2 conductor shielded cable assemblies. Banana jacks permit top Stack-up for multiple connections.

COLORS: Black, Red.

MODEL 2970 (Specify Color) QUANTITY DISC. CODE **A** **NET 1.25**

COMPONENT MOUNTING DOUBLE BANANA PLUG



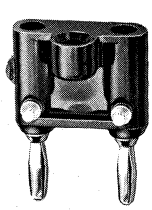


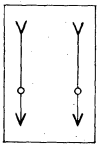
Double banana plug on ¾" centers; set screws secure leads; features recess for mounting small components; banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Red

MODEL 1330 (Specify Color) QUANTITY DISC. CODE **A** **NET .75**

DOUBLE BANANA PLUG WITH SOLDER TURRET TERMINALS



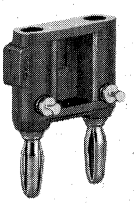


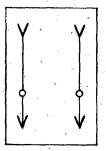
Similar to Model MDP, except has solder turret terminals for permanent noise-free connections of cables and components. Double banana plug on ¾" centers; banana jacks permit top Stack-Up for multiple connections.

COLOR: Black

MODEL MDP-ST QUANTITY DISC. CODE **A** **NET .85**

COMPONENT PLUG WITH SOLDER TURRET TERMINALS





Similar to Model 1330, except has solder turret terminals for permanent noise-free connections of components, etc. Double banana plug on ¾" centers: Banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Red.

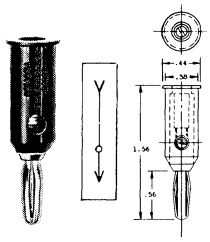
QUANTITY DISC. CODE **A**

MODEL 1330-ST (Specify Color) **NET .85**

POMONA ELECTRONICS

BANANA PLUG ACCESSORIES

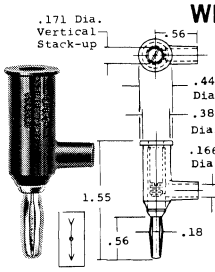
SOLDERLESS BANANA PLUG —STACK-UP



Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, .166 dia.; Brass, nickel plated.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1325 (Specify color) QUANTITY DISC. CODE **A** **NET .50**

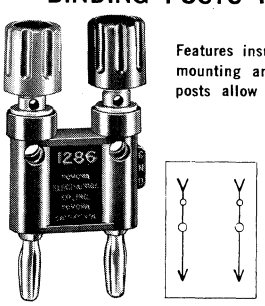
SOLDERLESS BANANA PLUG WITH SAFETY COLLAR —STACK-UP



Features: Integral safety collar insulates exposed wire leads. Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, .166 dia.; Brass, nickel plated.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1825 (Specify Color) QUANTITY DISC. CODE **A** **NET .50**

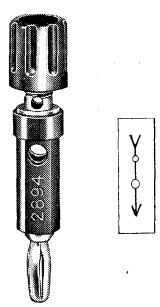
BINDING POSTS TO DOUBLE BANANA PLUG



Features insulated binding posts on ¾" centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated double binding posts, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Double banana plug, on ¾" centers.
COLORS: Body, Black. Binding Posts, Black/Red.

MODEL 1286 QUANTITY DISC. CODE **A** **NET 2.50**

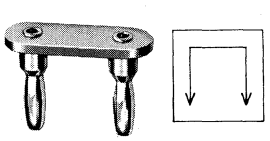
BINDING POST TO SINGLE BANANA PLUG



Features insulated binding post. Binding post allows top Stack-Up for multiple connections. Side Stack-Up provided by thru-hole in plug body.
UPPER: Insulated binding post. Cross hole (.166 dia.) in body provides side Stack-Up connections.
LOWER: Single banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Red.

MODEL 2894 (Specify color) QUANTITY DISC. CODE **A** **NET 1.50**

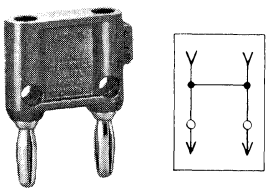
METAL SHORTING BAR



Low profile, nickel plated brass shorting bar. Double banana plugs on ¾" centers swaged to 3/32" thick brass bar. Resistance, less than 1.5 milliohms installed. Current rating: 15 Amps. Cont., 30 Amps. Int.

MODEL 1855 QUANTITY DISC. CODE **A** **NET .75**

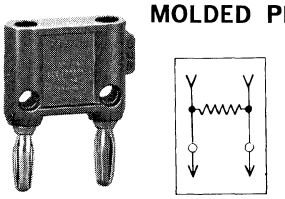
INSULATED SHORTING BAR



Ideal as a connecting link for use with ¾" spaced banana jacks. Banana plugs internally solder-bonded with #14 AWG wire. Banana jacks provide top Stack-Up. Cross holes (.166 dia.) in body provide side Stack-Up connections. Resistance less than 1.5 milliohms installed. Current rating 15 Amps. Cont., 30 Amps. Int. "Shorting Bar" marked on top of plug.
COLORS: Natural, Black, Red.

MODEL MDP-S (Specify Color) QUANTITY DISC. CODE **A** **NET 1.25**

MOLDED PRECISION RESISTOR

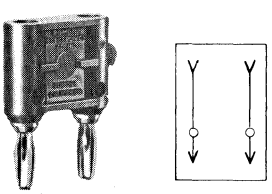


Ideal where rapid interchange of resistance values is required. Used in breadboarding, R & D labs., Standards, Terminations, etc. Deposited carbon 1% resistor, ½ watt, molded internally. Resistor soldered to double banana plug, on ¾" centers. Top Stack-Up provided for multiple connections. Cross holes (.166 dia.) in body provide side Stack-Up connections. Resistance value stamped on top of plug.

(OHMS)				
50	200	1K	100K	1 Meg.
75	250	5K	200K	2 Meg.
120	500	10K	250K	5 Meg.
130	600	20K	500K	10 Meg.
150	900	50K		

MODEL MDP-R (Specify Value) QUANTITY DISC. CODE **A** **NET 2.75**

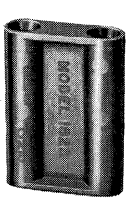
ADAPTER — .080 TIP JACKS TO DOUBLE BANANA PLUG



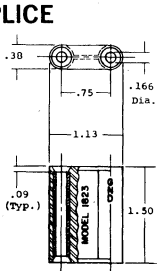
Permits .080 Tip plugs to be used with equipment having banana jacks.
UPPER: Tip jacks, beryllium copper, gold flashed; spaced on ¾" centers to accept .080 dia. pin tip plugs.
LOWER: Double banana plug, on ¾" centers, nickel plated. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1845 QUANTITY DISC. CODE **A** **NET .85**

DOUBLE BANANA PLUG SPLICE

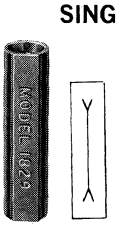


Provides rapid method for splicing cables. Reduces necessity of storing extra long cables. Molded thermo-plastic body eliminates shock hazard by completely enclosing banana plug contact. Brass, nickel plated banana jacks. .166 dia., on ¾" centers.
COLORS: Black, Red.

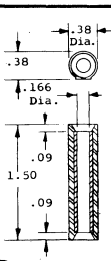


MODEL 1823 (Specify color) QUANTITY DISC. CODE **A** **NET .50**

SINGLE BANANA PLUG SPLICE



Provides rapid method for splicing single banana plug patch cords. Reduces the necessity of storing extra long patch cords. Molded thermo-plastic body eliminates shock hazard by completely enclosing banana plug contact. Brass, nickel plated banana jack, .166 dia.
COLORS: Black, Red.
Standard Package: 10 (per color)

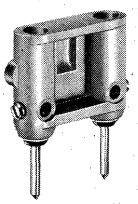


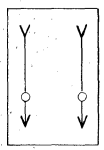
MODEL 1829 (Specify color) QUANTITY DISC. CODE **A** **NET .25 ea.**

POMONA ELECTRONICS

.080 PIN TIP PLUG ACCESSORIES

COMPONENT MOUNTING — TIP JACKS TO DOUBLE PIN TIP PLUG — SET SCREWS

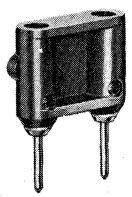


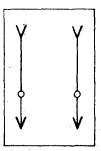


Features set screws on side of body to secure leads or components. Recess permits mounting of small component parts.
UPPER: Tip jacks, beryllium copper, gold flashed, spaced on ¾" centers, to accept .080 dia. pin tip plugs.
LOWER: Pin tips, .080 dia. on ¾" centers. Brass, nickel plated.
COLORS: Black, Red.

MODEL 2192 (Specify color) QUANTITY DISC. CODE **A** **NET 1.85**

COMPONENT MOUNTING PLUG— BANANA JACKS TO DOUBLE PIN TIP —SET SCREWS

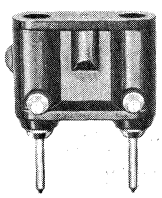


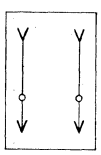


Permits single or double banana plugs to be used in equipment having tip jacks. Features recess for component mounting. Internal set screws firmly secure wire leads.
UPPER: Banana jacks, .166 dia., on ¾" centers. Brass, nickel plated.
LOWER: Pin tips .080 dia. on ¾" centers. Brass, nickel plated.
COLOR: Black.

MODEL 1858 QUANTITY DISC. CODE **A** **NET .75**

PLUG — COMPONENT MOUNTING — DOUBLE PIN TIP PLUG—SOLDER TURRETS

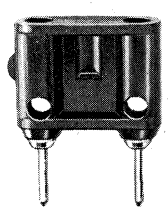


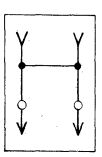


Features recess for mounting components. Gold flashed solder turrent terminals for permanent noise-free connections.
UPPER: Tip jacks, beryllium copper, gold flashed; spaced on ¾" centers to accept .080 dia. pin tip plugs.
LOWER: Pin tips, .080 dia. brass, nickel plated.
COLORS: Black, Red.

MODEL 1904 (Specify color) QUANTITY DISC. CODE **A** **NET .85**

INSULATED SHORTING BAR

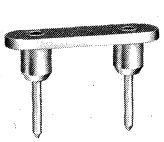


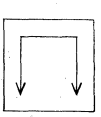


Used as a connecting link with equipment having tip jacks. Plugs internally solder bonded with 14 AWG wire. Top stack-up feature.
Current rating: 5 AMPS. cont., 10 AMPS. int. "Shorting Bar" marked on top of plug.
UPPER: Banana jacks, .166 dia. on ¾" centers. Brass, nickel plated.
LOWER: Pin tips, .080 dia. on ¾" centers. Brass, nickel plated. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLORS: Black, Red.

MODEL 1730 (Specify color) QUANTITY DISC. CODE **A** **NET .75**

METAL SHORTING BAR

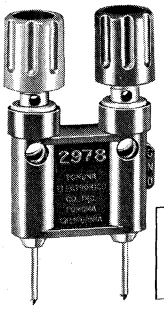


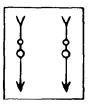


Used as a connecting link with equipment having tip jacks. Low profile, nickel plated brass shorting bar. Double pin tip plugs on ¾" centers swaged to 3/32" thick brass bar.
RESISTANCE: Less than 1.5 milliohms installed.
CURRENT RATING: 5 Amps Cont., 10 Amps Int.

MODEL 2072 QUANTITY DISC. CODE **A** **NET .75**

BINDING POSTS TO DOUBLE PIN TIP PLUG





Features insulated binding posts on ¾" centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated double binding posts on ¾" centers. Top and side stack-up connectors (.166 dia.). Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Pin tips, .080 dia. on ¾" centers. Brass, nickel plated.
COLORS: Body, Black, Binding Posts, Black/Red.

MODEL 2978 QUANTITY DISC. CODE **A** **NET 2.25**

BINDING POST TO SINGLE PIN TIP PLUG

Features insulated binding post. Binding post allows top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated binding post. Top and side Stack-Up connectors (.166 dia.). Cross hole (.166 dia.) in body provide side Stack-Up connections.
LOWER: Pin tip, .080 dia. brass, nickel plated.
COLORS: Black, Red.

MODEL 2953 (Specify color) QUANTITY DISC. CODE **A** **NET 1.35**

SOLDERLESS PIN TIP PLUG—STACK-UP

Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Tip jack, beryllium copper, gold flashed; accepts .080 dia. pin.
LOWER: Pin tip, .080 dia., brass, nickel plated.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1922 (Specify color) QUANTITY DISC. CODE **A** **NET .95**

ADAPTER — BANANA JACK TO PIN TIP

Permits standard single banana plug patch cords to be used with equipment having tip jacks.
UPPER: Banana jack, .166 dia. Brass, nickel plated.
LOWER: Pin tip, .080 dia. Brass, nickel plated. Cross hole (.166 dia.) in body provides side Stack-Up connection.
COLORS: Black, Red.
Standard Package: 10 (per color)

MODEL 1432 (Specify Color) QUANTITY DISC. CODE **A** **NET .15 ea.**

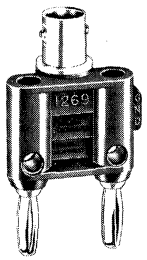
ADAPTER — .080 TIP JACK TO BANANA PLUG

Permits .080 dia. pin tip patch cords to be used with equipment having banana jacks. Insulation molded to plug body.
UPPER: Tip jack, beryllium copper, gold flashed. Accepts .080 dia. pin.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack. Cross hole (.166 dia.) in body provides side Stack-Up connection.
COLORS: Black, Red.

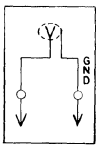
MODEL 1809 (Specify Color) QUANTITY DISC. CODE **A** **NET .75**

POMONA ELECTRONICS

BNC ADAPTERS

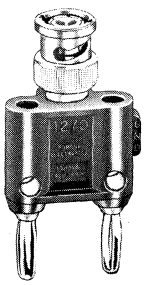


ADAPTER — BNC RECEPTACLE TO DOUBLE BANANA PLUG

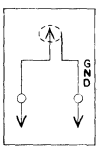


Permits BNC plug to be used with equipment having banana jacks. Excellent for adapting laboratory VTVM, oscilloscopes and signal generator inputs to readily available coaxial cables.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1269 QUANTITY DISC. CODE **A** **NET 2.85**



ADAPTER — BNC PLUG TO DOUBLE BANANA PLUG



Permits BNC receptacle to be used with equipment having banana jacks. Minimizes number of coaxial connections for maximum efficiency.
UPPER: BNC plug.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1270 QUANTITY DISC. CODE **A** **NET 3.85**

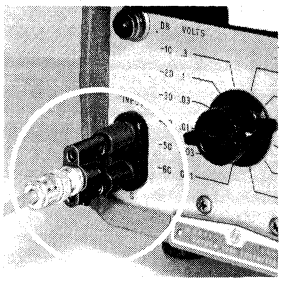
Now! Increase the flexibility of your laboratory with the use of POMONA molded test accessories.

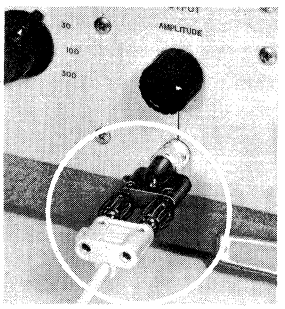
Minimize the necessity of stocking a large quantity and variety of coaxial cables by using POMONA molded adapters.

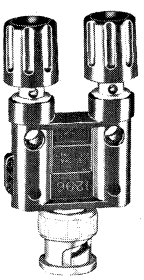
Tough thermo-plastic material molded to plug body or connectors insures maximum strength, moisture resistance and excellent insulative properties.

POMONA ELECTRONICS adapters are designed and engineered with you in mind, from the selection of the best in materials, incorporated with a quality control program that enables us to offer to you, products that are unequalled in reliability and quality.

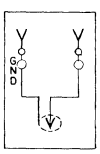
Complete engineering facilities are offered to our customers for special adapter problems that may arise.





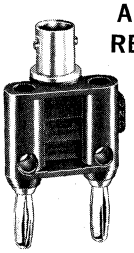


ADAPTER — BINDING POSTS TO BNC PLUG

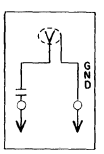


Permits single or double banana plugs to be used with equipment having BNC receptacle. Excellent for use with laboratory oscilloscopes.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: BNC plug.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1296 QUANTITY DISC. CODE **A** **NET 4.85**

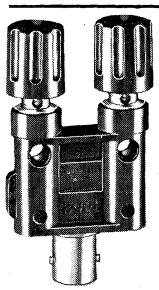


ADAPTER — SIGNAL ISOLATOR — BNC RECEPTACLE TO DOUBLE BANANA PLUG

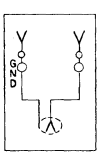


Permits BNC male connector to be used with equipment having banana jacks. General purpose ceramic capacitor molded internally. Rated @ .01 mfd ±20%, 200 WVDC. Insulation resistance 10,000 megohms min. Ideal for isolating DC signals from VTVM inputs and signal generator outputs.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Blue.

MODEL 1868 QUANTITY DISC. CODE **A** **NET 7.85**

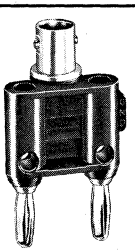


ADAPTER — BINDING POSTS TO BNC RECEPTACLE

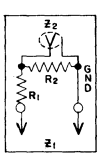


Permits single or double banana plugs to be used with equipment having BNC plug.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: BNC receptacle.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1452 QUANTITY DISC. CODE **A** **NET 4.85**

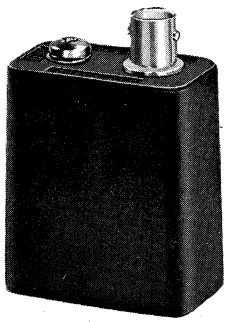


ADAPTER — BNC MATCHING PAD

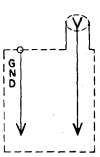


Adapts 600 OHM sources to 50, 75 or 93 OHM cables. Excellent for matching signal generators and VTVM's to standard coaxial cables. Ideal for receiver alignment. Molded in deposited carbon resistors 1%, ¼W.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

MODEL	COLOR	RANGE — OHMS	NET	QUANTITY DISC. CODE
1656-1	Yellow	600 to 50	10.85	A
1656-2	Red	600 to 75	10.85	
1656-3	White	600 to 93	10.85	
1656-4	Blue	300 to 50	10.85	



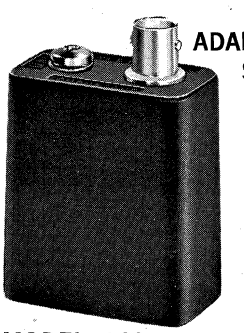
ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA PLUGS



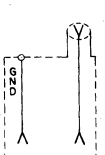
Permits BNC plug to be used with equipment having banana jack binding posts. Black anodized aluminum shield reduces noise Pick-up more than 70 DB. Ideal for low level inputs to oscilloscopes, wave analyzers, etc.
UPPER: BNC receptacle.
LOWER: Shielded double banana plug, on ¾" centers.

QUANTITY DISC. CODE **A**

MODEL 1645 **NET 3.45**



ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA JACKS



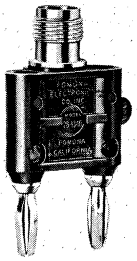
Permits BNC plug to be used with equipment having banana plugs. Black anodized aluminum shield reduces noise pick-up more than 70 DB. Ideal for low level inputs to oscilloscopes, wave analyzers, etc.
UPPER: BNC receptacle.
LOWER: Shielded double banana jacks, on ¾" centers.
COLOR: Black.

QUANTITY DISC. CODE **A** **NET 3.45**

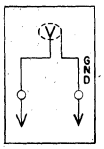
MODEL 1681

POMONA ELECTRONICS

TNC & "N" ADAPTERS



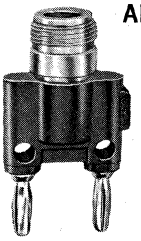
ADAPTER — TNC RECEPTACLE TO DOUBLE BANANA PLUG



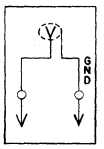
Permits TNC plug to be used with equipment having banana jacks. Perfect for connecting modern control systems to laboratory test equipment.
UPPER: TNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1340

QUANTITY DISC. CODE **A** NET 5.85



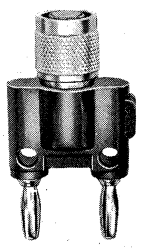
ADAPTER — TYPE "N" RECEPTACLE TO DOUBLE BANANA PLUG



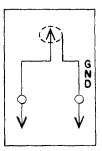
Permits Type "N" plug to be used with equipment having banana jacks. Ideal for connecting R.F. equipment to conventional test equipment.
UPPER: Type "N" receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1740

QUANTITY DISC. CODE **A** NET 5.85



ADAPTER — TNC PLUG TO DOUBLE BANANA PLUG

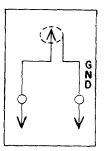


Permits TNC receptacle to be used with equipment having banana jacks. Minimizes your stock of coaxial cables.
UPPER: TNC plug.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1981

QUANTITY DISC. CODE **A** NET 6.85

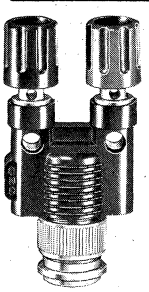
ADAPTER — TYPE "N" PLUG TO DOUBLE BANANA PLUG



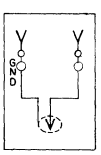
Permits type "N" receptacle to be used with equipment having banana jacks.
UPPER: Type "N" plug.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1770

QUANTITY DISC. CODE **A** NET 5.85



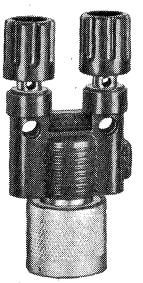
ADAPTER — BINDING POSTS TO TNC PLUG



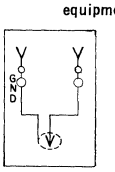
Permits single or double banana plugs to be used with equipment having a TNC receptacle. Exceptional for signal insertion with rapid interchangeability of terminations.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: TNC plug.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1982

QUANTITY DISC. CODE **A** NET 6.85



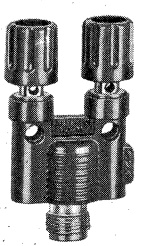
ADAPTER — BINDING POSTS TO TYPE "N" PLUG



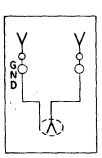
Permits single or double banana plugs to be used with equipment having Type "N" receptacle. Binding posts allow component insertion.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Type "N" plug.
COLOR: Black. Binding Posts: Black/Red.

MODEL 1796

QUANTITY DISC. CODE **A** NET 5.85



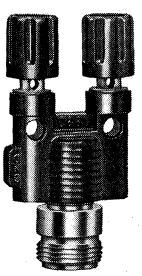
ADAPTER — BINDING POSTS TO TNC RECEPTACLE



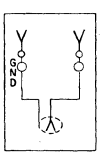
Permits single or double banana plugs to be used with equipment having TNC plug. Useful for rapid interconnection of systems and components.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: TNC receptacle.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1976

QUANTITY DISC. CODE **A** NET 5.85



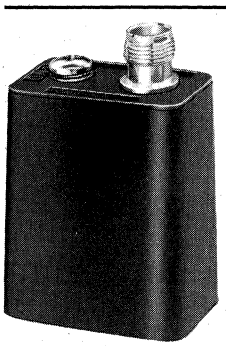
ADAPTER — BINDING POSTS TO TYPE "N" RECEPTACLE



Permits single or double banana plugs to be used with equipment having type "N" plug. Useful for rapid interconnection of systems and components.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Type "N" receptacle.
COLOR: Body, Black. Binding Posts: Black/Red.

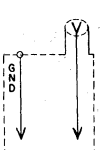
MODEL 1992

QUANTITY DISC. CODE **A** NET 5.85



ADAPTER — TNC RECEPTACLE TO SHIELDED BANANA PLUGS

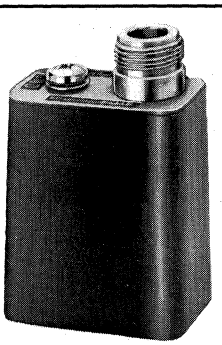
Permits TNC plug to be used with equipment having banana jack binding posts. Black anodized aluminum shield reduces noise pick-up more than 70 DB.



UPPER: TNC receptacle.
LOWER: Double banana plug, on ¾" centers.
COLOR: Black.

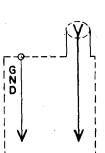
MODEL 1975

QUANTITY DISC. CODE **A** NET 4.85



ADAPTER — TYPE "N" RECEPTACLE TO SHIELDED BANANA PLUGS

Permits type "N" plug to be used with equipment having banana jack binding posts. Black Anodized aluminum shield reduces noise pick-up more than 70 DB.



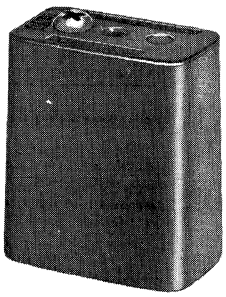
UPPER: Type "N" receptacle.
LOWER: Double banana plug, on ¾" centers.
COLOR: Black.

MODEL 1983

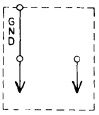
QUANTITY DISC. CODE **A** NET 4.85

POMONA ELECTRONICS

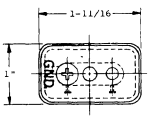
SHIELDED BANANA PLUGS UHF ADAPTERS



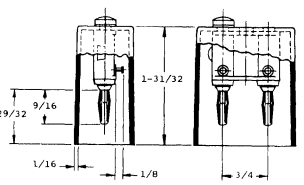
SHIELDED DOUBLE BANANA PLUG IN-LINE CABLE ENTRY



RATED: 15A CONTINUOUS
1200 WVDC
3400 VDC BREAKDOWN
2.5 PF @ 1 MC

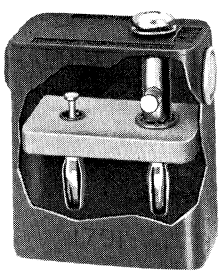


- Shielded double plug ¾" spaced
- Die cast aluminum shell, black anodized
- Noise pick-up reduced 70 DB
- Gold flashed solder turret terminals for positive reliable cable connections
- One piece nickel plated beryllium copper springs for use with standard 0.166 dia. banana jack binding posts.
- Rounded banana spring design results in maximum contact area and minimum contact resistance
- GND clearly molded in shell
- Cable opening, 7/32" diameter



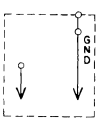
MODEL 1433

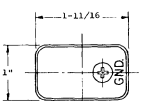
QUANTITY DISC. CODE **A** **NET 2.25**



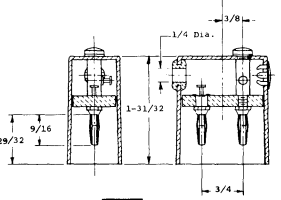
SHIELDED DOUBLE BANANA PLUG RIGHT ANGLE CABLE ENTRY

RATED: 15A CONTINUOUS
2800 PEAK WV
5000 VDC BREAKDOWN
2.0 PF @ 1 MC.





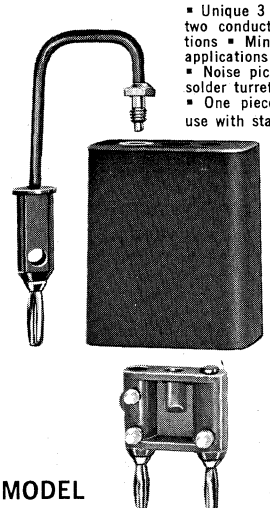
- Shielded double plug, ¾" spaced
- Ceramic insulating base
- Die cast aluminum shell, black anodized
- GND clearly molded in shell
- Noise pick-up reduced 70 DB
- One piece nickel plated beryllium copper springs for use with 0.166 diameter banana jack binding posts.
- Rounded banana spring design results in maximum contact area and minimum contact resistance
- Vinyl grommet and nickel plated snap button supplied



MODEL 1791

QUANTITY DISC. CODE **A** **NET 3.45**

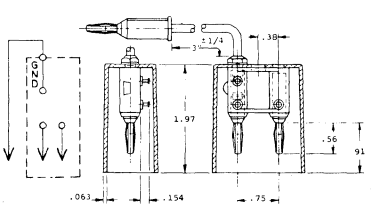
BALANCED LINE SHIELDED DOUBLE BANANA PLUG



- Unique 3 terminal design allows connection to shielded two conductor cable while maintaining balanced conditions
- Minimizes ground loop errors in low signal level applications
- Die cast aluminum shell, black anodized
- Noise pick-up reduced at least 70 DB
- Gold flashed solder turret terminals for reliable noise free connections
- One piece nickel plated beryllium copper springs for use with standard 0.166 dia. banana jack binding posts.

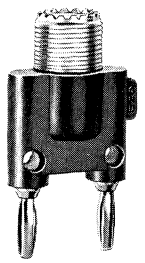
RATED:

15A Continuous	5000 V peak breakdown, line to line
1000 WV Peak; line to shield	2.0 pf @ 1 MC Capacity; line to line
2000 WV peak; line to line	3.0 pf @ 1 MC. capacity; both lines to shield.
2500 V peak breakdown; line to shield	

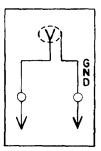


MODEL 1921

QUANTITY DISC. CODE **A** **NET 5.85**



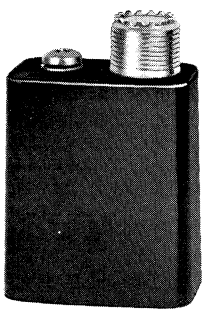
ADAPTER — UHF RECEPTACLE TO DOUBLE BANANA PLUG



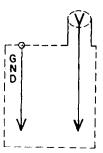
Permits UHF plug to be used with equipment having banana jacks.
UPPER: UHF receptacle, ⅝" dia.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up cannections.
COLOR: Black.

MODEL 1707

QUANTITY DISC. CODE **A** **NET 4.85**



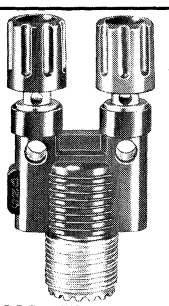
ADAPTER — UHF RECEPTACLE TO SHIELDED BANANA PLUGS



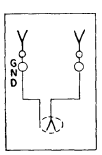
Permits UHF plug to be used with equipment having banana binding posts. Black anodized shield reduces noise pick-up at least 70 DB.
UPPER: UHF receptacle, ⅝" dia.
LOWER: Double banana plug on ¾" centers.
COLOR: Black.

MODEL 1708

QUANTITY DISC. CODE **A** **NET 4.85**



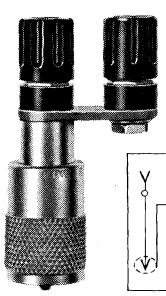
ADAPTER — BINDING POSTS TO UHF RECEPTACLE



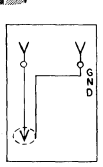
Permits single or double banana plugs to be used with equipment having UHF plug.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: UHF receptacle, ⅝" dia.
COLOR: Body, Black. Binding posts: Black/Red.

MODEL 1792

QUANTITY DISC. CODE **A** **NET 5.85**



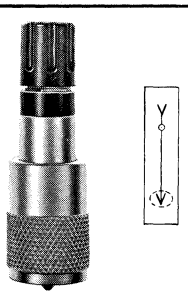
ADAPTER — BINDING POSTS TO UHF PLUG



Permits single or double banana plugs to be used with equipment having a UHF receptacle, ⅝" dia. Convenient for use with modern oscilloscopes. Center conductor binding post Red; Ground, Black.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. jacks.
LOWER: UHF plug.

MODEL 1699

QUANTITY DISC. CODE **A** **NET 4.85**



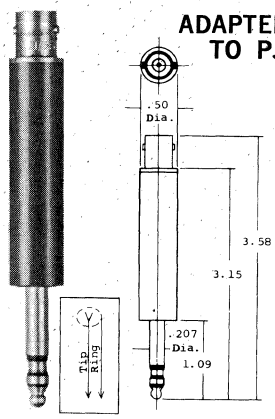
ADAPTER — BINDING POST TO UHF PLUG

Permits single banana plug to be used with equipment having a UHF receptacle, ⅝" dia. Adds flexibility to your oscilloscope.
UPPER: Insulated binding post with .166 dia. banana jack.
LOWER: UHF plug.

MODEL 1698

QUANTITY DISC. CODE **A** **NET 3.85**

ADAPTER — BNC RECEPTACLE TO PJ-068 PHONE PLUG

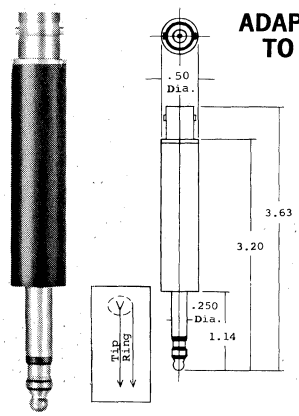


Permits BNC plug to be used with equipment having three circuit phone jacks for .206 dia. phone plugs. Readily adapts equipment to available BNC coaxial cables. Tip connected to inner contact of connector and Ring connected to shell. Sleeve, no connection.

UPPER: BNC receptacle, UG1094/U.
LOWER: Phone Plug, PJ-068.
COLOR: Black.

MODEL 1794 QUANTITY DISC. CODE **A** **NET 6.85**

ADAPTER — BNC RECEPTACLE TO PJ-051* PHONE PLUG

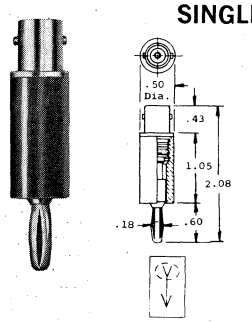


Permits BNC plug to be used with equipment having three circuit phone jacks for .250 dia. phone plugs. Readily adapts equipment to available BNC coaxial cables. Tip connected to inner contact of connector and Ring connected to shell. Sleeve, no connection.

UPPER: BNC receptacle, UG1094/U.
LOWER: Phone Plug, PJ-051*
*PJ-051 Interchangeable with WE 310

MODEL 2798 QUANTITY DISC. CODE **A** **NET 6.85**

ADAPTER — BNC RECEPTACLE TO SINGLE BANANA PLUG

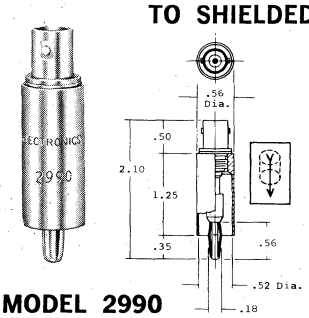


Permits BNC plug to be used with equipment having banana jacks. Inner conductor connected only. Excellent for adapting laboratory VTVM, oscilloscopes and signal generator inputs to readily available coaxial cables.

UPPER: BNC receptacle, UG1094/U.
LOWER: Single Banana Plug.
COLOR: Black.

MODEL 1894 QUANTITY DISC. CODE **A** **NET 2.50**

ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA PLUG

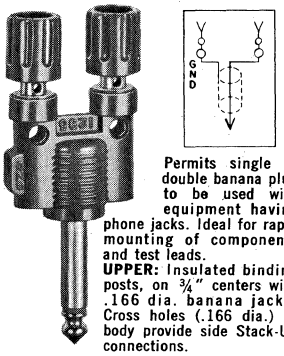


Permits BNC plug to be used with equipment having banana jacks or binding posts. Ideal for use when shielding of single banana jacks is needed. Nickel plated brass shield reduces pick-up more than 70 DB.

UPPER: BNC Receptacle, UG1094/U.
LOWER: Shielded single banana plug.

MODEL 2990 QUANTITY DISC. CODE **A** **NET 2.50**

ADAPTER — BINDING POSTS TO PHONE PLUG



Permits single or double banana plug to be used with equipment having phone jacks. Ideal for rapid mounting of components and test leads.

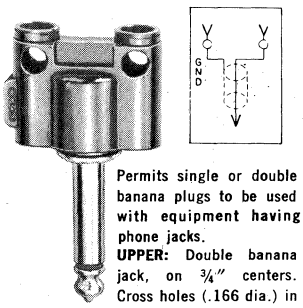
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

LOWER: ¼" dia. phone plug, 1-3/16" long.
COLOR: Body, Black. Binding Posts: Black/Red.

QUANTITY DISC. CODE **A**

MODEL 1285 NET 4.85

ADAPTER — BANANA JACKS TO PHONE PLUG



Permits single or double banana plugs to be used with equipment having phone jacks.

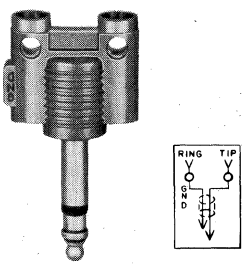
UPPER: Double banana jack, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

LOWER: Standard ¼" dia. phone plug, 1-3/16" long.
COLOR: Black.

QUANTITY DISC. CODE **A**

MODEL 1980 NET 2.85

ADAPTER-BANANA JACKS TO PJ-051* PHONE PLUG

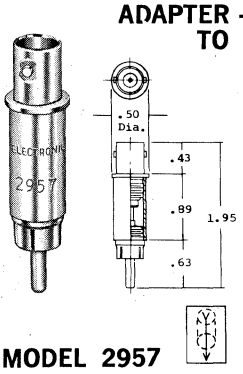


Permits single or double banana plugs to be used with equipment having three circuit phone jacks for .250 dia. phone plugs. Tip connected to hot side of adapter and Ring connected to ground side. Sleeve, no connection.

UPPER: Double banana jack, on ¾" centers. Crossholes (.166 dia.) in body provide side Stack-up connection.
LOWER: Phone Plug, PJ-051*
COLOR: Black
*PJ-051 Interchangeable with WE310

MODEL 2112 QUANTITY DISC. CODE **A** **NET 5.85**

ADAPTER — BNC RECEPTACLE TO PHONO PLUG

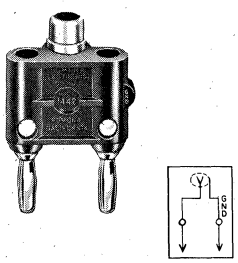


Permits BNC plug to be used with equipment having phono jacks. Readily adapts equipment to available BNC coaxial cables. All metal construction reduces pick-up more than 70 DB. to insure proper shielding.

UPPER: BNC receptacle UG1094/U.
LOWER: Phono plug.

MODEL 2957 QUANTITY DISC. CODE **A** **NET 2.50**

ADAPTER — PHONO JACK TO DOUBLE BANANA PLUG



Permits Phono plug to be used with equipment having banana jacks or binding posts. Quickly converts a cable with a phono plug to a double banana plug.

UPPER: Phono jack.
LOWER: Double Banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide Side Stack-Up connections.
COLOR: Black.

MODEL 1442 QUANTITY DISC. CODE **A** **NET 2.85**

POMONA ELECTRONICS

ISOLATION PLUGS — COMPONENT MOUNTING

CREATE passive and active networks, voltage dividers, isolation networks or attenuators with the Split-Terminal isolation plugs described below.

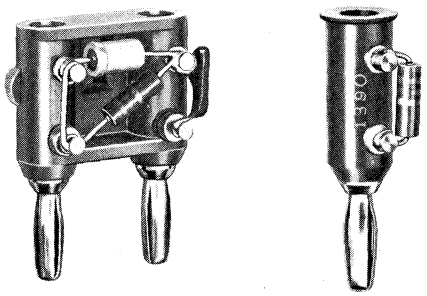
Gold flashed solder turret terminals provide permanent, reliable noise-free connections for component mounting.

Tough thermo-plastic material molded to plug body and connectors insures maximum strength, moisture resistance and excellent insulative properties.

Specifications for MDP-X, 1390, 1837, 1468:

- Fits standard 0.166 dia. banana jack.
- Spring, heat treated beryllium copper alloy 25 per QQ-C-533.
- Plug body, Brass per QQ-B-626 Comp. 22.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.

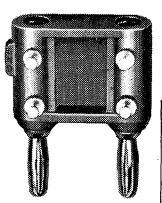
TYPICAL APPLICATION

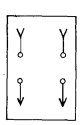


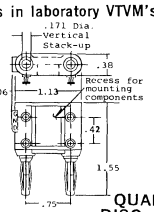
ACTUAL SIZE

MODEL MDP-X **MODEL 1390**

DOUBLE BANANA PLUG, FOUR TERMINAL ISOLATION







Provides four terminal isolation. Top Stack-Up receptacles isolated from lower plugs. Ideal for insertion of matching networks in laboratory VTVM's, signal generators, etc. Gold flashed solder turret terminals for permanent noise-free connections.

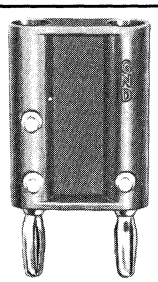
UPPER: Double banana jacks, .166 dia., on ¾" centers.

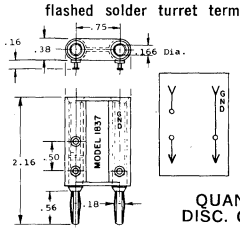
LOWER: Double banana plug on ¾" centers.

COLOR: Red.

MODEL MDP-X QUANTITY DISC. CODE **A** **NET 3.25**

DOUBLE BANANA PLUG, THREE TERMINAL ISOLATION





Provides three terminal isolation. Excellent for "L" and "Pi" networks. Plug and receptacle nickel plated. Gold flashed solder turret terminals for permanent noise-free connections. "Ground" is straight feed-thru. Hot side isolated.

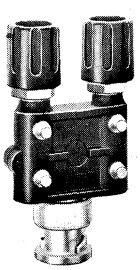
UPPER: Banana jacks, .166 dia. on ¾" centers.

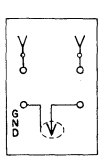
LOWER: Double banana plug on ¾" centers.

COLOR: Blue.

MODEL 1837 QUANTITY DISC. CODE **A** **NET 2.50**

ADAPTER — BINDING POSTS TO BNC PLUG, ISOLATION





Permits single or double banana plugs to be used with equipment having BNC receptacle. Provides isolation for a four terminal network. Binding posts facilitate connections of test leads or additional components. Gold flashed solder turret terminals provide permanent noise-free connections.

UPPER: Insulated binding posts, on ¾" centers with .166 dia. jacks.

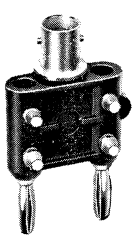
LOWER: BNC plug.

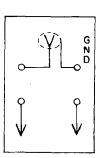
COLOR: Body, Black.

Binding Posts: Black/Red.

MODEL 1469 QUANTITY DISC. CODE **A** **NET 10.85**

ADAPTER — BNC RECEPTACLE TO DOUBLE BANANA PLUG, ISOLATION





Permits BNC plug to be used with equipment having banana jacks. Provides isolation for a four terminal network. Excellent for matching pad networks. Gold flashed solder turret terminals for permanent noise-free connnections.

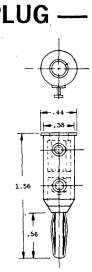
UPPER: BNC receptacle.

LOWER: Double banana plug, on ¾" centers.

COLOR: Black.

MODEL 1468 QUANTITY DISC. CODE **A** **NET 9.85**

PLUG — SINGLE BANANA, ISOLATION



Provides two terminal isolation. Top Stack-Up receptacle is isolated from lower plug to permit addition of series resistors, diodes, etc. Ideal for computers, lab. circuit design and testing. Gold flashed solder turret terminals for permanent noise-free connections.

UPPER: Banana jack, .166 dia.

LOWER: Banana plug.

COLORS: Black, Red.

MODEL 1390 (Specify color) QUANTITY DISC. CODE **A** **NET .95**

PLUG — PIN TIP, ISOLATION

Pin tip jack is isolated from .080 pin tip plug. Provides for addition of series components. Ideal for use with computer boards, lab circuit designs, etc. Gold flashed solder turret terminals for permanent noise-free connections.

UPPER: Tip jack, beryllium copper, gold flashed; accepts .080 dia. pin.

LOWER: Pin tip, .080 dia. Brass, nickel plated.

COLORS: Black Red.

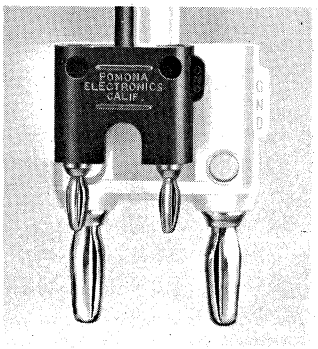
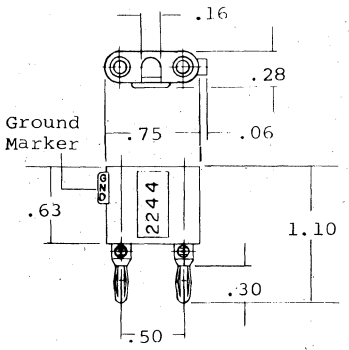
½" SPACED MINIATURE BANANA PLUGS AND ACCESSORIES

ONE-THIRD SMALLER Miniature Banana Plugs, a state-of-the-art development for the ever increasing demand for miniaturized test equipment.

Banana plug springs are precision formed of one-piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug bodies.



ACTUAL SIZE

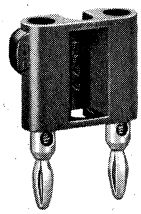


SPECIFICATIONS:

- Fits 0.104 dia. miniature banana jacks.
- Plug body brass, per QQ-B-626, Comp. #22.
- Gold flashed per MIL-G-45204 Type 11 (.00002/.00003).
- Spring, beryllium copper alloy 170 per QQ-C-533.

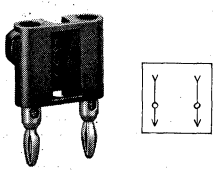
RATINGS:

- Operating temp.: —25°C to +85°C.
- Working voltage: 2500 VDC.
- Current: 5 amps cont., 10 amps. int.



ACTUAL SIZE

MINIATURE—DOUBLE BANANA PLUG WITH SET SCREWS



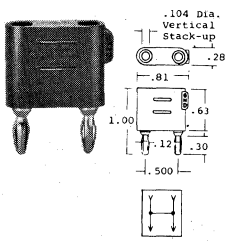
Miniature double banana plug on ½" centers. Internal set screws to secure cable or component leads. .104 dia. banana jacks on ½" centers permit top Stack-Up for multiple connections.

COLORS: Black, Red.

MODEL 2244 Black
MODEL 2244-2 Red

MODEL 2244 QUANTITY DISC. CODE **A** **NET .75**

MINIATURE—DOUBLE BANANA PLUG WITH SHORTING BAR



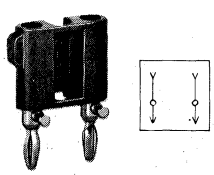
Ideal as a connecting link for use with ½" spaced banana jacks. .104 dia. banana jacks on ½" centers permit top Stack-Up for multiple connections. Banana plugs internally solder-bonded with #18 AWG wire. "Shorting Bar" stamped on plug.

COLORS: Black, Red.

MODEL 2035 Black
MODEL 2035-2 Red

MODEL 2035 QUANTITY DISC. CODE **A** **NET .95**

MINIATURE—DOUBLE BANANA PLUG WITH SOLDER TURRET TERMINALS



Miniature double banana plug on ½" centers. Solder turret terminals for permanent noise-free connections of cables or components. .104 dia. banana jacks on ½" centers permit top Stack-Up for multiple connections.

COLORS: Black, Red

MINIATURE BINDING POSTS
MINIATURE BANANA JACKS

MINIATURE BINDING POSTS

A complete 5-way Binding Post in "Miniature." Captive Thumb Nut and Binding Post Body, machined brass; gold or nickel plated. Thumb Nut and Mounting Base molded of High Impact Polycarbonate Thermoplastic. Heavy Duty Shouldered Ceramic Insulator. Lockwasher and hex nut included, unassembled, nickel plated.

SPECIFICATIONS:

■ 5-way Binding Post ■ Mounts ¼" dia. "D" hole ■ Panels up to 3/16" thick ■ Captive Thumb Nut ■ .082 dia. Cross hole ■ Thumb Nut and Binding Post Body — Gold Flashed per MIL-G-45204 Type 2 OR Nickel Plated per QQ-N-290 Class 2.

RATINGS:

■ Operating Temp.: —65°C to +150°C.
■ Working Voltage: 1500 VDC.
■ Current: 5 Amps Cont., 10 Amps Int.

MINIATURE BANANA JACKS

Developed by the need for miniaturization of test equipment and test panels. The new generation of test jacks. Built to Pomona Electronics high standard of quality.

Wide selection of colors available.

Molded of High Impact Polycarbonate Thermoplastic Banana Jack body, one piece machined brass, gold flashed. Heavy duty shouldered ceramic insulator. Lockwasher and hex nut included, unassembled, nickel plated.

SPECIFICATIONS:

■ Closed entry jack .104 dia. ■ Insulator head molded to body. ■ Mounts in ¼" dia. hole. Model 2142, Panels up to ¼" thick. Model 2143, Panels up to 3/16" thick. ■ Solder turret terminal.

RATINGS:

■ Operating Temp.: —65°C to +150°C.
■ Working Voltage: 1500 VDC.
■ Current: 5 Amps Cont., 10 Amps Int.

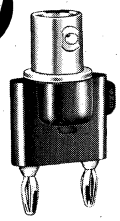
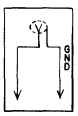
½" SPACED MINIATURE BANANA PLUG ADAPTERS AND ACCESSORIES

NEW ADAPTER — BNC RECEPTACLE TO MINIATURE DOUBLE BANANA PLUG





This adapter allows a BNC plug to be used with equipment having ½" spaced miniature .104 dia. banana jacks. Excellent for adapting test equipment to standard coaxial cables.

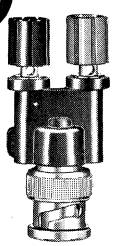
UPPER: BNC receptacle, UG 1094/U.

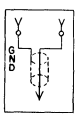
LOWER: Miniature double banana plug on ½" centers, for use with .104 dia. miniature jacks. Gold flashed one piece heat treated beryllium copper springs.

COLOR: Black.

MODEL 3269 QUANTITY DISC. CODE **A** **NET 3.25**

NEW ADAPTER — MINIATURE BINDING POSTS TO BNC PLUG





This adapter converts a BNC receptacle to miniature ½" spaced 5 way binding posts.

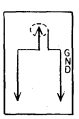
UPPER: Insulated, gold flashed miniature 5 way binding posts on ½" centers with .104 dia. miniature banana jacks.

LOWER: BNC plug.

COLOR: Black.

MODEL 3296 QUANTITY DISC. CODE **A** **NET 4.85**

NEW ADAPTER — BNC PLUG TO MINIATURE DOUBLE BANANA PLUG



Allows a BNC cable jack to be used on equipment having ½" spaced .104 dia. banana jacks.

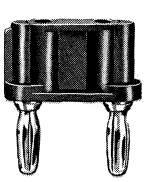
UPPER: BNC plug.

LOWER: Miniature double banana plug on ½" centers, for use with .104 dia. miniature jacks. Gold flashed one piece heat treated beryllium copper springs.

COLOR: Black.

MODEL 3270 QUANTITY DISC. CODE **A** **NET 4.25**

ADAPTER — STANDARD DOUBLE BANANA JACK TO MINIATURE DOUBLE BANANA PLUG



Permits standard double banana plug on ¾" centers to be used with equipment having miniature double banana jacks on ½" centers.

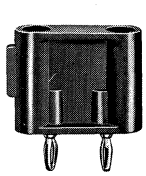
UPPER: Standard double banana jacks .166 dia. on ¾" centers. Brass, nickel plated.

LOWER: Miniature double banana plug on ½" centers. One piece nickel plated beryllium copper spring for use with .104 dia. miniature banana jacks.

COLOR: Black.

MODEL 2952 QUANTITY DISC. CODE **A** **NET .95**

ADAPTER — MINIATURE DOUBLE BANANA JACK TO STANDARD DOUBLE BANANA PLUG



Permits miniature double banana plug on ½" centers to be used with equipment having standard double banana jacks on ¾" centers.

UPPER: Miniature double banana jacks, .104 dia. on ½" centers. Brass, nickel plated.

LOWER: Standard double banana plug on ¾" centers. One piece nickel plated beryllium copper spring for use with .166 dia. standard banana jacks.

COLOR: Black.

MODEL 2943 QUANTITY DISC. CODE **A** **NET .95**

ADAPTER—STANDARD BANANA JACK TO MINIATURE BANANA PLUG

Permits standard banana plug to be used with equipment having miniature banana jacks.

UPPER: Banana jack, .166 dia.; Brass, nickel plated.

LOWER: Miniature banana plug, one piece nickel plated beryllium copper spring for use with .104 dia. miniature banana jacks.

COLORS: Black, Red.

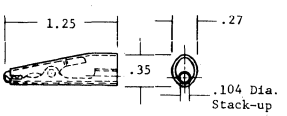
MINIATURE — METAL SHORTING BAR

Low profile, gold flashed, brass shorting bar. Miniature banana plugs on ½" centers swaged to 1/16" thick brass bar. Center hole accepts #4-40 screw for easy removal. Current rating 5 Amps. cont., 10 Amps INT.

MODEL 3030 QUANTITY DISC. CODE **A** **NET .85**

NEW INSULATED MINIGATOR CLIP TO MINIATURE BANANA JACK

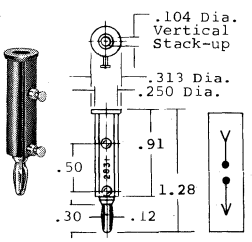


This Minigator clip accepts a miniature banana plug in the rear. Clip is steel, cadmium plated. Pinned hinge construction with full-meshing jaws for small wires. Vinyl insulators (5 red, 5 black). Unassembled.

Standard Package of 10 clips and 10 insulators.

MODEL 3217 QUANTITY DISC. CODE **A** **NET .20 ea.**

MINIATURE — SINGLE BANANA PLUG ISOLATION



Provides two terminal isolation. Allows for addition of series components. Excellent for circuit design and testing. Gold flashed solder turret terminals for permanent noise-free connections.

UPPER: Miniature banana jack, .104 dia. Brass, gold flashed.

LOWER: Miniature banana plug, one piece gold flashed beryllium copper spring.

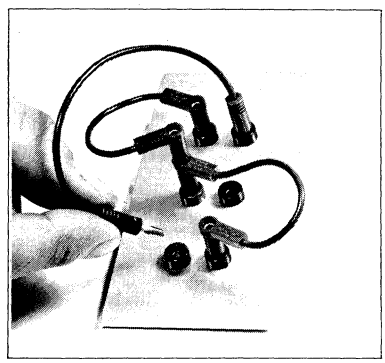
POMONA ELECTRONICS

MINIATURE PATCH CORDS

Miniature patch cords for use with .104 dia. miniature banana jacks. Excellent for miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug body and wire.



FEATURES:

■ Fits .104 dia. miniature banana jacks ■ Plug body brass, per QQ-B-626, Comp. #22 ■ Gold flashed per MIL-G-45204 Type II (.00002/.00003) ■ Spring, one piece heat treated beryllium copper, alloy 170 per QQ-C-533.

SPECIFICATIONS:

■ WIRE: 20 AWG, Strand. 41 x 36 T.C. Extra flexible polyvinyl insulation .087" O.D. ■ RATED: 5 A. Cont., 10 A. Int., 5,000 V.D.C. ■ OPERATING TEMP.: —0°C to +105 C°

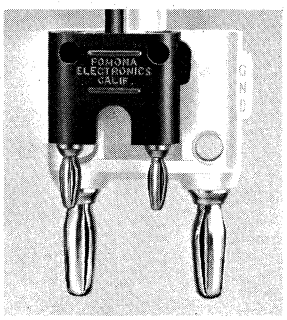
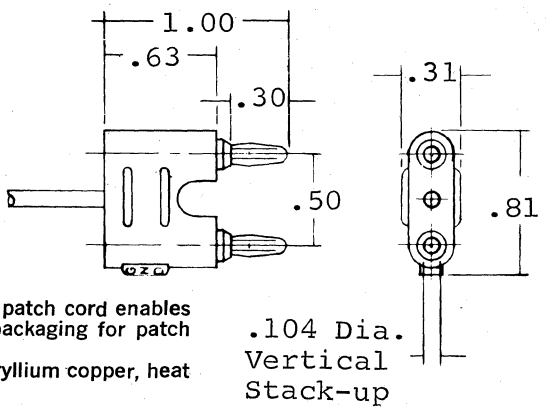
MOLDED MINIATURE DOUBLE BANANA PLUG PATCH CORDS

ACTUAL SIZE





STACK-UP

⅓ smaller...

A miniature double banana plug on ½" centers. This patch cord enables miniaturization of test equipment and high density packaging for patch systems.
Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance.

FEATURES...

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS . . .

- Fits standard 0.104 dia. banana jacks, on ½" centers.
- Spring beryllium copper alloy 170 per QQ-C-533.
- Plug body brass per QQ-B-626, Comp. 22.
- Gold flashed per MIL-G-45204, type II.
